Section 7 of this Act amends the administrative review and suspension provisions contained in Section 6 of FIFRA. A new subsection (3) is added to the section 6(a) of FIFRA. This provision authorizes the Administrator to immediately issue a notice of intent to cancel a pesticide's registrations, or revoke tolerances, if it appears to the Administrator that false, misleading, or inaccurate information has been submitted in support of the registrations or tolerances. If a hearing is held pursuant to the notice, the issues for resolution shall be limited to whether false, misleading, or inaccurate information was submitted to the Administrator. The Administrator is prohibited from cancelling a registration or revoking a tolerance if other valid data has been submitted to the Agency to replace the questionable data. The hearing shall be concluded within 90 days of issuance of the notice, and the Administrator's final decision is required 30 days after completion of the hearing.

Subsection 7(b) of this Act amends section 6(b) of FIFRA. The term "generally" is struck in the provision stating that the Administrator may issue a notice of intent to hold a hearing or cancel a pesticide's regulation because it appears to the Administrator that a pesticide "generally causes unreasonable adverse effects" when used in accordance with widespread and commonly recognized practices. The "will endanger" standard applicable to human health effects is added in the provision discussed previously in this paragraph, with specific mention of potential harm to children permitted to work in areas treated with pesticides. The "may issue a notice of intent . . ." is amended to read "shall issue. . .". The standing of a citizen, company, or public interest group to initiate and participate in a hearing under FIFRA section 6(a) or 6(b) is restored by adding a clause clarifying that a "person adversely affected by the notice" may include pesticide users, pesticide registrants, or a member of the public with or without an economic interest in the terms of the cancellation notice. Subsection 7(c) of this Act restricts the scope of a hearing held to consider data not available to the Administrator either when the registration of a previously cancelled use of a pesticide to cancellation hearing was terminated or when the cancellation decision was issued.

Subsection 7(d) adds a new section entitled "Effect of Cancellation, Suspension, or Withdrawal" of a pesticide registration. When a use or uses of a pesticide have been cancelled, suspended, or voluntarily withdrawn because of health or environmental concerns, such use or uses shall not be eligible for registration under sections 3, 5, or 24(c) of FIFRA, unless there are no alternatives to control new or expanding pest infestation. The Administrator must also have data demonstrating that the pesticide will effectively control the pest infestation.

Subsection 8 of this Act amends the reporting requirements applicable to pesticide applicators as specified in section 11 of FIFRA. The Administrator is authorized to issue regulations requiring commercial applicators to maintain records and file annual reports with the Agency regarding the time, place, quantities, and mixtures of pesticides applied, and any other information the Administrator determines is necessary.

Section 9 repeals the indemnification provisions of FIFRA which require the Administrator to compensate persons who suffer loses as a result of a suspension or cancellation of a pesticide (except for any current cases in which the indemnification procedures have already been initiated).

Section 10 of this Act establishes a private right to sue for damages or equitable relief, or both in the district courts of the U.S. A suit may be brought against a person, company, government agency, or the Administrator. An action may not be commenced under this section against a person or com-

pany, other than the Administrator, prior to sixty days after notice of the alleged violation has been made to the Administrator, the state, and the defendant. An action may also not proceed if the Administrator or state has commenced and is diligently prosecuting a civil or criminal action on the alleged violation. Legal provisions pertaining to the location, timing, and nature of unlawful acts subject to private suits under this section are specified. A court may award the costs of litigation to a prevailing party, other than the U.S. A governor of a state is granted authority to sue the Administrator under this section.

Section 11 of this Act amends the "Imports and Exports" section of FIFRA. The section 17(b) foreign government notification requirement is extended to include cases where a pesticide's registration has been voluntarily withdrawn.

Section 12 of this Act extensively amends the "Emergency Exemption" provision contained in section 18 of FIFRA. The Administrator is authorized to grant an exemption to a state or federal agency from the provisions of FIFRA when such an exemption is necessary to prevent or substantially mitigate an imminent and substantial danger to public health or welfare. An exemption for a use of a pesticide may not be granted if there is an efficacious registered pesticide available to fill the pest control need for which the exemption is sought, or if an alternative pest control technology is available.

Subsection 12(c) of this Act limits the time period for an emergency exemption to one year, and allows for no more than two renewals. The Administrator is required to publish notice in the Federal Register within 10 days of applications for emergency exemptions, and to consider public comments received on the applications, unless the Administrator determines that it is necessary to grant an exemption within 48 hours of receipt of the application because of extraordinary emergency circumstances. The Administrator is further directed to disclose to the public all information contained in an application for an emergency exemption within 30 days of receipt of a request for such information. The Administrator is also required to publish in the Federal Register in a timely manner his decision and the reasons therefor.

Subsection 12(g) of this Act states that in no case may section 18 of FIFRA authorize an unregistered use of a pesticide without the prior approval of the Administrator. In extraordinary emergencies, the Administrator must act on an application for an emergency exemption within 48 hours of receipt.

Section 13 of this Act amends the research and monitoring provisions contained in section 20 of FIFRA. The amendment contains additional specificity regarding the content of the national monitoring plan called for in section 20(b) of FIFRA. The plan shall be proposed by rule not later than June 1, 1984, and effective not later than October 1, 1984. The Administrator is further required to assure the quality of data collected pursuant to the plan, and is authorized to make available the monitoring data to the public in a timely and useful way.

Section 14 of this Act amends Subsection 21(b) of FIFRA requiring that the Administrator "shall", rather than "may, at his discretion", solicit the views of all interested parties on actions taken under this Act.

Section 15 of this Act transfers responsibility for regulating occupational exposure to pesticides to the Occupational Safety and Health Administration.

Section 16 of this Act amends Section 24(b) and (c) of FIFRA pertaining to the authority of States to regulate the sale and use of pesticides. A state is authorized to impose or continue in effect requirements for pesticide labelling or packaging in order to enforce a prohibition on the use of a federally registered pesticide or device in the state. The Administrator must be notified of such requirements, and keep a record of them available for public inspection.

Section 24(c) of FIFRA is amended to refer to "pesticides which are registered under paragraph (5) or 7(A) of section 3(c) . . .", rather than to "federally registered pesticides . . .". The effective date for a registration under section 24(c) is changed to ninety days after the date on which the Administrator is notified by a state of the state's intention to issue the registration, assuming the Administrator does not disapprove the use during the ninety day period. The clause prohibiting the administrator from disapproving a section 24(c) registration on the grounds of a lack of essentiality is eliminated. The Administrator is also authorized to deny a section 24(c) registration if the pesticide use is unnecessary to meet special local needs. The Administrator's discretion to disapprove a special local need registration that is inconsistent with the Federal Food, Drug, and Cosmetic Act is eliminated by changing "may immediately disapprove the registration" to "shall immediately disapprove. . .".

Subsection 16(b)(3)(D) specifies that a rebuttable presumption shall arise that a special local need for a pesticide does not exist if five or more states seek the same pesticide for the same special local need. The discretion of the Administrator to suspend the authority of a state to issue registrations under section 24(c) is eliminated when the Administrator determines a state is not capable of exercising adequate controls to assure that state registrations are granted in accordance with the provisions of FIFRA. This change is brought about by changing "may suspend the authority" to "shall suspend . . ." A new subsection is added stipulating that special local need registrations shall expire after five years, and may be reissued in accord with this subsection.

Section 17 of this Act amends the provisions pertaining to the appointment of members to the Scientific Advisory Panel. The amendment directs the Administrator to appoint the seven panel members from several different disciplines, and to stagger the three year terms so that the terms of no more than three panel members expire in any year.

Subsection 17(b) of this Act establishes a new requirement that the Administrator promulgate within one year regulations concerning the safe use of pesticides. The regulations shall require measures that protect individuals in the vicinity of pesticide applications, including steps to guard against exposure to pesticide drift from aerial applications. Posting areas where pesticides are to be applied, and other warnings are among the protective measures the Administrator should consider.

Section 18 of this Act amends the provisions delegating to states primary responsibility for carrying out programs to enforce FIFRA. States are required to administer an enforcement program "at least as stringent as sections 12 and 25" of FIFRA. This change would allow states to impose enforcement provisions and regulations more stringent than required by federal law. A new subsection (d) is added which grants states two years to adopt an enforcement program responsive to the new requirements and regulations established pursuant to the National Pesticide Hazard Prevention Act.

Section 19 of this Act adds a new section 32 to FIFRA. This section directs the Administrator to collect fees for registration actions under FIFRA. The fees shall be set at a level sufficient to make the pesticide program self-supporting.

Section 20 of this Act introduces another new section to FIFRA addressing the protections governing employees who have commenced actions, testified, or otherwise participated in an enforcement action or complaint under FIFRA. Remedies patterned after employees protection provisions in other statutes are specified, including the right to file and pursue a complaint with the Secretary of Labor.

Section 21 of this Act authorizes the Administrator "to establish and enforce standards for indoor human exposure to pesticides."

Section 22 of this Act contains several changes in the FIFRA statute's table of contents necessitated by the "Federal Insecticide, Fungicide, and Rodenticide Reform Act."

CONGRESSIONAL INTERNS FIND CENTRAL AMERICAN POLICY UNACCEPTABLE

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, 3 weeks ago a group of approximately 40 congressional interns began meeting independently to discuss pressing national issues. Out of deep concern over the increasing U.S. military involvement in Central America, they cooperated in writing a petition urging the President to seek a peaceful and productive solution to the conflict. The petition will be presented to the President next week.

A copy of the petition was presented to me today by two of the interns, Kathleen Dillon and Robin Richardson, in my office. The 150 interns who have already signed this petition are a very diverse group. Additional signatures are expected. They speak as individuals from every area of the country. They have different goals and backgrounds. The group is bipartisan. Yet all agree with the concerns expressed in this petition.

These interns will not leave their concern for Central America on Capitol Hill but will take it with them to their respective college campuses in the fall.

Mr. Speaker, I believe our colleagues would be most interested in the Central America concerns of this large group of interns. Therefore, I am offering a copy of the text of the petition for inclusion in the RECORD following these remarks:

AUGUST 1983.

PRESIDENT REAGAN: During the past few years, the political instability in Central America has raised serious concerns in our country. We, the undersigned Congressional and Government Interns, wish to express our opposition to several of your Administration's actions in Central America:

(1) Increased U.S. military involvement;

(2) U.S. military support of governments that blatantly violate fundamental human rights;

(3) U.S. violation of national and international laws; and

(4) Continuing U.S. efforts to overthrow the Nicaraguan Government.

These actions are increasing the probability of direct U.S. troop involvement in a full-scale regional war.

We believe these actions stem partly from a misguided perception of events in Central America as little more than an outgrowth of the international competition between the United States and the Soviet Union. This overemphasis on the Soviet influence in Central America diverts attention from the history of political and economic oppression which is the principal cause of the current unrest. Moreover, your Administration's policy in Central America is consistent with your actions that increase the disparity of wealth between the rich and poor peoples of the world.

Believing that these policies can only undermine both the interests and ideals of the United States and that negotiations provide the best means to the establishment of peace, democracy and justice in Central America, we therefore present the following petition:

Whereas, the Reagan Administration has violated the Boland Amendment, the Rio Treaty, the O.A.S. Charter, and the U.N. Charter by providing military assistance to groups attempting to overthrow the Nicaraguan Government; and

Whereas, in the past six months the political death toll in El Salvador has risen twelve percent over the previous six month period, to 1,054 deaths, according to the U.S. Embassy estimate, (Tutela Legal, the Salvadoran Catholic Church and Amnesty International document 2,527 deaths or disappearances in the same period, making the total for the last four years more than 38,000); and

Whereas, the U.S. has deployed combat troops in Honduras and three task forces led by the carriers *Ranger, Coral,* and the battleship *New Jersey* off the Nicaraguan coasts; and

Whereas, direct U.S. intervention in the internal conflicts in Latin America has led to the imposition of brutally repressive regimes in those nations (e.g. Nicaragua, 1933; Guatemala, 1954; Chile, 1973);

Therefore, we call for the following actions:

(1) Cease all U.S. military aid to Central America;

(2) End U.S. "covert" destabilization efforts against Nicaragua;

(3) Grant extended voluntary departure status to Central American refugees until they can safely return to their homelands;

(4) Make human rights a priority in the formulation of your policy toward all of the nations of Central America; and

(5) Support the proposals of the Contadora Group.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. WEBER (at the request of Mr. MICHEL), for today, on account of personal reasons.

Mr. STOKES (at the request of Mr. WRIGHT), for today, on account of a necessary absence.

SPECIAL ORDERS GRANTED

By unanimnous consent, permission to address the House following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BATEMAN) to revise and extend their remarks and include extraneous material:)

Mr. FORSYTHE, for 15 minutes, today.

Ms. SNOWE, for 5 minutes, today.

Mr. LEACH of Iowa, for 60 minutes, today.

Mr. PHILIP M. CRANE, for 20 minutes, today.

Mr. FRENZEL, for 30 minutes, today.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous material:)

Ms. OAKAR, for 10 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. TOWNS, for 5 minutes, today.

Mr. LANTOS, for 5 minutes, today.

Mr. CLARKE, for 5 minutes, today.

Mr. CONYERS, for 60 minutes, today.

Mr. ROSTENKOWSKI, for 5 minutes, today.

Mr. FOLEY, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. COYNE, for 5 minutes, today.

Mr. LAFALCE, for 5 minutes, today.

Mr. JONES of Oklahoma, for 5 minutes, today.

Mr. EVANS of Illinois, for 5 minutes, today.

Mr. PENNY, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. PENNY, during the debate on Senate Joint Resolution 149 in the House today.

Mr. OLIN, after discussion on dairy bill.

(The following Members (at the request of Mr. BATEMAN) and to include extraneous matter:)

Mr. ROGERS.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 268. An act to authorize the Secretary of the Interior to construct, operate, and maintain hydroelectric powerplants at various existing water projects, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1015. An act to clear certain impediments to the licensing of the vessel *La Jolie* for employment in the coastwise trade; to the Committee on Merchant Marine and Fisheries.

S. 1148. An act to to provide for the use and distribution of funds awarded the Assiniboine Tribe of the Fort Belknap Indian Community, Montana, and the Assiniboine Tribe of the Fort Peck Indian Reservation, Montana, in docket numbered 10-81L by the United States Court of Claims, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1186. An act to to clear certain impediments to the licensing of the yacht Dad's Pad for employment in the coastwise trade; to the Committee on Merchant Marine and Fisheries.

S. 1365. An act entitled the "Harry Porter Control Tower"; to the Committee on Public Works and Transportation.

S. 1465. An act to designate the Federal Building at Fourth and Ferry Streets, Lafayette, Ind., as the "Charles A. Halleck Federal Building; to the Committee on Public Works and Transportation.

S. 1625. An act to amend the District of Columbia Retirement Reform Act; to the Committee on the District of Columbia.

S. 1689. An act to clear certain impediments to the licensing of the vessel *Endless Summer* for employment in the coastwise trade; to the Committee on Merchant Marine and Fisheries.

S. 1724. An act to designate the Federal Building in Las Cruces, N. Mex., as the "Harold L. Runnels Federal Building"; to the Committee on Public Works and Transportation.

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building"; to the Committee on Public Works and Transportation.

S.J. Res. 136. Joint resolution to recognize "Volunteer Firefighters Recognition Day" as a tribute to the bravery and self-sacrifice of our volunteer firefighters; to the Committee on Post Office and Civil Service.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2355. An act to establish an emergency program of job training assistance for unemployed Korean conflict and Vietnam-era veterans, and for other purposes;

H.R. 3329. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes;

H.R. 3394. An act to provide additional authority for the consolidation of student loans and to make certain other changes in Federal student financial assistance; and

H.R. 3564. An act to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas.

Mr. BROWN of Colorado. Mr. Speaker, I have a privilged motion. I move the House adjourn.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, pursuant to House Concurrent Resolution 153, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore. Pursuant to the provisions of House Concurrent Resolution 153 of the 98th Congress, the House stands adjourned until 12 o'clock meridian, Monday, September 12, 1983.

Thereupon (at 8 o'clock and 20 minutes p.m.), pursuant to House Concurrent Resolution 153, the House adjourned until Monday, September 12, 1983, at 12 o'clock noon.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees concerning the foreign currencies and U.S. dollars utilized by them during the first and second quarters of calendar year 1983 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON APPROPRIATIONS, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN JAN. 1 AND MAR. 31, 1983

Name of member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]
Hon. Robert Livingston	3/25	3/27	Mexico		150.00		169.00		83.39		402.39
	3/27	3/28	Peru		75.00						75.00
	3/28	3/31	Brazil		354.00		(3)				354.00
Hon. Eldon Rudd	3/25	3/26	Mexico		150.00		322.66		83.39		556.05
Committee total					729.00		491.66		166.78		1,387.44

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.
[3] Travel by military aircraft at invitation of Secretary of Treasury.

JAMIE L. WHITTEN, Chairman, July 29, 1983.

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON THE BUDGET, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1 AND JUNE 30, 1983

Name of member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]

EDWARD P. BOLAND, Chairman, July 29, 1983.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1677. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report on the value of property, supplies and commodities provided by the Berlin Magistrate and under German Offset Agreement for the quarter April 1, 1983 through June 30, 1983, pursuant to section 719 of Public Law 97-377; to the Committee on Appropriations.

1678. A letter from the Deputy Assistant Secretary of the Air Force (Logistics and Communications), transmitting notice of plans to study the conversion from inhouse operation to contractor performance of various functions at sundry locations, pursuant to section 502(a) of Public Law 96-342; to the Committee on Armed Services.

1679. A letter from the Acting Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the Army's plans to initiate the study of potential conversions from inhouse operation to commercial contract of various activities at sundry locations, pursuant to section 502(a) of Public Law 96-342; to the Committee on Armed Services.

1680. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the shelf stocking function at the branch commissary store, Patuxent River, Md., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1681. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense articles and services to Lebanon (Transmittal No. 83-57), pursuant to 10 U.S.C. 133b; to the Committee on Armed Services.

1682. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense articles and services to the United Kingdom (Transmittal No. 83-50), pursuant to 10 U.S.C. 133b; to the Committee on Armed Services.

1683. A letter from the Chief of Staff, Defense Mapping Agency, U.S. Naval Observatory, transmitting notice of the Agency's decision to convert the operation of the mail room function at the DMA Hydrographic/Topographic Center, Brookmont, Md., to private contractor performance, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1684. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting the annual report on the operations of the Bank for fiscal year 1982, pursuant to section 9(a) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

1685. A letter from the Secretary of Energy, transmitting a report entitled, "The Domestic Impact of Reliance on Market Forces During a Substantial Petroleum Supply Disruption," pursuant to section 6(a) of Public Law 97-229; to the Committee on Energy and Commerce.

1686. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for the months of April and May, 1983, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

1687. A letter from the Vice President of Government Affairs, National Railroad Passenger Corporation, transmitting a report covering the months of April and May 1983, on the average number of passengers per day on board each train operated, and ontime performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

1688. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles and services to Lebanon (Transmittal No. 83-57), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1689. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles and services to the United Kingdom (Transmittal No. 83-50), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1690. A letter from the Secretary of State, transmitting notice of the President's intention to exercise his authority under section 506(a) of the Foreign Assistance Act of 1961 in order to authorize the furnishing of certain emergency military assistance to Chad, pursuant to sections 506(b)(1) and 652 of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

1691. A letter from the Assistant Secretary of the Treasury (Administration), transmitting notice of a revised records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1692. A letter from the Deputy Administrator, General Services Administration, transmitting a report on a proposed Presidential archival depository to be known as the Carter Presidential Library, pursuant to 44 U.S.C. 2108(a); to the Committee on Government Operations.

1693. A letter from the Acting Assistant Secretary of the Interior for Land and Water Resources, transmitting copy of an application by the Oakdale Irrigation District, Stanislaus County, Calif., for a loan under the Small Reclamation Projects Act, pursuant to section 4(c) of the act, as amended; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITTEN: Committee on Appropriations. Report on subdivision of budget totals for fiscal year 1984, pursuant to section 302 of the Congressional Budget Act of 1974 (Rept. No. 98-349). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ADDABBO (for himself, Mr. ACKERMAN, Mr. BIAGGI, Mr. GARCIA, Mr. HORTON, Mr. LAFALCE, Mr. MCGRATH, Mr. NOWAK, Mr. OTTINGER, Mr. RANGEL, Mr. SCHUMER, Mr. TOWNS, Mr. WORTLEY, Mr. CONYERS, Mr. FAZIO, Mr. HERTEL of Michigan, Mr. LANTOS, Mr. LELAND, Mr. LEVINE of California, Ms. MIKULSKI, Mr. RATCHFORD, Mr. ROE, Mr. SMITH of Florida, and Mr. STOKES):

H.R. 3781. A bill to establish an Interagency Committee on Arson Control to coordinate Federal anti-arson programs, to amend various provisions of the law relating to programs for arson investigation, prevention,

detection and prosecution, and for other purposes; jointly, to the Committees on the Judiciary and Science and Technology.

By Mr. BEREUTER:

H.R. 3782. A bill to amend title 5, United States Code, to provide that not more than nine holidays may be observed by the Federal Government during any calendar year; to the Committee on Post Office and Civil Service.

By Mr. BIAGGI:

H.R. 3783. A bill to clarify the personal injury and death provisions of section 844 of title 18, United States Code, relating to arson; to the Committee on the Judiciary.

By Mrs. BOXER (for herself, Mr. FAZIO, Mr. MILLER of California, Mr. BOSCO, Mr. PRITCHARD, Mr. LELAND, Mr. EVANS of Illinois, Mr. TORRICELLI, Mrs. HALL of Indiana, Mr. OTTINGER, Mr. HARKIN, Mr. MOODY, Mr. MARKEY, and Mr. LEVINE of California):

H.R. 3784. A bill to establish a program to promote military parts procurement cost savings, and for other purposes; jointly to Committees on Small Business Armed Services, and Government Operations.

By Mr. BROOKS:

H.R. 3785. A bill to suspend for 1 year duty on catalytic naphtha; to the Committee on Ways and Means.

Mr. BROWN of California:

H.R. 3786. A bill to authorize a grant to the Willard Frank Libby Foundation for energy and science related research grants, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Science and Technology.

By Mr. BROWN of Colorado:

H.R. 3787. A bill to amend the National Trails System Act by adding the Oregon-California Trail to the study list; to the Committee on Interior and Insular Affairs.

By Mr. BRYANT:

H.R. 3788. A bill to designate various areas as components of National Wilderness Preservation System in the national forests in the State of Texas; to the Committee on Interior and Insular Affairs.

By Mr. DAUB:

H.R. 3789. A bill to provide equitable rules for the tax treatment of fringe benefits; to the Committee on Ways and Means.

By Mr. JONES of Oklahoma (for himself, Mr. CAMPBELL, Mr. MARTIN of North Carolina, Mr. LIVINGSTON, Mr. ANTHONY, Mr. BROWN of Colorado, Mr. MCCURDY, Mr. BARTLETT, Mr. ROEMER, and Mr. SLATTERY):

H.R. 3790. A bill to amend the Internal Revenue Code of 1954 to provide that for calendar years 1985 through 1990 the cost-of-living adjustment for the individual income tax rates and the personal exemption shall take into account only inflation in excess of 2 percent per year and to provide a similar limitation on cost-of-living adjustments in benefits under certain entitlement programs; jointly, to the Committees on Ways and Means and Government Operations.

By Mrs. BURTON of California:

H.R. 3791. A bill to amend title XIX of the Social Security Act to provide for medicaid coverage of acupuncturists' services; to the Committee on Energy and Commerce.

H.R. 3792. A bill to provide benefits under part B of the medicare program with respect to acupuncture treatment in States which license or certify individuals jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Mr. BURTON of Indiana:

H.R. 3793. A bill to require commercial passenger-carrying aircraft to be equipped with comprehensive, manually operated fire extinguishing systems, to require newly built commercial passenger-carrying aircraft to be equipped with all available comprehensive fire protection technology, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 3794. A bill to amend section 312(c) of the Federal Aviation Act of 1958, relating to research and development, to require the Secretary of Transportation to assure the development of a collision avoidance system for use on all civil and military aircraft of the United States in the interest of air safety; jointly to the Committees on Public Works and Transportation and Science and Technology.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3502: Mr. PETRI.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

187. By the SPEAKER: Petition of the Synod of the Piedmont, Presbyterian Church (U.S.S.), Baltimore, Md., relative to Nicaragua; to the Committee on Foreign Affairs.

188. Also, petition of the city council, Rochester, Mich., relative to general revenue sharing; to the Committee on Government Operations.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2867

By Mr. TAUZIN:

—Page 18, after line 2, insert:

EARLY LEAK DETECTION SYSTEMS

SEC. 5A. Section 3004 is amended by adding the following new subsection at the end thereof:

"(1) Not later than 12 months after the date of the enactment of the Hazardous Waste Control and Enforcement Act of 1983, the Administrator shall promulgate regulations requiring that facilities used for the storage or disposal of liquid hazardous waste or hazardous waste containing free liquids on or in the land shall be required to utilize approved leak detection systems and technologies. For purposes of this subsection, the term 'approved leak detection systems and technology' means a system or technology which the Administrator determines, on a case-by-case basis, to be capable of detecting and locating leaks of hazardous waste at the earliest practicable time.".

Make the necessary conforming changes in the table of contents.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS

The following registrations were submitted for the second calendar quarter 1983:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

	QUARTER			
P	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the second calendar quarter 1983:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

SENATE—*Tuesday, September 13, 1983*

(Legislative day of Monday, September 12, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

"He's got the whole world in His hands."

Father God, we thank Thee for the profound truth in this simple Negro spiritual. We recall our first view of the Earth from space—like a colorful marble—a speck floating in vastness. Isaiah the prophet declared, "Behold the nations are as a drop in the bucket, and are counted as the small dust of the balance * * *. All nations are before Thee as nothing * * *" (Isaiah 40: 15, 17).

We boast Lord, we strut, we flaunt ourselves as we make our brief appearance on the stage of life. We act as though we are the center of the universe. Help us to see ourselves as Thou dost see us, infinitesimal by comparison to the universe around us—yet infinitely precious to Thee—so loved by Thee that Thou didst sacrifice Thy son that we might enjoy eternal fellowship with Thee. In the name of Him who is incarnate, unconditional, impartial, universal love. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE SENATE SCHEDULE

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order, there will be a very brief period for the transaction of routine morning business, and then the Senate will resume consideration of the motion to proceed to the consideration of S. 602, which is the Radio Marti bill.

I am advised that the items in controversy between the parties have been resolved and it is probably possible to dispose of that matter in a fairly brief time beginning at 2 p.m. this afternoon.

Mr. President, the hotline system on our side and perhaps on the minority leader's side has advised Senators that there will be a briefing by the Secretary of State in our secure briefing room at 10:30 a.m.

Mr. President, in order for Members to attend that briefing, I shall ask unanimous consent that at 10:30 a.m. the Senate stand in recess subject to the call of the Chair.

Mr. BYRD. Mr. President, the majority leader I am sure has reasons for recess subject to the call of the Chair. But would it be agreeable with him to set a time certain?

Mr. BAKER. Yes.

Mr. President, I do not know how long it will take, and I am confident that the Chair would not reconvene the Senate except at the request of the leadership. The reason for that was so that we could provide maximum flexibility for Members. But let me do this. The point is a good point, of course. Since we are going to go out at 12 o'clock for the caucuses I think it might be as well to just go ahead and recess at 10:30 a.m. until the hour of 2 p.m.

Mr. BYRD. I thank the majority leader.

Those of us who are very desirous of attending the briefing will not have to be concerned about the Senate being called into session.

Mr. BAKER. Yes. The point is well taken.

Mr. President, we are talking about only a few moments and since I am advised that the Radio Marti matter cannot be taken care of until about 2 p.m.

Mrs. HAWKINS. I have a statement on drugs I wish to put in morning business.

Mr. BAKER. Let me change the order this way. I withdraw the previous request.

ORDER FOR PERIOD FOR ROUTINE MORNING BUSINESS TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order there be a period for the transaction of routine morning business to extend from that time until the hour of 10:30 a.m. in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 2 P.M. TODAY

Mr. BAKER. Mr. President, I further ask unanimous consent that at 10:30 a.m. the Senate stand in recess until the hour of 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I remind Senators that when we resume consideration at 2 p.m., the time for the transaction of routine morning business having ended, the Senate will resume consideration of the motion to proceed to the consideration of the Radio Marti bill.

Once again I hope and expect that that measure is going to be disposed of in fairly short order.

I see the distinguished Senator from Florida giving me a crossed finger sign. I will keep my fingers crossed, too. If that is the case, if we are lucky enough to dispose of that issue in a short period of time, whether we are or not, after we dispose of Radio Marti, the Senate will automatically turn then to the consideration of the Interior appropriations bill, which is also an item of unfinished business.

I might say to the minority leader and for the benefit of other Senators, as I indicated yesterday, I wish to go to the Department of Defense authorization conference report today, which is privileged, unless there is some strong reason why we should not do so. One strong reason I can think of is if the pieces fall in place on the Interior appropriations bill, if we can devote some time to finishing that measure, since it is one of the regular appropriations bills, we should do so.

But I still entertain the hope that we can get to the DOD authorization conference report today and dispose of it today.

Now, for the benefit of my chairman of the Policy Committee, Senator TOWER, who may be listening in his office, and who is also chairman of the Armed Services Committee, and was chairman of the conference on the disagreeing vote of the two Houses on the defense authorization bill, I indicated to him yesterday that I plan to take up the DOD conference report at 2 p.m. We will slip that now a little but it is still my plan to take up the DOD conference report during the day today and hopefully to conclude it.

Mr. President, tomorrow we will be on Interior appropriations or the DOD authorization conference report, as the case may be. There are other matters that can be taken up this week, but before I make a further announcement, I wish to attend my caucus at 12:30 p.m. and to discuss matters dealt with in that caucus and perhaps mat-

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

ters discussed in his caucus with the minority leader.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. Mr. President, I have no further need of my time if any remains under the standing order, and I yield the floor.

Mrs. HAWKINS addressed the Chair.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I say to the gentle lady from Florida that I do not expect to utilize my full 10 minutes, and I will be glad to yield to her the remaining time after I have taken care of a couple of matters.

"MISS COY" HAS LEFT US

Mr. BYRD. Mr. President, people all over Washington and throughout the State of Mississippi were saddened last month by the death of Mrs. Coy Hines Stennis, wife of the distinguished senior Senator from Mississippi. On August 20, after a long illness, Mrs. Stennis passed away in the Kemper County Hospital in DeKalb, the Stennis' hometown and the community in which Mrs. Stennis first met her husband more than 53 years ago.

Following Senator STENNIS' election to the U.S. Senate in 1947, Mrs. Stennis accompanied her husband to Washington. Here, she achieved fame on her own as one of this city's most gracious and accomplished hostesses. By Presidents, First Ladies, Senators, Congressmen, and Cabinet members alike, she was known as Miss Coy, a charming, beautiful, and intelligent woman whose talents perfectly complemented her husband's abilities. Attendance at social events at the Stennis home was cherished as a sample of Old South and fabled Mississippi hospitality.

Mrs. Stennis was born in 1901. After studying home economics at the Uniersity of Southern Mississippi, she became a home economist with the Mississippi Cooperative Extension Service, and was first stationed in Kemper County where her future husband was a young lawyer.

After her marriage to Senator STENNIS in 1929, Mrs. Stennis continued sharing her abilities and energy with others through special programs for women and work with 4-H groups and as a Cub Scout den mother. And as her husband's political career advanced, Mrs. Stennis' contributions to her State and country multiplied, winning for her a growing circle of friends and admirers. Over the years, she served as president of the Senate Wives Club and was an active member of the Mississippi Women's Luncheon Club, the Mississippi State Society of Washington, and other organizations in Washington and Mississippi.

I know that I speak for my wife, Erma, and all of our colleagues on both sides of the aisle in offering condolences to Senator STENNIS, to his son, John Hampton, and daughter, Margaret Jane, and to their families in the loss of such an extraordinary wife, mother, and beloved family member. Mrs. Stennis was a bright, thoughtful, lovely woman whose gifts and graciousness enriched lives wherever she went, and all of her friends and admirers will miss her.

Mr. BAKER. Mr. President, will the minority leader yield to me briefly?

Mr. BYRD. Gladly.

Mr. BAKER. Mr. President, I wish to join the minority leader in my expression of grief at the loss of Mrs. Stennis.

When I received word she had passed away, I tried to reach Senator STENNIS at his home in Mississippi by telephone, and I was not able to do so.

The closeness between them was so well known to me that I wanted to tell Senator STENNIS, when I first learned on yesterday, how very much my wife and I were moved by the passing of Mrs. Stennis.

I am sure I speak for every Member on this side of the aisle when I say that one of our greatest Members has lost a great mate and a great helpmate. We wish him well.

Mr. BYRD. Mr. President, I thank the distinguished majority leader for his comments, and I am sure they will be much appreciated by Senator STENNIS.

(Later, Mr. WARNER addressed the Senate, as follows:)

Mr. WARNER. Mr. President, I rise to join my colleagues in expressing my condolences to Senator STENNIS and his family.

While I was not privileged to know Mrs. Stennis well, I can recall the many times I have been in the presence of Senator STENNIS when he always lovingly expressed regard for his wife. He would untiringly make trips back to his home to join his wife with such regularity as possible in view of his heavy responsibilities to our Nation's national defense.

The relationship between Senator STENNIS, his wife, and family, will always serve as a challenge and inspiration to other Members of Congress whose duties compete heavily with family life.

Mr. RANDOLPH. Mr. President, in sadness I offer condolences to my esteemed colleague, Senator JOHN STENNIS and his family, on the passing of his beloved wife, Coy.

They have served this Nation well, each in different roles, America is the better for her contributions as partner and helpmate.

JOHN has been a tower of strength for more than a half century of public service, 36 of those years as a stalwart Member of U.S. Senate.

Coy Stennis stood by and stood for her husband during 54 years of devoted marriage. Children and grandchildren know of their warm and wonderful life together.

In the inevitable trials and tribulations of life, we stress the serenity and inner strength of Coy and JOHN.

S. 1784—REFORM OF THE UNEMPLOYMENT INSURANCE SYSTEM

Mr. BYRD. Mr. President, I ask unanimous consent that a statement which I made this morning before the House Subcommittee on Public Assistance and Unemployment Compensation of the Committee on Ways and Means in support of S. 1784, which is a bill introduced by Senator HEINZ, myself, and others—I am trying to recollect if the Presiding Officer was a cosponsor——

The PRESIDING OFFICER (Mr. WARNER). At this moment, yes.

Mr. BYRD. This bill would reform the unemployment insurance system—I ask unanimous consent that that statement plus certain information in support thereof be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TESTIMONY OF SENATOR ROBERT C. BYRD OF WEST VIRGINIA

Mr. Chairman and distinguished Members of the Subcommittee:

Let me begin by expressing my appreciation for the opportunity to testify before you today. Mr. Chairman, I particularly appreciate your invitation to appear here, and of your including in the agenda for this hearing the unemployment insurance bill that I and Senator HEINZ introduced on August 4 in the Senate.

The work this subcommittee does in the next week to ten days will be critical to determining the future course of unemployment insurance in this nation. Yours is a major challenge, but also a significant opportunity. I am hopeful that my comments today will aid you in your efforts.

The economic indicators signal that we have begun to climb out of the depths of the recession in which we have been mired since July of 1981. As the long-awaited recovery materializes, however, we must not forget that recovery will be a very long time coming to many millions of Americans who lost their jobs and, in many cases, their possessions and homes as well during the past two years.

Unemployment still is at a terribly high level on a nationwide basis. The national unemployment rate in August, the latest month for which the Department of Labor has announced figures, was 9.5 percent.

No public official should rest while we have over 10.7 million persons in the American work force who are idle; while 5.8 million are working part time because they cannot find full time work; and while 1.7

million are still so discouraged as a result of their unsuccessful search for work that they have dropped out of the labor force altogether, and are not counted among the officially unemployed.

And the picture is even bleaker in some of the states that have been hardest hit by the recession. In June, the last month for which the U.S. Labor Department has compiled comprehensive figures, my state of West Virginia had a 17.5 percent unemployment rate. Michigan had a 14.6 percent unemployment rate. Ohio had a 12.8 percent rate. All told, 27 states and the District of Columbia had rates 9 percent or higher.

It also is important to note that those who have been laid off in this recession are remaining unemployed longer than in previous recessions. In May of this year, one million, five hundred, and fifty thousand workers had been unemployed for a full 12 months, and this does not count the structurally unemployed who have not worked in recent years.

It is all too clear to those of us who have seen their plight first hand, who have talked to them in the communities in our states and districts, and who receive letters and calls from them on a daily basis, that these unemployed workers and their families are the hapless victims of our nation's economic illness.

The saga of the unemployed worker and his or her family has been repeated countless thousands of times. Tragedy is not too strong a term to apply here.

As I have noted, unemployment insurance usually is available as a partial cushion. However, the unemployment insurance system currently is not functioning to provide the degree of cushioning that I believe the Congress intended. This is true primarily with respect to programs of additional benefits beyond those available through the basic U.I. programs operated by the states. The system simply was overcome by the severity of this recession and the magnitude of unemployment we have experienced and continue to experience, and by flaws that this severe testing of the system has revealed starkly.

Presently, although 28 of the 53 states and other jurisdictions have unemployment rates of 9 percent or greater, and the national unemployment rate is 9.5 percent—very severe unemployment by historical standards—only 2 states are eligible for Extended Benefits—the second of three tiers of benefits available through the unemployment insurance system. This unacceptable situation is primarily the result of the use of the Insured Unemployment Rate (the I.U.R.) as the sole state eligibility determinant for the Extended Benefits program.

In 1981, the Congress made two changes in the use of the I.U.R. The first change increased the level of the I.U.R. a state must have to qualify. The second change omits from the computation of the I.U.R. any person receiving benefits beyond regular state benefits. The I.U.R. continues to omit in its computation all persons who have exhausted all U.I. benefits, as it did before 1981.

Even had these changes not been made, however, use of the I.U.R. as the sole state eligibility determinant for the Extended Benefits program was badly flawed. States that are hardest hit by unemployment—particularly where the average duration of unemployment is highest—are substantially disadvantaged, because a greater proportion of their unemployed populations are not counted in the I.U.R. This distorting effect generally is greatest as a state's unemployment rate peaks and begins to fall but still remains very high—as currently is the case in many states. My own state of West Virginia provides a vivid example: while its total unemployment rate currently is 17.5 percent, its I.U.R. is only 7.19 percent.

In addition to this unacceptable situation with the Extended Benefits program, we are facing another crisis in the Supplemental Compensation program—the third or last tier of benefits. This tier expires again on September 30. It is absolutely unthinkable that Congress will fail to continue providing a number of weeks of benefits at least equal to the number now available, counting the weeks of Supplemental Compensation. And yet we must go through the motions to be sure that the program is reauthorized again, and avoid an interruption that could be devastating for the unemployed and their families who are dependent on these benefits while they still cannot find work.

There is yet a third major problem with the portions of the unemployment insurance system that are superimposed on top of the basic state U.I. programs. This problem is the confusion, distress, and cynicism that result from one of the most complicated programs operated at any level of government in this nation—that result from a program that is supposed to help those who have fallen upon hard times, but, instead, often stymies and boggles the mind. It defies understanding by the workers it is designed to protect, by the employers who pay into its trust funds, by the taxpayers who finance some of its benefits through general revenues, and, indeed, by the members of Congress who are its creators, and the federal and state administrators who are charged with operating it.

The Extended Benefits and Supplemental Compensation programs are crying out for repair. The basic idea of such additional benefits is sound; it is, in fact, essential. But these programs must be reformed so that they actually will provide the protection they were intended to provide. They must be reformed so they will be dependable. And they must be reformed so that those who need benefits beyond those provided in basic state programs, those who pay the costs, and those who operate the programs can understand what help is available, how to obtain it, how much it costs, and how to operate the programs providing it efficiently.

These are not minor repairs. They cannot be accomplished by tinkering with the programs. It is time for a real overhaul of the system beyond the basic benefit programs at the state level.

It seems clear to me that now—when major revisions in the Extended Benefits program are required, and when the Supplemental Compensation program expires in three weeks—now is the time to make sense out of this confusion by combining these two programs so that they no longer exacerbate each other's flaws. There are a number of changes that need to be made. I wish to highlight the most important.

First, rather than having two programs that operate according to inexplicably conflicting state eligibility standards and result in incomprehensible durations of benefits, there should be only one program providing benefits beyond those available through the basic programs operated by the states.

Second, rather than having, as in the current Extended Benefits program, state eligibility requirements that dictate a state is eligible for "all or nothing" of the current 13-week benefit period, the program should be structured as the Supplemental Compensation program now is structured—so that states with the highest levels of unemployment are eligible for the greatest number of weeks of benefits, and those benefits stage down as unemployment rates are lower.

Third, the use of the Insured Unemployment Rate as the sole determinant of eligibility no longer is acceptable. It is well known that the Total Unemployment Rate compiled each month by the Bureau of Labor Statistics is based on a national sample, and that the probability of significant error is high with respect to states with smaller populations because the sample size is so small there. Admittedly its use is not ideal. But surely it is apparent that use of the I.U.R. also is far from ideal.

This past Friday, the Brookings Institution published a study containing a striking empirical fact. During 1982, only 45 percent of unemployed workers received unemployment insurance benefits, compared to 78 percent during the recession year of 1975. One of the principal reasons cited by the study's author is that the I.U.R. no longer is accurate in measuring how difficult it is for unemployed workers to find jobs, and consequently is not desirable as a trigger for benefits beyond those in a state's basic program.

As a practical matter, we should not tolerate a methodology that causes a state with 15 percent unemployment to receive only a very few weeks of benefits beyond those in the basic program. So, although efforts should be redoubled to find a "better mousetrap", in the meantime we should employ the Total Unemployment Rate to assure that states and their long-term unemployed workers are treated fairly.

Fourth, and finally, the financing of the program should be arranged so that, as a state's unemployment rate increases, the federal government will pay an increasing share of the benefits in that state. This can be justified on the grounds that it is extremely likely that unusually heavy unemployment in any state will be largely the result of economic circumstances beyond its borders and control. It also is necessary in order to minimize future additions to the heavy debts that have been incurred by the trust funds of those states that have been hit hardest by unemployment in the current recession. To ignore this situation may result in ever-increasing employer taxation and thereby serve as a disincentive to private sector hiring—with the greatest increases in taxes falling in the states that have had the worst unemployment and are in greatest need of new hiring.

I was pleased to join with Senator Heinz and four cosponsors in introducing legislation—S. 1784—that will do precisely these things which badly need to be done, and which will make other changes of a more technical nature that also are very important. Mr. Chairman, if I may, I would like to submit for the record a summary of the purposes of this bill, a chart showing the distribution of benefits and financing mechanisms it provides, and a brief summary of its provisions.

At a time when we all are hopeful that the corner has been turned toward national economic recovery, we must not forget those who are the victims and remain the victims of this sad episode in our nation's economic history. We must take steps to assure that the cushion of unemployment assistance actually is available to those who need it. Just as important, we should act now, while the

failings of the U.I. system are fresh in our minds, to assure that the system will operate more fairly, dependably, and efficiently in the future.

I commend to your consideration the bill which Senator HEINZ and I, with cosponsors from both parties, introduced in a spirit of bipartisan cooperation. We believe it could solve the major problems that have confronted the U.I. system in recent months.

I hasten to add that we do not claim that every one of the detailed provisions of our bill is the perfect approach. Surely there is room for improvement, and this Subcommittee's expertise should be brought to bear on that challenge. In particular, the Subcommittee may wish to investigate some alternative to sole use of the Insured Unemployment Rate as the state eligibility determinant other than use of the Total Unemployment Rate. Our bill requires the Department of Labor to undertake a study with this objective, but the Subcommittee may wish to use a different device even now. The Subcommittee also may wish to modify the schedule determining how program costs will be divided between the state and federal governments. It may be desirable to incur slightly greater federal costs in order to assure that hard-pressed states will not have to bear a larger fiscal responsibility at some benefit duration levels.

But I am hopeful that this Subcommittee will act boldly to set in place (1) a logically constructed, single program of benefits beyond state basic programs; (2) with benefits determined by unemployment level; (3) available permanently to states whenever they have high unemployment; (4) with federal financial responsibility increasing as unemployment worsens; and (5) with use as the state eligibility determinant of a more accurate reflector of the difficulty of finding employment than the Insured Unemployment Rate.

Again, I thank you for the opportunity to talk with you today. I offer my respect and my best wishes as you grapple with the problem of making the U.I. system both more rational and more effective in meeting need. If I can be helpful in any way, I hope you will call on me.

Mr. Chairman, I believe the dilemma of my schedule has been communicated to you previously. A caucus of all Senators is scheduled to begin momentarily to provide a briefing on the circumstances surrounding the Soviet attack on the Korean Airlines plane. Consequently I must depart immediately. Again, I thank you for being able to talk with you and your Subcommittee members about this vital program so much in need of major repair.

I also want to thank Congressman Stark for introducing in the House yesterday the bill Senator Heinz and I introduced earlier in the Senate. I am advised that Congressman Stark was joined by Congressman Pease, who also serves as a member of this Subcommittee, and by Congresswoman Kaptur who will be testifying before the Subcommittee today.

It is very encouraging to see this level of concern among the Subcommittee's members about the problems that I described in my testimony today, which Senator Heinz and I have sought to address in our bill. I am very hopeful this means the Subcommittee will take the present opportunity to make some of the structural changes in the Unemployment Insurance system that are so badly needed.

I am honored to be joined at this hearing today by the distinguished Senior Senator from Pennsylvania, Senator Heinz, who introduced S. 1784 with me in the Senate in August. He has been a leader in the Senate in seeking recognition of the problems of the unemployed and legislation to address those problems. We want to emphasizes together today that we believe major reform to the Unemployment Insurance system now is both necessary and possible, and to highlight the fact that the bill we introduced together, with cosponsors from both parties, was in fact a bipartisan effort to address the deficiencies of the current system.

I regret having to leave before he makes his comments, and ask his forebearance as I ask the Committee for its understanding. I commend his comments to you.

TABLE OF BENEFITS UNDER S. 1784

When State IUR equals (percentage)	Or	State TUR equals (percentage)	Unemployed persons receive this many weeks of benefits [1]
0 to 3.99		0 to 8.99	0
4 to 4.99	And IUR is greater than average in prior 6 years [2].	9 to 9.99	10
5 to 5.99	do.[2]	10 to 10.99	20
6 to 6.99	do.[2]	11 to 11.99	25
7 and above	do.[2]	12 and above	30

[1] When the national total unemployment rate equals or exceeds 10 percent, unemployed persons in States in the 0 to 3.99 percent IUR category will be eligible for 5 weeks of benefits under the bill, and 5 additional weeks will be paid—beyond the number listed—for each other category

[2] In the 4 to 4.99 percent IUR category, a State must have an IUR that is 130 percent or greater of the average in the prior 6 years in order to qualify on the basis of its IUR. In the other categories, a State must have an IUR that is 105 percent or greater of the average in the prior 6 years in order to qualify on the basis of its IUR.

Mr. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The minority leader has approximately 6 minutes.

Mr. BYRD. I thank the Chair, and I yield 6 minutes to the gentle lady from Florida.

Mrs. HAWKINS. I thank the Senator from West Virginia.

PARENTS JOIN PBS IN NATIONWIDE TV CAMPAIGN AGAINST DRUG ABUSE

Mrs. HAWKINS. Mr. President, The National Federation of Parents for Drug-Free Youth, which was founded by my friends Bill and Pat Barton of Naples, Fla., has joined with Public Broadcasting Service station WQED/Pittsburgh and 26 professional and civic groups across the country to spearhead a landmark community outreach project called The Chemical People. First Lady Nancy Reagan and Dr. Carlton Turner, White House Drug Policy Adviser, will host the two 1-hour specials aimed at combating adolescent drug and alcohol abuse.

Nearly 300 PBS stations nationwide will carry the programs on November 2 and 9, 1983 at 8 p.m. e.s.t. NFP executive board member, Robert Kramer is a consultant for "The Chemical People" and will be featured in the programs, sharing what parents have done and what parents can do.

In the spring of 1982, WQED/Pittsburgh, producers of "The Chemical People" joined forces with a regional coalition of parents and community leaders to launch a local campaign targeting the epidemic of youthful drug and alcohol abuse. From that successful effort, over 12,000 people attended local town meetings, the national awareness campaign and two-part television series have evolved.

Communities will be encouraged to hold town meetings concurrently with the broadcast of the two programs. The first program is designed to inform and motivate viewers to examine the scope of the problem and to give the viewers and community leaders a forum for discussion.

The second hour of "The Chemical People" will feature successful community programs and demonstrate to viewers that they are not helpless—that they can join together to fight this problem. The ultimate goal is for the audience to organize itself into a community task force.

"The Chemical People" project is one of the most exciting and promising projects ever in the area of drug abuse prevention—it also presents an incredible opportunity for parents. As Mary Jacobson, NFP president remarks,

Never before has such a massive assault been launched against the wall of denial parents often encounter when trying to educate their communities about young people and drugs. Parents must be at the forefront of the local effort. The stakes are high. "The Chemical People" has the potential to truly stun America into action. Please get involved becuase you and I agree that this is one battle America can't afford to lose.

I ask unanimous consent that a June 1983 Reader's Digest article by Peggy Mann entitled "Parents Against Pot" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Reader's Digest, June 1983]

PARENTS AGAINST POT—IT STARTED IN NEIGHBORHOOD LIVING ROOMS AND EXPANDED INTO A POWERFUL NETWORK THAT MAY BE THE NATION'S BEST HOPE OF WINNING THE BATTLE AGAINST YOUTH DRUG ABUSE

(By Peggy Mann)

School authorities often refuse to face the problem; government drug-abuse agencies have done all too little to inform the public about it; many physicians still seem unaware of it when they examine teen-agers. As a result, parents may still be the last to know that their children have fallen victim to the drug epidemic that has been raging for more than a decade among America's youth. In a 1980 survey of a middle-income Cincinnati suburb, 38 percent of the sixth grade and 89 percent of the senior class said they used drugs and/or alcohol; 38 percent of the parents thought their children used alcohol, but only 8 percent thought their children used drugs.

Fortunately, there is a new force at work against this epidemic—a nationwide movement of more than 4000 parent groups

formed to expose and battle drug use among teen-agers and preteens. The groups, ranging in size from 15 members to more than 800, have different approaches and widely varying rates of success. Yet this parental crusade is the only major force in the country to have taken active, organized and effective steps aimed at stopping marijuana use.

Why the concentration on marijuana? Because it is the illegal drug most used by kids. According to the 1982 National High School Senior Survey, 44 percent of U.S. high-school seniors had smoked pot during the year, and one out of seven of these were daily or near daily smokers.

Moreover, in 1982, sociologists Richard Clayton and Harwin Voss reported a dose-related connection between pot smoking and subsequent use of cocaine and heroin by young men. Of those who had smoked pot fewer than 100 times, seven percent had graduated to cocaine, four percent to heroin. But of those who had smoked pot at least 1000 times, the equivalent of once a day for three years, 73 percent had gone on to cocaine, and one out of three had graduated to heroin. (Although heroin use among high-school seniors is minimal—0.6 percent in the past year—multi-drug use is "in.")

Parent groups have found that by stopping their kids from smoking pot, they almost automatically stop all other illegal drugs—and cut down on alcohol use as well. The High School Senior Survey's statistics show that heavy pot smokers tend to be heavy drinkers, while those who do not use pot tend not to drink heavily.

Since virtually all over the country teenage "partying" has come to mean "getting smashed and getting stoned"—on anything from pot to pills to hashish, LSD, angel dust and alcohol—some parent groups hone in on the partying aspect. Parents Who Care (PWC) was started in November 1979 by 15 Palo Alto, Calif., parents who were upset by stories of druggy senior proms. They held talk sessions with their children and learned, as founder Joann Lundgren observed, that most of them had never been to a party where the main activity was not getting high.

The parents solution: workshops showing kids how to give successful drug- and alcohol-free parties. Says Margery Ranch, PWC director, "We've seen a change in attitude. Young people are feeling more comfortable saying no."

Founding Mother. The parent movement began in Atlanta in 1976 at a back-yard birthday party for Kathy Manatt,[1] age 13. Her mother, Marsha, grew suspicious when a boy lurched into the kitchen and asked a girl, "Did they bring the stuff?" Then Manatt noticed that many of the youngsters appeared to be stoned. But they were only 12 and 13 years old!

At 1 a.m., the party over, Marsha Manatt and her husband crawled around the back yard with flashlights. They found dozens of marijuana butts, empty beer cans, wine bottles. "I felt absolutely sick," she recalls.

Next morning Manatt started phoning the guests' parents. Reactions ranged from disbelief to hostility. But one mother, Karen Hardy, told her, "If you really want to know what's going on with the kids, let's talk." Her son had just overdosed on a marijuana joint laced with angel dust.

With Karen Hardy's help, 15 couples agreed to meet in the Manatts' living room. Their children ranged in age from 11 to 14. At first the room bristled. One mother maintained, "My boy isn't involved in any of this. He told me so."

"I hate to disillusion you," a father answered, "but your son sells pot to mine in the woods behind my house before school."

As the parents pooled information, some felt shock, but there was also a sense of relief. Many had experienced guilt and shame; now they learned, as Karen Hardy's 12-year-old son put it, "Every kid has a drug problem the minute he walks out the front door, because drugs are all around."

The parents determined to research this marijuana world. They interviewed school-bus drivers, teachers chaperones at dances. At the next parents' meeting, they agreed on a concept that was to become a cornerstone of the national movement: parent peer pressure to combat teen peer pressure.

Manatt's group set down rules: Rock concerts and the drug-hang-out pinball parlor were off limits. There would be an eleven-o'clock curfew on weekends. All telephone callers would have to identify themselves. Spending would be watched. Parents would chaperone all school functions and monitor school-bus stops and the homes of parents who worked late.

Parents who "waffled" and tolerated exceptions made little headway. But those who stuck to the rules found that the pressure worked, and their teen-agers' resentment subsided because peers were subject to the same rules. Many seemed strangely relieved. Within six months, virtually all the children of the parents who had organized were drug-free—and remained that way.

By 1982, when Kathy Manatt's younger sister, Emily, entered eighth grade, she reported, "There's no one in my class I know of who does drugs. We think it's gross to be drunk or stoned."

Pride of Parents: In August 1977, Marsha Manatt met Thomas Gleaton, a Georgia State University professor of health education who had run the Southeast Drug Conference. While some professionals had been extremely hostile to Manatt when she tried to get support for parent involvement in drug-abuse programs, Gleaton listened. Out of their five-hour meeting two important ideas were born. The next Southeast Drug Conference in 1978 would be devoted to parents and to the new marijuana research. Also, an organization would be formed to disseminate information about marijuana. This became PRIDE, National Parents' Resource Institute for Drug Education.

Within two years, PRIDE has run workshops for parents, teachers and counselors from 144 schools in an around Atlanta. PRIDE also organized 20 regional, state and county conferences and two national conferences that proved a stimulus to new parent groups. By 1983, Manatt and Gleaton had addressed 500 emerging parent groups. Many adopted PRIDE's name, and spawned more groups.

Hidden Camera: Each new organization was triggered by parental anguish. In 1978, for example, Pat Barton, a mother in Naples, Fla., saw a report of PRIDE's conference and called Marsha Manatt. The Barton's 15-year-old daughter Bonnie, had been dating a drug dealer and smoking marijuana. Her parents threatened the drug dealer with legal action (he moved away) and put Bonnie under strict surveillance. But when Bonnie had shrieking tantrums, Pat and Bill Barton wavered, wondering if what they were doing was wrong. "Our kids seem to know everything about drugs," Pat Barton told Manatt. "We know nothing! *Is* marijuana harmful?

Marsha Manatt promptly mailed off a packet of information that provided the Bartons and their friends with enough background and courage to name themselves Naples Informed Parents (NIP). Then the parents asked the high school principal to "do something" about drugs in the school parking lot. When the school authorities appeared unable to cope with the problem, Bill Barton went to the sheriff, and for three weeks a detective hidden in a van photographed illegal drug use in the parking lot. Among those subsequently arrested was Barton's son Nick.

All that summer the parents worked with the schools, business and police, and when kids returned to Naples High that fall, they were issued a revised handbook setting forth a stricter code: "No drug or alcohol on school grounds or at any school function." During the same summer, the Bartons, as Pat put it, "went through sheer hell with Bonnie." But Bonnie did stay off drugs and returned to the sunny, spirited A-student she once had been. Nick was so impressed by this change that he too decided to get off pot.

By 1980 the Bartons' NIP had grown to 500 members. They collected scientific data on marijuana and brought it to schools, men's clubs, PTAs, doctors and their own children. It became evident to all involved that the students at Naples High had a healthier, more optimistic attitude. Their SAT scores improved, they dressed and looked better and showed more enthusiasm for everything. The situation continues to be on the upswing to this day.

There are now parent groups in over 80 Florida communities. "The message I give them," says Pat Barton, hired by the state in 1980 to "network" existing partent groups and encourage new ones, "is don't feel guilty, but do feel responsible.

"Because We Must." In the meantime, other pioneers recognized the need for a national organization to serve the parent groups engendered by PRIDE and others that had started spontaneously in over 30 states. The National Federation of Parents for Drug-Free Youth (NFP) was born in April 1980, and Bill Barton was elected president. The movement then represented some 350 parent groups. One year later, there were 3000. By March 1983, the NFP network was in touch with some 4000 parent groups and was meeting numerous requests for its step-by-step manual to aid parents in setting up new groups.

The affiliates retain their own identities. COPE (Concerned Organization of Parents to Educate), FACT (Family Action Council of Texas), HIP (Houston's Informed Parents), IDEA (Illinois Drug Education Alliance) . . . behind most of these acronyms lie heart-rending stories. Many groups have their own approaches to the local problem. Families Anonymous in Van Nuys, Calif., concentrates on "the hurting parents." The Millburn (N.J.) PTA Drug Awareness Committee aims at drug prevention among grade-school children. An all-black group, Parents and Youth Against Drug and Alcohol Abuse, in Washington, D.C., provides inner-city teen-agers with wholesome alternatives to drugs and alcohol, including ball games, talent shows, plays.

The first conference of the NFP was held in Washington, D.C., last October and attended by over 500 parent-group leaders

[1] Names of all children and some adults have been changed.

from 46 states. Speakers included First Lady Nancy Reagan, who was honorary chairperson of the conference.

Mary Jacobson, co-founder of PRIDE-Omaha and president of NFP, summed it up for all of them: "If each affected element in our society joins with the parents—schools, physicians, business, government—if we put blame and shame behind us, and forge ahead, we will win the battle. Because we must."

Mrs. HAWKINS. Mr. President, I yield my time to the minority leader.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, does the Senator from Montana wish me to yield him any time?

Mr. MELCHER. I thank the Democratic leader but I do not.

Mr. BYRD. I thank the Senator.

I suggest the absence of a quorum.

The PRESIDING OFFICER. If the minority leader will withhold——

Mr. BYRD. I will withhold my suggestion.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond 10:30 a.m. during which time Senators may speak for no longer than 5 minutes each.

Mr. BYRD. I thank the Chair, and I renew my suggestion with reference to the absence of a quorum.

The PRESIDING OFFICER. The clerk will now call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEATH OF H. W. CLOSE

Mr. THURMOND. Mr. President, I would like to take this opportunity to note the passing of a dedicated textile executive and a close personal friend, H. William "Bill" Close, Jr.

Bill Close, who died at the age of 63 in New York City on August 17, 1983, was chairman of the board of Springs Industries. He was a business graduate from the University of Pennsylvania. Upon completion of his college education, he entered the Navy and served in the Pacific theater during World War II. In 1946, Close joined Springs Industries as a sales trainee, and he subsequently worked in all facets of the company.

In 1969, he was named chairman of the board. During his tenure as board chairman, Bill Close guided the growth of Springs Industries into the fifth largest textile company in the Nation. Springs Industries, based in Fort Mill, S.C., employs over 18,000 people, of whom some 14,000 are South Carolinians, including large numbers of minorities and women. Springs also operates subsidiaries in Wisconsin and Paris, France.

Bill Close was able to maintain these high levels of employment in the face of many serious hardships confronting the textile industry today. Not only did he have to contend with the recent recession, but he was forced to compete with cheaply produced and often subsidized foreign imports.

Mr. Close was dedicated to the continued improvement of Springs Industries and to the betterment of living and working conditions for his employees. The textile industry, the State of South Carolina, and the Nation will miss Bill Close and the contributions he made to society.

Mr. President, I would like to extend my deepest sympathy to the members of Mr. Close's family of whom he was so proud. His wife, Anne; sons, William, Jr., Leroy, Derrick, and Elliot; and his daughters, Mrs. Crandall Bowles, Mrs. Francis Hart, Mrs. Patricia Hastings, Miss Katherine Close and Miss Martha McKee.

TIME RIPE FOR NUCLEAR TEST BAN RATIFICATION

Mr. PROXMIRE. Mr. President, on August 7 the Washington Post carried a remarkable article by Walter Pincus headlined: "Has Dr. Strangelove Made His Last Nuclear Bomb." What was so remarkable about this story? Two elements.

First, Pincus maintained that while negotiations between the U.S.S.R. and this country might not stop or even slow the nuclear arms race, the limits of technology might do exactly that. What a happy possibility: The scientists and their military collaborators on all sides stopped by the laws of nature. Pincus is a top flight reporter. But who will believe that given its head science will not continue to refine and make nuclear weapons ever more deadly. Oh, sure, for a few months science might run into some kind of a roadblock—maybe even for a few years—but a permanent limitation on any new nuclear weapons? Prove it—Walter—and take your time doing it. Pincus does not come close to proving it in this article. He quotes Roy Woodruff, assistant director of Livermore in charge of strategic weapons development, but a couple of days later Mr. Woodruff disavows much of what Pincus claims in a letter to the Post.

Nevertheless it seems that Pincus is indeed on to something here. There seem to be kinds of limitations imposed by science on the significance of the size of nuclear bombs and their megatonnage. And of course for a long time the basic theme of those everywhere who would limit the nuclear arms race was that you can only blow up the world once, why spend billions to assure yourself that you can blow it up 5 or 10 or 100 times over. Both the Soviet Union and the United States have the number of warheads, the megatonnage, the accuracy, and the delivery capability to utterly demolish the other. Sure, we can modernize, refine, improve accuracy even more, reduce the vulnerability of weapons and guarantee their accurate delivery. In fact this Congress will spend about $50 billion a year for each of the next 5 years to do all these things. The Soviets will do the same. Our weapons on both sides will be better, that is, more accurate, surer to pentrate any enemy defenses, better able to survive an enemy attack. But the results will be the same old thing: the destruction of civilization.

The second reason this was a remarkable story is because Pincus suggests what policy his conclusions lead to. Pincus proposes that we should ratify the 1974 threshold test ban treaty which both the United States and the Soviet Union have accepted and for some 9 years have respected, but have not ratified. Pincus argues that we should ratify it, and then proceed to build on it. The treaty is on the Senate calendar. Chairman PERCY of the Foreign Relations Committee has, according to Pincus tried to get President Reagan's support for it. At the instigation of David Emery, the Deputy Director of the Arms Control Agency, an interagency group is now studying the treaty and the White House is expected to reconsider its previous opposition to the treaty and possibly support it.

Why would the Senate ratification of a treaty that has been in effect for 9 years advance arms control? Answer: It would provide the basis for a reduction in the current 150 kiloton limit to 50 kilotons or less. With no significant tests for several years the arms race would meet a truly serious and effective limitation. With this kind of limitation, and further action such as proposed by Senators PERCY, NUNN, and COHEN to sharply reduce the number of strategic, nuclear warheads to 5,000, we could begin to turn the arms race around. Without the test ban firmly inplace, however, any warhead reduction could be illusory. We know, for instance, that a sharp reduction in megatonnage can be offset by a corresponding increase in accuracy. Similarly a considerable reduction in the number of warheads will not mean a less devastating nuclear power if the accuracy and reliability of the smaller number of warheads has been increased. Testing is essential to the improvement of a nuclear arsenal. Therefore an effective ban on testing, together with a verifiable reduction in the number of nuclear weapons would indeed stop the arms race.

Mr. President, I ask unanimous consent that the article to which I have referred by Walter Pincus in the August 7 Washington Post be printed in the RECORD, together with letters to the Post commenting on Mr. Pincus' article by Associate Director R. D. Woodruff and Deputy Associate Director W. F. Scanlin of the Lawrence Livermore Laboratory, and also a letter from David C. Morrison, research analyst, Center for Defense Information.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HAS DR. STRANGELOVE MADE HIS LAST NUCLEAR BOMB?

(By Walter Pincus)

LIVERMORE, CALIF.—If the policy planners and politicians in Washington would spend more time at the laboratories where America's nuclear weapons are fashioned, they might begin to grasp a remarkable fact: Neither the Soviet Union nor the United States need worry any longer that the other might come up with some fundamentally new nuclear weapon.

Similarly, if those toiling to legislate a nuclear weapons freeze would also study the facts, they would discover that they might accomplish far more by redirecting their energies to seek severe limits on the size of underground nuclear tests. If such limits were accomplished—and a treaty has already been negotiated to impose them—the dangers of nuclear war could indeed be reduced.

What the hardliners and softliners both would discover here at Lawrence Livermore Laboratory and at its older sister lab in Los Alamos, N.M., is that a different kind of freeze is already taking shape—a technological freeze, a limit imposed by science, not man. Discussions here and in Los Alamos with the scientists who make our bombs point to this conclusion: They have gone about as far as they can go in developing new nuclear weapons.

Yes, research continues on further nuclear advances, but these undertakings are essentially on marginal efforts, such as getting a bigger or more specialized bang from a smaller amount of nuclear material. And, yes, we can still expect new and exotic nonnuclear weapons such as laser and particle beams.

But 38 years to the week after the first two atomic bombs were dropped on Japan, the experts suggest that the basic development cycle of nuclear weaponry is complete.

Roy Woodruff, assistant director of Livermore in charge of strategic weapons development, will tell you that America's newest strategic and tactical hydrogen bombs, now in production, are probably the last nuclear bombs we need to build. He also believes that we may be at the end of designing significantly new missile warheads, adding: "There are no modern systems required with a yield over a megaton." (The bomb dropped on Hiroshima was 0.0125 megaton.)

This country's newest missiles are one piece of evidence suggesting there is nothing new to be done. An older basic design is being used for the warheads on both the new MX intercontinental ballistic missile, being developed here at Livermore, and the planned Trident II submarine-launched ICBM, which Los Alamos will put together. Scientists reckon they cannot significantly improve on the existing design.

William F. Scanlin, who directs the design of Livermore's short-range nuclear systems—including the controversial neutron artillery shells—delivers a similar message. The neutron represents "the end of nuclear artillery shells," he remarks. He also agrees with Woodruff that our latest strategic bomb, the B-83, "was the last bomb we ever do."

These men are hardly nuclear disarmers. Woodruff is looking at new defensive nuclear weapons in space, Scanlin at "safer" warheads, both are believers in continued research for new devices. But their personal beliefs cannot alter the fact that America is near the end of the line in basic warhead design, accuracy and types of delivery systems.

There seems little doubt, for example, that we have run out of new ways to base intercontinental nuclear missiles on land and at sea, and space basing of offensive weapons is already prohibited by treaty.

As for the size of weapons, we learned years ago that the more accurate we made our delivery systems, the smaller the nuclear warhead yield necessary to destroy any target.

The Reagan administration and its allies like to stir up fears with talk about the size and power of Soviet weapons. But scientists have long known that making more powerful nuclear weapons is less effective militarily than making more accurate ones.

The experts still accept the 20-year-old formula that says if you make a nuclear warhead twice as accurate, it can have one-eighth the explosive yield and still do the same damage to a target. The Soviet explosion in 1962 of a 50-megaton hydrogen device (equal to 50 million tons of TNT) was impressive but foolhardy. No target needs that big an explosive.

The biggest Soviet ICBM, the SS18, carries 10 separate warheads, each with a yield of more than 600 kilotons. Although it is perhaps one-third larger than the proposed U.S. MX ICBM, the smaller American missile's 10 warheads, each with a yield of about 500 kilotons, will be just as militarily effective because of the superior MX guidance system. At explosive yields of those levels, the only difference between the damage done to a target is the size of the dust particles in the radioactive crater.

The increasingly evident limit on technological advances in nuclear weaponry opens the door to the tantalizing possibility of a safer world where what already is known about nuclear devices is all there is, and the unseen need no longer be frightening.

It now is possible for politicians and world leaders, who are trying to find some means of halting the arms race, to drop the idea that one side or the other will suddenly come up with the ultimate nuclear bomb.

While senior scientists at Livermore and Los Alamos do not speak in exactly these terms, some of them do see a new possibility: moving toward limiting the size of underground tests to a point where neither superpower could have total faith in the reliability of its deployed and stockpiled arms.

If we do not need a new bomb, a new delivery system, a new artillery shell, after all, why would we need large-scale testing anymore? As for the Soviets, they have long urged a reduction in the permitted size of nuclear explosions. There is no risk in seeing if they will put their bombs where their mouth is.

Livermore's Woodruff, for example, is a firm advocate of the first step needed if we are to move in this direction: ratification of the 1974 threshold test ban treaty, the agreement signed by then-President Richard Nixon limiting both Washington and Moscow to underground weapons tests of devices with yields of 150 kilotons (0.15 of a megaton) or less.

Although both countries have agreed to abide by the treaty's limits, neither has ratified the treaty. Ratification is needed to clear the way for further agreements that could reduce the size of permitted tests still further.

The problem is that key Pentagon officials believe some Soviet tests conducted since the threshold treaty was signed have exceeded the existing 150-kiloton ceiling. Last year, when Sen. Charles H. Percy (R-Ill.), chairman of the Senate Foreign Relations Committee, tried to get President Reagan's support for ratification, the Pentagon led the opposition.

In May, Livermore scientists had the opportunity to talk to the new deputy director of the Arms Control and Disarmament Agency, David F. Emery, a former Republican congressman from Maine and an electrical engineer by profession, who visited the lab while awaiting confirmation to his post.

Emery was shown classified data the lab has developed on Soviet underground tests. The evidence, according to Woodruff, showed that there was no solid proof of Soviet cheating on the unratified treaty. Beyond that, Woodruff argues, even if the Soviets had done what Pentagon officials claimed, the small variance above the 150-kiloton limit "would not give them any military advantage in weapons building."

At Emery's initiative, an interagency group is now restudying the threshold treaty issue, and the White House is expected to reconsider in October its opposition to ratification. Arms control advocates within the administration believe the president will change his mind—not out of conviction, but as part of a major administration arms control offensive this fall aimed at aiding deployment of medium-range missiles in Europe.

Woodruff, moreover, says he already has briefed some Reagan administration officials on the Livermore view that the treaty should be ratified, and he plans to be available for testimony on Capitol Hill of additional hearings are held.

His support of the threshold limitation fits comfortably into the concept of the coming technological "freeze." If the United States has no plans or need to build bigger weapons, he says, why not also close out that option to the Soviets through a treaty obligation, whose increased weight would force them to stay in the 150-kiloton range for underground tests.

Moreover, he remarks, a formal limit to 150 kilotons would prevent building larger-yield warheads, because scientists are not convinced you can "scale up" devices tested at lower yields.

Scaling up means testing a device at, say, 10 kilotons and then designing a weapon with 10 times the test sample. Theoretically, the result would be a 100-kiloton bomb, but scientists at the nuclear labs don't believe you can safely assume that the bigger version would work as well as the small one, particularly with a weapon whose use has such extraordinary implications.

"Scaling up" is one of the many Washington myths in nuclear weaponry. This particular myth was used by liberals as an argument against ratification of the threshold test ban during the Carter administration; they claimed that the 150-kiloton limit

would have no effect because of the ability to "scale up." They were pushing for a comprehensive test ban treaty that would stop all underground tests. In the end they got neither.

If the 150-kiloton treaty were ratified, the next logical step would be for both countries to drive the level down to 50 kilotons, or even 5 kilotons. That surely would put a cap on any significant new nuclear weapons development and provide a further push toward the inevitable technical freeze.

Monitoring a 5-kiloton threshold test ban treaty would be easier than verifying a comprehensive agreement that bars each side from any nuclear tests, because inspectors on both sides would not get hung up on ambiguous small explosions. Moreover, any variation discovered would have little significance because such low-level tests would be too small to help develop new weapons concepts.

After a period of years in which no significant tests were permitted, both superpowers would have to begin wondering about the reliability of their respective arsenals. Of course, most of their thousands of bombs would probably still work, but with each passing year, doubts would have to grow. Eventually, generals and scientists on both sides would no longer be able to guarantee to their political leaders that their nuclear arsenals were fully reliable. So the leaders would have significant scientific grounds for worrying that a large part of their nuclear forces might not work as intended. At that point, neither side could rationally contemplate the first use of nuclear weapons—and we would have a considerably safer world.

It is time for government leaders, politicians and the public that has concerned itself with halting the arms race to take a serious look at pushing ratification of the threshold treaty as an easy first step toward a meaningful freeze. The agreement is already on the Senate calendar and could be called up for a vote when Congress returns in September.

Vocal public and congressional pressure at that time would surely force a favorable response from the White House, which needs to put its best arms control face forward as the Pershing II and ground-launched cruise missile deployments begin in December in Western Europe.

At the same time, the administration, which is uncomfortable with the 150-kiloton level (because it thinks the Russians are cheating on it) could be pushed to drive the threshold down lower.

It would be interesting to see how the numbers negotiations at the U.S.-Soviet arms control talks in Geneva would be affected by movement in the areas governed by the technological freeze.

After all, if you are not certain your weapons work, what difference does it make to serious people how many your enemy has?

THE LAST OF DR. STRANGELOVE?

Walter Pincus ["Has Dr. Strangelove Made His Last Nuclear Bomb?" Outlook, Aug. 7] reached a number of very inaccurate conclusions. While he is certainly entitled to his opinions, we deeply regret any inference that our interviews contributed to his reaching these conclusions or that we personally support them.

In particular, Mr. Pincus has used quotations from our interviews, out of context, to support his views, while omitting significant statements that did not suit his purposes. As an example of this, Mr. Pincus developed the idea that there is nothing new possible with respect to the design of nuclear weapons and that we are on the verge of a "technological freeze," i.e., one imposed by the limits of science and technology. Nothing could be further from our views.

We are described as "hardly nuclear disarmers. Woodruff is looking at new defensive nuclear weapons in space, Scanlin at safer warheads; both are believers in continued research for new devices." Later in the article Mr. Pincus states, "His [Mr. Woodruff's] support of the threshold limit fits comfortably into the concept of the coming technological 'freeze.'" We find this a remarkable (and incorrect) conclusion by Mr. Pincus, either with or without the information we provided him in our interviews. Mr. Pincus chose to ignore our discussion of such concerns as future mission requirements, testing restrictions, stockpile life of nuclear systems and survivability of current systems—all of which could generate requirements for new weapons that could not be provided under a freeze.

With regard to the issues concerning the Threshold Test Ban Treaty (TTBT), we expressed support for a 150-kiloton limit on testing and believe that the evidence, because of its statistical nature, can neither prove nor disprove Soviet violations of this yield limit, which has been "in effect" since March 31, 1976. But this certainly does not imply that such support "fits comfortably into the concept of a coming technological 'freeze.'" Further, Mr. Pincus refers to "the Livermore view that the [Threshold Test Ban] treaty should be ratified." We made clear to him that we were expressing our personal opinions; there is no official laboratory position or "Livermore view" regarding either the TTBT or any of the other topics we discussed.

In conclusion, we would like to reiterate that neither we nor presumably the Soviets are near technological limits in nuclear design technology. The idea that policy planners and politicians need no longer worry about either side's being able to come up with some fundamentally new weapon could have very serious consequences if it were used to guide our actions and planning. We know of no way of ensuring an equitable, verifiable means of limiting technological advance in either nuclear warhead design or in the design of the delivery systems. A continuing vigorous research and development program is therefore essential if technological surprise is to be avoided.

R.D. WOODRUFF,
Associate Director, Nuclear Design.
W.F. SCANLIN,
Deputy Associate Director, Military Applications, Lawrence Livermore Laboratory.
Livermore, Calif.

Walter Pincus' article holds out the comforting—albeit illusory—prospect that the Dr. Strangeloves at the Lawrence Livermore National Laboratory "have gone about as far as they can go in developing new nuclear weapons" and so embrace ratification of a stringent Threshold Test Ban Treaty.

While further refinement of fission (atomic) and fusion (hydrogen) weapons has indeed become "marginal," Lawrence Livermore is pushing ahead with the "third generation" of nuclear weapons. These would enhance such specific nuclear effects as directed plasma, electromagnetic pulse or X-ray lasing. For this very reason, Lawrence Livermore physicists and their overseers at the Department of Energy have steadfastly resisted any significant curtailment of the U.S. nuclear testing program.

In 1979, as negotiations on the Comprehensive Test Ban neared completion, Los Alamos National Laboratory director Harold Agnew and Lawrence Livermore director Roger Batzel successfully urged Jimmy Carter not to introduce the treaty. Reportedly, their arguments were based on the need to develop the coming third generation of nuclear weapons.

Only last March, Mr. Batzel testified before the procurement and military nuclear systems subcommittee of the House Armed Services Committee that, "We are still convinced that we need nuclear tests . . . and I would emphasize again that the advanced technologies [third generation] deserve a lot of attention and significant resources."

It is precisely because we have not reached the "technological freeze, a limit imposed by science, not man" that a Comprehensive Test Ban is so urgently needed. But it should be obvious by now that the impetus for such a ban will have to come from the American people and Congress, not from those in the national laboratories who continue to dedicate themselves to refining and enhancing the destructive power of the atom.

DAVID C. MORRISON,
Research Analyst,
Center for Defense Information.
Washington.

KINDNESS IN THE MIDST OF HORROR

Mr. PROXMIRE. Mr. President, in speaking for the ratification of the Genocide Convention, I have often referred to the horrible consequences of the Holocaust and its devastating impact on the personal lives of millions of innocent people. Today, I wish to draw your attention to a handful of fortunate individuals who survived the Holocaust thanks to the extraordinary generosity of two people. A recent article in the New York Times describes their story:

Forty-four years ago Mrs. de Rothschild and her husband, James de Rothschild of the international banking family, arranged for the rescue of 30 boys, ranging from 6 to 14 years in age from a Jewish school in Frankfurt am Main as Europe prepared for war.

They were brought to England in 1939 by emissaries of Mr and Mrs. de Rothschild with the family that cared for them in Frankfurt. They were put up on the edge of the family's 6,000-acre estate at Waddeson in Buckinghamshire, England, in an eight-bedroom house called the Cedars.

For more than 5 years the Cedar Boys, as they were called by the villagers who welcomed them into their schools and homes, lived without word of their families left behind in Germany. By the end of the war most of the boys learned that the war had orphaned them and they scattered to both sides of the Atlantic to start new lives.

The Cedar Boys married, had families, and became ambassadors, professors, engineers, and bakers. Yet, none forgot the kindness of their benefactors. Last month, 15 of the Cedar Boys traveled from the United States, Canada, Israel, and Great Britain to the home of Dorothy de Rothschild in

order to pay tribute to her. "Without her," one of the participants noted, "all of us would have been just a statistic of the Nazi death camps."

The Rothschilds can only be commended for their role in preserving the lives of these men. However, the tragic overtones behind the story of the Cedar Boys cannot be ignored. For every Cedar Boy that survived, 200,000 other Jews perished. Even the Rothschilds were powerless to alter this gruesome fact. No individual can singlehandedly halt the horrors of a campaign of mass annihilation.

For this reason, I urge the Senate to ratify the Genocide Convention. The Genocide Convention defines those actions which, when committed with intent to destroy an ethnic, national, racial, or religious group, consititute the crime of genocide. In addition, it calls on all nations ratifying this convention to make genocide a crime in their own criminal code, consistent with their constitution and legal practice.

With the support of the United States, the Genocide Convention has the potential to accomplish what the Rothschilds could not do: Deter a man such as Hitler from ever again attempting to destroy a people. I urge the Senate to ratify the Genocide Convention.

HONEY IMPORT PROBLEM AND HONEY LOAN PROGRAM

Mr. PRESSLER. Mr. President, recently a group of beekeepers from around the country and I met with Secretary of Agriculture John Block to discuss the honey import problem and the future of the honey loan program. We had a productive meeting, but several statements were made which clearly indicate that Congress must continue to be active in issues concerning the honey industry.

The meeting focused on honey imports and the need for an International Trade Commission investigation of the impact of honey imports on the domestic honey industry. In 1982, over 90 million pounds of honey were imported by the United States, and in the first 6 months of 1983, approximately 50 million pounds of honey have been imported. This is up from 24 million pounds in 1974 and 49 million pounds in 1980. In 1982, domestic producers forfeited over 75 million pounds of domestically produced honey to the Commodity Credit Corporation. This is up substantially from no forfeitures in the 1971 to 1979 period and 6 million pounds in 1980. These statistics illustrate the adverse impact of honey imports on the domestic industry and the need for a section 22 International Trade Commission study of these imports. Unfortunately, the Department of Agriculture does not agree with this assessment.

The Department of Agriculture continues to hold the questionable view that the cause of domestic honey forfeiture is domestic overproduction. USDA argues that support programs encourage overproduction. In most cases, a high support rate may encourage farmers to increase production, but this is not the case in the bee industry. There is a limited amount of flowers or forage from which bees can produce honey. As a result of changes in farming techniques and the loss of farmland and wilderness to development, the areas available to bees are decreasing. Beekeepers also continue to face problems of bee kill caused by the use of crop pesticides. These factors have led to a honey production decline—from an average annual production of approximately 250 million pounds in the 1960's, to production of 199 million pounds in 1980 and 185 million pounds in 1981; 1981 was the last year that production figures were kept, so the exact production for 1982 is not known. However, USDA statistics clearly show that domestic honey production has declined, rather than increased. These statistics would lead us to believe that the honey loan program has not caused honey producers to increase production.

Another response USDA has given beekeepers is that they can increase their pollination fees to compensate for income lost if the honey loan program were eliminated. The fact of the matter is that over 90 percent of the beekeepers in the United States do not receive any pollination fees. Almost all crops are pollinated by bees free of charge. The reason that pollination fees are so unusual is that the flight of bees cannot be controlled. It is hard to calculate appropriate pollination fees. If one farmer hires a beekeeper to pollinate his crop, then the surrounding fields also may receive pollination benefits. There is no way to determine which farmers specifically benefit from which bees. An increase in beekeepers' pollination fees is not a feasible alternative to the honey loan program.

The Department of Agriculture's responses only confirm the need for an International Trade Commission study to determine the degree of adverse impact of honey imports and to make an action recommendation. A study by USDA on the actual working of the honey industry might also be advised. I share the administration's concern about the increased cost of the program—as do the beekeepers—but the answer to the problem is not the elimination of the honey loan program. The elimination of the program would only rapidly accelerate the decline in the number of beekeepers and bee colonies in the United States. That decline would then have a severely negative impact on the production of nearly 100 different crops in the United States. It is not known how many bees are needed to pollinate all of these crops, but experts predict that if there is any further decline in bee numbers, we will also see a decline in the production of many crops in the United States because of inadequate pollination. In short, we can import honey, but we cannot import the pollination benefits. We must maintain a strong beekeeping industry if we are to maintain a strong agricultural economy.

I urge my colleagues to join me in our efforts to call an International Trade Commission investigation of the impact of honey imports and to maintain the honey loan program.

KOREAN WAR MEMORIAL

Mr. PRESSLER. Mr. President, during the August recess, I held a veterans workshop in South Dakota with Senator SIMPSON and the Korean war memorial was mentioned by numerous veterans. I have always supported such a memorial and I urge my colleagues to join in making this a reality.

Earlier this year I cosponsored Senate Joint Resolution 97, a resolution to authorize the building of a Korean war memorial on public grounds in the District of Columbia or its environs. It seems only fitting that the many courageous men and women who served in Korea be recognized for their dedicated service. Without their countless sacrifices, the defense of democracy in Korea would not have been possible.

The United States joined 15 other United Nations countries in committing troops to defend South Korea. We were also one of 41 countries to provide equipment and supplies. The United States provided over 90 percent of the troops, military equipment, and supplies. The Korean war was one of the bloodiest wars ever fought. Approximately 580,000 United Nations and South Korean soldiers were killed, wounded, or reported missing. Of the 6.8 million Americans who served in Korea, over 54,000 were killed and more than 100,000 were wounded.

Mr. President, over 5.7 million Korean war veterans reside in the United States today with no national memorial to commemorate their tremendous sacrifices, nor those of their fallen comrades in arms. In years past, I spoke out frequently in favor of a memorial for our Vietnam veterans. This dream was realized with the dedication of the Vietnam Veterans Memorial in November 1982. It is time we now focus our efforts on seeing that our Korean war veterans receive the recognition they so richly deserve.

MEDICAL SCHOOLS KEY TO VETERANS HEALTH

Mr. PRESSLER. Mr. President, in August, I had the privilege of hosting a veterans workshop in Rapid City, S. Dak. Joining me for this important event was Senator ALAN SIMPSON, chairman of the Senate Veterans' Affairs Committee. We were personally advised of many South Dakota veterans concerns and heard excellent presentations from veterans of Foreign Wars, American Legion, and Disabled American Veterans representatives.

One of the most significant events of the day was University of South Dakota Medical School Dean Dr. Robert Quinn's briefing on the ties between the USD Medical School and South Dakota's VA medical centers at Fort Meade, Hot Springs, and Sioux Falls. The text for Dr. Quinn's briefing was written by the USD Medical School's western South Dakota representative, Dr. Joseph Hamm. Mr. President, the crucial role played by the USD Medical School and medical schools around the country in veterans health care should be recognized by all. Without it, our often spartanly staffed VA centers would surely suffer.

Mr. President, I ask unanimous consent that the text of the presentation made by Dr. Quinn at the workshop be printed at this point in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS FROM THE UNIVERSITY OF SOUTH DAKOTA SCHOOL OF MEDICINE PRESENTED AT THE VETERANS WORKSHOP CONDUCTED BY SENATOR LARRY PRESSLER AND SENATOR ALAN SIMPSON

The Veterans Administration is affiliated with over 1,000 educational institutions. Since 1946, the affiliation of VA health care facilities with educational institutions has been a shared responsibility for insuring the maintainance of high quality health care to veterans. During the year of 1982, 132 VA health care facilities and 40 outpatient clinics were affiliated with 100 medical schools. Affiliation agreements between VA medical centers and medical schools are implemented through deans committees which advise the medical center directors and the Chief Medical Director on the education and research programs of VA facilities.

The School of Medicine of the University of South Dakota benefited greatly from the support of the VA when the school expended to a four-year, degree granting curriculum in 1974. An affiliation agreement was executed between the school and the VA Medical Center in Sioux Falls, S.D. promptly after the conversion to a four-year program. A Deans committee was appointed to implement the affiliation agreement. As teaching sites were established in western South Dakota, affiliation agreements were implemented at the VA health facilities at Fort Meade and Hot Springs.

The major contribution of the school is the recruitment and retention of highly qualified physicians to provide optimal care for the veteran patients. Teaching institutions tend to attract outstanding physicians to the more rural areas such as South Dakota. As a result more sophisticated diagnostic and treatment modalities are available at a local level. Less travel is required and there is less disruption of the life of the families and patients. Significant saving of time and money is effected. While the impact of the affiliation is more apparent at the Sioux Falls center where it was first established, similar benefits are developing at the VA centers in western South Dakota. Four fully trained specialists from the University of South Dakota School of Medicine now serve as staff physicians at one center.

The school highly values the resources of the VA facilities as teaching resources, and includes them in long range plans. Full-time faculty of the school make regular visits to the VA facilities for teaching sessions, and are available for consultation by telephone as well. A teleconferencing capability has been developed conjointly by the VA and the School of Medicine. Administrative as well as educational programs are conducted on a regular basis. This program has been proven both functional and cost effective.

Many medical students took advantage of a tuition waiver granted by the State of South Dakota for students who practiced in designated sites within the state following graduaiton and training. VA facilities have been included as designated sites for this prupose. This tuition waiver program has been discontinued.

The complexity of a school of medicine make long-range planning imperative. The School must be permitted to participate in the planning of institutions where its educational programs are conducted. This is particularly true at VA medical centers in South Dakota where a continuing and hopefully expanding affiliation is anticipated. Inexpected changes in mission and services provided to patients have serious consequences for the School as well as for patient care. The school offers continued support for the affiliated facilities, and hopes to continue on-going dialogue pertaining to mutual interests with them. To implement these plans, the school respectfully requests a participating role in the planning process of the affiliated VA medical centers.

TRIBUTE TO B. C. INABINET, JR.

Mr. THURMOND. Mr. President, in today's rapidly moving society, it is sometimes difficult to measure the impact of one person's life. While there are many people who reach high levels of achievement, few are irreplaceable.

It is with deep sadness that I note the loss of my dear friend, B. C. Inabinet, Jr., of Columbia, S.C., who passed away August 7, 1983. He was a man who, judged by his contributions to society, cannot be replaced. I rise today to express my deepest sympathy to his family and friends.

This man possessed an enthusiasm and aggressiveness which matched his imposing stature. The full scope of B. C. Inabinet's life is immeasurable, for he touched so many people in so many different walks of life.

Mr. Inabinet first made his presence known on the playing fields of Dreher High School in Columbia during the 1950's. It was immediately recognized that this young man was going places. With a vigor and style that exemplified his approach to life, B. C. Inabinet boosted the team to an undefeated season and a State championship title in 1951.

From there he donned the uniform of the Clemson Tigers and, under the tutelage of the great coach Frank Howard, soon became one of the greatest athletes in the history of that institution.

Clemson was to become one of the main objects of this man's promotional abilities. He saw a great need to boost not only the athletic program, but the academic program as well. His efforts gained him the title of Clemson's first "ambassador at large." He was also selected as chairman of the Richland County IPTAY Club, an athletic booster group; president of the Columbia Clemson Club; and Clemson Man of the Year.

In business, Mr. Inabinet likewise excelled. He founded Defender Industries, an industrial maintenance firm, which today employs more than 8,000 people in 22 States and is recognized as the Nation's largest firm of its type.

Mr. Inabinet was also active in civic affairs and served as a member of the Greater Columbia Chamber of Commerce and the South Carolina Chamber of Commerce. He was a board member of the Columbia YMCA, the United Community Service, and the Columbia Touchdown Club.

He additionally sought to play a role in the direction of government by actively serving in several Republican political campaigns. I always valued his political advice and called on him frequently for counsel.

Mr. President, I take this opportunity to pay tribute to this exceptional American, who will always be remembered as a kind and compassionate citizen who placed the good will of others first.

In an effort to share the story of this man's life with my colleagues, I ask unanimous consent that an article from the Columbia, S.C., State newspaper be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the State, Aug. 14, 1983]

INABINET'S HALLMARKS: GENEROSITY, GENIALITY

Many of Frank Howard's football players at Clemson have become his lifelong friends. But none was closer to the old coach than B. C. Inabinet. The big tackle from Columbia was almost family to Howard.

They had lots of laughs on the banquet circuit. "Me and ole B.C." is the way Howard would start the stories. Among his favorites was this one.

"Me and ole B.C. went to a pizza parlor and he ordered a giant-sized one. When the waitress brought it to him, she asked him if he wanted it cut in four or six pieces. 'Better make it four,' B.C. replied. 'Don't know if I could eat six or not.' "

A rube he wasn't, but the big fellow who managed the largest industrial maintenance firm in the world enjoyed being Howard's straight-man. "I kidded him a lot," Howard said the other day, "but I loved that old boy and admired him. He was a self-made somebody.

"Some people inherit their businesses. B.C. built his. He started out real small and ended up real big. He was the best salesman there ever was. You just couldn't hardly say no to him."

DEVOTED FAN

Inabinet died last Sunday at age 49. "He was at the peak of life," reflected Howard. "He had everything, most of all a lot of friends. B.C. was nice to everybody."

Inabinet was founder and chairman of Defender Industries, which employs 8,000 persons with offices in 22 states. "I never knew a harder worker," declared Howard. "He had it all, but he didn't take enough time off to enjoy it."

One thing Inabinet did not allow work to interfere with was football at Clemson. He wouldn't dare miss a game, home or away. There never has been a more devoted Tiger fan or more generous contributor to Clemson causes. If anything, he may have been too supportive of sports.

He simply wanted Clemson to be the best in sports and in all fields. He was Tiger Rag, Tiger Paw, Orange and White from head to toe, Mr. Clemson, but also a man of good cheer who numbered scores of Carolina grads among his friends.

B.C. never had time to get mad at anybody. He was too busy liking people. If he had a fault it may have been that he was naive about this crusty old world and its inhabitants. He thought we were all supposed to get along and enjoy life.

MEETING PLACE

The Holiday Inn is Frank Howard's favorite hangout in Clemson. He entertains employees and guests daily. He often met Inabinet there.

"If I got there first, I'd pull up two chairs and tell him to sit down in them when he arrived," Howard recalls.

Big was the descriptive word for Inabinet, the one that captured him. He was big in body, in business, in the community and the state and in the heart.

Generosity and geniality were his hallmarks. He enjoyed a laugh as much as anybody ever has, and he'd give the shirt off his back to anyone who needed it.

He lettered in football at Clemson and made his mark in the business world. But he will be remembered most as a likeable fellow and compulsive contributor to worthy causes. Frank Howard and many other South Carolinians mourn his loss.

[From the State, Aug. 8, 1983]

DEFENDER INDUSTRIES FOUNDER DEAD AT 49

Columbia businessman and former Clemson University football star B. C. Inabinet Jr., 49, died Sunday at Duke University Medical Center in Durham, N.C.

Inabinet was the founder and chairman of Defender Industries, which he started in the late 1950s and which has grown into the largest industrial maintenance firm in the nation.

But Inabinet perhaps was more widely known for his role with Clemson University, where he was one of the largest football tackles in the school's history at the time, and he was an equally large supporter of Clemson athletics after his graduation.

He was born in Columbia, the son of former Columbia police detective Benjamin C. Inabinet and Sarah Abrams Inabinet. He graduated from Dreher High School, where he was a High School All-America in football.

He graduated from Clemson University in 1956, where he was an honorable mention All-America tackle. He was a fourth-round draft choice in 1956 of the Baltimore Colts of the National Football League and played with the Hamilton Tiger-Cats of the Canadian Football League.

But an injury forced Inabinet to the sidelines, and he returned to Columbia and founded Defender Industries. The company handles industrial maintenance for major firms. It has 8,000 employees in 22 states, and 1980 annual sales reached $30 million.

Among Defender's clients are Du Pont, J. P. Stevens, Dow Chemical, Milliken & Co., Kelly Springfield and General Tire.

Defender Industries also spawned many subsidiaries, and Inabinet was constantly on the go developing businesses.

He was also head of Defender Chemical Co. in Columbia and of Resort Data System, Links Golf & Racquet Club and Beach House Golf & Racquet Club, all in Myrtle Beach. He owned The Bounty Restaurant off U.S. 378 east of Columbia.

"He has done an awful lot for Clemson, Columbia and the state of South Carolina," said Thomas B. McTeer, former chairman of Clemson University's board of trustees and who attended Clemson with Inabinet.

"He was in a lot of things," said McTeer, adding that Inabinet was a big contributor "in time spent and involvement" as well as the money he put forth to back various activities.

"It's a big loss to a lot of people," he said.

"He was one of our outstanding successes," said Clemson University President Bill L. Atchley. "He was a kind person. He will be missed by us all."

Inabinet and Clemson were almost inseparable.

After returning to Columbia, he established the Greater Columbia Clemson Club, which grew from a small group to one of the largest Clemson clubs in the nation.

He continually aided Clemson's athletic and academic scholarship programs.

He was the first Ambassador At Large for Clemson University and was a "Clemson Man of the Year." He was a member of the Clemson Alumni Association and past chairman of Richland County IPTAY, a Clemson athletic booster organization.

He was also active in local civic affairs, including the Greater Columbia Chamber of Commerce and the Committee of One Hundred, the private-sector promotional arm for the Columbia area Economic Development Commission.

He was chairman of the South Carolina Employers' Support for the Guard and Reserve. He was on the board of the Columbia Civitan Club, the Columbia YMCA, United Community Service and the Columbia Touchdown Club.

In 1963, he was South Carolina's nominee for the nation's Outstanding Men in America. He was a member of the Elks Club. He was a member of the Columbia Scottish Rite Temple and Omar Shrine Temple. He was also a member of Columbia Country Club.

He served on the campaign staffs for Sen. Strom Thurmond, R.-S.C., former Gov. James B. Edwards and former 2nd District Congressman Albert Watson. He served as finance chairman for Thurmond in several political campaigns.

He was a member of Shandon United Methodist Church.

Surviving are his widow, Kathryn Caughman Inabinet; daughters, Mrs. Kathy Chrisley and Miss Dixie Inabinet of Columbia; a son, Benjamin C. Inabinet III of Columbia; a brother, Ralph Inabinet of Columbia; and a sister, Sarah Ann Inabinet of Columbia.

Services will be at 3 p.m. Tuesday at Shandon United Methodist Church with burial in Greenlawn Cemetery.

Pallbearers will be Ed Bartos, William Barr, Hollis Cone, John Earl Dennis, James Hurtenstein, Henry Jaudan, Charles Kronenwetter and Roy Shriver.

Honorary pallbearers will be Sen. Strom Thurmond, R-S.C.; Rep. Floyd D. Spence, R-S.C.; former Clemson football coach Frank Howard; current Clemson football coach Danny Ford; Clemson Athletic Director William McLellan; Ken Stiles, Paul Lohman, Byrnes Bryant, Don Kelley and Carl Brazell.

Memorials may be made to Carolina Children's Home, the Heart Fund, the Kidney Foundation and the Shriners Hospital for Crippled Children in Greenville.

Dunbar Funeral Home, Devine Street Chapel, is in charge.

[From the Greenville News, Aug. 8, 1983]

B. C. INABINET WAS CLEMSON'S "BIGGEST" FAN

Whenever the name B. C. Inabinet was mentioned, most people immediately thought of tiger paws, orange and white and "Death Valley."

Although Inabinet founded Defender Industries and built it into the largest industrial maintenance firm in the nation, it often seemed just a sideline for the Columbia native. His main "occupation" was following and supporting Clemson athletics.

There wasn't anything fake about Inabinet's devotion to the Tigers. Unlike many a philanthropist whose donations are given with self-serving aims in mind, Inabinet had a genuine interest in Clemson; a love affair, really.

He was jokingly known as one of Clemson's "biggest" supporters because of his size. He stood 6-7 and tipped the scales at more than 400 pounds at his heaviest. He became a straight man for many of the quips from Clemson's legend in residence, Frank Howard. While the weight brought some laughs, Inabinet also knew it brought some problems, too. So less than a year ago, he decided to try to shed around 150 pounds.

He underwent treatment at Milledgeville, Ga., but had to be flown to the Duke University Medical Center in late June after complications from gastric bypass surgery. He died there yesterday at age 49.

To say Clemson will miss B. C. Inabinet is to make one of the decade's understatements. But others outside the Clemson community will miss him, too. Those who knew him as a good-natured, jovial guy who always seemed to have time for a friendly chat will find it hard to believe that he's no longer around.

Although Inabinet was understandably proud of his business accomplishments, his work in the community and his support of the Tigers, he probably would rather be remembered most as a football player. In view of his other accomplishments, many people often forgot that he once played the game and was pretty good at it, too.

A TIGER FOOTBALL PLAYER

The story of B. C. Inabinet, football player, began back in the early 1950s when he was a lineman at Dreher High School. Then a mere 245-pounder, he was one of the reasons the Blue Devils went undefeated in 1951 and claimed the state championship.

It was a talented team that also featured Joel Wells, later a star as a halfback at Clemson, and Carl Brazell and Crosby Lewis, both future standouts at the University of South Carolina.

From Dreher, Inabinet headed to Clemson, where Frank Howard was in the midst of abandoning the single-wing formation for the T. It was rough going for a while as the Tigers won a total of five games during the 1952 and 1953 seasons.

In 1954, things began to change. Clemson split 10 games, but the victory total included an upset of a good Florida team. "Florida was supposed to kill us that year," Inabinet once recalled. "But we went down there and beat them 14-7, and coach Howard still calls it one of the best victories he ever had."

That same season also saw Inabinet, a tackle, play probably his best game ever in Clemson's 32-20 win over Wake Forest. Howard called the 59-minute head-to-head duel with Wake's highly touted Bob Bartholomew one of the best performances ever by a Clemson player.

But it was his senior season (1955) that Inabinet used to remember most fondly.

FINALLY BEATING THE GAMECOCKS

The '55 squad represented a turning point for Tiger football, laying the foundation for a Clemson winning tradition that did not end until 1964. With Inabinet as a starter, the Tigers went 7-3, whipped Georgia handily, challenged for the ACC title and, for the first time since 1948, defeated South Carolina, 28-14.

"That was a great thrill, beating South Carolina that year," Inabinet said a few years ago. "We kinda figured we turned the series around for a while. I think Clemson won five of the next six with the Gamecocks."

After the season, Inabinet participated in the Blue-Gray game and the East-West Shrine Game in San Francisco. He may have been the only guy to play in both the High School Shrine Game in Charlotte and the College Shrine Game.

When an injury halted any thoughts of a pro career after he spent the 1956 season in the Canadian Football League, Inabinet returned to Clemson to do some graduate work and helped coach the Tiger freshmen team to an undefeated season. A few years later, he was on his way to business success with Defender Industries.

"I don't guess I've done too badly for an old country boy from Swansea," Inabinet used to say, laughing his big laugh.

That laugh was infectious. It will be missed.

RECESS UNTIL 2 P.M.

Mr. BAKER. Mr. President, there is an order for the Senate to recess at 10:30 a.m. Morning business would continue until that hour. I see no one seeking recognition, however.

Let me say if there is a need for further time for the transaction of routine morning business, I will ask the Senate to make that provision later in the day.

In light of that, I ask unanimous consent, Mr. President, that the Senate now stand in recess, in accordance with the order previously entered, until the hour of 2 p.m. today.

There being no objection, the Senate, at 10:23 a.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

RADIO MARTI

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, will the Chair please state the pending business?

The PRESIDING OFFICER. The pending business is a motion to proceed to the consideration of S. 602.

Mr. BAKER. Mr. President, I hope this matter can be resolved in a fairly short period of time. Senators on both sides of the aisle have been in caucuses, as we always are on Tuesdays, and the principals in this controversy are not on the floor at this moment. They will be here shortly. In the meantime, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LUGAR). Without objection, it is so ordered.

Mr. EXON. Mr. President, here we are once again debating the issue of whether or not to establish Radio Marti—a proposal which is ill advised from just about any standpoint I can imagine.

Congress and the rest of out Government are supposed to solve the problems of our country, not create them. Last December several of us made our objections known to the Senate regarding the proposal and we succeeded in killing the legislation. Unfortunately, we are being asked again to approve Radio Marti even though the proposal has changed very little from last year's version. Radio Marti was not in the best interest of our country in 1982 and it is not in our interest in 1983. I have two principal objections.

First, on foreign policy grounds, Radio Marti is another example of the administration's propensity for picking the wrong time and place to appear tough. Mr. President, I strongly oppose Fidel Castro and all he represents. I think everyone in the Senate shares that view and our degree of disdain for the Government of Cuba is not an issue here. I support our longstanding economic embargo of Cuba as well as other steps to counter Castro's attempted export of revolution in our hemisphere, as well as in Angola and Ethiopia.

Given that background, why do we want to challenge Castro in one of the few areas where he can effectively strike back at us? Why are we proposing to hand him a victory over the United States on a platter? Let us follow the scenario out to its logical conclusion: The United States begins Radio Marti broadcasts to Cuba. Castro effectively jams the broadcasts with assets he already has in place. I will discuss the effects of Cuban jamming later in my remarks. The United States protests, to no avail of course, because we began the radio war escalation. Castro refuses to stop jamming Radio Marti. What do we do then? What means, short of the use of force, do we utilize at that point to solve this problem we created?

You see, Mr. President, the proposal is not well thought out because its proponents have not and cannot explain what will occur at the end of a predictable chain of events begun by the United States.

The Cubans have jammed U.S. AM radio broadcasts for years on a periodic basis. Last summer, probably as a reaction to the Radio Marti proposal, they turned up the volume of the jamming and disrupted our stations one night. We need to negotiate an end to this kind of interference and there are some cautious signs that we are making some progress in this area. The U.S. Government is supposed to be a beacon of strength for the free world. Let us not sink down to Fidel Castro's level by playing a macho game of seeing which country can outdo the other in radio interference. This becomes evident especially when we consider that Castro will dispose of Radio Marti through jamming in short order. The Cuban people will never hear it.

Even if my foreign policy objections were somehow successfully dealt with, the ramifications to our own citizens as a result of Radio Marti lead to my second set of objections. If the proposal is approved, we will end up hurting our listening public much more than we will hope to inform the Cuban people. As I have indicated, Castro can and will jam Radio Marti broadcasts.

Mr. President, the AM radio broadcasting spectrum is already crowded and directional antennas are already necessary due to the high demand for space on the AM band. Our people, and especially our farming communities, rely heavily on radio broadcasts. The State Department held lenghty negotiations with the National Association of Broadcasters and the issue of interference and jamming could not be resolved. Despite this impasse, however, the administration has chosen to press ahead anyway, and now supports a set of cosmetic changes added to this bill during recent congressional action.

I am referring to the provision in the bill before us to provide $5 million in compensation for broadcasters for facility adjustments required to overcome Cuban interference. I find this most interesting, Mr. President. Especially since between 1,200 and 2,000 U.S. radio stations are likely to suffer substantial interference and revenue losses as a result of stepped-up Cuban interference.

First, this provision acknowledges that there will be substantial interference problems which are unresolved and which will be exacerbated by Radio Marti. Second, with all of the radio stations which can and will be affected adversely by this proposal, $5 million will not even come close to doing the job. So the proponents are making a half-hearted and wholly inadequate attempt at mitigating this problem. How much are we willing to pay our own broadcasters just to try to harass Castro a little bit with a scheme that will not even work?

In short, Mr. President, this is one of the most ill-advised proposals I have seen since I have been a Member of the Senate. It will not accomplish its stated objective. Instead it will only hurt our own radio listening public. If we really want to better inform the Cuban people, then there are better ways to accomplish that goal and I will be supporting measures such as expanding the current Voice of America broadcasts. Our hemispheric image and best interests would be better served in this manner and the American people will be better served as well.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, the motion pending before the Senate, I believe, is the motion to proceed to the consideration of Radio Marti, is it not?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Mr. President, I am hopeful there will be no further dispute on that motion. I would inquire of Senators if they have further statements to make pursuant to rule XXII on that measure, otherwise I am prepared for the Senate to put the question on the motion to proceed.

Mr. WEICKER. Mr. President, reserving the right to object, I wonder if I might just consult for a moment with the majority leader before I accept the motion?

Mr. BAKER. Mr. President, I would urge Members to consider whether they have further matters to discuss in respect to the debate on the motion to proceed to the consideration of this item. Otherwise I am prepared for the Chair to put the question.

The PRESIDING OFFICER. The question is on agreeing to the motion. [Putting the question.]

The motion was agreed to.

The PRESIDING OFFICER. The clerk will report the bill by title.

The bill clerk read as follows:

A bill (S. 602) to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Foreign Relations with an amendment:

On page 5, after line 15, insert:

FACILITY COMPENSATION

SEC. 6. The Board for International Broadcasting Act of 1973 is amended by adding a new section 13 at the end thereof:

"SEC. 13. (a) It is the intent of the Congress that the Secretary of State should seek prompt and full settlement of United States claims against the Government of Cuba arising from Cuban interference with broadcasting in the United States. Pending the settlement of these claims, it is appropriate to provide some interim assistance to the United States broadcasters who are adversely affected by Cuban radio interference and who seek to assert their right to measures to counteract the effects of such interference.

"(b) Accordingly, the Board for International Broadcasting shall make payments to the United States radio broadcasting station licensees upon their application for expenses which they have incurred or will incur in mitigating, pursuant to special temporary authority from the Federal Communications Commission, the effects of activities by the Government of Cuba which directly interfere with the transmission or reception of broadcasts by these licensees. Such expenses shall be limited to the costs of equipment (replaced less depreciation) and associated technical and engineering costs.

"(c) The Board for International Broadcasting shall issue such regulations and establish such procedures for carrying out this section as the Board finds appropriate. Such regulations shall be issued no later than one hundred and eighty days after enactment of this Act.

"(d) There are authorized to be appropriated to the Board for International Broadcasting, $5,000,000 for use in compensating United States radio broadcasting licensees pursuant to this section. Amounts appropriated under this section are authorized to be available until expended.

"(e) Funds appropriated for implementation of this section shall be available for a period of no more than four years following the initial broadcast occurring as a result of programs described in this Act.

"(f) This section shall enter into effect on October 1, 1984.".

So as to make the bill read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Radio Broadcasting to Cuba Act".

DECLARATION OF ADDITIONAL PURPOSES

SEC. 2. Section 2 of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2871) is amended—

(1) by inserting "(a)" immediately after "SEC. 2."; and

(2) by adding at the end of the section the following:

"(b) The Congress further finds and declares—

"(1) that, consonant with this policy set out in subsections (a) (1) and (2), radio broadcasting to Cuba may be effective in furthering the open communication of accurate information and ideas to the people of Cuba, in particular information about Cuba; and

"(2) that such broadcasting to Cuba, operated in a manner not inconsistent with the broad foreign policy of the United States and in accordance with high professional standards, would be in the national interest.".

ADDITIONAL FUNCTIONS OF THE BOARD

SEC. 3. Section 4 of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2873) is amended by adding at the end thereof the following:

"(c) In order to further carry out the purposes set forth in section 2 of this Act, the Board is authorized to provide for the open communication of information and ideas through the use of radio broadcasting to Cuba. The Board may carry out this subsection by means of grants, leases, or contracts (subject to the availability of appropriations), or such other means as the Board determines will most effectively carry out the purposes set forth in section 2. With respect to grants to or leases or contracts with a separate entity or other means of carrying out broadcasting to Cuba, the Board shall have the same authorities as those detailed in section (a) of this section.

"(d) Radio broadcasting to Cuba under this Act shall serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news.

"(e) Any broadcasting to Cuba in accordance with subsections (c) and (d) on the amplitude modulation (AM) band (535 kHz to 1605 kHz), other than that conducted by means of leasing time on commercial or noncommercial educational radio broadcasting stations, shall be limited to the frequency used by the Voice of America for its broadcasts from the facilities located at Marathon, Florida. In the event that broadcasting is conducted on the frequency used by the Voice of America, the Voice of America broadcasting facilities located at Marathon, Flordia, may also be used for the purposes of this Act.".

ASSISTANCE FROM OTHER GOVERNMENT AGENCIES

SEC. 4. The Board for International Broadcasting Act of 1973 is amended by adding at the end thereof the following:

"ASSISTANCE FROM OTHER GOVERNMENT AGENCIES

SEC. 12. In order to assist the Board in carrying out the purposes set forth in section 2 of this Act, any agency or instrumentality of the United States may sell, loan, lease, or grant property (including interests therein) and may perform administrative and technical support and services at the request of the Board. Support and services shall be provided on a reimbursable basis, which reimbursement shall be credited to the appropriation from which the property, support, or service was derived.".

MERGER OR BOARDS OF DIRECTORS

SEC. 5. (a) Section 11 of the Board for International Broadcasting Act of 1973 is amended by adding at the end thereof the following:

"(c) No grant may be made under this Act to Radio Broadcasting to Cuba, Incorporated, or any other corporation established to provide radio broadcasting to Cuba, unless such corporation provides in its certificate of incorporation that—

"(1) the Board of Directors of such corporation shall consist of the members of the Board for International Broadcasting and no other members; and

"(2) such Board of Directors shall make all major policy determinations governing the operation of such corporation and shall appoint and fix the compensation of such managerial officers and employees of such corporation as it deems necessary to carry out the purposes of this Act.

Compliance with the requirements of this subsection shall not be construed to make such corporation a Federal agency or instrumentality.".

(b) The section heading for section 11 of the Board for International Broadcasting Act of 1973 is amended to read as follows:

"MERGER OF BOARDS OF DIRECTORS"

FACILITY COMPENSATION

SEC. 6. The Board for International Broadcasting Act of 1973 is amended by adding a new section 13 at the end thereof:

"SEC. 13. (a) It is the intent of the Congress that the Secretary of State should seek prompt and full settlement of United States claims against the Government of Cuba arising from Cuban interference with broadcasting in the United States. Pending the settlement of these claims, it is appropriate to provide some interim assistance to the United States broadcasters who are adversely affected by Cuban radio interference and who seek to assert their right to measures to counteract the effects of such interference.

"(b) Accordingly, the Board for International Broadcasting shall make payments to the United States radio broadcasting station licensees upon their application for expenses which they have incurred or will incur in mitigating, pursuant to special temporary authority from the Federal Communications Commission, the effects of activities by the Government of Cuba which directly interfere with the transmission or reception of broadcasts by these licensees. Such expenses shall be limited to the costs of equipment (replaced less depreciation) and associated technical and engineering costs.

"(c) The Board for International Broadcasting shall issue such regulations and establish such procedures for carrying out this section as the Board finds appropriate. Such regulations shall be issued no later than one hundred and eighty days after enactment of this Act.

"(d) There are authorized to be appropriated to the Board for International Broadcasting, $5,000,000 for use in compensating United States radio broadcasting licensees pursuant to this section. Amounts appropriated under this section are authorized to be available until expended.

"(e) Funds appropriated for implementation of this section shall be available for a period of no more than four years following the initial broadcast occurring as a result of programs described in this Act.

"(f) This section shall enter into effect on October 1, 1984.".

Mr. BAKER. Mr. President, I do not expect this is going to take very long, and I urge Members to keep their presentations as brief as possible because we are going to take a fair amount of time yet today on the next measure, which is the Department of Defense authorization conference report.

I thank all Senators for cooperating and making it possible to reach this measure at this time in this manner, and I yield the floor.

AMENDMENT NO. 2131

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Florida (Mrs. HAWKINS), for herself and others, proposes an amendment numbered 2131.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HAWKINS. Mr. President, I would like the RECORD to reflect that I am sending this amendment to the desk on behalf of myself, Senator CHILES, Senator BAKER, Senator ZORINSKY, Senator WEICKER, and Senator GRASSLEY.

The PRESIDING OFFICER. The amendment is a complete substitute for the bill and it is not in order until the committee amendment has been disposed of.

Mr. BAKER. Mr. President, are there committee amendments?

The PRESIDING OFFICER. One committee amendment.

Mr. BAKER. Will the Chair then put the question on the adoption of the committee amendment?

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. BYRD. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BYRD. Is it one amendment or is it amendments en bloc?

The PRESIDING OFFICER. One amendment.

Mr. BYRD. I thank the Chair.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the committee amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, just so everybody understands, the compromise reached on this matter is an amendment to the committee amendment, and I assume now the committee amendment—was there a unanimous-consent request that it be treated as original text for the purpose of further amendment?

The PRESIDING OFFICER. There was not such a request, but it would not be required at this point.

Mr. BAKER. This would be a second-degree amendment?

The PRESIDING OFFICER. This would be a complete substitute for the bill.

Mr. BAKER. Very well. I thank the Chair and I once more yield the floor.

The PRESIDING OFFICER. The clerk will report the amendment of the Senator from Florida.

The bill clerk read as follows:

The Senator from Florida (Mrs. HAWKINS) for herself and others proposes and amendment numbered 2131.

Mrs. HAWKINS, Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following: That this Act may be cited as the "Radio Broadcasting to Cuba Act".

FINDINGS; PURPOSES

SEC. 2. The Congress finds and declares—

(1) that it is the policy of the United States to support the right of the people of Cuba to seek, receive, and impart information and ideas through any media and regardless of frontiers, in accordance with article 19 of Universal Declaration of Human Rights;

(2) that, consonant with this policy, radio broadcasting to Cuba may be effective in furthering the open communication of accurate information and ideas to the people of Cuba, in particular information about Cuba; and

(3) that such broadcasting to Cuba, operated in a manner not inconsistent with the broad foreign policy of the United States and in accordance with high professional standards, would be in the national interest.

(4) that the Voice of America already broadcasts to Cuba information that represents America, not any single segment of American society, and includes a balanced and comprehensive projection of significant American thought and institutions but that there is a need for broadcasts to Cuba which provide new commentary and other information about events in Cuba and elsewhere to promote the cause of freedom in Cuba.

ADDITIONAL FUNCTIONS OF THE UNITED STATES INFORMATION AGENCY

SEC. 3. (a) In order to carry out the objectives set forth in section 2, the United States Information Agency (hereafter in this Act referred to as the "Agency") shall provide for the open communication of information and ideas through the use of radio broadcasting to Cuba. Radio broadcasting to Cuba shall serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news.

(b) Radio broadcasting in accordance with subsection (a) shall be part of the Voice of America radio broadcasting to Cuba and shall be in accordance with all Voice of America standards to ensure the broadcast of programs which are objective, accurate,

balanced, and which present a variety of views.

(c) Radio broadcasting to Cuba authorized by this Act shall utilize the broadcasting facilities located at Marathon, Florida and the 1180 AM frequency that were used by the Voice of America prior to the date of enactment of this Act. Other frequencies, not on the commercial Amplitude Modulation (AM) Band (535 kHz to 1605 kHz), may also be simultaneously utilized provided that no frequency shall be used for radio broadcasts to Cuba in accordance with this Act which is not also used for all other Voice of America broadcasts to Cuba. Time leased from non-governmental shortwave radio stations may be used to carry all or part of the Service programs and to rebroadcast Service programs, provided that not less than 30 percent of the programs broadcast or rebroadcast shall be regular Voice of America broadcasts with particular emphasis on news and programs meeting the requirements of section 503(2) of P.L. 80-402.

(d) Notwithstanding subsection (c), in the event that broadcasts to Cuba on the 1180 AM frequency are subject to jamming or interference greater by 25 percent or more than the average daily jamming or interference in the 12 months preceding September 1, 1983, the Director of the United States Information Agency may lease time on commercial or non-commercial educational AM band radio broadcasting stations. The Federal Communication Commission shall determine levels of jamming and interference by conducting regular monitoring of the 1180 AM frequency. In the event that more than two hours a day of time is leased, not less than 30 percent of the programing broadcast shall be regular Voice of America broadcast with particular emphasis on news and programs meeting the requirements section 503(2) of P.L. 80-402.

(e) Any program of United States Government radio broadcasts to Cuba authorized by this section shall be designated "Voice of America: Cuba Service" or "Voice of America. Radio Marti Program".

(f) In the event broadcasting facilities located at Marathon, Florida, are rendered inoperable by natural disaster or by unlawful destruction, the Director of the United States Information Agency may, for the period in which the facilities are inoperable but not to exceed 150 days, use other United States Government-owned transmission facilities for Voice of America broadcasts to Cuba authorized by this Act.

CUBA SERVICE OF THE VOICE OF AMERICA

SEC. 4. The Director of the United States Information Agency shall establish within the Voice of America a Cuba Service (hereafter in this section referred to as the "Service"). The Service shall be responsible for all radio broadcasts to Cuba authorized by section 3. The Director of the United States Information Agency shall appoint a head of the Service and shall employ such staff as the head of the Service may need to carry out his duties. The Cuba Service shall be administered separately from other Voice of America functions and the head of the Cuba Service shall report directly to the Director and the Associate Director for Broadcasting of the United States Information Agency.

BOARD FOR RADIO BROADCASTING TO CUBA

SEC. 5. (a) There is established within the Office of the President the Advisory Board for Radio Broadcasting to Cuba (hereafter in this Act referred to as the "Board"). The Board shall consist of 9 members, appointed by the President by and with the advice and consent of the Senate, of whom not more than 5 shall be members of the same political party. The President shall designate one member of the Board to serve as Chairman.

(b) The Board shall review the effectiveness of the activities carried out under this Act and shall make such recommendations to the President, the Director and the Associate Director for Broadcasting of the United States Information Agency as it may deem necessary.

(c) In appointing the initial voting members of the Board, the President shall designate 3 members to serve for a term of three years, 3 members to serve for a term of two years, and 3 members to serve for a term of one year. Thereafter, the term of each member of the Board shall be three years. The President shall appoint, by and with the advise and consent of the Senate, members to fill vacancies occurring prior to the expiration of a term, in which case the members so appointed shall serve for the remainder of such term. Any member whose term has expired may serve until his successor has been appointed and qualified.

(d) The head of the Service shall serve, ex officio, as a member of the Board.

(e) Members of the Board appointed by the President shall, while attending meetings of the Board or while engaged in duties relating to such meetings or in other activities of the Board pursuant to this section, including traveltime, be entitled to receive compensation equal to the daily equivalent of the compensation prescribed for level V of the Executive Schedule under section 5316 of title 5, United States Code. While away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently. The ex officio member of the Board shall not be entitled to any compensation under this section, but may be allowed travel expenses as provided in the preceding sentence.

(f) The Board may, to the extent it deems necessary to carry out its functions under this section, procure supplies, services, and other personal property, including specialized electronic equipment.

(g) Notwithstanding any other provision of law, the Board shall remain in effect indefinitely.

(h) There are authorized to be appropriated $130,000 to carry out the provisions of this section.

ASSISTANCE FROM OTHER GOVERNMENT AGENCIES

SEC. 6. (a) In order to assist the United States Information Agency in carrying out the purposes set forth in section 2, any agency or instrumentality of the United States may sell, loan, lease, or grant property (including interests therein) and may perform administrative and technical support and services at the request of the Agency. Support and services shall be provided on a reimbursable basis. Any reimbursement shall be credited to the appropriation from which the property, support, or services was derived.

(b) The agency may carry out the purposes of section 3 by means of grants, leases, or contracts (subject to the availability of appropriations), or such other means as the Agency determines will be most effective.

FACILITY COMPENSATION

SEC. 7. (a) It is the intent of the Congress that the Secretary of State should seek prompt and full settlement of United States claims against the Government of Cuba arising from Cuban interference with broadcasting in the United States. Pending the settlement of these claims, it is appropriate to provide some interim assistance to the United States broadcasters who are adversely affected by Cuban radio interference and who seek to assert their right to measures to counteract the effects of such interference.

(b) Accordingly, the Agency shall make payments to the United States radio broadcasting station licenses upon their application for expenses which they have incurred before, on, or after the date of this Act in mitigating, pursuant to special temporary authority from the Federal Communications Commission, the effects of activities by the Government of Cuba which directly interfere with the transmission or reception of broadcasts by these licensees. Such expenses shall be limited to the costs of equipment (replaced less depreciation) and associated technical and engineering costs.

(c) The Federal Communications Commission shall issue such regulations and establish such procedures for carrying out this section as the Federal Communications Commission finds appropriate. Such regulations shall be issued no later than one hundred and eighty days after enactment of this Act.

(d) There are authorized to be appropriated to the Agency, $5,000,000 for use in compensating United States radio broadcasting licensees pursuant to this section. Amounts appropriated under this section are authorized to be available until expended.

(e) Funds appropriated for implementation of this section shall be available for a period of no more than four years following the initial broadcast occurring as a result of programs described in this Act.

(f) It is the sense of the Congress that the President should establish a task force to analyze the level of interference from the operation of Cuban radio stations experienced by broadcasters in the United States and to seek a practical political and technical solution to this problem.

(g) This section shall enter into effect on October 1, 1984.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. (a) There are authorized to be appropriated for the United States Information Agency $14,000,000 for fiscal year 1984 and $11,000,000 for fiscal year 1985 to carry out sections 3 and 4 of this Act. The amount obligated by the United States Information Agency in ensuing fiscal years shall be sufficient to maintain broadcasts to Cuba under this Act at rates no less than the fiscal year 1985 level.

(b) In addition to amounts otherwise authorized to be appropriated to the Agency for the fiscal years 1984 and 1985, there are authorized to be appropriated to the Agency $54,800,000 for the fiscal year 1984 and $54,800,000 for the fiscal year 1985, which amounts shall be available only for expenses incurred by essential modernization of the facilities and operations of the Voice of America.

(c) Amounts appropriated under this section are authorized to be made available until expended.

INDEPENDENT EVALUATION OF THE CUBA SERVICE

SEC. 9. The United States Information Agency shall arrange, by contract if necessary, an independent evaluation of Cuba Service programming, the results of which

are to be set forth in a report to be prepared and transmitted to the Agency 18 months after the date of enactment of this Act and at intervals of one year thereafter for the following three years. The Agency shall, not later than 30 days after the date of receipt of such report, transmit to the Congress such report, together with any recommendations for legislative action.

Mrs. HAWKINS. Mr. President, we have been involved in a fight over the idea of radio broadcasting to Cuba for almost 2 years. Those who favor the proposal see a great need for the Cuban people to have access to an alternative to Cuban Government propaganda. As I have said on other occasions, no practical, effective alternative currently exists. The Cuban people have for 20 years now been forced fed a steady diet of whatever it is that Fidel Castro wants them to know.

We here in the United States are proud of our tradition of freedom. One of the crowning gems is the freedom of the press. For without this, many of our other freedoms are meaningless. Mr. President, unless people have access to a variety of views and ideas, unless they have a means of getting the truth, they cannot develop independent conclusions. This is the purpose behind Radio Marti. It gives the Cuban people a chance to develop their own views about the events that effect their lives.

Those who have expressed concern over Radio Marti have done so for a variety of reasons. Some are concerned about its effect on domestic broadcasting. Others are concerned about the nature of its programing and its foreign policy implications.

Mr. President, this amendment addresses the concerns that have been raised while at the same time maintaining the integrity of Radio Marti. The course has not been easy. Both sides have defended their positions well, and what we have before us now is a compromise, a compromise in which both sides believe that they have protected their vital interests.

I would like to explain the elements of this compromise for the benefit of those Senators and their staffs who were not able to sit in on the negotiations. The amendment combines features of a Voice of America proposal suggested by Senator ZORINSKY, and my bill, S. 602.

I have introduced and can support the amendment before us because it allows us to further our essential goal—broadcasting accurate, objective, and comprehensive programing to the people of Cuba, a mission that I believe has already been met by existing Voice broadcasts. It is not an ideal amendment. I still believe that it is more appropriate to place Radio Marti, a surrogate home broadcast station, with the other Government-operated surrogate home broadcast stations, Radio Free Europe and Radio Liberty, in the Board for International Broadcasting.

On a practical level, however, there are a number of attractive features of this amendment. Within the USIA, Radio Marti will be able to build on the reputation for accuracy and reliability that USIA programs already have among the Cuban people. This will decrease dramatically the problems that would have faced Radio Marti had it had to begin building its reputation on its own. So, by placing Radio Marti within the USIA we increase the speed with which Radio Marti becomes effective. In other words, we eliminate some of the difficulties in building a consistent listening audience.

In addition, this amendment contains important funding increases to insure that both the USIA and Radio Marti have the resources to carry out their legislative mandates.

Furthermore, the amendment enhances the standing of Radio Marti's broadcasts by establishing a Presidential commission to advise the President and administrative officials on Radio Marti programing and broadcasts. It would be a high level commission requiring a Presidential nomination and the advice and consent of Congress. I believe that this is an important factor in enhancing the quality and prestige of Radio Marti broadcasts.

The amendment also contains a provision to protect Radio Marti broadcasts from Cuban jamming. If Cuban jamming exceeds a low threshold, measured as a 25 percent increase above the average daily levels over the last year, then the station can expand its broadcasts through the leasing of commercial or noncommercial time. The interference levels will be determined by the Federal Communication Commission.

Finally, this amendment offers a means of getting Radio Marti on the air fast, including the option of using shortwave broadcasts in addition to 1180 on the AM dial. We have been debating Radio Marti now for over a year. This is a year in which Radio Marti could have been beaming reliable programing to the people in Cuba, but instead the legislation was bogged down in Congress. This amendment offers a practical and reasonable way out of this impass. It offers a means by which, at long last, the Cuban people can receive an alternative to Communist propaganda.

I hope that those who have supported Radio Marti in the past will support this amendment now. I believe that this amendment allows us to make the Cuban people aware of the costs to them of Castro's mismanagement at home and adventurism abroad, and provide them with information needed to hold their Government accountable.

Under this amendment, Radio Marti can provide credible, verifiable information and programs similar to those broadcasts by Radio Free Europe (RFE) and Radio Liberty (RL). Radio Marti can serve as a surrogate "home service" and break the Cuban Government's monopoly on news and information.

Mr. President, I thank the Senators who have worked with me during these long hours and many, many weeks. I urge my colleagues to join us in this important amendment.

Mr. SYMMS. Will the Senator yield?

Mrs. HAWKINS. Yes.

Mr. SYMMS. I thank the distinguished Senator from Florida for yielding. I wish to compliment her on her leadership in accomplishing this most important effort.

I inquire of the Chair, have the yeas and nays been ordered on final passage?

The PRESIDING OFFICER. They have not been ordered.

Mr. PERCY. Mr. President, today the Senate will consider a compromise substitute for S. 602, the Radio Broadcasting to Cuba Act.

The purpose of this substitute is to establish within the Voice of America a Cuba Service which will broadcast news, commentary and other information about events in Cuba in an effort to promote the cause of freedom in Cuba. It is the intent of this substitute to conform these broadcasts to all the Voice of America standards which insure that such programs are objective, accurate, balanced and comprehensive.

This substitute will create a nine-member advisory board which can make recommendations to the President, the U.S. Information Agency and the Voice of America concerning the effectiveness of the Cuba Service. Under this proposal, the Cuba Service may utilize the 1180 AM frequency currently used by Voice of America broadcasts, shortwave or off-band noncommercial AM frequencies. In the event of jamming, the Cuba Service may lease, on a limited basis, time on commercial or noncommercial AM band radio broadcasting stations.

For commercial AM radio stations which have sustained interference from Cuban broadcasting, the proposal mandates that the U.S. Information Agency compensate such stations in accordance with regulations issued by the Federal Communications Commission. Approximately $5 million is authorized for compensation purposes.

Finally, the substitute will authorize $14 million in fiscal year 1984 and $11 million in fiscal year 1985 to create the Cuba Service and $54.8 million in fiscal year 1984 and 1985 to complete the Voice of America's modernization plans proposed by the President over a year ago.

Mr. President, this substitute is far different from the bill (S. 602) reported from the Foreign Relations Committee. That bill would have created under the oversight of the Board for International Broadcasting an independent broadcasting station for Cuba. The purpose of that station would have been to make the Cuban people more aware of the costs to them of Castro's mismanagement at home and adventurism abroad, and to provide them with information needed to hold their Government more accountable. It was the intent of the committee to establish a station which would provide credible, verifiable information and programs similar to those broadcasts by Radio Free Europe and Radio Liberty to the people behind the Iron Curtain. Radio broadcasting to Cuba was intended to serve as a surrogate home service and break the Cuban Government's virtual monopoly on news and information. Half of Cuba's population is under 25 and Castro has been in power for 24 years. All information given to these young Cubans about their country and the world has been controlled by Castro's Communist regime.

Mr. President, I realize that Senators BAKER, HAWKINS, WEICKER, GRASSLEY, and ZORINSKY have worked long and hard in fashioning this compromise and I will support it. However, I have some serious concerns. As we all know, the mission of the Voice of America is clearly set forth in its charter. It is a mission quite different from that of Radio Free Europe and Radio Liberty or from the mission envisaged by the President for radio broadcasting to Cuba. In addition to the charter's mandate that VOA broadcast accurate, objective and comprehensive news, the Voice must reflect American interests, society, institutions and official policies, and it is specifically prohibited from representing any single segment of American society and the concept of balance is a key aspect. In contrast, radio broadcasting to Cuba's most important mission would be to act as a surrogate radio station for Cuban citizens who are unable to obtain information about developments inside Cuba because of the rigid controls over the Cuban media.

It is my hope that the conflict in these missions will not adversely affect the credibility of the Voice of America nor unduly restrict the flexibility and effectiveness of radio broadcasting to Cuba. I strongly support the goals of the Voice of America and the establishment of a home broadcasting service for Cuba.

Let me assure my colleagues that as chairman of the Foreign Relations Committee I will closely monitor the implementation of this legislation to insure that the Voice of America remains a strong and viable operation and that the Cuba Service will be an effective voice of truth for Cuba. I urge my colleagues to support this compromise amendment.

Mr. ZORINSKY. Mr. President, it has taken over 1½ years for us to reach this point of compromise on the issue of radio broadcasting to Cuba. After many hearings in the Foreign Relations Committee and various discussions on the floor of the Senate, we finally have a proposal which is acceptable to all the principals.

During our consideration of the administration's proposal last December, I told some of my colleagues that I was confident that with some hard work we could come to an agreement which would result in a measure expanding radio broadcasting to Cuba. I, as an opponent of the original Radio Marti proposal, also believed that broadcasting news and information to Cuba was appropriate. With this compromise, my confidence has been vindicated. Due to the hard work and dedication of a number of Senators and their staffs, we now have a bill which satisfies the concerns of both the proponents and opponents of the original proposal. From the perspective of all, it is far from perfect, but it seems to me very important that we have been able to achieve a consensus on two central points: First, that it is U.S. policy to support the right of the people of Cuba, in accordance with article 19 of the Universal Declaration of Human Rights, to seek, receive and impart information through any media and regardless of frontiers; second, that all U.S. broadcasts authorized by this act shall be Voice of America broadcasts and subject to all VOA regulations and legislative guidelines.

Mr. President, this legislation does not create a separate entity to broadcast information to Cuba. It does create a separate Cuba Service within VOA for the purpose of expanding VOA broadcasts to Cuba. With that understanding, I support it.

I wish to take this opportunity to thank the majority leader and the minority leader for their courtesy shown throughout the many months of debate on the floor of the Senate in addition to the honoring of all their commitments during the debate of this issue.

Mr. WEICKER. Mr. President, I rise in support of the substitute amendment now before the Senate. I learned a long time ago that a good compromise leaves everyone a little unhappy. From what I can ascertain from the other Senators involved in the negotiations on this matter on both sides, this proposal meets that test.

For my part, the pending amendment makes substantial improvements in the original S. 602 which make it acceptable. First, radio broadcasting to Cuba under this proposal would be conducted under the auspices of and in conjunction with the programing of the Voice of America. We are not creating a separate broadcasting entity to accomplish the purpose of getting more information into Cuba. We are utilizing existing facilities and frequencies for that purpose. Second, we are increasing broadcasts to Cuba only in accordance with the established rules and legislative guidelines of the VOA. We are not creating a propaganda station, but an accurate, objective, and balanced source of news. As a whole, this amendment, by embracing the VOA option suggested by Senators ZORINSKY and PELL, maximizes the effectiveness of additional broadcasting and minimizes the resultant risks to U.S. broadcasters.

Mr. President, I also want to state for the record that we are fooling ourselves if we believe that this bill constitutes a foreign policy toward Cuba.

Proponents of the misguided policies which have dictated United States-Cuban relations for the past quarter century like to think they have succeeded in cutting the Cubans off from the rest of the world. What they have really succeeded in doing is isolating the United States among world powers. Most of our closest allies not only recognize the Castro government but do business with it as well. The technology that drives the Cuban economy—cares for its ill, bottles its rum, runs its factories and farms its fields—comes not just from the Soviet bloc but from Canada, Great Britain, West Germany, Japan, and on down the list. There can be no doubt that once inside Cuba, American products and technology would speak for themselves—and for the advantages of our economic system.

The President condemns critics of his Central American policies for advocating passivity in the face of Communist subversion. I, for one, feel passionately the need for an activist U.S. role, not as propagandist, however, or as hemispheric policeman. Our role must be that of a nation dedicated to principle, a nation which by force of its example and its accomplishments, rather than its arms, contributes to the peace and prosperity of its neighbors.

You do not have to be a fan of the Cuban form of government—I most definitely am not—to recognize that Fidel Castro has been in power for 25 years and that he is likely to remain there for some time to come. It is high time we fashioned a new policy for dealing with him and his regime. Invading Cuba proved a colossal mistake. Ignoring it has worked no better.

I want to express my appreciation to the majority leader for his efforts to bring us to this point and to all the Senators involved for the effort expended to hammer out this arrangement.

Mr. GRASSLEY. Mr. President, for well over a year, I have been working for a solution to the problems created for broadcasters by the the proposal for radio broadcasting to Cuba. This effort has involved innumerable hours of hearings, debate, and negotiations. There were offers for cosmetic changes, but there was little interest in making the necessary substantive, alterations to avoid transforming our domestic commercial frequency spectrum into a "chessboard" for foreign policy. And as I have stated before, I was dismayed with the apparent lack of good faith on the part of some of the principle negotiators for the administration. It was getting to the point that I felt that Congress was going to refuse to address the concerns of our Nation's broadcasters and their listening audiences. It is with this backdrop that I stand here today in near disbelief that we have finally developed a satisfactory compromise to the principles involved.

As with any compromise, there are changes that I would have preferred. On the whole, however, this compromise should minimize the potential of harm to our broadcasting interests while at the same time meeting the objectives of providing information to the people of Cuba about the domestic and international affairs of their government.

Frankly, I am still concerned about this proposition in that whatever risk it brings, it will be carried by our private sector. The Soviet grain embargo should have taught us a lesson. As we have seen during the past several years, the United States and Cuba has been unable to resolve their problems relating to interference. We can hardly expect this proposal to enhance the prospects of any resolution.

Notwithstanding my dismay with the past deliberations and negotiations, and my continued reservations, I believe that this present compromise has come a long way from where we were last year. Consequently, I lend my support to this amendment as the best possible compromise. I urge my colleagues to join in this support.

Mr. PELL. Mr. President, the compromise reached by the principals involved on this issue of radio broadcasting to Cuba is a measure, although less than perfect, which I believe satisfies the concerns that have been voiced in this year and a half by proponents and opponents of the concept.

My opposition to the original Radio Marti concept was based on my belief that the radio would become a loud propagandistic organ of the anti-Castro exile community and would precipitate a real radio war which American broadcasters believed could be avoided. Last year and earlier this year, I proposed an amendment in the Foreign Relations Committee which would have avoided these problems by expanding the existing programing of the Voice of America. I advocated such an approach because incorporating radio broadcasting to Cuba under the Voice of America would insure that the broadcasting would be heard and the broadcasts would be accepted as credible by the Cuban listenership because it would meet the VOA's high standards for accuracy and objectivity. Broadcasting through the VOA minimizes the chances for provoking Cuban retaliation against U.S. radio stations, which would set off a full-scale radio war. Moreover, the VOA option would help promote a negotiated settlement of the radio interference problem which both the United States and Cuba want to resolve.

I am extremely happy to see that the compromise worked out on radio broadcasting to Cuba is based on my original proposal to place the broadcasting within the framework of the Voice of America. The compromise, which is a version of Senator ZORINSKY's modification of my original amendment, along with concepts embodied in Senator HAWKINS' bill, satisfies my concerns.

The compromise does not create a separate Radio Marti. It does add some 14 hours of programing to existing Voice of America broadcasts to Cuba. Although carried out by a separate Cuba service, these additional program hours are an integral part of the Voice of America. They are subject to all Voice of America statutory requirements and regulations for accuracy, balance, objectivity, and diversity of news. Unlike a potentially propagandistic Radio Marti, the additional hours will have the great credibility of the Voice of America. It is incumbent on the Voice of America and its able director, Kenneth Tomlinson, as well as on the oversight committees of Congress to insure that this credibility is not compromised.

With this extended consideration by the Senate of the issue of broadcasting to Cuba over, I look forward to seeking ways of improving relations with Cuba. While our countries are as far apart as ever from normalizing relations, there are some areas which could be closer to resolution, namely, immigration—including the return of the excludables of the Mariel exodus—and the aforementioned radio interference problem. I enthusiastically support proposals emanating from the Contadora leaders which would bring Cuba into the peace process which will hopefully succeed in Central America. We have succeeded in reaching a compromise between groups that were very far apart on the broadcasting to Cuba issue. This gives me hope. This was achieved because it serves the U.S. national interest. May our future policies toward Cuba and the rest of Latin America and the Caribbean serve our best national interests as well.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Florida (Mrs. HAWKINS).

The amendment (No. 2131) was agreed to.

Mr. ZORINSKY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHILES. Mr. President, I rise in support of S. 602, the Radio Broadcasting to Cuba Act. This measure enjoys wide bipartisan support in both Houses of Congress. It has also been endorsed by the AFL-CIO and is strongly supported by the administration.

The establishment of Radio Marti and the broadcasting of information to the people of Cuba is an idea whose time has arrived. I am proud to be an original cosponsor of this legislation that will provide the Cuban people with an alternative to the controlled information they are currently receiving. We can no longer ignore the fact that the Cuban people have a right to the truth, and that Radio Marti is the best method to provide them with the truth.

As we once again take up consideration of Radio Marti, we hear the familiar cry warning us of the repercussions that will befall the United States if such a measure is approved. We are cautioned by opponents of Radio Marti not to antagonize the Cuban Government. They say that the proposed radio station will only provoke Castro into interfering with our own radio stations, that Radio Marti will be the cause of a total breakdown in communications with the Cuban Government, and that the United States will be pursuing a confrontational policy that will close the door to future negotiations.

In other words, while Cuba transmits weekly 280 hours of programs to North America and the Caribbean, the United States cannot set up a radio station which would transmit objective information to the Cuban people. While Cuba pursues destabilizing policies around the world, assists in drug trafficking, and stages offensive amphibious military drills off its coast, the United States cannot set up this radio station because it will appear confrontational and lead to a breakdown in communications. I do not agree with this double standard.

For over 15 years, south Florida broadcasters have been experiencing interference from the island of Cuba. Up until recently, the government of Fidel Castro has been unresponsive toward efforts to reach a solution over a problem it itself created. Today, we see headlines that read, "Cuba Would

Negotiate if Marti Plan Is Killed." In other words, the Cuban Government is now willing to negotiate over the question of interference as long as it can use Radio Marti as a bargaining chip. The diplomatic double standard has been coupled with diplomatic double talk.

Fidel Castro's do as I say, not as I do philosophy has no place in the formulation of this Nation's foreign policy. We need to address the issue of Cuban interference on our radio broadcasts, but this is totally separate from the establishment of Radio Marti. Allowing Cuba to claim the absurd—that Radio Marti is the cause of such interference—would belie the fact that this interference has been around long before any mention of the proposed radio station. Radio Marti has become a very convenient excuse for Cuba's direct violation of our international broadcasting laws.

In the mid-1960's, the Cuban Government was already in the process of redesigning its domestic AM broadcasting system. The purpose of this redesign was Cuba's intention to broadcast directly into the United States and other countries. In 1979, before any mention of Radio Marti, new Cuban plans surfaced which sought to increase significantly the number and power of its AM radio stations. In November 1981 at the International Telecommunications Union Western Hemisphere Conference the Cubans walked out after their proposed plan requesting 48 changes to their radio inventory was rejected.

Cuban interference will continue whether we have a Radio Marti or not. I do not believe that Radio Marti should be made the scapegoat, when it has been years of Cuban neglect and intransigence that has brought about this interference problem.

The Cuban Government has threatened to jam our radio stations if we go ahead with plans to establish Radio Marti. While I am sensitive to the broadcasters' concern, how much more of a loss it would be to have this country's foreign policy determined via the threats and whims of a country the likes of Cuba.

Those concerned over the Cuban threat of jamming forget that such action is not without cost for the island of Cuba, financially and diplomatically. It has been pointed out that sustained jamming and counterbroadcasting will require a substantial amount of electricity from Cuba's limited and expensive power generating capabilities. Also, counterbroadcasting will not only affect the United States but also neighboring Central and South American countries with which Castro wants to maintain good relations. Cuba's threats should not be seen as reason to retreat from our foreign policy objectives.

During previous consideration of this measure, opponents recommended several changes which they felt needed to be made to the bill. These changes are now part of the legislation. The bill has also been amended to include a facility compensation package for broadcasters adversely affected by any increase in interference.

Mr. President, we have gone a long way to meet all the concerns expressed. The compromise reached by the opposing sides on this issue provides that Radio Marti will be incorporated as part of the Voice of America. Frankly, I do not feel that this is the most desirable of formats for Radio Marti. I believe the Cuban people deserve much more than this. While I would have preferred to see a Radio Marti, as envisioned in the original legislation, the compromise reached does provide a way to resolve the impasse we have encountered during consideration of S. 602. It is important that this legislation continues to acknowledge the need for additional broadcasts to Cuba, that is, in addition to the broadcasts already being provided by the VOA.

The purpose of the VOA's Radio Marti program will not be to inform the Cubans about American thoughts and institutions. It will be to inform the Cubans about themselves, about their Government's policies. This is the information they have been lacking for so long.

As we continue to debate this issue, we need only to look at the success of our currently operating Government-sponsored radio stations. Who would question the responsibility of our Radio Free Europe broadcasts to the people of Poland in their current strife against the oppressive Polish Government. There is no reason to assume that Radio Marti will not abide by the same high standards which have been the trademark of Radio Free Europe, Radio Liberty, and the Voice of America: Providing objective and reliable information.

Fidel Castro does not want his people to hear the truth. And that is exactly what Radio Marti is proposing to broadcast. I am not advocating the airing of propaganda. It is not propaganda to inform the Cuban public that there are Cuban troops in Angola, Ethiopia, and South Yeman. It is not propaganda to inform the Cuban people that their Government is involved in the shipping of arms to Central America. And it is not propaganda to inform the Cuban people that their Government and its officials have been strongly implicated in the illicit drug trade.

VOA's Radio Marti program will not succeed as a half-hearted effort. Its success will come when we realize that it is a viable foreign policy objective. It is a peaceful alternative which proposes to enhance the exchange of information to a people who have been deprived of the truth for far too long.

In establishing the Radio Marti program, we will be providing the Cuban people with the information they yearn for, to the truth to which they have a right.

● Mr. BENTSEN. Mr. President, as a cosponsor of legislation to establish the Cuba Service of the Voice of America, I commend my colleagues from Florida and other Members of the Senate for their efforts and for working out a compromise which can be accepted by all parties concerned with this issue, and I join them in urging the passage of S. 602.

We are all conscious of the need to combat communism, particularly in our own hemisphere. To that end we are spending hundreds of billions of dollars every year on national defense; we are devoting additional billions of dollars to military and economic assistance for our friends and allies around the world.

I would submit, however, that we have a tendency to overlook one of the most powerful and effective weapons in the arsenal of democracy; the truth. We focus our attention and resources on the arms race and turn our backs on the information race.

Mr. President, the Soviet Union outspends the United States 7 to 1 in the area of international broadcasting and information. In Latin America, the Soviet Union and Cuba outbroadcast the United States by a ratio of 5 to 1. Even the insurgents in El Salvador have a powerful radio station—Venceremos—which broadcasts their particular brand of distortion to people of the region.

Unlike our adversaries in Havana and Moscow, the United States is not afraid of the truth; it is an important asset of democracy. I think, and I hope my colleagues will agree, that we have an obligation to get Radio Marti on the air and get our message of truth to the people of Cuba and this hemisphere. I do not want to see the United States of America losing the information in our own backyard.

Radio Marti would be a medium for providing the truth to Cuba's citizens. The people of Cuba, like the people of Eastern Europe, cannot depend on their government-controlled media for accurate news about the world, much less about their own country and their leader. Radio Marti would give Cubans honest information about the mismanagement of the Cuban economy, the needless deaths of their countrymen in Africa; they will hear about Castro's deep involvement and the squandering of Cuba's resources on international subversion and adventurism.

Armando F. Valladares, a poet recently released after 20 years in Cuban jails, said:

The Cuban media * * * is a doctrinaire press, not an information press. The Cuban people, as is the case with the Czechs, the Poles, the Russians and others under Communism, have a need for a radio station that would broadcast especially for them, as is the case with Radio Liberty and Radio Europe. The Cubans await anxiously the day in which these broadcasts would start; as if it was the day of their liberation.

Radio Marti would constitute a small investment in a brighter future for Cuba, the United States, the Western Hemisphere, and the world. It is designed to serve as a "consistently reliable and authoritative source of accurate, objective and comprehensive news." The truth, Mr. President, is powerful medicine, and the people of Cuba deserve to know the truth. Radio Marti can help bring it to them, and I hope the Senate will agree to provide the necessary funds and authority to get the American message on the air.●

Mr. THURMOND. Mr. President, I rise in support of S. 602, the Radio Broadcasting to Cuba Act of 1983.

The principal purpose of S. 602 is to improve communications of accurate information and ideals to the uninformed and misinformed people of Cuba. The bill would establish a Board for International Broadcasting and grant it the authority to develop the actual broadcasting system to Cuba. Once established, the radio broadcasting system would be responsible for delivering reliable, accurate, objective, and comprehensive news from the free world to the people of Cuba.

Mr. President, for over two decades, the citizens of the island nation of Cuba have been subjected to Communist propaganda and untruths, without any factual information to counterbalance the Communist line. Cubans have grown up without knowing the real meaning of the words "freedom" and "democracy." They have never had the opportunity to listen to an objective news broadcast in order to decide for themselves which side of an issue they will support. Today in Cuba there is no alternative view of the Castro government and its actions.

The Soviet Union has long benefited from the process of propagating its ideology and philosophy, with emphasis on radio broadcasting aimed at specific countries. The Soviet Union outspends the United States by a ratio of 7 to 1 in the area of international broadcasting. The Soviets and their surrogate Cuba outbroadcast the United States in Latin America, in terms of hours on the air, by a ratio of 5 to 1. We are clearly losing the war of words in our hemisphere. The people in Havana, as in all closed societies, thirst for the truth. If we ever hope for lasting stability and peace in this hemisphere, we must provide the facts to those who are willing to listen. We must allow the Cuban people to learn about the domestic mismanagement and continued failures of their government, as well as about the promotion of subversion and international terrorism worldwide by Castro. We must inform the Cuban people of what these activities cost in terms of reduced standards of living for themselves and their children.

Mr. President, the establishment of this radio broadcasting system is a proper step toward diminishing Castro's stronghold over his people. By reducing Castro's power in this area, we can decrease his ability to export subversion throughout the Western Hemisphere. At the same time, we can provide the enlightenment which will be necessary to enable the Cuban people to eventually throw off the shackles of communism and regain their precious freedom.

Mr. KASTEN. Mr. President, we have heard a great deal of debate during the past year and a half on the merits of Radio Marti. That debate has usually dealt with abstractions. But in the past few days, we have had an object lesson that brings this debate into sharp focus and makes us realize in concrete terms just what Radio Marti is all about.

The Korean Airlines tragedy has given us a textbook example of how a totalitarian society controls the flow of information. The Soviet people were not told for a week about the massacre. Once they did hear about, it they were told that their armed forces had shot down an American spy plane. To this day, the people of the Soviet Union have not been told by their own leaders about the enormity of the crime that was committed in their name.

But that should not be surprising, because lies, evasions, and misinformation are the tools that Communist countries use with great skill to control their peoples. That is what goes on in Cuba, an unhappy land just 90 miles from our shores. There, people very much like ourselves live under a Soviet-style regime. But the Cubans do not simply live in slavery. They also provide the resources that allow their leader, Fidel Castro, to subvert democratic nations throughout the world. It is imperative that we try to neutralize Castro's troublemaking, and that is where Radio Marti comes in.

Radio Marti is one of the few peaceful options we have for dealing with Castro. It will act as an alternative to the government-controlled media now available to the Cuban people. It will provide them with news and information they could not otherwise get. We can use Radio Marti to bring the cost of Castro's adventurism home to Cubans in a way Castro cannot ignore. The realization that his people know the full costs of his schemes may be just enough to give Castro pause before embarking on more conquests. That alone would make Radio Marti worthwhile.

I am proud to be a cosponsor of legislation to set up Radio Marti. I am glad to see that we have reached a compromise that clears the way for this vital program. I congratulate my colleague from Florida, (Mrs. HAWKINS) for her tenacity on this important issue, and I urge all my colleagues to support the revised Radio Marti proposal.

I hope we will soon be hearing Radio Marti on the air, breaking the infromation blockade under which the Cuban people suffer.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill, having been read the third time, the question is, Shall it pass?

The bill (S. 602), as amended, was passed as follows:

S. 602

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Radio Broadcasting to Cuba Act".

FINDINGS; PURPOSES

SEC. 2. The Congress finds and declares—

(1) that it is the policy of the United States to support the right of the people of Cuba to seek, receive, and impart information and ideas through any media and regardless of frontiers, in accordance with article 19 of Universal Declaration of Human Rights;

(2) that, consonant with this policy, radio broadcasting to Cuba may be effective in furthering the open communication of accurate information and ideas to the people of Cuba, in particular information about Cuba; and

(3) that such broadcasting to Cuba, operated in a manner not inconsistent with the broad foreign policy of the United States and in accordance with high professional standards, would be in the national interst.

(4) that the Voice of America already broadcasts to Cuba information that represents America, not any single segment of American society, and includes a balanced and comprehensive projection of significant American thought and institutions but that there is a need for broadcasts to Cuba which provide news commentary and other information about events in Cuba and elsewhere to promote the cause of freedom in Cuba.

ADDITIONAL FUNCTIONS OF THE UNITED STATES INFORMATION AGENCY

SEC. 3. (a) In order to carry out the objectives set forth in section 2, the United States Information Agency (hereafter in this Act referred to as the "Agency") shall provide for the open communication of information and ideas through the use of radio broadcasting to Cuba. Radio broadcasting to Cuba shall serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news.

(b) Radio broadcasting in accordance with subsection (a) shall be part of the Voice of America radio broadcasting to Cuba and shall be in accordance with all Voice of America standards to ensure the broadcast of programs which are objective, accurate, balanced, and which present of variety of views.

(c) Radio broadcasting to Cuba authorized by this Act shall utilize the broadcasting facilities located at Marathon, Florida, and the 1180 AM frequency that were used by the Voice of America prior to the date of enactment of this Act. Other frequencies, not on the commercial Amplitude Modulation (AM) Band (535 kHz to 1605 kHz), may also be simultaneously utilized: *Provided*, That no frequency shall be used for radio broadcasts to Cuba in accordance with this Act which is not also used for all other Voice of America broadcasts to Cuba. Time leased from nongovernmental shortwave radio stations may be used to carry all or part of the Service programs and to rebroadcast Service programs. *Provided*, That not less than 30 percent of the programs broadcast or rebroadcast shall be regular Voice of America broadcasts with particular emphasis on news and programs meeting the requirements of section 503(2) of Public Law 80-402.

(d) Notwithstanding subsection (c), in the event that broadcasts to Cuba on the 1180 AM frequency are subject to jamming or interference greater by 25 percent or more than the average daily jamming or interference in the twelve months preceding September 1, 1983, the Director of the United States Information Agency may lease time on commercial or noncommercial educational AM band radio broadcasting stations. The Federal Communications Commission shall determine levels of jamming and interference by conducting regular monitoring of the 1180 AM frequency. In the event that more than two hours a day of time is leased, not less than 30 percent of the programming broadcast shall be regular Voice of America broadcast with particular emphasis on news and programs meeting the requirements of section 503(2) of Public Law 80-402.

(e) Any program of United States Government radio broadcasts to Cuba authorized by this section shall be designated "Voice of America: Cuba Service" or "Voice of America: Radio Marti Program".

(f) In the event broadcasting facilities located at Marathon, Florida, are rendered inoperable by natural disaster or by unlawful destruction, the Director of the United States Information Agency may, for the period in which the facilities are inoperable but not to exceed one hundred fifty days, use other United States Government-owned transmission facilities for Voice of America broadcasts to Cuba authorized by this Act.

CUBA SERVICE OF THE VOICE OF AMERICA

SEC. 4. The Director of the United States Information Agency shall establish within the Voice of America a Cuba Service (hereafter in this section referred to as the "Service"). The Service shall be responsible for all radio broadcasts to Cuba authorized by section 3. The Director of the United States Information Agency shall appoint a head of the Service and shall employ such staff as the head of the Service may need to carry out his duties. The Cuba Service shall be administered separately from other Voice of America functions and the head of the Cuba Service shall report directly to the Director and the Associate Director for Broadcasting of the United States Information Agency.

BOARD FOR RADIO BROADCASTING TO CUBA

SEC. 5. (a) There is established within the Office of the President the Advisory Board for Radio Broadcasting to Cuba (hereafter in this Act referred to as the "Board"). The Board shall consist of nine members, appointed by the President by and with the advice and consent of the Senate, of whom not more than five shall be members of the same political party. The President shall designate one member of the Board to serve as Chairman.

(b) The Board shall review the effectiveness of the activities carried out under this Act and shall make such recommendations to the President, the Director and the Associate Director for Broadcasting of the United States Information Agency as it may deem necessary.

(c) In appointing the initial voting members of the Board, the President shall designate three members to serve for a term of three years, three members to serve for a term of two years, and three members to serve for a term of one year. Thereafter, the term of each member of the Board shall be three years. The President shall appoint, by and with the advice and consent of the Senate, members to fill vacancies occurring prior to the expiration of a term, in which case the members so appointed shall serve for the remainder of such term. Any member whose term has expired may serve until his successor has been appointed and qualified.

(d) The head of the Service shall serve, ex officio, as a member of the Board.

(e) Members of the Board appointed by the President shall, while attending meetings of the Board or while engaged in duties relating to such meetings or in other activities of the Board pursuant to this section, including traveltime, be entitled to receive compensation equal to the daily equivalent of the compensation prescribed for level V of the Executive Schedule under section 5316 of title 5, United States Code. While away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently. The ex officio member of the Board shall not be entitled to any compensation under this section, but may be allowed travel expenses as provided in the preceding sentence.

(f) The Board may, to the extent it deems necessary to carry out its functions under this section, procure supplies, services, and other personal property, including specialized electronic equipment.

(g) Notwithstanding any other provision of law, the Board shall remain in effect indefinitely.

(h) There are authorized to be appropriated $130,000 to carry out the provisions of this section.

ASSISTANCE FROM OTHER GOVERNMENT AGENCIES

SEC. 6. (a) In order to assist the United States Information Agency in carrying out the purposes set forth in section 2, any agency or instrumentality of the United States may sell, loan, lease, or grant property (including interests therein) and may perform administrative and technical support and services at the request of the Agency. Support and services shall be provided on a reimbursable basis. Any reimbursement shall be credited to the appropriation from which the property, support, or services was derived.

(b) The Agency may carry out the purposes of section 3 by means of grants, leases, or contracts (subject to the availability of appropriations), or such other means as the Agency determines will be most effective.

FACILITY COMPENSATION

SEC. 7. (a) It is the intent of the Congress that the Secretary of State should seek prompt and full settlement of United States claims against the Government of Cuba arising from Cuban interference with broadcasting in the United States. Pending the settlement of these claims, it is appropriate to provide some interim assistance to the United States broadcasters who are adversely affected by Cuban radio intereference and who seek to assert their right to measures to counteract the effects of such interference.

(b) Accordingly, the Agency shall make payments to the United States radio broadcasting station licensees upon their application for expenses which they have incurred before, on, or after the date of this Act in mitigating, pursuant to special temporary authority from the Federal Communications Commission, the effects of activities by the Government of Cuba which directly interfere with the transmission or reception of broadcasts by these licensees. Such expenses shall be limited to the costs of equipment (replaced less depreciation) and associated technical and engineering costs.

(c) The Federal Communications Commission for carrying such regulations and establish such procedures for carrying out this section as the Federal Communications Commission finds appropriate. Such regulations shall be issued no later than one hundred and eighty days after enactment of this Act.

(d) There are authorized to be appropriated to the Agency, $5,000,000 for use in compensating United States radio broadcasting licensees pursuant to this section. Amounts appropriated under this section are authorized to be available until expended.

(e) Funds appropriated for implementation of this session shall be available for a period of no more than four years following the initial broadcast occurring as a result of programs described in this Act.

(f) It is the sense of the Congress that the President should establish a task force to analyze the level of interference from the operation of Cuban radio stations experienced by broadcasters in the United States and to seek a practical political and technical solution to this problem.

(g) This section shall enter into effect on October 1, 1984.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. (a) There are authorized to be appropriated for the United States Information Agency $14,000,000 for fiscal year 1984 and $11,000,000 for fiscal year 1985 to carry out sections 3 and 4 of this Act. The amount obligated by the United States Information Agency in ensuing fiscal years shall be sufficient to maintain broadcasts to Cuba under this Act at rates no less than the fiscal year 1985 level.

(b) In addition to amounts otherwise authorized to be appropriated to the Agency for the fiscal years 1984 and 1985, there are authorized to be appropriated to the Agency $54,800,000 for the fiscal year 1984 and $54,800,000 for the fiscal year 1985, which amounts shall be available only for expenses incurred by essential modernization of the facilities and operations of the Voice of America.

(c) Amounts appropriated under this section are authorized to be made available until expended.

INDEPENDENT EVALUATION OF THE CUBA SERVICE

SEC. 9. The United States Information Agency shall arrange, by contract if necessary, an independent evaluation of Cuba Service programming, the results of which are to be set forth in a report to be prepared and transmitted to the Agency eighteen months after the date of enactment of this Act and at intervals of one year thereafter for the following three years. The Agency shall, not later than thirty days after the date of receipt of such report, transmit to the Congress such report, together with any recommendations for legislative action.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank all Members for their cooperation in bringing this matter to a conclusion. It has been a long and sometimes difficult debate that necessitated the invocation of cloture. I believe a good result has been reached.

I wish especially to congratulate the Senator from Florida (Mrs. HAWKINS), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Iowa (Mr. GRASSLEY), the Senator from Connecticut (Mr. WEICKER), and others who were intimately involved for bringing this matter to a successful conclusion.

Mr. President, as I indicated earlier, I would like the Senate to turn next to the consideration of the DOD conference report. I understand that the distinguished minority manager is on his way to the floor.

Mr. President, I believe I will wait until Senator NUNN reaches the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll,

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I am advised that the Senator from Georgia (Mr. NUNN) is on his way to the floor and will arrive momentarily. After consulting with the minority leader, I am prepared now to ask the Senate to turn to the consideration of the DOD conference report but we will not proceed with any statement or any action at all until Senator NUNN arrives.

DEPARTMENT OF DEFENSE AUTHORIZATIONS, 1984—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 675 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of September 12, 1983.)

Mr. BAKER. Mr. President, I believe we will be able to arrive at a time agreement on this measure. We are not prepared to do that at this moment, but I think we will shortly.

While we await further negotiations on that subject and the arrival of the minority manager, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Texas.

Mr. TOWER. Mr. President, I ask unanimous consent that the time consumed in the consideration of the conference report on S. 675 be limited to 4 hours, to be equally divided between the Senator from Georgia and the Senator from Texas or their designees.

Mr. BYRD. Mr. President, reserving the right to object, this matter was discussed in our conference today. There was no objection. We have subsequently contacted all Members via the hotline and, in particular, the soon to be formally recognized ranking member of the Armed Services Committee, and others, and there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, the majority and minority leaders have conferred and have agreed that we should stay on this matter until it is completed today.

I expect that there will be a record vote, so if all time is consumed that vote would occur at 10 minutes to 7. After conferring with my colleagues, I doubt that we would consume that much time, so my colleagues should be on notice that a record vote could occur any time from an hour to 2 hours from now.

Mr. President, I ask for the yeas and nays on the adoption of the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. TOWER. Mr. President, I am pleased to report the conference report on S. 675, the defense authorization bill for fiscal year 1984.

My colleagues will recall that when the House and Senate passed their respective bills in late July, after extended periods of debate on the floors of both Houses, it was not clear that a conference could be completed prior to the August recess. Indeed, most observers felt that completing the conference prior to the recess would be impossible given the number and complexity of the funding issues that had to be resolved. Nevertheless, the managers on both sides asked the conferees to make a special effort to insure that, once started, the conference was not held over beyond the recess. The conferees responded with remarkable energy, working through the weekend of July 29 and late into the evenings of the following week, reaching compromise on nearly 1,000 items in disagreement. From a narrow, institutional perspective, the amount of time and effort invested in this conference report should alone be sufficient to secure the support of the Senate.

Nevertheless, Mr. President, the substance of the report is, of course, central to its acceptability in both Houses. Before discussing these specifics, I would like to review for the Senate congressional action on the defense budget during the past 2 years.

The Reagan administration deserves much credit for having proposed and implemented vital improvements to our national defense. In this effort they have been both assisted and hindered by the Congress.

The Congress is providing steady real growth in defense, but not enough to reverse the ominous trends in the military balance. In fiscal year 1982 the administration requested $228 billion in budget authority and the Congress approved $218 billion, a reduction of $10 billion. In fiscal year 1983 the administration requested $263 billion and the Congress approved $244 billion, a reduction of $19 billion. For fiscal year 1984 the administration requested $281 billion and the budget resolution provides for only $269 billion, a reduction of $12 billion.

In real terms the President proposed 15-percent growth in fiscal year 1983; he got less than 7. In fiscal year 1984 he proposed about 10 percent; he will be lucky to get 5 percent. I hope this kind of review will temper the judgment of those who mistakenly believe that this bill somehow represents congressional rubberstamping of massive defense increases.

The conference report now before the Senate reflects the determination of the Congress to hold real growth in the national defense function to approximately 5 percent over fiscal year 1983. It authorizes $187.5 billion for the Department of Defense for procurement, research and development, operation and maintenance, and civil defense programs under the Federal Emergency Management Agency. The conference report reflects a reduction of $10.5 billion from the President's request, an addition of $1.7 billion to the Senate-passed bill. When combined with action already taken on the military programs of the Department of Energy and the military construction bill, the defense-related reductions in fiscal year 1984 will total approximately $11.9 billion—the amount called for in the first concurrent budget resolution.

In procurement, the administration requested $94.1 billion and the conferees approved $88.3 billion, a reduction of $5.8 billion.

The conferees approved $27.3 billion in research and development, down $2.3 billion from the request.

For operation and maintenance, the conferees approved $71.8 billion, a reduction of $2.2 billion from the request.

On a more specific level, there were several issues of interest to the Senate which deserve special note:

INFLATION ASSUMPTIONS

The Senate accepted revised economic estimates contained in the administration's midsession review, which were the basis of a $3.4 billion reduction in the Senate bill. The House bill contained only part of this reduction. The conferees agreed to recommend incorporation of the entire fuel adjustment of $1.3 billion and to split the difference on the remaining inflation assumptions.

MX

Conference action on the MX and ICBM modernization programs included acceptance of the Senate provisions establishing a completion date for the environmental impact statement of January 1984, an initial operational capability of December 1986, a description of the characteristics of the small, mobile ICBM, and a link between the deployment of MX and the expeditious development of the small, mobile ICBM. The conferees also endorsed the substance of the Gore, Aspin, and Price amendments in the House which included a reduction in MX procurement from 27 to 21 missiles in fiscal year 1984.

BINARY CHEMICAL MUNITIONS

The conferees approved the administration's request of $114.5 million for facilities and procurement of binary chemical munitions. However, the conferees included the Senate provision which proscribes the assembly of components prior to October 1985, and no assembly thereafter unless the President certifies that this is essential to the national interest. The conferees also agreed to the House provision which requires the retirement of one older chemical weapon for each new one entering the inventory, thus freezing the size of the current arsenal.

RESERVE COMPONENTS

During the conference a considerable amount of time was given to discussion about the expanding role of the Reserve components; and the conference report contains numerous initiatives in this area. Among these are an increase of nearly 10,000 in Reserve component end strength, authorization of up to $12 million in bonuses, and the designation of a new Assistant Secretary of Defense for Reserve Affairs.

SPARE PARTS

The conferees responded swiftly to reports of excessive prices allegedly charged by some contractors for aircraft spare parts. The conference report contains specific guidance on near-, mid-, and long-term actions to be directed toward more effective management of spare parts. This will take some time. However, Secretary Weinberger and the service secretaries have already taken steps to change the DOD practices that have created this problem.

A final issue of special note is the conference action regarding pay raises. During consideration of the first concurrent budget resolution the Congress indicated its intention to provide a 4-percent pay raise to Federal employees for some portion of the next fiscal year. However, even though the Department of Defense is one of the Government's largest employers, the issue of Federal pay will not be decided in this bill, but in a reconciliation bill to be reported by the Committee on Governmental Affairs.

The conferees have taken two steps to minimize the financial disruption in the appropriation process caused by these unprogramed increases to the defense budget: First, the conference approved overall reductions in defense spending which are, for the most part, sufficient to fund a pay raise and still achieve the target ceiling in the budget resolution. Second, the conference report includes a provision which will tie the effective date of the military pay raise to that established by the Committee on Governmental Affairs for other Federal employees.

Mr. President, this conference report is one of the most detailed and comprehensive pieces of legislation that the Senate will address this year. We consider it at a critically important time in light of a series of recent international developments.

The 5 weeks since completion of the conference have seen major military exercises in Central America and the Middle East; the deployment of American arms and assistance to Chad in opposition to Libya's invasion; the death of U.S. marines in Lebanon; and the Soviet's brazen shooting down of a unarmed civilian airliner with the tragic loss of all 269 people aboard. I can think of no comparable period in the recent past which more vividly demonstrates the dangers we face in today's world, the contrasting values and ideals which separate us from our adversaries, and the certain responsibilities we must shoulder in the pursuit of peace.

Every Senator who believes that our military forces are necessary tools of foreign policy, and that they can and should be used to promote stability and to resist aggression, should vote for this conference report.

To be sure, this bill contains some provisions which will be objectionable to various Members of the Senate. But the lamentable events of past weeks will, I hope, focus the Senate's attention on the broader issue of whether or not at this important time this legislation makes a positive contribution to our standing among both allies and adversaries. I believe it does.

Of equal importance are the consequences of its rejection. The Appropriation Committees stand ready to mark up their respective defense bills. With less than 20 days left in the fiscal year, we must not delay them. There is a slight chance that we may avoid the institutional embarrassment that annually accompanies a continuing appropriations bill. For my part, I am determined that the authorization process should not delay passage of a regular defense appropriations bill.

The arguments in favor of this conference report are numerous and compelling and I urge its adoption.

Mr. President, I would be remiss if I failed to say that this conference report, in significant measure, is a product of the work, and the effort, and the dedication of our late colleague Scoop Jackson. I think that his stamp is to be seen in every major piece of defense legislation that has been passed in Congress over the course of his tenure on the Armed Services Committee.

No one had a better perspective on the defense needs of our country. No one had a better understanding of the threat that confronts the security of the United States and her vital interests abroad. No one better understood

better the need to balance the requirements of defense against the requirements of our citizenry in the domestic area. He was a man with a truly broad perspective and one who did much to assure the security of this country. I think no single man in my career in this body has done more not only to promote the security of the United States but also to promote the quest for peace, and stability, and justice throughout the world.

Much of the work we have done in establishing defense policy will be an enduring monument to him.

My sadness is tempered by the fact that he will be succeeded by a very, very distinguished Senator from Georgia, in the tradition of another great Georgian under whom I served on that committee, Richard Russell; a man already strongly steeped in knowledge of national defense and what it should be used for; a man with a good grasp of what national security policy should be, and one who I know is going to perform very ably in his role to come as the ranking minority member of the Armed Services Committee—Senator NUNN.

I am prepared to yield the floor to my distinguished colleague.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from Georgia.

Mr. NUNN. Mr. President, I thank the Senator from Texas for the generosity of his remarks.

I also commend him on the conference report. No one worked more diligently to try to produce this conference report, in terms of timing and in terms of substance.

I also want to add my voice, very briefly, to that of the Senator from Texas in commending Senator Jackson not just for his role in producing this conference report but also for his role, during 30 years in the U.S. Senate, in protecting the security of our Nation.

I commend Jim Roche, the minority staff director, and all the staff on our side, basically put together by Senator Jackson, for their excellent work.

I assure the majority side that I will be just as diligent in trying to facilitate cooperation and a bipartisan spirit on this committee as was Senator Jackson and certainly as were Senator STENNIS and my predecessor, Senator Russell.

Mr. President, it is with a great deal of sadness that I present these views on the conference report, not because of the conference report itself or its contents, but because all of us had expected our beloved colleague, Senator Jackson, to be standing here today to present the ranking minority views.

Senator Jackson's untimely death was a major loss to the Armed Services Committee, where he was an influential member for all his Senate career. We will sorely miss his intellectual leadership, his experienced judgments and advice, and his warm friendship. Scoop, as we are all painfully aware, is simply irreplaceable. I will be joining my colleagues on the floor later in paying special tribute to this remarkable person. I, again, as I have in recent days, thank the voters of Washington State for sending this unique individual to serve among us and to uphold the freedom and security of our Nation.

I am especially pleased that President Reagan announced last Friday that the next Trident submarine, which will be launched on October 15, 1983, will be named the U.S.S. *Henry M. Jackson.* This major addition to our strategic deterrence will be based in Scoop's beloved Washington State, at the Bangor Trident Base; and I think all my colleagues will join me in applauding that action by the President of the United States.

Mr. President, the conferees worked diligently on this conference report in a short period of time—less than a week. This situation was unfortunate but unavoidable unless we wanted the appropriations markups to start without any authorization guidance. I certainly share the view of my chairman in believing that it is not the correct procedure to begin appropriations markup without an authorizing bill. The differences in the House bill and the Senate bill were substantial. But I believe the conference report represents a reasonable compromise. The chairman has provided the contents of the conference report in sufficient detail, so I would like to make just a few general observations.

BUDGET CONSIDERATIONS

The conference report is generally faithful to the guidance provided in the first concurrent resolution on the budget. I commend the chairman on that, because it is not easy, when you have watched a budget put together and you have gone through all the hearings, to be presented then with a mandate for a very substantial reduction. That is precisely what occurred in this case. We had to make major reductions in the defense authorization bill.

The chairman approached this with a great deal of dedication, a sense of reality, a sense of duty, a sense of looking at the Senate as a whole. Even though he would not have made these reductions, he guided the committee so as to comply with the budget resolution. I believe this is an example for other committees, if we truly are going to try to get our fiscal house in order.

This report represents a reduction of $10.5 billion in budget authority from the $198 billion requested for defense and civil defense programs covered by this authorization. However, it will still require the anticipated reductions in the military construction and Department of Energy military programs to meet the overall $11.9 billion reduction in national defense functions in the budget resolution. In addition, the conferees accepted certain revised assumptions on inflation which anticipate lower than budgeted prices for Pentagon goods and services and account for about 10 percent of the reduction to the administration's request.

Mr. President, I have reservations about this procedure. I understand why it occurred. But I do believe that we have for so long gone over the inflation estimates that it would be a breath of fresh air for the Nation if we could come under the inflation estimates and by taking this step we make that less likely although not impossible.

This is neither the time nor place for a detailed discussion on the overall defense budget, the appropriate levels, and the congressional budget process. Suffice it to say there are significant problems that the Congress and Executive must address both from an organizational and a policy standpoint.

And I say to my colleagues here today, as I have in the past, that one of the big questions we are going to have to address in the near term is whether we can afford the time and the effort both of Congress and of the executive branch in continuing to both authorize and appropriate in a defense function. In these defense functions we are spending weeks and even months preparing a defense authorization bill. Our colleagues on the Appropriations Committee are doing the same thing with the same witnesses coming before them. The executive branch, of course, is repeating this not only in the Senate but in the House of Representatives. We are all behaving as if it were 100 years ago and we had ample time to do our duties.

I believe we have to eliminate some redundancies and duplications in this institutions, and I believe one of the places we should start is in the dual function of authorizing and appropriating.

There is no magic solution. I suggest that we need to go to 2-year authorizations and perhaps even 2-year appropriations, and I suggest that we begin thinking seriously about this subject.

I will not go into further detail today, but I am preparing some legislation that at least that I hope will kick off a long overdue debate about our own procedures.

The conference report provides for a 4-percent pay raise for military and civilian personnel in the Defense Department beginning on January 1, 1984. Since the President's budget provided for no pay raise, this action adds about $1.8 billion to the defense budget as proposed by the President. Thus, the conferees, have in fact reduced the programs requested by the administration by about $12.3 billion.

About $2 billion of the reductions proposed in this conference report are in the area of investment for strategic nuclear forces—75 percent of these reductions in this area are the result of the administration's revised MX program. About $2.5 billion was taken out of the operation and maintenance accounts which are the accounts traditionally associated with readiness. The conferees also recommended changes in personnel policies and end strengths which should produce an additional $.5 billion in savings. The remaining $6 plus billion of reductions are generally being made in the area of conventional force programs.

In addition to the question of the appropriate balance in key accounts like strategic nuclear, conventional forces, and readiness, the Congress will be faced in the next several years with a continual growth in the percent of defense outlays resulting from prior years appropriations. When this is coupled with the large increases in the investment accounts and a constant, if not growing, strategic account, significant additional pressures will be created on readiness and conventional forces. In my judgment, this is a situation that must be addressed in future considerations of defense programs and budgets, and I hope that that kind of careful examination is now occurring in the Department of Defense in preparing next year's budgets.

STRATEGIC PROGRAMS

In the strategic nuclear area, the conference committee accepted the Price-Aspin amendment from the House bill which links MX deployment to the administration's commitment to the recommendations of the Scowcroft Commission on both strategic modernization and arms control. It also included the Warner-Nunn Senate provision that links any future deployment request for the MX missile to a justification based on the strategic balance and stability as well as arms control. In my judgment, these two provisions help preserve the coupling of future considerations of the MX to arms-control matters and the Scowcroft recommendations.

BINARY CHEMICALS

The issue of binary chemical munitions was a particularly difficult one in the conference.

And I am sure that my colleague and friend from Arkansas will have observations on this point.

The principal intent of the conference agreement is to provide our country with the negotiating leverage necessary to reach an agreement with the Soviet Union on the limitation and eventual banning of all chemical weapons. In addition, it recognizes the need to enhance the U.S. deterrent now undermined by an increasingly obsolete munitions stockpile.

The proposed conference compromise on binaries does not authorize final assembly of these weapons, any more than did the original Senate provision. The conferees adopted multiple restrictions from both the Senate and House bills including: Prohibiting final assembly of any chemical munitions until October 1985; requiring that even thereafter one existing chemical shell be destroyed for each new binary weapon produced; and mandating Presidential certification prior to final assembly that any such production is in the national interest. Congress will have many more opportunities to decide on final production.

155 NUCLEAR ARTILLERY SHELL

The conferees also took a major step in recognizing the diminishing contribution of short-range nuclear artillery and directed termination of the 155-millimeter nuclear artillery shell program. This reflected action taken in the Senate to delete this program and to redirect funds to conventional munitions. The conferees linked the termination or the 155 program with a major emphasis on the joint conventional programs designed to improve our ability to deter, detect, and if necessary, destroy and defeat Warsaw Pact aggression. I was pleased that the joint tactical fusion, joint tactical missile, and joint surveillance and attack radar systems were fully supported by the conference. The conferees also agreed to conduct an unprecedented joint House-Senate hearing in the area of conventional weapons capability and the deep strike/second echelon concept later this fall. The conferees also are requiring some major studies and recommendations on the overall issue of improving the conventional posture as well as reexamining the tactical nuclear posture. These are all indications of the conferees' strong support for improving NATO's conventional capability.

MANPOWER

In the manpower area, there were several significant developments, but I will highlight just one. The conferees agreed to substantial cuts in the administration's request for additional active-duty end strength. The administration requested an increase of 37,300 above the fiscal year 1983 level and the conference only approved an increase of 8,500. This action was taken in large part due to the conferees' belief that a better integrated Active and Reserve Force would yield a less costly yet combat-effective force structure. Truly Ready Reserve forces are perhaps the best defense bargain available and the depth of feeling by the conferees in this area should not be underestimated by those who are concerned in the Department of Defense.

DEFENSE ORGANIZATION

Finally, Mr. President, a few words about efficiency and management. It is becoming increasingly difficult to give DOD the benefit of the doubt when dealing with inefficiency and ineffectiveness of expenditures. Recent stories about the exorbitant costs of spare parts and weapons that do not work as expected have done little to improve the image of the Department. On the contrary, they continue to erode the hope of sustaining the long-term consensus on improving our overall defense capabilities.

Nothing is more damaging to the consensus on national security than has been built so painfully after the Vietnam war than reading reports of gross inefficiency in procurement procedures.

The conferees adopted several initiatives which hopefully would improve the Department's ability to deal with some of these longstanding problems.

One is a compromise establishing a Director of Operational Testing and Evaluation in DOD. This will be an independent office and should help insure that our weapons are subject to rigorous and objective testing prior to the commitment to procure these expensive systems.

I commend my colleague, Senator PRYOR, for his leadership in this regard, also the Senator from Delaware, my colleague, Senator ROTH. I think they have made a real contribution and I think all of us need to follow the implementation of this provision with a great deal of care.

Just for the information of the Senator from Arkansas, I have heard in recent days allegations that this provision is going to slow down the whole procurement process, that we are going to see a lot more delays and, therefore, cost overruns, and so forth.

I do not share those views, and I think that many of those who are spreading this need to understand that the provision puts this management under the Secretary of Defense. This is not over in the Library of Congress or somewhere in the legislative branch. This is an independent cost evaluator under the overall supervision and direction of the Secretary of Defense.

So I certainly hope that in implementing this the Department would understand that this is not intended to delay but to assure that we are truly going to get a nonbiased independent evaluation of a weapons system before production.

I hope that some of the existing procedures can be shortened and some of the inevitable duplications which will occur, if nothing changes, can be avoided. We are not trying to overlay this on all the existing management. We are trying to say "Cut out some of what you have got now and let us have a truly independent evaluation."

So I think there will be a number of us who will be looking very carefully at how the Department of Defense im-

11-059 O-87-33 (Pt. 17)

plements this, and I certainly hope they implement it in good faith and with a view in mind that we want to not bog down the process but make it much more effective. I am sure the Senator from Arkansas would share those views. We will hear from him later on. Again I commend him for his leadership.

The conferees also approved a provision requiring that the Secretary of Defense consider an independent cost estimate before the Department can proceed with full-scale development, or production and deployment of a major weapon system. This was an amendment that I authored in the committee and it did go through the conference. This requirement in the cost area is trying to do what the Senator from Arkansas' provision has done in the operation, testing, and evaluation. This requirement builds on an existing regulatory framework that already exists in the Department of Defense, and I commend the Department of Defense for what they have already done in moving in this direction. But this new provision should give greater weight to the cost conclusions of the independent cost analysis groups. Again I will be following that internal defense procedure with a great deal of interest. More accurate and more independent cost estimating is critical to having a credible weapon acquisition process.

The conferees approved two initiatives focused specifically on the spare parts area where much more focus is needed. One is for an extensive report and the other accepts Senator LEVIN's amendment requiring the issuance of certain regulations dealing with spare parts costs.

The conferees also directed a 5-percent reduction in the number of military and civilian personnel in the Office of the Secretary of Defense and the headquarters of each of the services. This hopefully should result in a leaner, more efficient headquarters element.

Mr. President, although none of us might agree on each and every part, and although the trends in certain areas are disturbing, I think we are going to have some real struggles in the next couple of years in the overall defense trying to make certain we can maintain a reasonable defense program without adversely impacting the readiness of our present forces, and that is going to be the real challenge.

In spite of these anticipated possible problems in the future I believe this conference report represents a fair portrayal and a fair compromise between the House and the Senate bills in an area of vast importance and an area with a great deal of complexity with respect to our national security program.

Again I commend Senator TOWER and the majority for a diligent, excellent job in getting this bill before us now. Without the strong dedicated leadership of the Senator from Texas we could well have the conference extend through the month of September and even into October. But he did a yeoman's job in pushing this bill to a conclusion, and I commend his staff, led by Jim McGovern and others, for working with the minority. We, of course, look forward to that continuing kind of bipartisan effort.

Mr. President, I know some of my colleagues on this side of the aisle would like to be heard, but at this point I will yield the floor.

Mr. TOWER. Mr. President, I yield 5 minutes to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in support of the conference report for S. 675, the Department of Defense authorization bill for fiscal year 1984.

My distinguished colleagues will note that the total dollar figure is about $12 billion less than the total for the Senate omnibus defense bill previously considered by this body.

The reason for this decrease is the deletion of the military construction and Department of Energy authorization requests. The military construction conference has been completed and the conference report will be filed in the near future. The conference on military construction recommends approximately $7.3 billion in new authorization for fiscal year 1984.

Mr. President, I would also like to commend the distinguished chairman of the Armed Services Committee, Senator JOHN TOWER of Texas, for his tireless efforts during review of the defense budget and during the joint conference.

It is also proper to note that the Armed Services Committee will sorely miss the leadership of Senator Henry M. "Scoop" Jackson. Additionally, designation of our fifth Trident class submarine as the U.S.S. *Henry M. Jackson* is a fitting tribute to one of America's greatest modern day patriots.

Mr. President, one of the strengths of our Nation is the unity of purpose that surfaces when America faces grave challenges. Recent events have underscored the seriousness of the threat that the Soviet Union poses for the Free world.

No nation in history can match the atrocities perpetuated by the Soviets as they have trampled human decency under the boot of totalitarian rule. Their recent actions are not out of character and should remind us that military strength and national will are our only deterrents to Soviet aggression.

Mr. President, I urge all of my colleagues to join me in unanimous support of this conference report. Such a vote will serve notice that the United States cannot be intimidated by threats or murder.

Mr. President, in closing I want to observe that the distinguished Senator from Georgia (Mr. NUNN) has been selected as the ranking Democrat on the Armed Services Committee. I have known Senator NUNN for a long number of years, since he came to the Senate, and he has done a magnificent job in defense and other matters, and I think we are fortunate to have him in this key role. I am certain that he will cooperate, as Senator Jackson did, in standing for a strong defense, and that he will pursue a course that will be in the best interests of our Nation.

Mr. NUNN. I thank my colleague from South Carolina who has been a stalwart in national security for his entire career, I thank him for his kind words, and I want to assure him that I look forward to continuing to work with him in these important areas.

Mr. President, I do not know whether we have anyone on this side of the aisle who would like to be heard at this time. I understand Senator GOLDWATER—Senator STENNIS.

Mr. STENNIS. Mr. President, if the Senator will just yield to me, I am certainly giving my strong support to this conference report. I also salute the Senator from Georgia for his role here, an important role. I repeat that I support the conference report entirely.

Mr. TOWER. Mr. President, I yield 10 minutes to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. I thank my chairman.

Mr. President, before I proceed with the few comments I have on this report, I wanted to compliment the Senator from Texas for a very outstanding job during this conference. I was not able to attend much of the conference because of personal health problems, but I observed what he did, I observed how he did it.

I have watched him all the years since he has been in the Senate working on the Armed Services Committee and I can tell my colleagues that without the leadership of Senator TOWER our defenses would not be in the state they are in today.

I am very happy to see Senator NUNN move up in rank, and I look forward to continuing my service with him.

I would like to join my other colleagues in the comments that have been made about the late Senator Jackson of Washington. He and I came to this body as classmates a long, long time ago, and we served together on the Armed Services Committee almost the entire time we have been here. His

contributions to America are going to be sorely missed.

Now, Mr. President, in general, I am in favor of the provisions of the conference report on the Department of Defense Authorization Act for 1984. Under this administration, we have made significant progress in certain areas of the Defense Department which needed strengthening. Unfortunately, I was not able to be present during all of the conference on this year's defense bill. As a result, I feel a strong obligation to state opposition to the provision in the conference report which provides that the Secretary of the Army cannot make a contract for the purpose of establishing a second source for production of the engine for the M-1 tank.

As my colleagues may recall, the position which the Senate Armed Services Committee, and indeed the entire Senate, took on this issue was quite in contrast to the conference report. The Senate Armed Services Committee report encouraged the Army to continue its evaluation of the feasibility of establishing a second production source for the AGT-1500 M-1 tank engine. We suggested that in addition to expanding the engine mobilization/production base, that the second source initiative appeared to have merit as an incentive toward future price competition and as a basis for improving delivery stability, engine quality, and technical performance.

The position of the House of Representatives, on the other hand, was to prevent the Army from second sourcing the M-1 tank engine. There has been substantial confusion on this issue. Much of this confusion has been cleared by a letter forwarded to Mr. ADDABBO, the chairman of the Defense Subcommittee on Appropriations in the House of Representatives. This letter, dated August 10, 1983, was signed by the Assistant Secretary of the Army for Research and Development, and firmly established the Army's position on a second production source for the M-1 tank's engine. The Army Assistant Secretary, in his letter to Mr. ADDABBO, spelled out the results of their analysis of firm, fixed price offers from three potential second source contractors for 1,170 engines.

The lowest price proposal, including Government-furnished equipment, provided a unit price in fiscal year 1986 constant dollars which was $10,000 per engine less than their most recent proposal from AVCO, the current engine manufacturer. The Army judged the savings available by awarding a second source contract to be in excess of $300 million considering the procurement of about 4,000 life cycle spare engines/equivalents beyond fiscal year 1989. These spare engines would support the Army's tank fleet of over 7,000 tanks during its anticipated 20-year lifespan. The low offer provides approximately $67 million in savings when compared to a sole source multiyear contract with AVCO over the period fiscal year 1985-89.

In addition to Assistant Secretary Sculley's certification to the House Appropriations Committee, the Under Secretary of the Army, Mr. Ambrose, and the Secretary of Defense both discussed this subject with the press at news conferences. Needless to say, both the Secretary of Defense and the Under Secretary of the Army are firmly opposed to what appears to be an obvious congressional effort to prevent competition.

As a result of my concerns over this issue, I have asked the General Accounting Office to provide an independent analysis as to the reliability of the data which the Army used in arriving at their position of affordability. Likewise, I have asked the Inspector General for the Department of Defense, a newly created independent agency, to provide an assessment of the Army's feasibility analysis. Although these independent assessments are not yet available, I expect to receive them soon.

Contrary to the position taken by the House of Representatives on this subject, competition almost always drives the price down. Granted, there must be sufficient quantities of the product produced to provide a saving and we all understand that. Serious questions should be asked of the Department of Defense when they indicate an intention to second source any weapons system or part of a weapons system. But, outright prohibition of second source procurement is ludicrous. We continue to harass the Defense Department in encouraging them to provide competition in the procurement process and now we are turning around and banning their effort to even seriously consider a second source. We have not even provided the Army an incentive to pursue second source in future weapons procurement but, in fact, have provided a disincentive.

There is no reason that Congress cannot reverse or override decisions by any of the military departments should they decide to second source a particular weapons system but, in my view, we do a serious disservice to the taxpayers by not even letting the Army try to create some competition in this situation.

Mr. President, I would not contend for a moment that the Army has handled this situation perfectly. There have been shortages of engines, at various times, for M-1 tanks. In all probability, some of the shortages were created by the contractor, AVCO, and some by the Army themselves. That, however, is not the pertinent issue in this case. The issue here is whether or not we are even going to consider competition which can provide a price reduction overall. Likewise, it is probably true that second sourcing was considered because of the earlier, poorer performance of AVCO in delivering engines to the Army. Even if we take as fact the indications that AVCO is now producing engines of much better quality and in a timely fashion, I still see no reason why we should not look at the competition aspect and the potential savings to the Department of the Army.

Mr. President, I oppose this particular provision of the conference report and, at the appropriate time—probably during the consideration of the appropriations bill—I will offer an amendment to change this and will recommend to my colleagues that they support the original Senate position. That is the only way, in my view, that we can continue to urge the services to improve their procurement process and to provide real competition in the purchase of the many costly weapons systems in the defense budget.

Mr. President, I ask unanimous consent that the letter from the Honorable J. R. Sculley, the Assistant Secretary of the Army for Research, Development, and Acquisition, to Representative ADDABBO, be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GOLDWATER. Mr. President, in closing, I wish to second what the distinguished Senator from Georgia has said in warning this body about the almost stupid procedures that we have to proceed under now with the way we hold appropriations from the opening of the Senate until we finally are able to act on them after other committees have had to act on them and then go to conference with the House, come back here for this vote, and then have the matter go once again to two different committees, neither one of them with any real expertise in the field of military procurement or military judgment. And I say this advisedly and without disrespect to these committees.

But to have to go through the budget process and then to have to go through the appropriations process—I do not know if this Chamber realizes it or not but I do not think we have had an appropriations bill on defense here in 2 or 3 years—as the Senator from Georgia has indicated, it is a waste of time and it is a waste of effort. If we are going to have three different committees consider our defense spending and what we need, I think we should seriously consider eliminating two of them and coming down with one because we are wasting time.

Mr. President, once again, I want to pay my respects to the Senator from Texas. I think it is almost a tragedy

that a young man like this has decided to go back to Texas. I do not question his judgment in leaving the body, but going back to Texas causes me some concern. [Laughter.]

I yield the floor.

EXHIBIT 1

DEPARTMENT OF THE ARMY,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, D.C., August 10, 1983.

Hon. JOSEPH P. ADDABBO,
Chairman, Defense Subcommittee, Committee on Appropriations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The Army recently completed its evaluation of establishing a second production source for the M1 tank's AGT 1500 gas turbine engine. This letter provides information on the results of that analysis in accordance with the fiscal year 1983 House Appropriations Committee Report 97-943 which requires that the Army submit engine second source proposal data to the authorization and appropriations committees.

In response to a February, 1983 request for proposal, the Army received firm-fixed-price offers in June 1983 from three potential second source contractors for 1170 engines. The results of our analysis of these offers indicate that establishing an engine second source is affordable and cost effective. The lowest price proposal, including government furnished equipment, equates to a unit price in fiscal year 1986 constant dollars which is $10,000 per engine less than the most recent proposal from AVCO, the current engine manufacturer.

The savings generated by awarding a second source contract will be in excess of $300 million considering the procurement of about 4,000 life cycle spare engines/equivalents beyond fiscal year 1989. The spare engines will be used to support the 7058 tank fleet during its anticipated 20 year life span. The low offer amounts to approximately $67 million in savings when compared to a sole source multi-year contract with AVCO over the period fiscal year 1985-1989.

While there is a requirement to adjust funding in specific years, no net additional funds must be applied to the M1 tank program to support engine second sourcing. The Army's fiscal year 1985-89 POM program for the M1 has not been increased to accommodate engine second sourcing.

In summary, the Army has determined that establishing a second production source for the M1 tank engine is affordable, cost competitive and in the best interest of national defense. However, based on the results of the Joint Authorization Conference, it appears now that the Army will not be able to award a second source contract.

Sincerely,

J. R. SCULLEY,
Assistant Secretary of the Army (Research, Development, and Acquisition).

Mr. NUNN. Mr. President, with the permission of the young man from Texas, I yield to my colleague from Arkansas such time as he may need. Would 15 minutes be appropriate?

Mr. PRYOR. Fifteen minutes would be more than enough.

Mr. NUNN. I yield 15 minutes to the Senator from Arkansas.

Mr. PRYOR. I thank my colleague from Georgia for yielding to me at this time, Mr. President.

First, I echo the sentiments of our colleague from Arizona, Senator GOLDWATER, in his comments about our friend—I almost said our departed or late friend from Texas, but I will not quite go that far. He has had a tremendous impact on our national defense and this body will miss him sorely.

Mr. President, I also wish to thank the distinguished Senator from Georgia, Senator NUNN, for his generous statements about some of my efforts—our efforts, I should say—with regard to the creation of the independent Office of Operational Testing. I think that this reform will make our entire weapons system more efficient.

I am hopeful that it will hold down costs, and certainly it should bring about more efficient weapons—weapons that work. That is not too much to ask.

I am somewhat concerned about the reluctance that has been alluded to by the distinguished Senator from Georgia, implying Pentagon claims that this system might not work, might slow down the procurement process. But be that as it may, Mr. President, I think we have to try something.

I am very, very appreciative of the conferees looking at this matter and accepting basically the language that we adopted in the Senate, language that was authored by the distinguished Senator from Delaware, the chairman of the Senate Governmental Affairs Committee, myself, and several of my colleagues.

Especially, Mr. President, do I appreciate the support of Senator NUNN in this matter. He has long been interested in this matter, and his support without question was instrumental in passage of this section and its inclusion in the conference report we deal with today.

Mr. President, time, circumstances, and events generally control, to a great degree, legislation that we consider on this floor. This debate is certainly no exception. Time, circumstances, and events of the past 12 days present us with deep sorrow with regard to what I call the savage massacre of the passengers of an unarmed Korean airliner, by the Soviet Union. It also presents us with a great deal of irony that we have at this moment in this body, the responsibility of authorizing the largest single appropriation bill for defense and national security in the history of this country, only 12 days after that international tragedy.

Mr. President—and this may be somewhat personal—in looking over some experiences I have had in certain offices and positions of public trust, being a State legislator, a U.S. Congressman, a Governor, and now a Member of this very distinguished body, I think many times when we legislate in a period of deep emotion, when the American people basically are angry and frustrated, many times, Mr. President, we might find some wisdom if we would remember that we must look at long-range events before us as well as events immediately behind us.

I think it is ironic, Mr. President, that today with this particular bill before us, this Defense Department conference report, that we are basically embarking on some programs that might not have survived the test of this body or the other body had the vote come before, rather than after, the Korean plane disaster. But once again, time, circumstances, and events have come together and placed us here at this time with this legislation before us, and now it must be our duty to act on it up or down.

There is one particular area that I am most concerned with that the conferees sent to this body, and that is the issue of our once again embarking into the production stages of chemical weapons, commonly known as nerve gas.

I think my colleagues have known my long opposition to the production of nerve gas, doing away with a 13-year moratorium against the production of chemical weapons, totally turning our backs on the decisions of several Presidents and on several votes relative to the production of chemical weapons.

I oppose chemical warfare, and I will oppose it tomorrow as I oppose it today for several very simple reasons:

I do believe that we have an adequate supply. I sincerely believe that that supply is more than adequate to kill every man, woman and child on the face of the Earth 50 times over.

I do not believe that supply has deteriorated to the extent that it renders us helpless to defend ourselves or to wage successful chemical warfare in a battlefield situation.

Also, Mr. President, I oppose chemical weapons production because I feel that it will do nothing to enhance the possibility of finding agreements with the Soviets or any other country which might be tempted to engage in chemical warfare, which, in my opinion and, I think, in the opinion of America, is the most repugnant of all acts of war.

Mr. President, I oppose chemical weapons and their production because we find no country today that has come forward and said that it would be willing to store this new supply, called binary on its soil.

That is very understandable because when this supply is stored any place in the world, that particular land, that particular soil, becomes an immediate target and becomes immediately vulnerable to the horrible effects that could be visited upon the citizens of that area, the civilian population

which would be unprotected and unprepared.

Mr. President, in general, it is my opinion that nerve gas does not necessarily kill soldiers. Soldiers will be equipped with nerve gas suits and protective gear; however, nerve gas can wipe out millions and millions of unarmed civilians. I hope our soldiers will be protected, but today we have no adequate protection for the civilian population.

I am hopeful, Mr. President, that this issue of chemical warfare and the production of chemical weapons will not become our monument to the 269 dead people of the Korean Air Line tragedy.

I, too, Mr. President, look at what we are doing in this particular conference report with the MX missile, with the B-1 bomber, with chemical weapons, and perhaps other new embarkations in the area of defense. I am just hopeful, Mr. President, that we do not find ourselves slipping very quickly into a philosophy which proclaims to build more and more of everything in order that we might eventually have less. I hope that is not our posture.

Mr. President, I have been in politics a good while, and I consider myself somewhat pragmatic. I know today that if I went back to July 13, my vote would be unchanged. As the President will recall, on that particular day we had the vote in this body on the production or nonproduction of chemical weapons in our country.

That vote was tied 49 to 49.

The Vice President, Mr. BUSH, broke that tie, making it 50 to 49. The House of Representatives had defeated the idea of the production of nerve gas by some 15 votes. Therefore, we find ourselves today once again in a position of irony because we find that in neither body have we found a majority of the Senators or the Members of the House of Representatives supporting the idea that we should once again proceed to the production of chemical weapons, and yet production is authorized in this conference report. And in a few hours, or perhaps a few moments, we will vote up or down on this conference report, and we will see that our country is committing itself to the production of chemical weapons.

There is one final opportunity, Mr. President, that I and other Senators who feel as I do will avail ourselves of, and that is not in the authorization process, which we conclude today, but is the appropriations process. When we try to act with some degree of wisdom, commonsense, and what is truly in the best interests of our country and this world, once again I will propose, at the proper time and the proper place, to strike the moneys committed in this conference report today to the production of nerve gas.

Mr. President, I have taken a few moments to share some of my feelings about this conference report. I wish that we had waited a week or two, or perhaps even three, before taking it up, but I am not going to ask my colleagues today to once again take a vote at this very emotional time on the issue of nerve gas production. That time will come later, perhaps at a time when we can see things more clearly and when our perspective is somewhat better.

Mr. TOWER. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. The Senator from Massachusetts is on the floor. May I inquire of the Senator how much time he would like?

Mr. KENNEDY. I do not expect to use more than 15 minutes, perhaps less.

Mr. NUNN. I yield 15 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I rise to join my colleagues in paying tribute to Senator Henry "Scoop" Jackson, who died suddenly and tragically last week. I will take the opportunity to speak at greater length about his contributions both to this body and to our Nation, but I think as has been appropriately pointed out earlier in this debate, no discussion of national security items or defense issues, particularly on this defense authorization, would be complete without recognizing Senator Jackson's extraordinary contribution to this body and to our Nation. I will welcome the chance to elaborate on this tomorrow during the time that has been designated by the majority and minority leaders.

I also want to recognize the chairman of our Armed Services Committee (Mr. TOWER), who has announced his decision to retire. He certainly will be missed in this body. Although Senator TOWER and I have seen a number of major issues from different perspectives, I have a real abiding respect for his capabilities and expertise on national defense and his commitment to the Nation's interests. Our debates on the floor will be less spirited, less lively because of his retiring. We will have lost one of our best sources of information and insight about national security policy.

Mr. President, I am reluctantly voting against the 1984 Defense Authorization Conference Report. This bill does not meet the most basic test of any defense authorization—to maximize our national security through the wisest use of our limited resources.

When the defense authorization was before the Senate in July, I opposed the bill because it allocated billions to wasteful, inefficient, and destabilizing weapons systems such as the B-1 and the MX. The bill was also the product of blatant budgetary manipulation. These flaws fatally infected the Senate bill, and were not remedied in conference.

The story of Budget Director Stockman's statistical trickery is familiar to most of my colleagues, and I will not repeat it here.

Let me just say that I was appalled by this budgetary flim-flam. I regard these actions as bad defense policy, bad budgetary policy, and an insult to the intelligence of the Senate. I believe that it is fundamentally shortsighted to cut from readiness, manpower, and tactical warfare programs in order to preserve wasteful and destabilizing strategic and naval programs.

I reject the notion that simply spending more will lead to greater national security. The MX missile is the product of such thinking. Touted as the answer to the "window of vulnerability," this multibillion-dollar multiwarhead nuclear weapon is less survivable than the Minuteman it is designed to replace and its deployment will further escalate the arms race with no increase in our national security. I believe in maintaining a strategic nuclear triad that includes a survivable land-based leg—not one that is obsolete before it is even built.

When the Congress agreed to authorize the MX, President Reagan indicated a willingness to alter his negotiating position in the START talks. The American people are entitled to more than a bland assurance of the President's good faith in arms control. It is all too easy to promise action in return for congressional approval of MX, but the proof must come at the bargaining table. The Congress ought to be skeptical of such promises, given the President's opposition to every arms control agreement signed by the United States and the Soviet Union in the past 20 years.

I also strongly object to the inclusion in this bill of funding for the development and production of lethal chemical binary weapons. It has been the policy of the last three administrations, both Republican and Democratic, to oppose the production of new chemical weapons, and now is no time to reverse that policy. A majority of the House of Representatives rejected the Reagan administration's request to build new weapons and voted instead to support arms control negotiations with the Soviet Union to eliminate chemical weapons from the arsenals of the superpowers. I regret the

conferees failed to take advantage of the opportunity to halt a senseless and dangerous continuation of the chemical arms race. I believe that my colleague from Arkansas has reviewed that for the record in a very persuasive way.

I support a national defense that is second to none. I also support real growth in the defense budget. But real growth in defense must address real problems in our defense posture. We must also consider other urgent national needs, including importance of reducing the massive Federal deficit.

We can, as a Nation, fashion an effective defense at an affordable cost. There is no more important responsibility before us. But this task requires that we reorder our defense priorities and reexamine what is militarily necessary and effective—a task which this conference report fails to do.

I want to mention at this point one or two issues that were debated previously.

The Senate has addressed the issue of binary nerve gas, but I believe that this issue will not be resolved by this defense authorization legislation but will continue to be before this body in the weeks and months to come. I believe it should be.

I want to commend the Senator from Arkansas again for his excellent presentation during the formal consideration of the defense authorization. In addition, the help and assistance he gave to those of us who were conferees was greatly appreciated.

At this point, I also want to acknowledge the consideration that was given to those who had supported the position of the Senator from Arkansas. We want to express our appreciation to the Senator from Georgia, who, although he did not support our position, was instrumental in permitting those of us who had a differing position to have a discussion and a debate in the conference and to have a rollcall vote in the conference.

As a Member of this body, I want to draw attention not only to his courtesy, but also to his consideration of the views of those with whom he might differ; but, in the proud tradition of this institution, he was willing to assure that those views were going to be given a fair consideration and a vote.

I do not wish to take up much time. The Senator has covered these items. There are three or four issues which I think are basic to the whole debate on the binary gas issue, and I should like to address these to the Senator from Arkansas.

The first is the issue of the current stockpile. I know he has addressed that issue in the past. Arguments have been made that the existing weapons are outmoded and dangerous, prone to leakage. The question has been asked whether, on safety grounds, we really need to replace our existing stockpile. Those arguments were made in the course of the conference; and as we address this final conference report, we should address them briefly this afternoon.

I ask the Senator from Arkansas, who I consider to be the foremost expert in this body on this issue—he has spent a great deal of time on this, and the record of this body over a period of years would indicate that—if he will respond.

(Mr. SPECTER assumed the chair.)

Mr. PRYOR. Mr. President, I appreciate my friend from Massachusetts raising these concerns.

I really get to where I start worrying a great deal about myself—I have mentioned this to my colleague—because I am afraid I am becoming an authority on only one subject—nerve gas. People walk up and start to talk about nerve gas, and it weighs heavily on me after a while. I am concerned about it and I think the Senator has raised some pertinent points.

As to the adequacy of our stockpile, we have done extensive research on this question. We have looked at the reports of the General Accounting Office, for example. The reports from the GAO, dating back as far as 3 or 4 years ago, relative to the existing stockpile, indicate to me, at least, that that stockpile is adequate and that the leakers, as they call them, are very few, considering the massive number of artillery shells that are now filled with the lethal nerve gas.

Second, we have taken testimony on several occasions in the Armed Services Committee and as individual Senators, listening to Dr. Matthew Meselson, of Harvard University, having discussions with him and reading papers he has written. He is certainly one of the foremost authorities in this field, and I think he is without peer in this whole area.

We have looked at various other studies and reports and findings by groups to which we would certainly give great credibility that our stockpile is adequate, has not deteriorated, is ready for active use, and could be called upon in a very quick time in the event it were needed.

Mr. KENNEDY. Another issue raised in the conference is that binary munitions are safer than the present unitary chemical weapons. I wonder if the Senator from Arkansas would accept that argument.

Mr. PRYOR. I must say that I know what the Senator's question is, and I know where he is coming from. I must say that in my opinion—and it is a layman's opinion—the transportation itself, the movement from one place to the other, of this form of binary nerve gas might be safer than the system we have now.

The downside of this whole argument on the issue of transportation and of safety is that it may become so safe that it could be utilized in many conditions and many environments. In the end, we would be more likely to witness the utilization of binary nerve gas by Third World countries, and so forth.

So I think that, in many cases, the safety might be a blessing and in some it might really be a very dangerous thing in the long run.

Of course, the two nonlethal elements combining to make a lethal element is the whole structuring process that distinguishes the new binary production proposal from the existing supply of nerve gas.

In some respects it could be safer, but the safety itself may mean that it would be more accessible to far too many people.

Mr. KENNEDY. The distinguished Senator has followed not only the chemical issue but the whole range of different issues on arms reductions and the past agreements, both those which have been ratified and those which have been at least debated and discussed, and perhaps not submitted to the Senate. Therefore, let me ask my distinguished colleague, does the Senator from Arkansas believe that the action that is included in the conference report about committing this Nation to renewed production of chemical weapons is going to be an important bargaining chip for the United States in its negotiations on arms limitations with the Soviet Union? Is there anything in the past that from his own understanding and awareness of the nature of the negotiations that would suggest or recommend to him or to this body that such a bargaining chip will be created and that it will enhance our ability to really slow or halt the arms race?

Mr. PRYOR. To answer my distinguished friend and colleague, I would say that I think that this would deter any immediate hopes for an improved bargaining position because it would once again indicate that we are reversing a policy of 13 years and going back into the production of chemical weapons.

I also believe that, in going back into production of this particular type of lethal, and I must say repugnant, type of weapon, I do think that we are sending a signal out to the rest of the world that once again we are falling into a trap and accepting the dangerous argument that we ought to produce more and more so that we can eventually have less. Somehow or other maybe one of my colleagues can convince me that that is the right thing to do, but at this point I am not convinced, especially when we have such an enormous stockpile which is ready and available for use. For us to

simply add to that stockpile makes no economic sense. This is going to be a $4 to $6 billion program before we know it, and we are just duplicating a stockpile that we already have.

If I might, I wish to add one thing relative to the safety features of this production of binary and chemical warfare.

The Senator posed that question very succinctly a moment ago, and in answer to that question I failed to point out to my colleagues that a large portion of the $116 million in this defense authorization report goes to what is known as the Big Eye bomb. The Big Eye bomb was built originally, if I am not mistaken, for the U.S. Navy to utilize. The Big Eye bomb is a bomb that will utilize the binary concept. Third, it is a bomb that has failed in several of its tests, exploding prematurely in at least one and perhaps more of its tests. For that reason I think that the safety features of the binary system are less compelling.

Mr. KENNEDY. I welcome the comments of the Senator from Arkansas about the Big Eye bomb.

Finally, I wonder if the Senator is not troubled as I am, that, after the House of Representatives effectively dismissed the arguments of the President on this issue, and after the Senate of the United States sided with the President only after the Vice President voted to break the tie, a better compromise might have been realized. One House voted to eliminate new chemical weapons production, and the other body essentially tied on it, and then the conference itself came back with a recommendation for full funding.

I am just wondering, as someone who has been in this body and has been in conferences over a long period of time, whether the Senator is not troubled as I and I know other members of this conference are that we did not really respond to what I would consider to be our obligations. One such obligation is to find a truly responsible, reasonable, and rational compromise between positions which have been expressed by the majority vote in the House of Representatives and also by at least a number of Members of the Senate, a tie vote by the voting Members of the Senate, broken by the vote of the Vice President of the United States.

Mr. PRYOR. Let me answer my friend from Massachusetts by saying, if a ninth grade civic student asked this Senator, can Congress pass a piece of legislation without a majority of its Members supporting that legislation or that amendment or that bill, I would say no.

But what we have here is to the contrary. The House of Representatives defeated the production of chemical weapons. The Senate tied. The Vice President broke the tie, on July 13, 1983, I believe. It went to the conference. The conferees put it in the report, and now it is before us today without a majority of Congress itself supporting it.

Possibly some researcher or some political scientist could tell us whether or not that has established a new precedent, whether that has ever happened in Congress before. I do not know of a precedent for it. I am not demeaning or criticizing the conferees in any way. I am saying that there is a little strange quirk in our system today that I think certainly needs to be looked at because it could establish for the future very dangerous precedents.

Mr. KENNEDY. Finally, let me ask the following question for the benefit of the Members and I think also for millions of American people: Is it the intention of the Senator from Arkansas to continue this battle in the appropriations process and to continue to give Members of this Senate an opportunity to express their views on this issue and to continue to attempt to educate the American people about the real facts on this issue? Is it the intention of the Senator from Arkansas to continue that battle that he has waged so effectively over the period of these recent years?

Mr. PRYOR. The Senator is very kind and generous. The answer is yes; I do plan to. I plan at the proper time and the proper place to give our colleagues another opportunity to express themselves on the issue of chemical weapons and their production—on the appropriations bill.

I hope that by the time we will again be considering this issue it will be in a time when we will be legislating not in a period of great turmoil or great crisis but when we can objectively look at the long-range implications of our decision. When that occurs, I have enough hope in our system to believe that we will make a decision based upon commonsense and wisdom.

I thank the very distinguished Senator from Massachusetts for posing these questions and for being so deeply committed to preventing the production of lethal chemical agents and for the leadership he has demonstrated at every turn.

Mr. KENNEDY. I thank the Senator from Arkansas.

I will look forward to working with him on this issue in the days and months ahead.

I thank the ranking minority member and if there is any time remaining, I yield it back.

Mr. TOWER. Mr. President, I yield 3 minutes to the Senator from California.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. WILSON. Thank you, Mr. President.

Mr. President, I rise to indulge in some personal observations. The pending business before us is the conference report. It may not be amended. It may only be praised or disagreed with, but it provides the opportunity for someone who has experienced his first conference to render some judgments based upon that vast experience, and I must say the experience was one that left me optimistic.

This recess has been a period that brought sad news. First, of course, the death of our respected and beloved colleague, Senator Jackson. Tomorrow is the appointed time for placing in the RECORD comments about Scoop Jackson, but it would be inappropriate to discuss this measure without taking note of the enormous contribution he made not just to this report and to this legislation but throughout his 30-year career in the Senate and his 44-year career in the Congress. But suffice it to say for the moment that Henry Jackson was a great U.S. Senator, a true defense expert and, at least as important, one who exercised his expertise and considerable experience in truly bipartisan fashion.

Born of conviction that the democracy he understood and loved had as its first duty survival, the understanding underlying that as a corollary was that the most destabilizing flaw that could beset that democracy was weakness.

The legislation that we will vote on in a few moments does not spend as much for defense as I believe we should, but I must say I think it is a remarkable price of legislation. The comments that have preceded mine indicate that men and women of good faith and real conviction are almost bound to differ. This legislation represents, as do all conference reports, an exercise at compromise. It has been a successful effort, and while it does not in my view spend enough of our treasure to see that we remain strong enough to achieve peace for ourselves in our lives, it is nonetheless a remarkable testimonial to two men in particular. I have mentioned Senator Jackson, I have spoken of the truly remarkable bipartisan exercise of his natural assets, the wisdom and experience he brought to this floor.

But as Scoop Jackson I think would be the first to concede the primary duty falls upon the Senator who manages this legislation. I see in the distinguished manager for the minority, the Senator from Georgia, someone whom I think will wear the mantle of a successor of Scoop Jackson in bipartisanship, and I think he would agree, as would Senator Jackson, that this legislation will reach through it because of the bulldog, Churchillian tenacity of the manager, the Senator from Texas who, through late hours in the evening, at great cost to his own per-

sonal energy, has I think conducted a rather remarkable exercise. I knew him by reputation before I was privileged to come to this Chamber. I had an affection based upon that reputation, and the respect which he had earned is deserved, having experienced my first conference, and I must say that I think he is due all that and a great deal more.

So to the Senator from Georgia, I give my thanks; to the manager of the legislation and the chairman of this committee I give my thanks, and a highly deserved "well done."

I think this legislation will do much to honor and memorialize the traditions of Scoop Jackson, who believed in a strong America. This legislation will achieve safety for us in a time when recent events have indicated the need for strength if we are to in fact allow our democracy to survive.

Mr. President, I thank the Senate for these few moments. My congratulations, in particular, to the manager, the Senator from Texas.

Mr. TOWER. Mr. President, I am prepared to yield back the remainder of my time. It is my understanding the Senator from Ohio (Mr. METZENBAUM) would like to make some remarks. I know of nobody else who wants to speak on the measure, so I would advise my colleagues that we could come to a vote very shortly on this issue.

Mr. NUNN. Mr. President, I share the Senator from Texas' hopes and aspirations about an early vote. I understand the Senator from Ohio (Senator METZENBAUM) is on his way. He would like to speak, so while we are awaiting his arrival, I suggest the absence of a quorum.

Mr. TOWER. I ask unanimous consent the time consumed be charged equally to both sides.

The PRESIDING OFFICER. Without objection. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, may I inquire of the Senator from Ohio how much time he would desire?

Mr. METZENBAUM. Very little. I just intend to ask a couple of questions.

Mr. NUNN. Mr. President, I yield to the Senator from Ohio such time as he may need.

Mr. METZENBAUM. Mr. President, I rise to commend the chairman of the committee as well as the ranking minority member of the conference committee for addressing themselves to the issue in conference having to do with the matter of leasing.

As this body knows, I have raised this issue, the matter was included in the bill after considerable debate, and then went to conference.

In the conference I want to commend the managers on the part of the Senate, both the majority and the minority, for seeing to it that the substance of the language remained in the bill, and I rise for that purpose.

But I rise for an additional purpose, and that is it is my understanding that as the measure left here there was a cutoff date with respect to military leases that was changed from June 14 to December 1. It is my further understanding that the language provided that the Secretary of Defense was to notify the Congress in connection with such leases made between June 14 and December 1.

It is my understanding that the language itself seems to indicate that the notification can be made after the lease has been completed, but I believe it to be the position of the conferees and the intent of the conferees that the notification is actually to be made by the Department of Defense to the Congress prior to the lease being executed.

Mr. TOWER. If the Senator will yield to me to respond, it was the intention of the conferees that the DOD should report prior to entering into such contract. It was not the intention of the conferees that the DOD could take advantage of this for any new program. The House insisted on this date because they believed it would take that much time for DOD to comply with the requirements.

But it is our intention that if there is any such contract that they intend to enter into they should notify us prior to entering into that contract. It is our understanding there will be no such contract.

Mr. METZENBAUM. I thank the distinguished chairman of the Armed Services Committee. I wish to commend him both for his actions in handling this matter in conference as well as for his seeing to it that the Congress will be notified in advance of any leases. As I understand his response, at the moment he does not anticipate any leases will actually be entered into between January 14 and December 1.

Mr. TOWER. That is correct.

Mr. METZENBAUM. I thank the chairman of the Armed Services Committee.

Mr. TOWER. Mr. President, I am prepared to yield back my time. Mr. President, I yield back my time.

Mr. NUNN. Mr. President, I am prepared to yield back time on this side of the aisle, unless some other Senator wants to be heard. I know of no other Senator desiring to be heard. I yield back all time remaining.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. INOUYE (after having voted in the affirmative). Mr. President, on this vote I have a live pair with the Senator from Colorado (Mr. HART). If he were present and voting, he would vote "nay." I have already voted "aye." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from Oregon (Mr. HATFIELD) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. BYRD. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I further announce that, if present and voting the Senator from Delaware (Mr. BIDEN) would vote "yea."

The PRESIDING OFFICER (Mr. SYMMS). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 83, nays 8, as follows:

[Rollcall Vote No. 244 Leg.]

YEAS—83

Abdnor	Exon	Murkowski
Andrews	Ford	Nickles
Armstrong	Garn	Nunn
Baker	Goldwater	Packwood
Baucus	Gorton	Percy
Bentsen	Grassley	Pressler
Bingaman	Hatch	Pryor
Boren	Hawkins	Quayle
Boschwitz	Hecht	Randolph
Bradley	Heflin	Riegle
Bumpers	Heinz	Roth

Leahy	Pell	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Inouye, for

NOT VOTING—8

Biden	Glenn	Long
Cranston	Hart	Weicker
Danforth	Hatfield	

So the conference report was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized

Mr. BAKER. Mr. President, I once again take this opportunity to commend two Senators especially for their excellent handling of an important and difficult matter. I refer, of course, to the managers of this conference report, Senators TOWER and NUNN.

It is a big report. It is important and controversial. We did the conference report in less than 2 hours. I wish to express my gratitude and appreciation to both managers, Senators TOWER and NUNN and, of course, to the minority leader for his unfailing cooperation in moving the necessary business of the Senate.

(Later the following occurred:)

Mr. BAKER. Mr. President, I am told that there is one housekeeping detail that might be attended to at this time. It has been brought to my attention that the other body, in sending the defense authorization bill to conference, inadvertently failed to amend the title of the bill.

Mr. President, I propose now to amend the title of the bill in the form that I submit to the minority leader.

Mr. BYRD. Mr. President, I see no appropriate reason for objecting to the request.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the title of the bill S. 675 be amended in the form which I now send to the desk.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The title of the bill (S. 675), as amended, reads as follows:

"An act to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strenghts for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purpose.".

Mr. BAKER. Mr. President, I might say for the record, for the benefit of those who are not directly involved in the consideration of this measure, that apparently when the bill was passed by the House the title reflected that it also included MilCon appropriations and DOE appropriation matters which were removed from the bill before it was finally adopted. This change simply reflects an amendment to the title to show that those two items are no longer in the bill.

● Mr. MOYNIHAN. Mr. President, I voted today in favor of the defense authorization conference report as an act of support for the leadership of the Senate and the Armed Services Committee in a time of great international difficulty. This bill, of course, authorizes funds for the deployment of the MX missile in Minuteman silos. I opposed the bill on these grounds when it was first before the Senate. The Senate and the House and now the Senate-House Conference have decided otherwise. My vote, today, could not change that outcome. I remain, however, utterly opposed to what I deem to be a senseless, and wildly dangerous decision. I would ask colleagues to consider how much greater would the tension between the Soviet Union and the United States have been following the brutal Soviet destruction of KAL flight 007 if both sides had intercontinental ballistic missiles deployed in a launch-on-warning mode. I will continue my opposition when the matter reaches the appropriation stage. I will continue until that day—if it comes—when the missiles are lowered into those silos. For the moment, however, I think it best to support the leadership of the Congress.●

● Mr. LEVIN. Mr. President, I have reluctantly voted against this conference report on the fiscal 1984 Defense Authorization Act because I think it underfunds needed improvements to our conventional forces while overemphasizing the development and procurement of strategic nuclear weapons which are not necessary for our security.

This conference report does represent some improvement over the Senate version of the fiscal 1984 defense authorization, which robbed our conventional forces even more than the House bill to fund redundant strategic nuclear programs. Unfortunately, those improvements are not sufficient to overcome the basic deficiencies in Congress latest efforts to strike a proper balance in allocating our scarce defense dollars.

This conference report does not yet represent such a proper balance.

I am gratified that the conference report includes increased funding for several Army programs which the Senate version of the bill reduced unwisely. The authorization of 120 additional M-1 main battle tanks, 153 more Patriot air defense missiles, 80 more command post vehicles, 66 more field artillery ammunition support vehicles and 16 more advanced attack helicopters are prudent, cost-effective increases.

The conference report also restores some of the funding cut by the Senate in the combat readiness accounts that are part of the other procurement programs for the Army and Navy. Furthermore it authorizes 10 C-130H tactical airlift aircraft not originally approved by the Senate for the Air National Guard and Air Force Reserve.

Having outlined these improvements, however, I am saddened that their inclusion cannot overcome the basic faults of this bill. These deficiencies do not contribute to maintaining and improving America's military capabilities; instead they weaken our ability to defend ourselves by diverting our resources away from more militarily cost-effective investments.

In the strategic arena, two programs which do not adequately help us to maintain and improve our deterrent to nuclear war and diplomatic blackmail—the MX missile system and the B-1B bomber—are authorized. The MX missile, to be deployed in a nonsurvivable basing mode contrary to repeated congressional and executive branch statements in the past, is a particularly dangerous waste of our defense resources.

The B-1B bomber simply cannot compare with the advanced technology, or Stealth, bomber in terms of long-term survivability and military effectiveness against the improving Soviet air defenses. Because of these deficiencies, the B-1B also is an unnecessary and unwise program.

Deployment of MX means we are asking the taxpayers to pay $22 billion for 10 to 70 surviving warheads, which is an absurd cost for such a minimal gain in retaliatory and deterrent capability. The B-1B will cost about $40 billion for 100 bombers whose survivability is questionable shortly after it is deployed fully.

Finally, this conference report authorizes production of components for a new generation of nerve gas weapons, the binary artillery shells. This production is militarily unjustified according to the testimony of our own Secretary of Defense, and the money for it could be better spent to further improve our chemical warfare defenses.

Proceeding now with binary production also plays directly into the hands of the Soviet propaganda machine and hands the Soviets a public relations victory. Not only could this further interfere with the willingness of some of our allies to cooperate with the United States on other politically sensitive and important defense programs, but it could undermine current allied support for the American position in the ongoing chemical arms control talks.

Mr. President, on balance, the negatives still outweigh the positives in this conference report, and they force me to vote against its final passage.●

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, at this moment I believe that the unfinished business will be the Interior appropriations bill. Before the Chair lays that measure before the Senate, let me announce that there will be no more record votes tonight. I expect to ask the Senate to turn to the consider-

ation of that measure in a moment, or to ask the Chair to lay it before the Senate, but before I do there are two or three schedule readjustments that I would like to make.

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m. tomorrow.

Mr. McCLURE. Mr. President, reserving the right to object, and I do not object, is it possible to include in that a request that the standing committees that have meeting tomorrow will be able to meet until 12 noon?

Mr. BYRD. Mr. President, I personally know of no objection, but I would have to clear that. I hope the leader will not include it in his request.

Mr. McCLURE. I understand. I have no objection.

Mr. BYRD. I will be glad to check on it and, if possible, to come back on it later.

Mr. BAKER. Very well. In view of that, I will make a subsequent request to permit committees to meet until 12 noon, but I do not now include that in the request which is pending before the Senate.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. I thank the Chair.

Mr. President, I hope that before the day is out, we can clear the request suggested by the distinguished Senator from Idaho for permission for committees to meet.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, there be a brief period for the transaction of routine morning business until 10 a.m. in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTES TO SENATOR JACKSON AT 10 A.M.

Mr. BAKER. Mr. President, may I inquire of the Chair, is it not so that there is already an order entered that at 10 a.m. tomorrow the Senate will embark on a time for eulogies and tributes to our late colleague, Senator Henry M. Jackson, of the State of Washington?

The PRESIDING OFFICER. The order is that that will occur at the close of morning business.

Mr. BAKER. Very well. Do I interpret correctly that in the formulation I have just provided that would happen at 10 a.m.?

The PRESIDING OFFICER. The leader is correct.

ORDER FOR ADDITIONAL PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, there is also a request for additional time tomorrow for a special purpose by the minority leader and others, and that is for 2 hours beginning at 12 noon for statements in respect to the situation in Lebanon.

Mr. President, I ask unanimous consent that beginning at 12 noon tomorrow there be an additional period for the transaction of routine morning business of not more than 2 hours in length in which Senators may speak for not more than 15 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, the purpose of those speeches is not limited in this order, but it is being provided so there will be an opportunity for Members to speak on that subject.

Mr. BYRD. Yes.

Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. BYRD. Mr. President, I thank the majority leader for his courtesy in providing for the 2 hours.

I should like to alert the Members of the Senate on both sides of the aisle that the subject on which I will be speaking—and I will speak for only a small portion of that time—will be the War Powers Act and its application to today's circumstances in the Middle East. I hope Senators on both sides of the aisle will feel free to speak on the matter. I hope we will hear from those who feel, as I do, that the act is applicable. But I just want to give Senators notice of this.

Mr. BAKER. I thank the Senator.

Mr. President, there is at this point, then, a conflict between this order and an order previously entered that the Senate would proceed to the consideration of the Korean plane resolution at 12 noon.

CONSIDERATION OF KOREAN AIR LINES RESOLUTION AT 2 P.M.

I ask unanimous consent now that that order be modified so that we return to the consideration of the Korean plane resolution at 2 p.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, with respect to the Korean plane resolution, it is my hope that we can further provide for a limitation of time for debate on that measure and perhaps a provision for a restriction on amendments, or, in the alternative, a time certain for the consideration of amendments. That is not material at this point, and I may have a further statement to make.

Mr. BYRD. Mr. President, may I report to the majority leader that, in my explorations on this side of the aisle, I find an inclination to withhold the offering of amendments if the other side of the aisle will do the same.

Mr. BAKER. I thank the minority leader. He had previously advised me of that privately, and I thank him for his reiteration of that view.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

The PRESIDING OFFICER. The Senate will now resume consideration of the unfinished business, which will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

The PRESIDING OFFICER. The McClure amendment, No. 2110, to the committee amendment is pending.

Mr. BAKER. Mr. President, I observe the Senator from Idaho in the Chamber. I am willing to ask the Senate to remain as long as it serves any purpose for the debate of this measure. I am prepared to suggest that we resume consideration of this matter on tomorrow.

Mr. McCLURE. Mr. President, the pending matter before the Senate generated some prolonged debate, and I am told that that prolonged debate will continue. I think it is unlikely that we will be able to resolve that issue in the time remaining to us this evening, and under those circumstances it might be just as well that we defer the resumption of the debate until we have more time than we have at this point.

Mr. BAKER. Mr. President, in view of that, I will not urge Members to resume consideration of this appropriation bill at this time. I hope we can do that tomorrow and the remainder of this week and get it out of the way.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, to extend no longer than 5:30 p.m., in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the

Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed in the end of the Senate proceedings.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1714. A communication from the Director of the Office of Pesticide Programs, Environmental Protection Agency, transmitting, pursuant to law, the agency's final rule establishing procedures for the conditional registration of pesticides; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1715. A communication from the Assistant Secretary of the Army for Civil Works transmitting, pursuant to law, a final environmental impact statement on the Saginaw River and Tributaries of Shiawassee Flats, Mich. project; to the Committee on Appropriations.

EC-1716. A communication from the Assistant Secretary of the Interior for Land and Water Resources transmitting, pursuant to law, certification of an adequate soil survey and land classification for the San Felipe Division, Central Valley Project, Calif. development; to the Committee on Appropriations.

EC-1717. A communication from the Acting Director, office of Legislative Affairs, Agency for International Development transmitting, pursuant to law, the 1983 report on AID program allocations; to the Committee on Appropriations.

EC-1718. A communication from the President of the United States transmitting a request for supplemental appropriations for the District of Columbia for fiscal 1983; to the Committee on Appropriations.

EC-1719. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report on three new deferrals of budget authority for fiscal 1983; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Energy and Natural Resources, and the Judiciary.

EC-1720. A communication from the Acting Assistant Secretary of the Air Force for Manpower, Reserve Affairs, and Installations transmitting a draft of proposed legislation to extend certain benefits to civilians employed by or accompanying the armed forces abroad; to the Committee on Armed Services.

EC-1721. A communication from the Chairman of the Securities and Exchange Commission transmitting, pursuant to law, the 1982 annual report of the Securities Investor Protection Corporation; to the Committee on Banking, Housing, and Urban Affairs.

EC-1722. A communication from the Secretary of the Interstate Commerce Commission transmitting, pursuant to law, a report on the extension of time for completion of evidentiary proceedings in Utility Fuels, Inc. against Burlington Northern Railroad Co., Fort Worth and Denver Railway Co., and Atchison, Topeka and Santa Fe Railway Co., to the Committee on Commerce, Science, and Transportation.

EC-1723. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Uncertainties Surround Future of U.S. Ocean Mining"; to the Committee on Energy and Natural Resources.

EC-1724. A communication from the Acting Secretary of the Interior transmitting, pursuant to law, a report on the receipt of project proposals under the Small Reclamation Projects Act for a loan to Preston-Whitney Irrigation Co., Idaho in the amount of $26 million; to the Committee on Energy and Natural Resources.

EC-1725. A communication from the Acting Secretary of the Interior transmitting, pursuant to law, a report on the receipt of project proposals under the Small Reclamation Projects Act for a loan to the Santa Ana Watershed Project Authority, Calif. in the amount of $14,917,000; to the Committee on Energy and Natural Resources.

EC-1726. A communication from the members of the Railroad Retirement Board transmitting, pursuant to law, the Board's budget request for fiscal year 1985; to the Committee on Finance.

EC-1727. A communication from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs transmitting, pursuant to law, the text of an agreement on defense and economic cooperation between the Government of the Hellenic Republic and the Government of the United States of America, with a related annex; to the Committee on Foreign Relations.

EC-1728. A communication from the Director of the Arms Control and Disarmament Agency transmitting a draft of proposed legislation to upgrade certain key ACDA executive positions; to the Committee on Foreign Relations.

EC-1729. A communication from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs transmitting, pursuant to law, a report on country allocations of 1983 supplemental appropriations funds for military assistance, foreign military credit sales, and international military education and training; to the Committee on Foreign Relations.

EC-1730. A communication from the Congressional Budget Office transmitting, pursuant to law, a report entitled "The Federal Government in a Federal System: Current Intergovernmental Programs and Options for Change"; to the Committee on Governmental Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-354. Joint resolution adopted by the legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"ASSEMBLY JOINT RESOLUTION NO. 38—RELATIVE TO A NATIONAL PUBLIC SAFETY TELECOMMUNICATIONS POLICY

"Whereas, Radio telecommunication is the principal medium of command and control for those agencies which are charged with the maintenance of the public safety; and

"Whereas, There are insufficient radio spectrum frequencies allocated to land mobile radio service in the public safety area; and

"Whereas, The fierce competition for remaining frequencies best suited for public safety communications has resulted in fragmentation and congestion of those frequencies; and

"Whereas, The existence of fragmented communication capabilities inhibits effective delivery of police, fire, and paramedic services for day-to-day operations and impedes service in emergency situations while making tactical coordination between agencies almost impossible; and

"Whereas, The Communications Act of 1934, which is the Federal Communications Commission's charter, requires that those services which provide for the protection of life and property have priority over all other applicants and user groups in the assignment of sufficient spectrum; and

"Whereas, The Federal Communications Commission continues the licensing of other services to frequencies suitable of public safety which is rapidly eliminating the last possible chance for public safety to obtain a broadcast spectrum having the required propagation characteristics capable of meeting present and future needs; and

"Whereas, The Federal Communications Commission has not sufficiently recognized the necessity for the assignment to public safety of contiguous, sufficient, and appropriate frequencies for current and future needs and, what is more, the Commission has assigned frequencies to public safety which are spread over the entire radio spectrum to the extent that it may require up to eight different radios for public safety or law enforcement agencies to intercommunicate during emergencies; and

"Whereas, The Federal Communications Commission has assured Congress that it is adequately providing for public safety and law enforcement, while in fact it is proceeding to license those few remaining frequencies to the televison service; and

"Whereas, There is a need to establish a national public safety telecommunications policy with specific priorities in order to address the issues confronting public safety communication; and

"Whereas, These issues have been previously submitted to the Federal Communications Commission and are supported by the International Association of Chiefs of Police, the International Association of Fire Chiefs, the California Peace Officers' Association, the National Association of Public Safety Communications Officers, the California Public Safety Radio Association, and the National Association of Police Planning Officers; and

"Whereas, The California Legislature, in cooperation with the Marin County Sheriff's Department, has resolved to support in principle the petition submitted to the Federal Communications Commission by the Sheriff of Los Angeles County, in the interest of all public safety organizations in the United States; now, therefore, be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the President and Congress of the United States are respectfully memorialized to take appropriate action to ensure that oversight hearings are held regarding the vital need for public safety communication, and to ensure that the Communications Act of 1934 is amended for the purpose of establishing a national public safety telecommunications policy; and be it further

"Resolved, That the Congress is respectfully requested to enact, and the President to sign, federal legislation to create a national public safety telecommunications policy that would set forth the following priorities for the issuance of telecommunications licenses by the Federal Communications Commission:

"(a) First priority—Those services which directly provide for the national defense (military and support agencies), as provided for by the Interdepartmental Radio Advisory Committee.

"(b) Second priority—Those services which directly provide for the protection of life and property (police, fire, certain government and private agencies).

"(c) Third priority—Those services which directly provide activities essential to the continued well-being of the populace (utilities, public transportation, certain public agencies).

"(d) Fourth priority—Those services which directly contribute to the effective continuance of commerce and the economic well-being of the nation (business radio, experimental technology).

"(e) Fifth priority—Those services which provide information, instruction, and entertainment to the populace (broadcast radio and television).

"(f) Sixth priority—Those services which are primarily recreational in nature; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-355. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"ASSEMBLY JOINT RESOLUTION No. 38

"Whereas, Radio telecommunication is the principal medium of command and control for those agencies which are charged with the maintenance of the public safety; and

"Whereas, There are insufficient radio spectrum frequencies allocated to land mobile radio service in the public safety area; and

"Whereas, The fierce competition for remaining frequencies best suited for public safety communications has resulted in fragmentation and congestion of those frequencies; and

"Whereas, The existence of fragmented communication capabilities inhibits effective delivery of police, fire, and paramedic services for day-to-day operations and impedes services in emergency situations while making tactical coordination between agencies almost impossible; and

"Whereas, The Communications Act of 1934, which is the Federal Communications Commission's charter, requires that those services which provide for the protection of life and property have priority over all other applicants and user groups in the assignment of sufficient spectrum; and

"Whereas, The Federal Communications Commission continues the licensing of other services to frequencies suitable for public safety which is rapidly eliminating the last possible chance for public safety to obtain a broadcast spectrum having the required propagation characteristics capable of meeting present and future needs; and

"Whereas, The Federal Communications Commission has not sufficiently recognized the necessity for the assignment to public safety of contiguous, sufficient, and appropriate frequencies for current and future needs and, what is more, the commission has assigned frequencies to public safety which are spread over the entire radio spectrum to the extent that it may require up to eight different radios for public safety or law enforcement agencies to intercommunicate during emergencies; and

"Whereas, The Federal Communications Commission has assured Congress that it is adequately providing for public safety and law enforcement, while in fact it is proceeding to license those few remaining frequencies to the television service; and

"Whereas, There is a need to establish a national public safety telecommunications policy with specific priorities in order to address the issues confronting public safety communication; and

"Whereas, These issues have been previously submitted to the Federal Communications Commission and are supported by the International Association of Chiefs of Police, the International Association of Fire Chiefs, the California Peace Officers' Association, the National Association of Public Safety Communications Officers, the California Public Safety Radio Association, and the National Association of Police Planning Officers; and

"Whereas, The California Legislature, in cooperation with the Marin County Sheriff's Department, has resolved to support in principle the petition submitted to the Federal Communications Commission by the Sheriff of Los Angeles County, in the interest of all public safety organizations in the United States; now, therefore, be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the President and Congress of the United States are respectfully memorialized to take appropriate action to ensure that oversight hearings are held regarding the vital need for public safety communication, and to ensure that the Communications Act of 1934 is amended for the purpose of establishing a national public safety telecommunications policy; and be it further

"Resolved, That the Congress is respectfully requested to enact, and the President to sign, federal legislation to create a national public safety telecommunications policy that would set forth the following priorities for the issuance of telecommunications licenses by the Federal Communications Commission:

"(a) First priority—Those services which directly provide for the national defense (military and support agencies), as provided for by the Interdepartmental Radio Advisory Committee.

"(b) Second priority—Those services which directly provide for the protection of life and property (police, fire, certain government and private agencies).

"(c) Third priority—Those services which directly provide activities essential to the continued well-being of the populace (utilities, public transportation, certain public agencies).

"(d) Fourth priority—Those services which directly contribute to the effective continuance of commerce and the economic well-being of the nation (business radio, experimental technology).

"(e) Fifth priority—Those services which provide information, instruction, and entertainment to the populace (broadcast radio and television).

"(f) Sixth priority—Those services which are primarily recreational in nature; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-356. A resolution adopted by the Senate of the Commonwealth of Massachusetts; to the Committee on Foreign Relations:

"RESOLUTION CONDEMNING ATROCITIES COMMITTED AGAINST MEMBERS OF THE BAHA'I FAITH

"Whereas, at exactly noon on the ninth day of July in the year nineteen hundred and eighty-three, memorial services were held all over the world to commemorate the execution of the revered founder of the Baha'i Faith which took place at the noon hour on a day in the year eighteen hundred and fifty; and

"Whereas, during a previous year more than twenty-two thousand members of the Baha'i Faith were executed; and

"Whereas, in June of this year, the year nineteen hundred and eighty-three, sixteen members of the Baha'i Faith were executed in Iran by hanging; and

"Whereas, the Baha'i Faith is represented by its members who live in many parts of the world, and is founded upon the precepts of brotherhood, peace, equality among men and women; and

"Whereas, the members of the Baha'i Faith have suffered indelibly in Iran because of their religious conviction; now therefore be it

"Resolved, That the Massachusetts Senate hereby wholly condemns any religious persecution or repression because of religious belief and calls upon the citizenry to be vigilant against the perpetration of any such atrocity; and be it further

"Resolved, That a copy of these resolutions be transmitted forthwith by the Clerk of the Senate to the President of the United States, the Speaker of the United States House of Representatives and the President pro tem of the United States Senate."

POM-357. A resolution adopted by the Republican Hispanic Assembly of California supporting the policies of the administration in support of the national independence and freedom of all the nations of Central America; to the Committee on Foreign Relations.

POM-358. A resolution adopted by the General Assembly of the State of Ohio; to the Committee on Foreign Relations:

"RESOLUTION

"Whereas, The horror of a nuclear holocaust is universally acknowledged, as the United States and the Soviet Union presently possess more than 50,000 nuclear weapons that can destroy each society many times over and threaten all life on earth; and

"Whereas, The United States and the Soviet Union plan to build more than 20,000 new nuclear warheads, including a new generation of super-accurate, first-strike capable weapons; and

"Whereas, The increased accuracy of these new weapons will, for the first time in the history of the arms race, threaten the retaliatory capability of each side's missile forces, and pressure each side to adopt a

hair-trigger 'launch on warning' policy creating a substantially greater risk of accidental nuclar war; and

"Whereas, The continuation of the nuclear arms race will, if not stopped, increase chances of a massive nuclear exchange during this time when economic difficulties, political dissension, revolution, and competition for energy supplies are on the rise worldwide; and

"Whereas, The increasing sums of money devoted to creating weapons of destruction are depriving our economy of resources which, if transferred, would develop a healthy job-productive economy and could be used for social services; and

"Whereas, Ohio cities are in desperate need of jobs and the U.S. Bureau of Labor Statistics reported in 1982 that military spending creates substantially fewer jobs per $1 billion expended than civilian and service industries; and

"Whereas, The threat of nuclear war is already having an adverse psychological effect on the citizens of our nation and is especially crippling our children; and

"Whereas, Rather than permit this dangerous future to continue, the United States and the Soviet Union should adopt the immediate, mutual, and verifiable freeze on all further testing, production, and deployment of nuclear weapons and of missiles and new aircraft designed primarily to deliver nuclear weapons; and

"Whereas, The U.S. Department of Defense in its annual report in fiscal year 1982 testifies as follows: "The United States and the Soviet Union are roughly equal in strategic nuclear power"; and

"Whereas, Stopping the production of nuclear weapons and weapon-grade material would increase the incentive of other countries to adhere to the Nonproliferation Treaty, renouncing their own nuclear weapons, and would help prevent the spread of unclear weapons to other countries; and

"Whereas, Balanced and verifiable reductions in the nuclear arsenals of the United States and the Soviet Union, following the first step of a freeze, will further lessen tensions and further decrease the chances of nuclear war; and

"Whereas, Both a freeze and subsequent reductions can be satisfactorily verified by existing national technical means; now therefore be it

"Resolved, That the members of the Senate and the House of Representatives of the 115th General Assembly of the State of Ohio hereby memorialize the Congress and the President of the United States and Chairman Yuri Andropov of the Communist Party and the Politburo of the U.S.S.R. to seek the adoption of the following proposal, that:

"(1) As an essential first step toward lessening the risk of nuclear war, the United States and the Soviet Union should adopt an immediate, mutual, and verifiable freeze on the testing, production, and further deployment of nuclear weapons and of missiles and new aircraft designed primarily to deliver nuclear weapons;

"(2) Proceeding from this freeze, the United States and the Soviet Union should pursue major, mutual, and verifiable reductions in nuclear warheads, missiles, and other delivery systems, through annual percentages or equally effective means, in a manner that enhances stability;

"(3) All funds that would otherwise have gone to these weapons programs should be redirected to help create a healthy, job-productive economy and provide needed social services; and be it further

"Resolved, That the Clerk of the Senate tramsit duly authenticated copies of this Resolution to the President of the United States Senate, to the Speaker of the United States House of Representatives, to the members of Ohio's Congressional Delegation, and to the President of the United States."

POM-359. A resolution adopted by the Senate of the Commonwealth of Massachusetts; to the Committee on Labor and Human Resources:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION PROVIDING FOR A COMPREHENSIVE CATASTROPHIC ILLNESS MEDICAL SERVICE PLAN

"Whereas, health care costs have escalated to uncontrollable levels which are far beyond the ability of citizens to pay; and

"Whereas, health care providers, insurance companies, hospital service corporations and health maintenance organizations continue to increase rates and fees for medical services; and

"Whereas, litigation involving doctors, hospitals and other medical professional groups has increased dramatically in recent years resulting in increasing rates for medical malpractice insurance; and

"Whereas, the majority of our citizens cannot meet the financial burden of new lifesaving medical procedures and are thereby denied the benefits of such services; and

"Whereas, many individuals find their entire net worth depleted by charges for medical services after a single serious illness; now therefore be it

"Resolved, That the Massachusetts Senate respectfully urges the Congress of the United States to enact legislation providing for a "comprehensive catastrophic illness medical service plan" which shall provide for the payment of all medical charges in excess of twenty per cent of an individual's net worth as determined by commonly accepted methods of valuation and financial accounting for the purposes of providing necessary medical care and lifesaving procedures to all persons requiring such care; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, to the Presiding Officer of each branch of Congress and to the Members thereof from the Commonwealth."

POM-360. A resolution adopted by the Association of Pacific Island Legislatures; to the Committee on Energy and Natural Resources:

"RESOLUTION NO. GA-2-5

"Whereas, the people of Micronesia have learned in recent decades that the assistance of legal counsel is essential for the protection of their employment, land, fishing and personal rights, and for participation in the economic and social life of their societies; and

"Whereas, although a small group of citizens have the financial means to afford legal counsel, the majority of people have inadequate means to retain counsel on legal problems; and

"Whereas, the United States government has recognized that absence of legal counsel in civil matters denies a person the opportunity to exercise basic rights and has provided low income persons with access to necessary legal counsel by the legal services offices throughout the United States and Micronesia; and

"Whereas, several governments in Micronesia have assisted legal services offices to assure that their citizens have access to legal assistance; and

"Whereas, the legal services offices in Micronesia, just as those in the United States, are necessary elements of democratic societies; and

"Whereas, the United States Legal Services Corporation stands as a proud accomplishment of what a just society can do at comparatively little cost; and

"Whereas, the affiliation of the Micronesian Legal Service Corporation with the United States Legal Services Corporation with the United States Legal Services Corporation is important to members of the Association of Pacific Island Legislatures; and

"Whereas, funding for legal services in the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau is scheduled to end when the Trust Territory of the Pacific Islands is terminated; now, therefore, be it

"Resolved, That the Association of Pacific Island Legislatures hereby urges that upon the termination of the Trusteeship Agreement, the United States government should continue to make available to the citizens of the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau the legal services program in the same manner as it is available in Guam, the Northern Mariana Islands, the Virgin Islands, Puerto Rico and each state of the United States; and be it further

"Resolved, That the President certify and the Secretary attest to the adoption hereof, and that copies of the same be thereafter transmitted to the chief executive of each member nation or territory of the Association of Pacific Island Legislatures; to U.S. Senators Lowell P. Weicker, Jr.; Thomas F. Eagleton; and Daniel K. Inouye; to U.S. Representatives John F. Sieberling; Cecil Hefter; and Daniel K. Akaka; and to the Executive Director of the Micronesian Legal Services Corporation."

POM-361. A resolution adopted by the Association of Pacific Island Legislatures; to the Committee on Energy and Natural Resources.

"RESOLUTION NO. GA-2-9

"Whereas, due to a bilateral agreement between the United States and Japan, the people of Guam have been excluded from pursuing reparations from Japan for injuries to the island during World War II; and

"Whereas, the people of Guam have documented the damages to persons and property; and

"Whereas, the people of Guam are presenting these claims to the U.S. Congress through the War Reparations Commission; and

"Whereas, the passage of time has not lessened the suffering caused by loss of life and possessions; and

"Whereas, when the U.S. government signed the bilateral agreement with Japan waiving claims for war reparations, it assumed responsibility for injuries to the people of the island of Guam; now, therefore, be it

"Resolved, That the Association of Pacific Island Legislatures urges the U.S. Congress to appropriate necessary funds to compensate for the losses suffered by the people of Guam at the hands of the Japanese during World War II; and be it further

"*Resolved,* That the President certify and the Secretary attest to the adoption hereof, and that copies of the same be thereafter transmitted to the Speaker of the House of Representatives; to the President Pro Tempore of the U.S. Senate; the Secretary of the Department of Interior; to the "Governor of Guam; to the Chairperson, War Reparations Commission on Guam; and to the chairman of the United Nations Decolonization Committee."

POM-362. A resolution adopted by the Association of Pacific Island Legislatures; to the Committee on Energy and Natural Resources:

"RESOLUTION NO. E-2-10

"Whereas, the Pacific Basin, especially the American Pacific Territories and the Trust Territory of the Pacific Islands, is likely to grow in geopolitical and military importance for the security of the United States and its Pacific allies; and

"Whereas, despite the strong U.S. geopolitical and military interest in the Pacific Basin, exemplified by the major U.S. military presence and political control of the American Pacific Territories and the Trust Territory of the Pacific Islands, the United States has never had any comprehensive economic policy equal in significance and importance; and

"Whereas, it is in the best interest of the United States and the Pacific Basin island nations and territories for the United States to adopt a comprehensive economic policy similar in scope to the Caribbean Basin Initiative and designed to mobilize, on a long-term basis, private section resources to assure economic development; and

"Whereas, the Caribbean Basin Initiative, among other things, provides these benefits and assistances to the Caribbean nations and islands—(1) duty free treatment for nearly all Caribbean exports to the United States; (2) tax incentives and credits for U.S. investors in the Caribbean Basin; (3) short-term credit guarantees by the U.S. Export-Import Banks to Caribbean exporters to the United States; and (4) $350 million in the first year of a multi-year economic and financial program to help Caribbean economies; now, therefore, be it

"*Resolved, by the Association of Pacific Island Legislatures,* That the United States is hereby requested to adopt a comprehensive economic policy, similar in scope to the Caribbean Basin Initiative for Guam, American Samoa, the Northern Marianas, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshalls; and that such an economic policy be formulated only after full consultations with the respective island governments of the American Pacific territories and the Trust Territory of the Pacific Islands; and be it further

"*Resolved,* That the Executive Committee of the Association of Pacific Island Legislatures is hereby directed to prepare a draft proposal for such a policy to include, among other things, the following:

"(1) duty free treatment of exports from the respective territories and nations to the United States;

"(2) tax incentives, exemptions and credits for investors in the island nations and territories;

"(3) credit guarantees and loans by the U.S. Export-Import Bank and the U.S. Overseas Investment Corporation;

"(4) creation of a Special Economic Assistance Fund to assist economies of the island nations and territories; and, be it further

"*Resolved,* That the draft proposal be submitted to the chief executives and legislatures of the island nations and territories and to business organizations and other interested institutions for review before adoption at the next or special meeting of the Association of Pacific Island Legislatures; and be it further

"*Resolved,* That the President certify and the Secretary attest to the adoption hereof, and that copies of the same be thereafter transmitted to the President and presiding officers of the United States Congress; the chairman of the U.S. Committee on Energy and Natural Resources; to the U.S. House Committee on Interior and Insular Affairs; to the Secretaries of the Departments of Interior, Commerce, Agriculture and State; to the chief executives and legislatures of Guam, the Northern Marianas, American Samoa, the Republic of Palau, the Federated States of Micronesia, and to the Republic of the Marshalls."

POM-363. A joint resolution adopted by the Legislature of the State of California; to the Committee on Small Business:

"ASSEMBLY JOINT RESOLUTION NO. 69

"Whereas, there are over 2 million small businesses in California which employ more than 10 million Californians; and

"Whereas, 87 percent of all new jobs are created by small businesses; and

"Whereas, it is clear that small businesses are the stabilizing force in the economy; and

"Whereas, small businesses often lack meaningful access to the legislative process that large firms enjoy; and

"Whereas, the White House Conference on Small Business in 1980 attracted 1,682 delegates and 3,600 observers, and produced 60 specific recommendations in 12 issue areas to improve the position of small business in the economy; and

"Whereas, many of the legislative recommendations of the conference have already been enacted into law, including changes to the tax code, reduced regulatory requirements, and new public and private initiatives to assist small business; and

"Whereas, California has taken action based on these recommendations which resulted in the Equal Access to Justice Act, the California Regulatory Fairness Law, and the State Late Payment Act; and

"Whereas, this conference brought together for the first time a broad-based, bipartisan coalition of thousands of small business men and women to give them the chance to decide for themselves solutions to the significant problems they face; and

"Whereas, Senator Lowell Weicker (R-Connecticut), Chair of the Senate Small Business Committee was joined by 51 of his colleagues in a bipartisan letter urging the President to reconvene the 1980 conference; now, therefore, be it

"*Resolved by the Assembly and the Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to reconvene the 1980 White House Conference on Small Business to give small business the voice it needs in government; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SPECTER:

S. 1832. A bill to amend the Civil Rights Act of 1957 to extend the life of the Commission on Civil Rights; to the Committee on the Judiciary.

By Mr. CHILES:

S. 1833. A bill to amend title 38, United States Code, to authorize the VA to furnish each veteran with a compensable service-connected disability, such drugs and medicines as may be prescribed by any licensed physician for treatment of the service-connected disability: to the Committee on Veterans Affairs.

By Mrs. HAWKINS:

S. 1834. A bill to authorize the Secretary of the Army to make modifications in certain water projects in Florida; to the Committee on Environment and Public Works.

By Mr. D'AMATO:

S. 1835. A bill to provide for the relief of local prosecutors and sheriffs; to the Committee on the Judiciary.

By Mr. D'AMATO (for himself and Mr. COHEN):

S. 1836. A bill to provide equitable treatment for certain fresh vegetables produced in the United States; to the Committee on Finance.

By Mr. GORTON (for himself and Mr. EVANS):

S. 1837. A bill to designate the Federal Building in Seattle, Wash., as the "Henry M. Jackson Federal Building"; to the Committee on Environment and Public Works.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 1832. A bill to amend the Civil Rights Act of 1957 to extend the life of the Commission on Civil Rights; to the Committee on the Judiciary.

EXTENSION OF COMMISSION ON CIVIL RIGHTS

Mr. SPECTER. Mr. President, today I introduce a bill to provide for reauthorization of the Commission on Civil rights on a permanent basis and to establish 6-year staggered terms for members of that Commission.

Considerable public concern has arisen over the nominations by President Reagan of Mr. Morris Abram, Mr. John Bunzel, and Mr. Robert Destro to replace Rabbi Murray Saltzman, Dr. Mary Frances Berry, and Dr. Blandina Cardenas Ramirez as members of the Commission.

Two extensive hearings have been held before the Senate Judiciary Committee on the nominations submitted by President Reagan. A question has been raised as to the President's legal right to replace members of the Commission. In reviewing the precedents, it has been my legal opinion that the President is not precluded, as a matter of law, from replacing members of the Commission. Assuming that legal conclusion to be correct, then the relevant issue presented would appear to be the qualifications of the nominees.

During the course of the two hearings, I have been concerned about the overriding consideration of the "institutional independence" of the Commission which is separate and distinct from the President's legal right to replace Commissioners and the qualification of the President's nominees.

Since the time that the President has made the nominations, especially during the August recess, I have heard considerable comment in my travels around Pennsylvania on the propriety and wisdom of having one President replace five members of the Commission. While I do not believe that the President has any intention of impairing the "institutional independence" of the Commission, there is justification for the public perception that the replacement of five members of the Commission by a single President would, in fact, undermine the "institutional indepenence" of the Commission.

In my judgment, the reauthorization of the Commission is directly linked to the question of the pending appointments, and I believe that Congress should consider both issues together.

The legislation which I am proposing would resolve the outstanding issue on the right of the President to replace Commission members. This bill would eliminate the contention that a Commission member should serve indefinitely or for life by imposing the limit of a 6-year appointment. At the same time, this bill would limit the President's power to remove only on conditions of neglect of duty or malfeasance in office.

As the 6-year terms would work out, the President would be entitled to an additional appointment at that time because the term of one Commissioner, considering that all sitting Commissioners have 6-year terms, would expire in January 1981. This would permit the President to appoint his lead nominee, Mr. Morris Abram, whose extraordinary qualifications have been established during the course of the Judiciary Committee's hearings.

In my judgment, it is unfortunate that positions have become polarized on the important issue relating to the Civil Rights Commission. Civil rights issues, which is so fundamental to equal justice in our society, should be resolved in a calm unemotional way on a nonpartisan basis without the polarization which unfortunately is emerging.

By letter dated July 29, 1983, I wrote to the President on the subject as follows:

U.S. SENATE,
Washington, D.C., July 29, 1983.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: As a result of listening to many witnesses at Judiciary Committee hearings and reflecting on the matter, I am writing to urge you to reconsider your three nominations for the U.S. Civil Rights Commission.

I do so for these reasons: (1) the confidence of the American people in civil rights enforcement requires it; (2) your policy on civil rights has been badly misunderstood; (3) this bold move, which would be a sharp reversal of your present position, would restore public confidence in your civil rights position.

As the record will show at the two hearings before the Judiciary Committee, I stated for the record that I believed you had the right to replace Commission members and the sole question before the Committee was the independence and qualification of your nominees. As the hearings progressed, there was no significant challenge to the qualification and independence of the nominees.

Based on that analysis, it was my initial conclusion that the nominees should be confirmed. However, in this unique situation, the whole is greater than the sum of the parts.

In a context where you would be replacing five of six Commission members in an unprecedented manner during the 26 year life of the Commission, there is substance to the objection raised by so many witnesses that the character of the Commission is being inappropriately reshaped by one Administration which is contrary to the intent of Congress and the continuity of independence of the Civil Rights Commission. The substance, as well as the perception, is that the institutional independence of the Commission would be altered.

Such a bold move on your part would, in my opinion, give additional strength to your Presidency and to your commitment on civil rights. There is real value to listening and hearing and changing your mind.

It is my considered judgment that it is in the national interest generally and the enforcement of the civil rights law specifically for you to withdraw the three nominations.

Sincerely,

ARLEN SPECTER.

This letter has not been released to the public or the news media pending a response from the President. I have since been advised that the President intends to stand by his nominees; and by letter dated September 12, 1983, the President wrote me as follows:

THE WHITE HOUSE,
Washington, D.C., September 12, 1983.

Hon. ARLEN SPECTER,
Committee on the Judiciary, U.S. Senate,
Washington, D.C.

DEAR ARLEN: The Senate Judiciary Committee will soon be voting on the nominations of Morris Abram, John Bunzel and Robert Destro to be members of the United States Commission on Civil Rights, and Linda Chavez as Staff Director for the Commission. I am writing to you today to reiterate my strong support for and belief in these outstanding Americans.

In nominating these citizens to the Civil Rights Commission, I took particular care to select individuals whose dedication to the principle of equality was not only unquestioned, but demonstrably evident. They have, along their separate paths, devoted their lives to the civil rights of all people, regardless of race, color, creed, gender or national origin. Further, I chose them for their quality of independence of judgment. These nominees have made it clear to the White House, to the Senate and to the American people that they intend to continue exercising that independence as members of the Commission.

I know you share my deep concern for the future of civil rights in this country. I strongly urge you to vote for these four dedicated individuals when you meet in Executive Session this week.

Sincerely,

RONALD REAGAN.

I am introducing this bill at this time because the nominations and the issue of reauthorization will be before the Judiciary Committee later this week. It is my hope that this proposed legislation can provide a basis to resolve this complex issue.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1832

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Civil Rights Act of 1957 is amended as follows:

SEC. 2. Section 101 of the Civil Rights Act of 1957 (42 U.S.C. 1975) is amended by adding at the end thereof the following new subsection:

"(f) Except as provided in subsection (h) below, upon vacancies in the Commission occurring after the date of the enactment of this subsection, members of the Commission shall be appointed for a term of six years except—

(A) each member holding office on January 1, 1983, shall serve until his total years service on the Commission equals six years; or

(B) any member to fill a vacancy shall serve for the remainder of the term for which the member's predecessor was appointed.

"(g) A member of the Commission may continue to serve on the Commission after the expiration of his term until his successor has taken office as a member of the Commission.

"(h) The President may remove a member of the Commission only for neglect of duty or malfeasance in office."

SEC. 3. Section 104(c) of the Civil Rights Act of 1957 is amended to read as follows:

"(c) The Commission shall submit reports to the President and to the Congress at such times as the Commission, the Congress or the President shall deem desirable."

SEC. 4. (a) Section 104(d) of the Civil Rights Act of 1957 is repealed.

(b) Subsections (e), (f), and (g) of section 104 of the Civil Rights Act of 1957 are redesignated as subsections (d), (e), and (f), respectively.

SEC. 5. Section 106 of the Civil Rights Act of 1957 is amended to read as follows:

"SEC. 106. There are authorized to be appropriated $12,180,000 to carry out the provisons of this Act for the fiscal year 1984, and such sums as may be necessary for each succeeding fiscal year.".

By Mr. CHILES:

S. 1833. A bill to amend title 38, United States Code, to authorize the VA to furnish each veteran with a compensable service-connected disability, such drugs and medicines as may be prescribed by any licensed physician for treatment of the service-connected disability; to the Committee on Veterans' Affairs.

PROVIDING MEDICATION FOR SERVICE-CONNECTED DISABILITIES

● Mr. CHILES. Mr. President, today, I am introducing legislation to address a problem that has surfaced concerning the Veterans' Administration authority to provide medication to service-connected veterans who have had medicines prescribed by private physicians.

Until recently, service-connected disabled veterans who sought medical attention for their disabilities from private physicians could receive medications and have prescriptions filled by the Veterans' Administration. A legal opinion supplied to the Chief Medical Director of the Veterans' Administration questioned the statutory authority for this procedure and prompted the subsequent decision by the Veterans' Administration to stop providing medication to service-connected veterans not being treated in VA facilities or on a fee card basis. Veterans in Florida who have been utilizing this procedure in the past will soon be notified of the Veterans' Administration's decision. Veterans will either have to receive medical care at a Veterans' Administration facility in order to receive medications from the Veterans' Administration, or continue treatment by private physicians and assume full cost of prescription and other medications associated with their disabilities.

I have discussing this question with the Veterans' Administration during the last few months and feel it is the responsibility of Congress to insure the continuation of the past policy of distributing medications to service-connected veterans.

Whether statutory authority exists for the Veterans' Administration to continue its present policy of furnishing medications to service-connected veterans is still subject to debate. It is my understanding the Senate Committee on Veterans' Affairs is currently reviewing this situation. I am introducing this bill today for two reasons. First, I feel it is important that service-connected veterans realize that Congress recognizes the problems that exists and is willing to do something to rectify it. Second, in the event it is determined that legislation is, in fact, necessary to clarify the Veterans' Administration authority in this regard, my bill will specifically authorize the VA to furnish medication prescribed by private physicians for veterans with compensable service-connected disabilities.

I hope my colleagues in the Senate will join me and others in working to resolve this situation and to insure the continuation of providing medications to service-connected veterans.●

By Mrs. HAWKINS:

S. 1834. A bill to authorize the Secretary of the Army to make modifications in certain water projects in Florida; to the Committee on Environment and Public Works.

EVERGLADES RESTORATION ACT OF 1983

Mrs. HAWKINS. Mr. President, south of Lake Okeechobee, bordered on the west by the Big Cypress National Preserve and on the east by the Atlantic Coastal Ridge, lies the Everglades, a shallow depression some 40 miles wide extending 100 miles southward from Lake Okeechobee to the mangrove and coastal glades near Florida Bay. Just a swamp? Not at all. The Everglades National Park is one of the world's most precious, one-of-a-kind natural resources. The park has a worldwide constituency and has been cited by the United Nations as one resource that the world cannot afford to lose.

In addition to providing an essential water supply to southeast Floridians, and a unique wildlife habitat for all of south Florida, the Everglades is a fragile and complex ecosystem with immense practical value. The fate of the Everglades National Park is closely linked with the fate of our entire population in south Florida. The park is a vital recharge zone for the Biscayne Aquifer which provides fresh water to millions of residents living along our south coast. Federal action has played an important part in making the development of south Florida possible. Further Federal action is now needed to preserve that considerable investment.

This proposal would authorize the Army Corps of Engineers to conduct an experimental program for delivery of water to the Everglades National Park in an attempt to reestablish the proper and natural flow of water into the park. Further, the legislation will direct the Secretary of the Army to acquire whatever lands are necessary to effect the improvements to the park and to construct the necessary flood protection structures needed to protect homes in the areas affected by the restoration of a natural waterflow.

Mr. President, the importance of a healthy Everglades National Park to Florida and the world is hard to measure. It will take the combined efforts of the National Park Service, the Florida State government, the South Florida Water Management District, and Congress to obtain complete restoration. I urge my colleague to join me in saving one of this Nation's greatest natural resources.

Mr. President, I ask that a brief description of the Everglades environment be printed in the CONGRESSIONAL RECORD immediately following a printing of the bill itself. this description is part of a larger study prepared by the Dade County Planning Department in 1980.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1834

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Army (hereafter in this Act referred to as the "Secretary") is authorized, with the concurrence of the Director of the National Park Service and the South Florida Water Management District, to modify the schedule for delivery of water from the central and southern Florida project to the Everglades National Park re-

quired by section 2 of the River Basin Monetary Authorization and Miscellaneous Civil Works Amendments Act of 1970 (Public Law 91-282) and to conduct an experimental program for the delivery of water to the Everglades National Park from such project for the purpose of determining an improved schedule for such delivery.

(b) The Secretary shall, as soon as practicable, make such modifications in the comprehensive plan for flood control and other purposes, central and southern Florida, authorized by the Flood Control Act of 1948 and subsequent Acts of Congress, as may be necessary to restore the natural flow of water to the Everglades National Park. The Secretary is further authorized to acquire such interests in lands as are necessary to permit the natural flow of water to the Everglades National Park. The Secretary shall acquire any interest in land under this subsection at the fair market value of such interest based on conditions existing after the construction of the project described in subsection (a) of this section and before any modification is made to the schedule for delivery of water to the Everglades National Park under such subsection and before the restoration of such natural flow. The Secretary is also authorized to construct necessary flood protection measures for protection of homes in the area affected by any modification of such delivery schedule or by the restoration of such natural flow.

By Mr. D'AMATO:

S. 1835. A bill to provide for the relief of local prosecutors and sheriffs; to the Committee on the Judiciary.

LOCAL PROSECUTORS AND SHERIFFS RELIEF ACT OF 1983

● Mr. D'AMATO. Mr. President, today I am introducing legislation to help local governments meet the onerous financial burdens that often result from the extraordinary security costs necessitated by special circumstances. The classic example of such a case is the Brink's murder and robbery trial now pending in Orange County Court in New York. A parallel case, until recently, was being tried in Federal District Court in Manhattan.

Both cases involve the holdup of a Brink's armored truck and the murder of a security guard and two local policemen on October 20, 1981. Both cases have received national publicity. Defendants in both cases are identified with a number of radical and revolutionary groups, including the Weather Underground, the Black Panthers, the White Panthers, and the Black Liberation Army. Defendants in both cases have also stated that the ultimate purpose of the holdup was the creation of a black nation out of five Southern States. Clearly, then, the Orange County trial is no ordinary local matter.

This extraordinary case has generated extraordinary expenses. Total costs to Rockland County, which, as the place of original venue, must bear the full brunt of these costs, are expected to exceed $5 million. That is a crippling amount for a small county, whose population barely exceeds 250,000. Most of these costs are directly attributable to the round-the-clock courthouse and jailhouse security precautions the notoriety of the defendants has made necessary.

Rockland County did receive a $500,000 LEAA grant last year. Unfortunately, the expiration of LEAA's authorization has deprived the county of any additional Federal assistance from this source. We are left, therefore, with a situation in which, although the principle of Federal assistance in this case has been upheld, there is no mechanism for funding that principle. The bill I introduce today will remedy this defect.

The grant procedure created by this legislation is simple and straightforward. It gives the Attorney General broad discretionary authority to choose which applications will be funded.

Mr. President, the solution I propose today is not a new one. It is merely the return to a procedure that was in place until very recently. The Brink's trial is a clear example of the need to reinstate that procedure. For that reason, and in the interest of fairness and equity, I urge my colleagues to support this important legislation.

Mr. President, I ask unanimous consent that the legislation be printed in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1835

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Local Prosecutor's and Sheriff's Relief Act of 1983".

SEC. 2. The Attorney General, in his sole discretion, is authorized to make grants to State or local governments for the purposes set forth in section 3, if he deems an application made by a State or local government to merit payment under this Act.

SEC. 3. Grants under this Act may be made to assist State and local governments—

(1) to meet the expenses of prosecuting a defendant or defendants,

(2) to meet the expenses of maintaining courtroom security, or

(3) to meet the expenses of maintaining a defendant or defendants safely and securely in custody,

when a Federal interest is served by the vigorous prosecution of such defendant or defendants.

SEC. 4. The Attorney General is authorized to prescribe such rules as are necessary to carry out this Act, including rules regarding the disposition and accounting of funds granted under this Act.

SEC. 5. The Attorney General may approve in whole or in part, or deny, any application for a grant under this Act.

SEC. 6. Grants under this Act may be made in advance or by way of reimbursement.

SEC. 7. Grants under this Act may be made to reimburse costs incurred at any time after June 1, 1981.

SEC. 8. For the purpose of carrying out the provisions of this Act, there are authorized to be appropriated $10,000,000 for fiscal year ending September 30, 1984, $10,000,000 for fiscal year ending September 30, 1985, and $10,000,000 for fiscal year ending September 30, 1986.●

By Mr. D'AMATO (for himself and Mr. COHEN):

S. 1836. A bill to provide equitable treatment for certain fresh vegetables produced in the United States; to the Committee on Finance.

FRESH VEGETABLE AND POTATO TRADE ACT OF 1983

● Mr. D'AMATO. Mr. President, I rise today to introduce the fresh vegetable and potato trade act of 1983. This legislation is of vital importance to our Nation, as well as to our vegetable producers, for farmers comprise the economic backbone of our country.

We now face a very real threat from across our northern border. The increased importation of perishable produce from Canada has reached staggering proportions. Growers in the northern States have been hard hit by competition from farmers who are subsidized by the Canadian Federal and provincial treasuries. The rise in Canadian potato imports, for instance, was 300 percent over the last 3 years. These imports are depressing prices at the market and forcing many American farmers out of business. And while our Government has taken action to protect the specialty steelmakers, no similar action seems forthcoming to help our farmers.

Vegetable farmers, in particular, often compete with subsidized produce from foreign countries and are, therefore, frequently faced with a flooded market. As a solution to this problem, this legislation would establish a commodity surtax designed to be imposed only for limited periods, and only when agricultural imports are injuring a specific commodity for a certain time period.

Economic injury often results when subsidized commodities are imported during periods of heavy U.S. production. Since the declared value of a shipment at the point of entry into the United States often is not accurate, it is necessary to provide, periodically, a temporary surtax on commodities when an increased volume of imports is ruled by the Agriculture Department to have resulted in depressed domestic market prices.

My legislation requires the Agriculture Department to monitor various commodities, including cabbages, carrots, celery, lettuce, red and yellow onions, potatoes, and radishes. However, any fresh vegetable may be added to this list by petitioning the Secretary and securing a declaration that economic injury is being caused or threatened by subsidized imports.

The Agriculture Department will determine, by examining volume and prices, the extent of the economic impact on our domestic growers. Should injury be determined for a par-

ticular commodity, a surtax system would be put into effect.

There will be times, Mr. President, when such a surtax will not be necessary. At other times, however, a surtax can provide the difference that will allow our farmers to compete on a more equal footing than is now possible.

The vegetable industry has been suffering severely. The flight of our Northeastern farmers who must compete with subsidized produce from a foreign country must not be overlooked. While our farmers receive no governmental assistance, Canadian produce is subsidized in several ways, including low-interest loans to farmers, substantial transportation subsidies, stabilization payments for crop production, and an export promotion program designed to garner a greater share of the produce market in the Northeast.

I believe that this agricultural surtax system is a fair method of insuring that our agricultural economy is eroded no further by imported vegetables and potatoes. Though we cannot control nature and eliminate droughts, floods, and other natural disasters, we can rectify the problem of falling prices caused by the deliberate subsidization by competing nations.

Mr. President, I ask unanimous consent that my legislation be printed in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1836

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fresh Vegetable and Potato Trade Act of 1983".

SEC. 2. As used in this Act:

(1) The term "article" means a specific vegetable category commodity entered into trade in a terminal market.

(2) The term "benchmark price" means, with respect to articles in a vegetable category, a price, computed for each month within the applicable marketing season, that equals—

(A) 85 per centum of the average monthly market price for domestic and imported articles in that category for the same month during the thirty-six-month period immediately preceding the month for which such computation is made; or

(B) if the Secretary considers that the benchmark price computed under subparagraph (A) is abnormally high or low because of harvest variations, 90 per centum of the average monthly market price for domestic and imported articles in that category for the same month during the sixty-month period immediately preceding the month for which such computation is made.

(3) The term "imported articles" means articles that have been entered, or withdrawn from warehouse for consumption, within the customs territory of the United States.

(4) The term "market price" means the sale price at which imported articles in a vegetable category are bought and sold in the course of trade at the three terminal markets having the heaviest volume of imports of such articles. The market price shall be based on such quantity of measure as the Secretary deems appropriate for purposes of carrying out this Act.

(5) The term "marketing season" means the marketing season in the United States for vegetables, that are produced in the United States, of a kind like those in a vegetable category, as determined by the Secretary.

(6) The term "Secretary" means the Secretary of Agriculture.

(7) The term "terminal market" means a marketing area in the United States at which major shipments of imported articles in a vegetable category are introduced into domestic commerce.

(8) The term "vegetable category" means each of the following classifications, identified by reference to the appropriate item numbers of the Tariff Schedules of the United States (19 U.S.C. 1202), of vegetables, if fresh:

(A) Cabbages provided for in item 135.30.

(B) Carrots provided for in items 135.41 and 135.42.

(C) Celery provided for in items 135.60 and 135.61.

(D) Lettuce provided for in item 136.60 and 136.61.

(E) Red onions and yellow onions, of the type produced for storage holdings, provided for in item 136.93.

(F) Potatoes provided for in items 137.25, 137.26, 137.28, and 137.29.

(G) Radishes provided for in item 137.40.

The Secretary, for the purposes of this Act, may add for the duration of a marketing season any classification of fresh vegetable provided for in such Schedules as a vegetable category if a United States producer of vegetables of that kind petitions the Secretary for such addition and the Secretary concludes that economic injury is being caused or threatened to United States producers of articles in that category after applying the criteria in section 3(a) and (b)(2).

SEC. 3. (a) During each week of the marketing season, the Secretary shall monitor the market prices paid for articles in each vegetable category. If the Secretary finds, on the basis of such monitoring, that the average market price paid for articles in any vegetable category during a week does not equal 90 per centum of the average price for such category for such week in the immediately proceeding three years, the Secretary shall, within five working days, publish notice thereof in the FEDERAL REGISTER designating that vegetable category as a depressed vegetable category.

(b) The Secretary shall, with respect to articles in each vegetable category designated as a depressed vegetable category under subsection (a)—

(1) monitor on a daily basis the market prices paid for articles in such category; and

(2) monitor on a weekly basis the volume of imported articles in such category that is sold in commerce at terminal markets.

(c) If the Secretary determines, on the basis of the monitoring required under subsection (b) regarding a vegetable category that is depressed, that—

(1) the average market price for articles in that category for any week in the marketing season was below the benchmark price for such category; and

(2) the volume of imported articles in that category that was sold in commerce at terminal markets during such week exceeds by 5 per centum or more the volume of imported articles in that category sold at terminal markets during the equivalent seven-day period in calendar year 1978;

the imported articles in that vegetable category shall be presumed to be causing, or threatening to cause, economic injury to United States producers of like vegetables.

SEC. 4. (a)(1) Within two working days after making a determination under section 3(c) regarding imported articles in a vegetable category, the Secretary, by publication of notice thereof in the Federal Register, shall (A) issue notice of such determination, and (B) establish a surtax period for such category which shall be the one hundred and eighty-day period commencing on the next Thursday which occurs not less than five days after the date on which such determination was made. The Secretary shall at the time of such publication notify the exporting countries of articles in such category of such establishment.

(2) The Secretary may extend a surtax period established under paragraph (1) by an additional ninety days if he determines that the conditions which led to the establishment of the initial one hundred and eighty-day surtax period are still in effect at the close of the initial period.

(b)(1) There is imposed on all articles in a vegetable category to which a determination under section 3(c) applies that are entered, or withdrawn from warehouse for consumption, in the customs territory of the United States during each week within the surtax period a surtax for that week, the amount of which shall be computed on a weekly basis in accordance with subsection (c) by the Secretary on the basis of the applicable market prices.

(2) A surtax imposed under this Act shall be treated for all purposes of the customs laws which is in addition to any other duty imposed on the entry or withdrawal from warehouse of articles in the vegetable category concerned.

(c)(1) For purposes of this section—

(A) The term "computation period" means the seven-day period that ends on a Wednesday in the two weeks before the week in which a surtax week begins.

(B) The term "surtax week" means each seven-day period, beginning on a Thursday, that is within a surtax period established under subsection (a).

(2) The surtax imposed under subsection (b) for each surtax week on imported articles within a vegetable category shall be determined on the basis of the relationship between the average daily market price paid during the applicable computation period for articles in such category, and the applicable benchmark price for such article, as follows:

(A) If there is no difference between such market price and benchmark price—

(i) no surtax shall apply during the surtax week if no surtax is in effect for the immediately preceding surtax week; or

(ii) the surtax for the surtax week shall be the same as the surtax, if any, in effect for the immediately preceding surtax week.

(B) If such market price is below the benchmark price, the surtax for the surtax week shall be—

(i) an amount equal to the difference between such prices, if there is no surtax in effect for the immediately preceding surtax week, or

(ii) an amount equal to such difference plus the amount of any surtax in effect for the immediately preceding surtax week.

(C) If such market price exceeds such benchmark price—

(i) no surtax shall apply during the surtax week if no surtax is in effect for the immediately preceding surtax week, or

(ii) the surtax for the surtax week shall be the amount of the surtax in effect for the immediately preceding surtax week reduced by the amount of such excess (but not below zero).

(3) For purposes of determining under paragraph (2) the surtax to be imposed during the first surtax week in any surtax period, a surtax shall be determined under paragraph (2)(B) on the basis of the findings of the Secretary under section 3(c)(1) on the imported articles concerned and such surtax shall be treated as being in effect during the week before such first surtax week.

(d) The Secretary shall certify to the Secretary of the Treasury the surtax, or absence thereof, as determined under subsection (c) for each surtax week within the surtax period established for a vegetable category. The Secretary of the Treasury shall take such action as may be necessary or appropriate to levy and collect any such surtax so certified, including the requirement of additional bond to secure payment of a surtax.

SEC. 5. The Secretary and the Secretary of the Treasury shall each issue such regulations as may be necessary and appropriate to carry out this Act.●

By Mr. GORTON (for himself and Mr. EVANS):

S. 1837. A bill to designate the Federal building in Seattle, Wash., as the "Henry M. Jackson Federal Building"; to the Committee on Environment and Public Works.

HENRY M. JACKSON FEDERAL BUILDING

● Mr. GORTON. Mr. President, I am honored to introduce a bill with Senator EVANS to designate the Federal office building in Seattle, Wash., as the "Henry M. Jackson Federal Building." It is with a deep sense of personal loss and sadness that I introduce this bill today, but I believe it is entirely appropriate that we name the Federal office building after a man who played such an important role for so many years in our Federal Government and in the State of Washington.

Senator Jackson was a statesman who served the State of Washington and the Nation with distinction, pride, and honor. His life's work was motivated by his deep love for his country, its people, and its insitutions. His impressive career in the U.S. Congress, spanning more than 42 years, was dedicated to improving and protecting our great Nation. Over the last week, we have been reminded of the magnitude of Senator Jackson's accomplishments.

The Henry M. Jackson Federal Bulding will be a living memorial to the people and institutions Senator Jackson valued so deeply. I urge my colleagues to join me in promptly enacting this legislation as a tribute to a great man who dedicated his life to serving his country.●

ADDITIONAL COSPONSORS

S. 74

At the request of Mr. MELCHER, the name of the Senator from Georgia (Mr. NUNN) was added as a cosponsor of S. 74, a bill entitled the "Reye's Syndrome Act of 1983."

S. 337

At the request of Mr. MOYNIHAN, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 337, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 551

At the request of Mr. ROTH, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 551, a bill to amend the Tax Reform Act of 1976 to extend, for an additional 4 years, the exclusion from gross income of the cancellation of certain student loans.

S. 555

At the request of Mr. MOYNIHAN, the names of the Senator from Connecticut (Mr. DODD), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 555, a bill to stop the proliferation of "cop killer" bullets.

S. 591

At the request of Mr. INOUYE, the names of the Senator from Minnesota (Mr. DURENBERGER), the Senator from Oklahoma (Mr. NICKLES), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of S. 591, a bill to amend the Internal Revenue Code of 1954 to provide a mechanism for taxpayers to designate $1 of any overpayment of income tax, and to contribute other amounts, for use by the U.S. Olympic Committee.

S. 1004

At the request of Mr. D'AMATO, the name of the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 1004, a bill to amend the Federal employees health benefits plan provisions of chapter 89, title 5, United States Code, to assure adequate mental health benefit levels and otherwise limit benefit reductions.

S. 1113

At the request of Mr. D'AMATO, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 1113, a bill to amend the Internal Revenue Code of 1954 to provide that tax-exempt interest shall not be taken into account in determining the amount of social security benefits to be taxed.

S. 1256

At the request of Mr. MOYNIHAN, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 1256, a bill to authorize special assistance for desegregation activities.

S. 1271

At the request of Mr. RANDOLPH, the name of the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 1271, a bill to encourage citizen participation in wildlife conservation programs and to establish the National Fish and Wildlife Foundation.

S. 1305

At the request of Mr. PACKWOOD, the names of the Senator from Oklahoma (Mr. BOREN), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of S. 1305, a bill to amend the Internal Revenue Code of 1954 to extend the energy tax credit for investments in certain classes of energy property, and for other purposes.

S. 1419

At the request of Mr. SARBANES, the names of the Senator from Michigan (Mr. LEVIN), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 1419, a bill to amend title XVIII of the Social Security Act to retain the option of direct reimbursement for all providers under the medicare program.

S. 1613

At the request of Mr. TRIBLE, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 1613, a bill to amend title 10, United States Code, with respect to the provision of medical benefits and post and base exchange and commissary store privileges to certain former spouses of certain members or former members of the Armed Forces.

S. 1668

At the request of Mr. D'AMATO, the names of the Senator from Missouri (Mr. DANFORTH), and the Senator from Alabama (Mr. DENTON) were added as cosponsors of S. 1668, a bill to amend chapter 37 of title 31, United States Code, to authorize contracts retaining private counsel to furnish collection services in the case of indebtedness owed the United States.

S. 1785

At the request of Mr. SASSER, the names of the Senator from New Jersey (Mr. BRADLEY), the Senator from Maryland (Mr. SARBANES), and the Senator from Idaho (Mr. MCCLURE) were added as cosponsors of S. 1785, a bill to amend title II of the Social Security Act to eliminate the waiting period for disability benefits in the case of an individual who is terminally ill.

S. 1794

At the request of Mr. D'AMATO, the name of the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 1794, a bill to require certain agencies to procure supplies or services from local commercial sources instead of from a multiple-award schedule of the Federal supply schedule under certain circumstances; to require the Adminis-

trator of General Services to remove contractors from multiple-award schedules under certain circumstances; and to increase the maximum amount of small purchases which may be made by such executive agencies from sums in an imprest fund for one transaction.

S. 1795

At the request of Mr. MOYNIHAN, the name of the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of S. 1795, a bill to further the national security and improve the economy of the United States by providing grants for the improvement of proficiency in critical languages, for the improvement of elementary and secondary foreign language instruction, and for per capita grants to reimburse institutions of higher education to promote the growth and improve the quality of postsecondary foreign language instruction.

SENATE JOINT RESOLUTION 112

At the request of Mr. INOUYE, the names of the Senator from Montana (Mr. BAUCUS), and the Senator from North Carolina (Mr. HELMS) were added as cosponsors of Senate Joint Resolution 112, a joint resolution to proclaim the month of March 1984 as National Social Work Month.

SENATE JOINT RESOLUTION 143

At the request of Mr. MELCHER, the name of the Senator from West Virginia (Mr. BYRD) was added as a cosponsor of Senate Joint Resolution 143, a joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with Sunday, June 3, 1984, as "National Garden Week."

SENATE JOINT RESOLUTION 145

At the request of Mr. LONG, the names of the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Georgia (Mr. NUNN), the Senator from Oregon (Mr. HATFIELD), the Senator from Michigan (Mr. LEVIN), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maryland (Mr. SARBANES), the Senator from Florida (Mr. CHILES), the Senator from California (Mr. WILSON), the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of Senate Joint Resolution 145, a joint resolution to designate the week of October 2, 1983 through October 8, 1983, as "National Port Week."

SENATE JOINT RESOLUTION 155

At the request of Mr. WILSON, the names of the Senator from Maine (Mr. COHEN), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of Senate Joint Resolution 155, a joint resolution designating the week beginning November 6, 1983, as "National Disabled Veteran's Week."

SENATE JOINT RESOLUTION 157

At the request of Mr. MELCHER, the names of the Senator from Ohio (Mr. GLENN), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Joint Resolution 157, a joint resolution designating November 13, 1983, as "National Retired Teachers' Day."

SENATE JOINT RESOLUTION 158

At the request of Mr. BENTSEN, his name was added as cosponsors of Senate Joint Resolution 158, a joint resolution condemning the brutal behavior of the Government of the Union of Soviet Socialist Republics for the destruction of Korean Airlines flight 007 with the loss of 269 innocent lives.

At the request of Mr. DURENBERGER, his name was added as cosponsor of Senate Joint Resolution 158, supra.

At the request of Mr. BAKER, the name of the Senator from Mississippi (Mr. STENNIS), was added as cosponsor of Senate Joint Resolution 158, supra.

At the request of Mr. FORD, his name was added as cosponsor of Senate Joint Resolution 158, supra.

At the request of Mr. BYRD, the names of the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Connecticut (Mr. DODD) were added as cosponsors of Senate Joint Resolution 158, supra.

At the request of Mr. DOMENICI, his name was added as cosponsor of Senate Joint Resolution 158, supra.

SENATE JOINT RESOLUTION 160

At the request of Mr. BYRD, the names of the Senator from Idaho (Mr. SYMMS), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of Senate Joint Resolution 160, a joint resolution to designate the week of October 17, 1983, through October 24, 1983, as "National Adult Continuing Education Week."

SENATE CONCURRENT RESOLUTION 29

At the request of Mr. HOLLINGS, the names of the Senator from Illinois (Mr. PERCY), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of Senate Concurrent Resolution 29, a concurrent resolution to provide that it is the sense of the Congress that the national policy of the United States be that the Federal Government contribute to the support of education in the United States.

AMENDMENTS SUBMITTED

RADIO MARTI

HUMPHREY AMENDMENT NO. 2130

(Ordered to lie on the table.)

Mr. HUMPHREY submitted an amendment intended to be proposed by him to the bill (S. 602) to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes; as follows:

At the bottom of page 7, add the following:

INDEPENDENT EVALUATION OF RADIO MARTI PROGRAMING

SEC. 7. The Board for International Braodcasting shall arrange, by contract if necessary, an independent evaluation of Radio Marti programming, the results of which are to be set forth in a report to be prepared and transmitted to the Board 18 months after the date of enactment of this Act and at intervals of one year thereafter for the following three years. The Board shall, not later than 30 days after the date of receipt of such report, transmit to the Congress such report, together with any recommendations for legislative action.

HAWKINS (AND OTHERS) AMENDMENT NO. 2131

Mrs. HAWKINS (for herself, Mr. CHILES, Mr. BAKER, Mr. ZORINSKY, Mr. WEICKER, and Mr. GRASSLEY) proposed an amendment to the bill S. 602, supra; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:
That this Act may be cited as the "Radio Broadcasting to Cuba Act".

FINDINGS; PURPOSES

SEC. 2. The Congress finds and declares—

(1) that it is the policy of the United States to support the right of the people of Cuba to seek, receive, and impart information and ideas through any media and regardless of frontiers, in accordance with article 19 of Universal Declaration of Human Rights;

(2) that, consonant with this policy, radio broadcasting to Cuba may be effective in furthering the open communication of accurate information and ideas to the people of Cuba, in particular information about Cuba; and

(3) that such broadcasting to Cuba, operated in a manner not inconsistent with the broad foreign policy of the United States and in accordance with high professional standards, would be in the national interest.

(4) that the Voice of America already broadcasts to Cuba information that represents America, not any single segment of American society, and includes a balanced and comprehensive projection of significant American thought and institutions but that there is a need for broadcasts to Cuba which provide news commentary and other information about events in Cuba and elsewhere to promote the cause of freedom in Cuba.

ADDITIONAL FUNCTIONS OF THE UNITED STATES INFORMATION AGENCY

SEC. 3. (a) In order to carry out the objectives set forth in section 2, the United States Information Agency (hereafter in this Act referred to as the "Agency") shall provide for the open communication of information and ideas through the use of radio broadcasting to Cuba. Radio broadcasting to Cuba shall serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news.

(b) Radio broadcasting in accordance with subsection (a) shall be part of the Voice of America radio broadcasting to Cuba and shall be in accordance with all Voice of America standards to ensure the broadcast of programs which are objective, accurate, balanced, and which present a variety of views.

(c) Radio broadcasting to Cuba authorized by this Act shall utilize the broadcasting facilities located at Marathon, Florida and the

1180 AM frequency that were used by the Voice of America prior to the date of enactment of this Act. Other frequencies, not on the commercial Amplitude Modulation (AM) Band (535 kHz to 1605 kHz), may also be simultaneously utilized, provided that no frequency shall be used for radio broadcasts to Cuba in accordance with this Act which is not also used for all other Voice of America broadcasts to Cuba. Time leased from non-governmental shortwave radio stations may be used to carry all or part of the Service programs and to rebroadcast Service programs, provided that not less than 30% of the programs broadcast or rebroadcast shall be regular Voice of America broadcasts with particular emphasis on news and programs meeting the requirements of section 503(2) of Public Law 80-402.

(d) Notwithstanding subsection (c), in the event that broadcasts to Cuba on the 1180 AM frequency are subject to jamming or interference greater by 25 percent or more than the average daily jamming or interference in the 12 months preceding September 1, 1983, the Director of the United States Information Agency may lease time on commercial or non-commercial educational AM band radio broadcasting stations. The Federal Communications Commission shall determine levels of jamming and interference by conducting regular monitoring of the 1180 AM frequency. In the event that more than two hours a day of time is leased, not less than 30 percent of the programming broadcast shall be regular Voice of America broadcasts with particular emphasis on news and programs meeting the requirements section 503(2) of Public Law 80-402.

(e) Any program of United States Government radio broadcasts to Cuba authorized by this section shall be designated "Voice of America: Cuba Service" or "Voice of America: Radio Marti Program".

(f) In the event broadcasting facilities located at Marathon, Florida, are rendered inoperable by natural disaster or by unlawful destruction, the Director of the United States Information Agency may, for the period in which the facilities are inoperable but not to exceed 150 days, use other United States Government-owned transmission facilities for Voice of America broadcasts to Cuba authorized by this Act.

CUBA SERVICE OF THE VOICE OF AMERICA

SEC. 4. The Director of the United States Information Agency shall establish within the Voice of America a Cuba Service (hereafter in this section referred to as the "Service"). The Service shall be responsible for all radio broadcasts to Cuba authorized by section 3. The Director of the United States Information Agency shall appoint a head of the Service and shall employ such staff as the head of the Service may need to carry out his duties. The Cuba Service shall be administered separately from other Voice of America functions and the head of the Cuba Service shall report directly to the Director and the Associate Director for Broadcasting of the United States Information Agency.

BOARD FOR RADIO BROADCASTING TO CUBA

SEC. 5. (a) There is established within the Office of the President the Advisory Board for Radio Broadcasting to Cuba (hereafter in this Act referred to as the "Board"). The Board shall consist of 9 members, appointed by the President by and with the advice and consent of the Senate, of whom not more than 5 shall be members of the same political party. The President shall designate one member of the Board to serve as Chairman.

(b) The Board shall review the effectiveness of the activities carried out under this Act and shall make such recommendations to the President, the Director and the Associate Director for Broadcasting of the United States Information Agency as it may deem necessary.

(c) In appointing the initial voting members of the Board, the President shall designate 3 members to serve for a term of three years, 3 members to serve for a term of two years, and 3 members to serve for a term of one year. Thereafter, the term of each member of the Board shall be three years. The President shall appoint, by and with the advise and consent of the Senate, members to fill vacancies occurring prior to the expiration of a term, in which case the members so appointed shall serve for the remainder of such term. Any member whose term has expired may serve until his successor hs been appointed and qualified.

(d) The head of the Service shall serve, ex officio, as a member of the Board.

(e) Members of the Board appointed by the President shall, while attending meetings of the Board or while engaged in duties relating to such meetings or in other activities of the Board pursuant to this section, including traveltime, be entitled to receive compensation equal to the daily equivalent of the compensation prescribed for level V of the Executive Schedule under section 5316 of title 5, United States Code. While away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently. The ex officio member of the Board shall not be entitled to any compensation under this section, but may be allowed travel expenses as provided in the preceding sentence.

(f) The Board may, to the extent it deems necessary to carry out its functions under this section, procure supplies, services, and other personal property, including specialized electronic equipment.

(g) Notwithstanding any other provision of law, the Board shall remain in effect indefinitely.

(h) There are authorized to be appropriated $130,000 to carry out the provisions of this section.

ASSISTANCE FROM OTHER GOVERNMENT AGENCIES

SEC. 6. (a) In order to assist the United States Information Agency in carrying out the purposes set forth in section 2, any agency or instrumentality of the United States may sell, loan, lease, or grant property (including interests therein) and may perform administrative and technical support and services at the request of the Agency. Support and services shall be provided on a reimbursable basis. Any reimbursement shall be credited to the appropriation from which the property, support, or services was derived.

(b) The Agency may carry out the purposes of section 3 by means of grants, leases, or contracts (subject to the availability of appropriations), or such other means as the Agency determines will be most effective.

FACILITY COMPENSATION

SEC. 7. (a) It is the intent of the Congress that the Secretary of State should seek prompt and full settlement of United States claims against the Government of Cuba arising from Cuban interference with broadcasting in the United States. Pending the settlement of these claims, it is appropriate to provide some interim assistance to the United States broadcasters who are adversely affected by Cuban radio interference and who seek to assert their right to measures to counteract the effects of such interference.

(b) Accordingly, the Agency shall make payments to the United States radio broadcasting station licensees upon their application for expenses which they have incurred before, on, or after the date of this Act in mitigating, pursuant to special temporary authority from the Federal Communications Commission, the effects of activities by the Government of Cuba which directly interfere with the transmission or reception of broadcasts by these licensees. Such expenses shall be limited to the costs of equipment (replaced less depreciation) and associated technical and engineering costs.

(c) The Federal Communications Commission shall issue such regulations and establish such procedures for carrying out this section as the Federal Communications Commission finds appropriate. Such regulations shall be issued no later than one hundred and eighty days after enactment of this Act.

(d) There are authorized to be appropriated to the Agency, $5,000,000 for use in compensating United States radio broadcasting licensees pursuant to this section. Amounts appropriated under this section are authorized to be available until expended.

(e) Funds appropriated for implementation of this section shall be available for a period of no more than four years following the initial broadcast occurring as a result of programs described in this Act.

(f) It is the sense of the Congress that the President should establish a task force to analyze the level of interence from the operation of Cuban radio stations experienced by broadcasters in the United States and to seek a practical political and technical solution to this problem.

(g) This section shall enter into effect on October 1, 1984.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. (a) There are authorized to be appropriated for the United States Information Agency $14,000,000 for fiscal year 1984 and $11,000,000 for fiscal year 1985 to carry out sections 3 and 4 of this Act. The amount obligated by the United States Information Agency in ensuing fiscal years shall be sufficient to maintain broadcasts to Cuba under this Act at rates no less than the fiscal year 1985 level.

(b) In addition to amounts otherwise authorized to be appropriated to the Agency for the fiscal years 1984 and 1985, there are authorized to be appropriated to the Agency $54,800,000 for the fiscal year 1984 and $54,800,000 for the fiscal year 1985, which amounts shall be available only for expenses incurred by essential modernization of the facilities and operations of the Voice of America.

(c) Amounts appropriated under this section are authorized to be made available until expended.

INDEPENDENT EVALUATION OF THE CUBA SERVICE

SEC. 9. The United States Information Agency shall arrange, by contract if necessary, an independent evaluation of Cuba Service programming, the results of which are to be set forth in a report to be prepared and transmitted to the Agency 18 months after the date of enactment of this Act and at intervals of one year thereafter for the following three years. The Agency shall, not later than 30 days after the date of receipt

of such report, transmit to the Congress such report, together with any recommendations for legislative action.

TRANSFER OF CERTAIN LAND IN SOUTH CAROLINA

HOLLINGS (AND THURMOND) AMENDMENT NO. 2132

(Ordered to be referred to the Committee on Agriculture, Nutrition, and Forestry.)

Mr. HOLLINGS (for himself and Mr. THURMOND) submitted an amendment intended to be proposed by them to the bill (S. 566) to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain land conveyed to the South Carolina State Commission of Forestry and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such land to such commission; as follows:

On page 1, line 3, strike all that follows through page 4, line 13 and insert in lieu thereof the following:

"That, with respect to 1.99 acres of land in Sumter County, South Carolina, described in section 2 of this Act, the Secretary of Agriculture, on behalf of the United States, shall release the South Carolina State Commission of Forestry for the State of South Carolina, without consideration, from the condition contained in a deed dated June 28, 1955, between the United States and the State of South Carolina granting certain lands in Sumter County, South Carolina, of which the described lands are a part, that requires that the lands so granted be used for public purposes and provides for a reversion of such land to the United States if at any time it ceases to be so used: *Provided*, That such release shall in no way affect the interests of the United States in coal, oil, gas, and other minerals (not outstanding or reserved in third parties) reserved by the United States in the described lands.

"SEC. 2. The 1.99 acre tract described in section 1 of this Act is more particularly described as follows: Beginning at an iron pipe located on the west side of the Old Kings Highway and being south 18 degrees and 35 minutes east and 2519.2 feet from Manchester State Forest monument number 2314; thence south 3 degrees 19 minutes east 417.22 feet to an iron pipe; thence south 86 degrees 41 minutes west 208.64 feet to an iron pipe; thence north 3 degrees 19 minutes west 199.97 feet to an iron pipe; thence north 3 degrees 32 minutes west 214.05 feet to an iron pipe; thence north 85 degrees 47 minutes east 209.27 feet to an iron pipe, the same being the point of beginning.".

Amend the title so as to read: "A bill to direct the Secretary of Agriculture to release a reversionary interest held by the United States in certain lands located in Sumter County, South Carolina.".

DESTRUCTION OF KOREAN AIR LINES FLIGHT 007

HELMS (AND OTHERS) AMENDMENT NO. 2133

(Ordered to be printed and to lie on the table.)

Mr. HELMS (for himself, Mr. SYMMS, and Mr. ARMSTRONG) submitted an amendment intended to be proposed by them to the joint resolution (S.J. Res. 158) condemning the brutal behavior of the Government of the Union of Soviet Socialist Republics for the destruction of Korean Air Lines flight 007 with the loss of 269 innocent lives; as follows:

At the end of the joint resolution, add the following new section:

SEC. 2. It is the sense of the Congress that the President should—

(1) recall the United States Ambassador to the Soviet Union for urgent consultations and reduce the number of Soviet diplomats accredited to the United States to the number of United States diplomats accredited to the Union of Soviet Socialist Republics;

(2) conduct a comprehensive reappraisal of the complete spectrum of United States-Soviet relations, including arms control, human rights, East-West trade, and regional issues;

(3) report to the Congress on the record of Soviet compliance or non-compliance with the letter and spirit of all existing strategic arms limitation talks (SALT) agreements and other arms control agreements to which the Soviet Union is a party;

(4) direct the United States negotiators at the strategic arms reduction talks at Geneva to link the possible success of such talks with the willingness of the Soviet Union to abide by international law as a responsible member of the community of nations, paying specific attention to the KAL 007 massacre, Soviet violations of the Helsinki accords, the Soviet invasion and subjugation of Afghanistan, the repression of Poland and its free labor movement, and the use of chemical and biological weapons in contravention of existing treaties;

(5) re-emphasize the inconsistency of the Soviet military presence in the Western Hemisphere with the Monroe Doctrine;

(6) declare Poland in default on all or a part of the debt owed to the Commodity Credit Corporation, recognizing that Poland is an integral part of the Soviet economic empire and that financial credit is an element of national strategy;

(7) tighten substantially the foreign policy and military controls over the export of machine tools, high technology products, and equipment for the development of Soviet oil and gas resources; and

(8) direct the Secretary of the Treasury to use existing statutory authority to prevent the import of any product or material produced in the Soviet Union unless the President certifies that it was produced without the use of forced labor.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy and Mineral Resources to receive testimony on S. 1634, to amend the Mineral Lands Leasing Act of 1920, and for other purposes. The hearing will be held on Tuesday, October 18, beginning at 10 a.m. in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy and Mineral Resources, U.S. Senate, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Roger Sindelar or Mr. Robert Terrell at 224-5205.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. TOWER. Mr President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, September 13, at 2 p.m., to receive a briefing on Lebannon.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. TOWER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, September 13, at 10 a.m., to hold a hearing on the National Security Decision Directives '84.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SECURITY AND TERRORISM

Mr. TOWER. Mr. President, I ask unanimous consent that the Subcommittee on Security and Terrorism, of the Committee on the Judiciary, be authorized to meet during the session of the Senate on Tuesday, September 13, to receive testimony.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, September 14, at 2 p.m. to hold a hearing on S. 1432, a bill relating to the President's budget to request information regarding major capital investment programs in the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, September 14, at 3 p.m., to meet in executive session with the Norway Defense Committee members.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, September 14, at 10 a.m., to receive a top secret briefing on the arms control update.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, September 14, at 5 p.m., to hold a code-word level briefing on the Korean jetliner incident.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, September 14, at 10 a.m., to consider trade reorganization legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Wednesday, September 14, to hold a hearing on private sector initiatives to feed America's poor.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

STATUS REPORT ON THE BUDGET

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1983 pursuant to section 311 of the Congressional Budget Act.

Since my last report the Congress has completed action on the Railroad Retirement Solvency Act of 1983 (Public Law 98-76) and amendments to the Federal Supplemental Compensation Act of 1982 (Public Law 98-92).

The report follows:

(Report No. 83-9)

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET

(Status of the fiscal year 1983 Congressional Budget Adopted in H. Con. Res. 91)

REFLECTING COMPLETED ACTION AS OF SEPT. 9, 1983

[In millions of dollars]

	Budget authority	Outlays	Revenues
Revised 2d budget resolution level	877,200	807,400	604,300
Current level	869,180	806,980	604,131
Amount remaining	8,020	420	0

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $8,020 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 91 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $420 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 91 to be exceeded.

REVENUES

Any measures that would result in revenue loss exceeding $0 million for fiscal year 1983, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 91.●

ERA HEARINGS CONTINUE IN SENATE

● Mr. KENNEDY. Mr. President, the Senate Judiciary Committee's Subcommittee on the Constitution continued hearings today on Senate Joint Resolution 10, the equal rights amendment. The focus of today's hearing was the relationship of the ERA to education.

We were fortunate to have as one of our witnesses Dr. Donna E. Shalala, president of Hunter College of the City University of New York. In addition to her responsibilities as professor of political science and head of the largest college in the city university system, President Shalala is also a governor of the American Stock Exchange and a director of the American Council on Education, the Social Science Research Council, the Charles F. Kettering Foundation, the Institute for International Economics, the National Women's Law Center, the Children's Defense Fund, the Citizens Council on Women Education, and a Trustee of the Committee for Economic Development.

President Shalala spoke eloquently of the need for the ERA to assure equal rights and opportunities at all levels in public and private education. Her testimony provides valuable assistance to the subcommittee as we continue our deliberations of this important issue, and I commend it to the attention of the full Senate.

Mr. President, I ask that the text of President Shalala's testimony be printed in the RECORD.

The testimony follows:

TESTIMONY ON THE EQUAL RIGHTS AMENDMENT AND EDUCATION BEFORE THE SUBCOMMITTEE ON THE CONSTITUTION OF THE COMMITTEE ON THE JUDICIARY OF THE U.S. SENATE

(Presented by Donna E. Shalala)

Good morning. I am Donna Shalala, President of Hunter College of the City University of New York. I am here today to speak in favor of the Equal Rights Amendment. That Amendment would finally make it unconstitutional to deny any individual's equal rights on account of sex in any area of government action. No longer would women be required to rely on the patchwork of antidiscrimination laws to enforce their rights to equal opportunity and equal treatment; nor would they bear the substantial risk that the claim for equality is unenforceable, because the government does not stand behind it, or insupportable because of some exception in the laws.

In no area of public life is the ERA more important than in education. In virtually every aspect of education, both public and private, sex discrimination continues to exist. Today, I am here to discuss the extent of that discrimination and its impact on women.

I need not elaborate on the importance of education in determining one's life opportunities. By denying equal access to education to a woman, we narrow her choices and options in employment, income and mobility.

The ERA is central to ensuring women's equal right to education. It will provide women with a permanent constitutional basis to assert that right. It will provide an important constitutional backdrop to the statutes designed to ensure equality and, thus, eliminate any necessity for such statutes to be liberally construed to achieve equality. It will insulate women's rights from political pressures. It will end efforts to repeal existing antidiscrimination statutes; to create special exceptions to the equality principle in antidiscrimination statutes; and to limit the remedies or means to enforce equality. Finally, it would free this Congress to implement women's equality in an efficacius and cost effective manner.

I. SEX DISCRIMINATION IN EDUCATION

Discrimination based on sex in educational institutions creates a host of problems for female students and employees on every level. While women now have better access to education (helped substantially by Title IX) they still face the heavy burden of proving themselves in many areas. The resulting patterns are evident in employment of women in education, admissions, courses of study and athletics. Without a constitutional amendment, the gains women have won are vulnerable to political whim.

Admission and Course of Study for Women

In its 1981 report Title IX: The Half Full, Half Empty Glass, the National Advisory Council on Women's Educational Programs described some of the discrimination that limits women's educational opportunities. The following examples illustrate widespread sex discriminatory policies:

Because it had few dormitories for women and would not permit them to live off

campus, the University of North Carolina accepted only one-quarter of the women who applied for admission while admitting half of the male applicants.

At the New York State College of Agriculture at Cornell, women were required to have SAT scores 30 to 40 points higher than those of entering men.

A male applicant at Penn State was five times more likely to be admitted than a female.

Although Title IX outlawed these particular discriminatory practices especially in professional and graduate programs, the percentages of women enrolled in certain courses of study still fall short of full access to these programs. In 1980, the proportion of women in medical school was 26 percent; in law school 34 percent; in dental school 17 percent; and in veterinary school 39 percent. Women earned only 30 percent of doctorate awarded in 1980.

The problems in secondary and postsecondary education are even more severe, almost half of all programs are still overwhelmingly segregated by sex. Seventy-two percent of all women in vocational education in 1978 were still enrolled in predominantly female clerical programs or in home economics classes. The percentage of women enrolled in training that leads to higher paid typically male skills is still quite low. Seventeen percent in agricultural programs, 18 percent in trade and industrial programs, and 20 percent in technical programs.[1] These figures overstate the progress because these broad job categories include predominately female trades such as, cosmetology.

The importance of skill training for women for high paid jobs, usually reserved for men, cannot be underestimated. One half of all women in this country work, and two-thirds of them work out of economic necessity. With rising divorce rates, the economic cushion of a spouse's income can no longer be assumed. As noted by the National Advisory Council on Economic Opportunity, "Poverty among women is becoming one of the most compelling social facts of this decade. If the proportion of the poor who are in female-headed families were to increase at the same rate as it did from 1966–1977, the poverty population would be composed solely of women and their children in the year 2000."

Occupations historically reserved for women are undergoing enormous change. An estimated 80 percent of women currently working are now concentrated in occupations which are rapidly declining or becoming obsolete as a result of technological advances. Jobs such as bank teller, telephone operator and clerical worker are undergoing major changes. These changes will result in dramatically fewer available jobs in fields in which women have been concentrated and greater technological skill requirements in the remaining jobs. An unskilled woman will be displaced and may become permanently unemployed.

Moreover, a variety of forces have kept women out of predominantly "male" jobs. First and foremost is the fact that many jobs—e.g., plumber, electrician, auto mechanic—are still performed almost exclusively by men in our society. This fact alone deters many teenage girls from even considering such fields, or from employment even if they have been trained. Just as teenage girls do not try out for the high school football team or seek to join a "boys' only" school club or extracurricular activity, many do not even enroll for the auto mechanics course that only boys take.

Not only are there subtle societal norms that give young women implicit messages, girls are expressly discouraged from pursuing certain educational opportunities. Discriminatory counselors believe and tell girls that "dirty" work is not appropriate for them. Many counselors warn girls to avoid jobs in which they could face harassment (verbal and physical) rather than counseling them how to avoid the harassment. The result is that those girls who achieve academically despite this discouragement are likewise excluded from and discouraged in the job market. Women are harassed in many job environments, and many employers refuse to consider hiring females for "male" jobs, such as plumbers, electricians, etc.[2]

The failure actively to recruit female students into traditionally male courses is sex-based discrimination in recruiting and training. It effectively endorses and perpetuates the pattern of discrimination that has kept women out of high-paying blue-collar skilled craft jobs. The notion that a girl should be discouraged or not encouraged in acquiring the special skills demanded by these changes, unless she herself exhibits an intense desire to do so, is economically catastrophic to women and fails to recognize the depth of the forces deterring her.

Women are also discouraged from courses of study in math and science with virtually the same force as they are discouraged from skilled jobs and vocational training. The sterotype that women are not good at math and science is still widely indulged even though these are extremely important areas of future employment. The result of this historic unfair exclusion of women from math and the sciences has proven difficult to overcome.[3] It is reflected in the counsel that girls receive as they choose a course of study.

There are severe consequences to the cultural bias that math and science are properly in the male domain. In 1981, only half of college-bound girls, compared to two-thirds of college-bound boys, had completed four years of high school math. The gap in enrollments, especially in advanced courses, persists despite the assistance of Title IX.

A study of math enrollments by the Project on Equal Educational Rights of the NOW Legal Defense in Education Fund in 113 schools districts in Michigan in the fall of 1981 confirmed this pattern. Boys outnumbered girls two to one in computer math courses. In one school district the percentage of girls in computer math was as low as 22 percent. Girls were 40 percent of the students in calculus and 43 percent of the students in trigonometry. Advanced science courses had enrollments as low as 19 percent female.

This difference in course-taking is chiefly responsible for the lower achievement rates of girls that many studies have reported. While boys and girls tend to do equally well in math at elementary school levels, girls' math scores drop behind in junior high and fall further behind at the high school and college level. The disparity between boys' and girls' scores disappears, however, when the data are controlled for years of math taken in school. These findings confirm that it is primarily lack of exposure and practice that keeps girls behind boys' achievements in math and other technical studies.

The problem of women's exclusion from math training and their resultant loss of opportunity is exacerbated by the fact that sex segregated schools at the elementary and secondary level are tolerated under both Title IX and the equal protection clause of the Fourteenth Amendment. In 1977, the U.S. Supreme Court upheld on an equal protection challenge the exclusion of a Philadelphia girl from the all-male Central High,[4] one of the city's two academic high schools, and the one with the best reputation and the most prestigious graduates. The other academic school, the all-female Girls High, was good but, not quite on a par with "Central." The appellate court ruled in favor of "separate but equal", emphasized that Central and Girls High were comparable in quality, academic standing and prestige—and ignored the superior science facilities and reputation of Central. Last month, a Pennsylvania state court ordered Central High to admit girls. However, that decision was based in part on the state Equal Rights Amendment.[5]

Schools for boys typically offer superior math and science opportunities. Girls, therefore, are often barred from entering programs in which math and science learning is required. The evidence confirms that girls, like most people, gain confidence in their ability to perform a difficult task only after they have tried it.[6] The exclusion from a superior program of education can be fatal to any woman's development of interest and abilities in math and science.

Judging from the educational programs that prepare future professionals in these fields, women are likely to stay substantially underrepresented in scientific and technical fields. While the trend has been slightly upward over the last decade, young women are still enrolling in education for these fields in significantly smaller numbers than are men. For example, in 1980, only 30 percent of all college graduates specializing in computer and information sciences were women. There have been modest recent gains, but women are still a small minority in educational programs in these fields. In 1976, while women were 40 percent of the labor force, they held only 13 percent of the jobs in math, computer and life science. Women have historically been missing from other expanding career fields as well. In 1976, women held only 7.5 percent of the jobs in the physical sciences and one percent of the jobs in engineering.[7]

The implications of these statistics for the nation's future are staggering. At a time when our society is moving into an advanced technological era, we need to develop every citizen's ability to contribute. Instead, half the population is effectively excluded from these fields.

Sports and physical activity are another important area of student life that would be affected by the equal rights amendment. The strongly held stereotypes about women's athletic abilities have begun to be challenged. Today girls and women have more opportunity to participate in athletics—either for recreation or in competition—than they did before the passage of Title IX. But we have a long way to go.

Title IX has to date been interpreted to require institutions to provide a selection of sports and a level of competition that effectively accommodate the interests and abilities of both sexes. Women and men, boys and girls, must be provided comparable equipment and supplies, travel and per diem allowances, opportunity to receive coaching and academic tutoring, publicity, scheduling of game and practice times, scholarship aid, medical, housing, and dining facilities. Since

[1] Footnotes at end of statement.

the passage of Title IX the increase in womens' and girls' enrollment in athletic programs reflects the active desire that girls and women had for sports participation that was denied to them. However, the current data on girl's participation in athletics shows how far we have to go before programs reflect full and fair participation for women:

Last year only 35 percent of the high school varsity athletes were girls.

In 1980, the average budget for a woman's athletics program was 16.4 percent of the total athletics budget.

During the 1977-78 school year, the average Big 10 school athletic budget for women was between $250,000 at smaller schools and $750,000 at larger schools. In the same year, however, the average men's Big 10 athletic budget was 3 million dollars.

While women still have a long way to go to achieve equality of opportunity in athletic participation, the gains in athletics for women are at risk today. The current Administration wants to severely limit Title IX in a way that would virtually eliminate althletics from coverage by that Act. For women to lose these gains would not only deny talented women careers in athletics. It would deny all young women the health, wellbeing and emotional and physical development that comes with sports and a full range of physical education participation. It would also guarantee that all women must continue to labor under the stereotype that women are innately weak, because as women continue to be denied opportunities for physical development and the incentives for that development, the stereotypes remain unchallenged and the talented athletic woman remains an aberration.[8] For girls, as much as for boys, physical development through athletics is a crucial part of their education. Today, we continue to deny our girls and women this access to a full eduation.

Women's Employment in Education

My own experience is illustrative of the blatant discriminatory treatment of women employed in education until the very recent past. When I was a graduate student in the late sixties my department head informed me that there would be no financial aid for me. He argued that his statistics demonstrated that women doctoral students do not complete their degrees. I had to find financial assistance from other sources within the university in order to earn my degree.

In the early 1970's, when I became assistant professor in another college the chair of my department counseled me that I need not work so hard since the department had never and would never grant a woman tenure. My publications and teaching record, which he conceded were distinguished, would make no difference whatsoever. I left that institution to go to another institution that awarded me early tenure. Many other women were not so lucky.

With such active discouragement and stereotypic treatment of women in professional training, it is not surprising that the number of women teaching in higher education is low and many fewer of them are tenured. In the humanities, women are one third the number of men (14,500/42,200), and only 49.8 percent of those women are tenured. By contrast, the percentage of tenured males in the humanities is 76 percent. In the category of males aged 46 or older, 90.22 percent of those men are tenured in the humanities while, of all academically-employed female Ph.Ds aged 46 or over, only 68.7 percent are tenured. The situation is similar in the sciences. The number of women teaching in the sciences is one fifth the number of males (24,200/157,000), and only 37.6 percent of women as compared with 64.6 percent of men are tenured. Of all academically-employed male Ph.Ds aged 46 or older, 87.3 percent are tenured, while only 63.4 percent of women in that category are tenured.

The breakdowns do not change markedly for professors in the younger categories. For the humanities, in the age category 36 to 45 in which many would have become eligible for tenure in the last ten years, there are 17,700 males of whom 73.5 percent are tenured, and only 5,900 women of whom 45.7 percent are tenured. In the sciences, for the age category 36 to 45, there are 60,800 men who are academically employed, and 66.5 percent of them are tenured. Only 41 percent of the 9,200 women employed in the sciences are tenured. In the under 35 category, many have not yet come up for tenure. The humanities employed men (4,100) nearly twice as many than women (2,500). Furthermore, only 21 percent of the men are on nontenure tracks compared to 32 percent of the women. In the sciences, there are 31,200 men under 35 and 7,700 women. Of these, 30.4 percent of the men are on nontenure tracks compared to 40.4 percent of the women.[9]

Another way to examine the status of women's employment opportunities in higher education is to look at the percentage of women on full-time instructional staff during the period 1972 to 1983. There have been a small gain, mostly among women in the lower ranks. Women lecturers increased by 12 percent (from 34.4 to 47.1 percent); woman instructors increased by 13 percent (39.9 to 53.3 percent); woman assistant professors increased by 12 percent (23.8 to 35.9 percent); and women associate professors increased by 5 percent (16.5 to 21.5 percent). But women full-professors increased by only 1 percent (9.8 to 10.8 percent). In all ranks combined the number of women increased by only five percent.[10] I speak from first-hand experience and observation when I say that even for the last ten years, the disparities are the product of continuing discrimination against women in higher education opportunities and employment.

The impact of these statistics is the loss of role models for young women and leaders for all women and lower wages [11] and job security for women.

The pattern in higher education is not unique. Similar patterns are found in the employment of women in elementary and secondary education. A brief selection of the data will illustrate my point:

While seventy percent of classroom teachers are female, only one percent of all head administrators of schools are female.[12]

Male classroom teachers earn, on the average, $3,000 more per year than do female teachers.[13]

Ninety-nine percent of school superintendents are male.[14]

Women elementary school principals have decreased from fifty-five percent of all such principals in 1928 to eighteen percent in 1978.[15]

Twenty-one percent of all vocational education administrators are women.[16]

We need the equal rights amendment to supplement the protections afforded by Title VII to women employed in educational institutions. Discrimination in professional employment, particularly in the granting of academic promotion and tenure is the most difficult area to challenge under current employment discrimination law.

II. EXISTING LAWS PROHIBITING SEX DISCRIMINATION IN EDUCATION

At the present time, the principal laws relied on to redress sex discrimination in schools include Title IX of the Education Amendments of 1972, 20 U.S.C. Sections 1681-86, Title VII of the 1964 Civil Rights Act, equal rights amendments in state constitutions, and the Fourteenth Amendment to the U.S. Constitution. All of these provisions have major gaps in their coverage. Title IX provides "(n)o person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any educational program or activity receiving Federal financial assistance." It covers most areas of school life including admissions, access to courses, counseling and testing, scholarships and awards, health and insurance benefits, treatment of unmarried students and students who are parents, access to housing and other facilities and employment. Title IX has been seen as the primary remedy for sex discrimination in schools and is largely responsible for beginning the important process of change toward equality for women in these aspects of eduction.

What are rarely addressed are the major gaps in Title IX's reach. Its provisions apply only to the admissions practices of vocational education, professional education, graduate higher education and to public undergraduate higher institutions.[17] In other words, the statute does not prohibt sex-based discrimination in admissions—whether a complete bar to women's enrollment, a quota, or a demand for higher qualifications—in all the nation's elementary and secondary schools, private colleges, and even public colleges, if they have always excluded persons on the basis of sex. These are not minor exceptions. They go to the heart of discrimination in eduation. Girls and women can be denied equal access with boys and men to all educational opportunities at certain institutions even with Title IX. The statute now precludes a Title IX claim against sex-segregated elementary and secondary schools, or against a school district that imposes different entrance requirements on the basis of sex.[18]

Sex segregation in schools can be extremely detrimental to girls and boys, reinforcing sex stereotypic roles which artificially limit the options of both. The *Vorchheimer* case showed Philadelphia reserving its best science preparation for the boys who could attend "Central"—those who could be future leaders of the nation.[19] The girls attending "Girls High" presumably did not need science instruction. Similarly, the all-female Winthrop College in South Carolina was set up to prepare women for:

". . . stenography, typewriting, telegraphy, bookkeeping, drawing, . . . designing, engraving, sewing, dressmaking, millinery, art, needlework, cooking, housekeeping, and such other industrial arts as may be suitable to their sex and condusive to their support and usefulness".[20]

Men at the companion state college, The Citadel, are prepared for careers in engineering and the military. When the University of Virginia at Charlottesville was reserved for men, great disparities between the state's male facilities and the female facilities were revealed in litigation.[21] The men's college offered the highest average faculty salaries in the state. The state ap-

propriation per student at the men's college was more than double that at each of the two women's colleges. Men had access to sophisticated astronomy and science facilities; women did not. Men could take degrees in astronomy, Latin-American studies, and nine foreign languages—all unavailable to women. The men's college offered a far greater variety of courses in almost every department, especially in government, astronomy, economics, English, history, physics, geology, geography, sociology and anthropology. In short, the lawyers showed in detail that the state reserved its highest-quality educational facilities "For Men Only."

Yet these kinds of blatant violations are immune from attack under Title IX.

The primary weakness of Title VII to redress discrimination against academically employed women is the reluctance of federal judges to closely examine university, hiring, promotion and tenure procedures. While I do not advocate a judicial takeover of academic decision making, the equal rights amendment would require closer judicial scrutiny of these procedures. It would force colleges and universities to examine their own polices and affirmatively to remove artificial barriers to women's employment and advancement.

Other major laws concerning equality for women in education are state equal rights amendments. Only sixteen states[22] have equal rights provisions in their constitutions. The cases under state ERAs demonstrate that the federal ERA will be an effective tool for all women seeking an equal education.

The United States Constitution as it is presently interpreted is of only limited utility to overcome sex discrimination. For example, the Supreme Court did strike down the exclusion of men from a state university nursing school, but it did so with a closely divided court.[23]

The charter of Mississippi University for Women underscores the sex stereotypic nature of the school:

"The purpose and aim of the Mississippi State College for Women is the moral and intellectual advancement of the girls of the state by the maintenance of a first-class institution for their education in the arts and sciences, for their training in normal school methods and kindergarten, for their instruction in bookkeeping, photography, stenography, telegraphy, and typewriting, and in designing, drawing, engraving, and painting, and their industrial application, and for their instruction in fancy, general, and practical needlework, and in such other industrial branches as experience, from time to time, shall suggest as necessary or proper to fit them for the practical affairs of life.[24]

This example also serves to demonstrate that sex discrimination is often a two-edged sword. When men's opportunities are limited, there is usually accompanying discrimination that limits women based on cultural stereotypes about their abilities. With the Equal Rights Amendment, unless the purpose of sex segregation is to implement principles of affirmative action and to create equal access to full educational opportunities, single sex schools that deny women access to any educational facilities and teaching would be outlawed. Of course, in private educational institutions where sex segregation serves specific religious principles or purposes (as distinguished from educational purpose), the equal rights amendment would not abrogate the First Amendment right to freedom of religion.

III. THE EQUAL RIGHTS AMENDMENT ELIMINATES THE OPTION OF DISCRIMINATION ON THE BASIS OF GENDER IN EDUCATION AND IN OTHER AREAS OF PUBLIC LIFE

The effect of the Equal Rights Amendment on education is simple. The choice of whether to discriminate on account of sex in education will no longer be an option.

This means that unless educational policies are justified by principles of affirmative action, schools must treat males and females the same. Every legislator, federal and state executive and administrator, every educational policy-maker, every school board, every educator and teacher will receive the clear and final message that discrimination on account of sex will not be permitted. The ERA will establish equality on a permanent basis in a way not subject to the vagaries of administration policy. This is important since the alternative of prohibiting sex discrimination statute by statute, as Congresswoman Barbara Mikulski says, "is a little like eliminating slavery plantation by plantation."

The ERA will do much more than any statute to ensure enforcement. Although Title IX was passed in 1972, it was not fully enforced by the government as was contemplated. For years, HEW, now the Department of Education, failed to comply with regulatory requirements of prompt resolution of complaints, and compliance reviews were often incomplete. In 1974, a lawsuit was brought against HEW and the Department of Labor for failure to enforce laws prohibiting sex discrimination in schools. That suit resulted in an order requiring strict enforcement time frames.[25] After a contempt motion, the order was reaffirmed and strengthened, but this Administration is challenging it on appeal. In short, federal enforcement of Title IX has never been rigorous.

The ERA will provide a constitutional backdrop to statutory provisions against sex discrimination as well. This constitutional backdrop has much more than symbolic value. One court has held that women's rights under Title IX are due lesser consideration and enforcement than rights guaranteed under Title VI, because, the court reasoned, Title VI is premised on the Constitution while Title IX is merely statutory.[26]

The ERA will also afford each woman a right to unqualified equality. A statute, like Title IX, is the product of political tradeoffs, and the resulting statutory scheme is riddled with exceptions and limitations on remedies. With the ERA, a woman's right to equality will no longer be part of the bargain. The result: Congress will no longer be assailed by lobbyists to minimize women's rights particularly in education.

Finally, the ERA will blunt the initiative of those who would reject the equality principle and lock women into second place in education and elsewhere. I mentioned that Title IX was not vigorously enforced by prior national administrations and that, fortunately, individuals were able to assert their rights by private lawsuits. Now women face more than neglect in the government's enforcement of Title IX. Officials of the current administration have launched a concerted effort to severely limit the scope and effectiveness of Title IX, by revising the Department of Education regulations enforcing Title IX, by the Department of Education's refusal to appeal an unfavorable court interpretation of that statute,[27] and, finally, by advocating the extremely narrow interpretation in the Department of Justice brief to the Supreme Court in *Grove City College* v. *Bell*, now pending.

This administration's objective is to subject to Title IX only those institutions that receive federal funds earmarked for narrowly defined specific educational "programs", and to exclude from coverage institutions that receive federal aid for more general purposes. For example, this administration has claimed that federally guaranteed school loan funds no longer trigger an obligation to comply with Title IX. These moves represent a clear strategy to turn back the clock on women's rights by reducing the number of schools covered by Title IX, and limiting educational opportunities and activities which women are guaranteed access to by statute. Many academic programs, including athletics, will be hard hit by the proposed interpretation of Title IX.

Senators, the Equal Rights Amendment would make women's right to equality no longer a political football. For those of you who share the view that women are entitled to equality, the ERA would free you and your colleagues in the House, and members of executive and legislative branches in most states throughout this nation, to debate the most efficacious and cost effective means to implement women's right to equality, not whether they are entitled to that equality. That I believe, is what the vast majority of you would like to do and what the vast majority of Americans, would like you to do.

[7] Among those areas of employment growing at a rapid rate are ones requiring math and computer training. The Bureau of Labor Statistics projects 48,250 openings in the mathematics/computer sciences field each year through 1990. The demand for electrical and computer engineers will exceed supply by almost 40,000 by 1985, according to the National Engineering Manpower Project of the Electronic Industries Association. The U.S. will experience a shortage of 577,000 computer operators, systems analysts and technicians by 1990.

[8] The popular support for participation of girls and women in athletics is quite strong. A study by Seventeen magazine showed that 99.9 percent of all high school girls surveyed now participate in some form of athletic activity. A recent Harris poll demonstrated that 93 percent of parents of high school students want their sons and daughters to participate in sports. For a more thorough discussion, see United States Commission on Civil Rights, "More Hurdles to Clear: Women and Girls in Competitive Athletics" (July, 1980).

[18] A additional federal statue is the Equal Educational Opportunities Act, 20 U.S.C. Sections 1703-1758, whose general purpose is to ensure that all children enrolled in public schools are given "equal educational opportunity without regard to race, color, sex, or national origin . . . ." 20 U.S.C. Section 1701 (a). However, another section prohibits race segregation of students, but not sex segration of students, and there is thus a conflict in the courts as to whether sex segregation is forbidden by that statute. Compare *Vorchheimer* v. *School District*, 532 F. 2d 880 (1976) aff'd men, by an equally divided court, 430 U.S. 703 (1977), with *United States* v. *Hinds County School Board*, 560 F. 2d 619 (5th Cir. 1979). Accordingly, this federal statute does not clearly address still very important areas of sex discrimination.

[19] Judge Marutani, in the recent Pennsylvania state court decision admitting girls to Central High, emphasized the vast superiority to "Central's" facilities over those at Girls High. *Newberg* v. *Board of Public Education*. (Court of Common Pleas, No. 5822, August 30, 1983)

EXPULSION OF AN AMERICAN DIPLOMAT

Mr. D'AMATO. Mr. President, yesterday, the Soviet Union announced the expulsion of Vice Consul Lon David Augustenborg and his wife on charges that the couple had been engaged in some form of spying. This incident represents only the latest in a series of expulsions of American diplomatic personnel by the Soviets. These actions have been designed to divert attention away from their own illegal and criminal activities. Today, the communist leadership of the U.S.S.R. is engaged in an unprecedented campaign designed to discredit the United States.

The time has come to unmask those who would hide under the cloak of diplomatic immunity. Judge William Webster, Director of the Federal Bureau of Investigation, recently revealed that nearly 40 percent of the 3,000 East European diplomats currently stationed in the country are involved in operations designed to transfer our military and industrial secrets to Moscow and the other Communist capitals of Eastern Europe.

Earlier this year, more than 20 different nations expelled Soviet diplomats who had been caught spying. These Soviet nationals are part of an international network which has been established for purposes of diverting high technology to the East. While the Soviets have displayed a desire for a wide-variety of technology, they have placed particular importance on acquiring those high-technolgoy secrets which have potential military application. The theft of these secrets poses a clear threat to our national security and must be stopped.

I call upon Judge Webster and other Government officials to initiate a full-scale investigation of this incident in order to determine the extent of espionage activities being undertaken by diplomatic personnel from the Communist nations of Eastern Europe. We must take appropriate action to deter this unlawful activity.●

THE PROUD RECORD OF THE TOWN OF NORTH PROVIDENCE

● Mr. PELL. Mr. President, the past decade has been a trying and difficult period for most local governments across the United States. In most communities, inflationary cost increases have outrun tax and revenue growth with results ranging from huge property tax increases, taxpayer revolts, and financial turmoil. In some cases, governments have teetered on the edge of default and bankruptcy.

During this same period, however, the town of North Providence, R.I., under the leadership of its distinguished mayor, Salvatore Mancini, has achieved a remarkable record of tax stability and financial management.

While many other communities have faced property tax increases of 20 percent or more in recent years, the town of North Providence is now looking toward its fourth consecutive fiscal year without a property tax increase.

With a long-term debt of only $3.8 million, the town ended its last fiscal year with a $2 million surplus. While its annual budget has nearly doubled during the past decade to maintain its fine municipal services, the town's tax rate has increased only 35 percent since its last property revaluation 9 years ago.

This admirable record has been achieved, under Mayor Mancini, by careful control of spending, wise development policies, and a thoughtful use of Federal general revenue sharing funds.

Mr. President, I believe Mayor Mancini, the members of the town council, and the residents of North Providence are to be commended on this record of financial stability.

In the very near future, the Senate will be considering the question of continuing the general revenue sharing program. I believe the experience of the town of North Providence indicates that Federal revenue sharing, combined with good local government management, can and does play an important part in maintaining the health and vigor of local governments. It is for this reason that I am proud to be a cosponsor of legislation to extend the general revenue sharing program.

Mr. President I ask that an article from the Providence (Rhode Island) Sunday Journal of September 4, 1983, entitled "North Providence Keeps Property Tax Stable" be printed at this point in the RECORD.

The article follows:

NORTH PROVIDENCE KEEPS PROPERTY TAX STABLE

Property owners in Rhode Island, especially those who see the mailman arrive every summer with a bigger property-tax bill, should take a hard look at the Town of North Providence.

This community of 29,188 on the northwest border of Providence has no land, just a meager 5.7 square miles. Only Central Falls—with 1.2 square miles—has less of this precious ingredient.

Nor does North Providence have any industry. Less than 2 percent of the property tax in North Providence comes from industrial properties.

And forget about malls, race tracks, or classy, low-rise industrial parks like those found in East Providence, Lincoln and Middletown. None of that modern tax relief in this densely-populated, bedroom community.

Owners of residential property in North Providence should be hurting.

But not so.

For the last nine years, North Providence has chalked up a remarkable performance in the high-priced arena of the property tax.

Under the no-nonsense control of Mayor Salvatore Mancini—a full-time, elected mayor for the last 10 years—North Providence has used a triple combination of fiscal toughness, multi-family housing and federal revenue sharing to ease the tax burden on property owners.

And none of this at the expense of municipal services, which easily match or improve upon those found in the state's other 38 communities.

This year, for the third year in a row, the tax rate in North Providence will be $39 per $1,000.

That's three years of no increase in the property tax, provided of course that an owner made no improvements, which raise taxes by raising assessed values.

In North Providence, the tax rate has risen only once in the last six years. That increase came in the 1981 tax bill, when the rate rose $3.40, which is a 9.6-percent increase from the $35.60 in place since 1978.

(Tax rates or the percentage at which assessments or book values are taxed are usually expressed in Rhode Island in dollars

per $1,000 of assessed value. A $39 tax rate means a tax of $39 for every $1,000 of assessment.)

When assessments remain constant year to year, tax rates can be used to measure an increase or (very rare) an easing of the property tax. In a non-revaluation year a community gets more revenue from either new construction or by raising the tax rate.

Tax rates, however, aren't much use in townwide revaluations when assessments are updated to either 100 percent or a uniform percentage of market value. In revaluations, tax rates are often dramatically lowered, because a community has a bigger value pie to tax.

The lower, revalued tax rate doesn't necessarily mean lower taxes. In some cases, the lower rate can hide a hefty tax increase.

Since its townwide revaluation in 1975, the $28.80 tax rate in North Providence has risen by only $10.20 or 35.4 percent in nine years. Only Cranston and Lincoln—both with considerably more land and industry—can compete with this record.

Meanwhile, those nine years saw the total budget of North Providence almost double from $10.1 million in 1975 to $18.8 million for the current 1983/1984 fiscal year.

That's a spending increase of 86 percent, but only a 35-percent hike in property taxes—an outstanding achievement.

In most Rhode Island communities, property owners have watched their property taxes bite deeper each year.

This year alone, tax rates in West Greenwich and Richmond soared 23 percent. In Charlestown, the 1983 rate jumped 19 percent over last year. In 1982, Pawtucket socked its property owners with a $94.92 rate, a 24 percent increase over the $76.60 of the 1981 tax roll.

In only seven years, the Barrington 1977 revalued tax rate of $30.60 jumped 41.8 percent to $43.40 on the current roll. In eight years, Newport raised its rate 70.6 percent from $43 in 1975 to $73.40 for the 1982 roll. (Newport's current 1983 rate of $18.85 is a result of a townwide revaluation.)

Meanwhile, the $39 tax rate in North Providence looks good for a fourth year.

"The $39 tax rate looks good for next year," said Mayor Mancini. "I can't see any problem with holding the $39 tax rate next year."

Mancini can afford to be confident. North Providence ended its fiscal year June 30 with a $2-million surplus.

Mancini deserves much of the credit for the 9-year record of the property tax in North Providence. "We hold down our spending and we stay within our budget," said Mancini.

The town has only about $3.8 million in long-term debt and has not been forced to borrow in the short-term note market since 1980. In Mancini's words: "We don't have to borrow to operate."

In place of borrowing long in the bond market, Mancini has insisted on using federal revenue sharing for capital projects as opposed to using that money for general-fund expenses.

Some of the capital projects which North Providence has paid for with revenue sharing in recent years are:

$1-million renovation and addition to town hall in Centerdale.

$750,000 for a new fire station on Fruit Hill Avenue.

$200,000 to remodel the fire stations on Mineral Spring and Douglas Avenues.

$200,000 for two new pumper fire trucks.

$80,000 to overhaul two ladder trucks.

$400,000 for six recreation areas, such as the new Twin River project on Douglas Avenue which has a beach, two tennis courts and a ball field.

$310,000 to purchase the skating rink on Mineral Spring Avenue and eventually another $400,000 to renovate the building into a town library.

$150,000 for new lighting and concession stands at four Little League fields.

Not only does North Providence not have to borrow to operate, but the town expects to earn $275,000 this year in interest on investments of its surplus funds.

Active in R. I. Democratic politics, Mancini is secretary of the Democratic State Committee and a close ally of Warwick Mayor Joseph W. Walsh, who is preparing to challenge Gov. J. Joseph Garrahy for the 1984 Democratic nomination for governor.

However, Mancini is one Democrat who shatters a popular image that Democrats are big spenders.

Mancini has line-item veto power over the town budget and a sure "three votes" on the seven-member town council. This means Mancini's budget vetoes are rarely overturned by the required five votes.

(Mancini does not sit on the council.)

Tax Assessor Rudolph Caranci best describes the fiscal austerity of Mancini.

"He acts like the money is his," said Caranci.

Other than routine or trivial items, Mancini signs every purchase order. Last week he held up an asphalt bill for $990 from the pubic works department and an order for $38.50.

"And he looks at every one," said Madeline Ferrante, Mancini's able finance director.

Mancini didn't sign the asphalt bill because some delivery pickup slips were missing and he was puzzled by the $38.50 for a "Trail Maker Snow White" for the sanitation department.

"I want to find out what that is," said Mancini.

Mancini is equally frugal in watching teacher contracts and the town payroll. For example, North Providence has only 26 full-time firemen, not counting the fire chief.

For nights and weekends, the town uses a "callman system of 148 men who resemble a volunteer force, but who sleep at the fire stations.

The town pays only for the clothing and equipment of the "callmen," which results in substantial savings. The "callmen" item is only $170,050 in the current budget.

Finally, the decision of the town council 12 years ago to welcome multi-family housing—apartments and condominiums—gave North Providence the additional tax base to pay for and even increase services while keeping property taxes under control.

The 1980 census counted 2,049 multi-family housing units in the 10-or-more-unit category. This is an increase of 429-percent over the 387 multi-family units counted in the same category in the 1970 census.

It is these apartment complexes clustered off Mineral Spring Avenue that have helped North Providence add $51.7 million to its total assessed value of real property (land and buildings) in the last nine years.

Automobiles, another growth item linked to apartments, have added another $23.8 million in assessed value to the tax base in the same period. (Autos are taxed at the same rate as real property.)

The latest multi-family development has just begun at Louisquisset Golf Course.

In the next five years, Downing Associates of Providence plans to build 619 condominiums on the 120-acre part of the golf course that lies in North Providence.●

NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. STEVENS, Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 which would permit Ms. Mary Grace Lucier, of the staff of Senator HELMS to accompany him to a conference in Seoul, South Korea, from September 1 to 3, 1983, to participate in a conference commemorating the 30th anniversary of the United States-Korea Mutual Defense Treaty.

The committee has determined that participation in the conference by Ms. Lucier, at the expense of the Asiatic Research Center of Korea University, is in the interests of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Senator JESSE HELMS to participate in a program in Seoul, South Korea, from September 1 to 3, 1983, sponsored by Korea University.

The committee has determined that participation by Senator HELMS in the program in Seoul, South Korea, to discuss U.S.-Korean relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Miss Elise Paylan, a member of the staff of Senator KASTEN, to participate in a program sponsored by the Chinese Cultural University, in Taipei, Taiwan, from August 16 to 24, 1983.

The committee has determined that participation by Ms. Paylan in the program in Taiwan, at the expense of the Chinese Cultural University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Lamar Smith of the staff of Senator GARN, to participate in a program sponsored by the Chinese Cultural University in Taipei, from August 16 to 24, 1983.

The committee has determined that participation by Mr. Smith in the program in Taipei, Taiwan, at the expense of the Chinese Cultural University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Charles Goolsby of the staff of Senator McCLURE, to participate in a program sponsored by the Chinese Cultural University in Taipei, Taiwan, from August 20 to 28, 1983.

The committee has determined that participation by Mr. Goolsby in the program in Taipei, at the expense of the Chinese Cultural University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Dr. James P. Lucier of the staff of Senator HELMS to participate in a program in South Korea, from September 1 to 3, 1983, sponsored by Korea University.

The committee has determined that participation by Dr. Lucier in the program in South Korea, at the expense of Korea University, to discuss United States-South Korean relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Charles N. Atkins of the staff of Senator BOREN to participate in a program sponsored by Tunghai University in Taipei, Taiwan, from August 9 to 16, 1983.

The committee has determined that participation by Mr. Atkins in the program in Taipei, at the expense of Tunghai University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Miss Susan Schwab of the staff of Senator DANFORTH, to participate in a program sponsored by the Chinese Culture University in Taipei, Taiwan, from August 16 to 24, 1983.

The committee has determined that participation by Miss Schwab in the program in Taipei, at the expense of the Chinese Culture University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Timothy N. Bergan, of the staff of Senator BOSCHWITZ to participate in a program sponsored by the Government of Sweden, in Sweden, from August 18 to 27, 1983.

The committee has determined that participation by Mr. Bergan in the program in Sweden at the expense of the Government of Sweden, to discuss United States-Sweden trade policies, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Robert J. Shapiro of the staff of Senator MOYNIHAN to participate in a program sponsored by the China Culture University in the Republic of China, from August 16 to 31, 1983.

The committee has determined that participation by Mr. Shapiro in the program in the Republic of China, at the expense of the China Culture University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Timothy N. Bergan, of the staff of Senator BOSCHWITZ to participate in a program sponsored by the Swedish Institute, a nonprofit educational institution, in Sweden, from August 18 to 27, 1983.

The committee had determined that participation by Mr. Bergan in the program in Sweden at the expense of the Swedish Institute to discuss United States-Sweden trade policies, is in the interests of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Senators ORRIN HATCH and EDWARD ZORINSKY to participate in programs sponsored by Korea University in Korea and the Chinese National Association of Industry and Commerce in Taiwan, from September 2 to 6, 1983.

The committee has determined that participation by Senators HATCH and ZORINSKY in the programs in Korea and Taiwan, at the expense of Korea University and the Chinese National Association of Industry and Commerce, is in the interests of the Senate and the United States.●

DEFEAT OF THE AIRLINE PROTOCOLS

● Mr. HOLLINGS. Mr. President, on March 7, 1983, during the Senate's debate on the Montreal Protocols, I made the unfortunate mistake of stating that the International Law Association (ILA) had recommended unlimited liability for personal injuries or death to individual passengers as a result of an airline crash during an international flight. It has since been brought to my attention that the ILA had not made this recommendation; rather, it was a working draft proposed by the chairman of the ILA's Air Law Committee Prof. Bin Cheng.

I would like to clarify for the record the fact that the ILA has taken no formal action on the principle of unlimited liability other than to have its Air Law Committee continue its efforts to formulate an integrated system of airline liability which includes, as one of its principles, the concept of unlimited liability. Also, while Professor Cheng's proposal has received considerable support from scholars within the ILA, there are those who have opposed his position of favoring unlimited liability. One such individual opposed to the concept of unlimited liability is Prof. Nicolas Matte, current president for the ILA. Professor Matte informs me that five other members of the ILA have also officially disassociated themselves from Professor Cheng's proposal.

I regret any inconvenience I may have caused by associating all the members of the ILA with the proposal by Professor Cheng. However, despite the fact that I have learned of some of the ILA member's opposition to the concept of unlimited liability, I remain its most ardent supporter. As I mentioned in debate on the Montreal Protocols, unlimited liability is a necessity—it insures fair compensation to airline crash victims and provides an incentive for airline safety.

In an effort to remind my colleagues of the basis of my opposition to the Montreal Protocols and my position in favor of the concept of unlimited liability, I ask that the following article be printed in the CONGRESSIONAL RECORD as follows:

[From Trial Magazine, May 1983]

DEFEAT OF THE MONTREAL PROTOCOLS: VICTORY FOR AIRLINE PASSENGERS

(By Senator Ernest F. Hollings)

The United States Senate recently refused to ratify two very obscure treaties that would seriously impair the basic rights of more than 27 million U.S. citizens who annually embark on international airline flights.

The defeat of these treaties was necessary to ensure the right of every American to secure adequate and just compensation for personal injuries or death caused by the negligence of an international airline. The treaties struck at the very heart of the well-developed U.S. common law principle that a culpable tort-feasor be responsible for fully compensating a victim. The treaties, because they would place a strict limit on liability, would do serious harm to the high level of safety that we have come to expect from air travel. Finally, the treaties would impose a costly system of liability insurance that is inadequate to meet the needs of today's international air traveler and is, therefore, no more than a rip-off of the flying public.

LIMITED LIABILITY AND THE WILLFUL MISCONDUCT EXCEPTION

The Montreal protocols are extensions of the now-outmoded Warsaw Convention of 1929. In a day when aviation was considered miraculous and mysterious it was considered prudent to guarantee passengers a recovery in the event of an accident, and at the same time limit the liability of an infant industry, thereby ensuring its growth.

Airlining has come of age with the passage of time. The efforts to protect the growth of the fledgling airline industry have now come to fruition—the aim of the original Warsaw Convention has been accomplished. We can all take pride in the system of air travel that has emerged, but we must realize that the limits imposed by the Convention can no longer be justified today.

Yet, the Montreal protocols would continue to provide the international airline industry the protection of limited liability. The protocols, in amending the Warsaw Convention, would raise the limitations a small amount to $109,000. An airline would be strictly liable for provable economic damages up to this amount. However, the protocols would eliminate the potential of unlimited liability on the part of an airline by removing the "willful misconduct" section currently in effect under the Warsaw Convention.

Let us stop for a moment to consider what the effect of the elimination of this willful misconduct exception to limited liability means. Two cases immediately come to mind. Recently a Japanese aircraft crashed with loss of life because the pilot, who had been drinking and had a history of psychiatric problems, deliberately flew the plane into the ground. Were this flight subject to the Warsaw Convention the conduct clearly would have constituted willful misconduct, and any limitation on recovery would have been set aside. Under the protocols, however, even such a gross example of negligence would have been protected—that is, the limitation would not be broken under any circumstances.

Another example is the fiery crash last July 19 of a Pan American World Airways 727 in New Orleans, which took the lives of all 146 passengers, some of whom, 18 Americans included, were flying on international tickets. Had such an accident occurred under the proposed treaties, surviving families of those victims flying on domestic tickets could have received compensation commensurate with their loss—while families of victims holding international tickets would have been limited to settlements of $109,000 or less from the airline, even though pilot error may have contributed to the crash.

These cases demonstrate the absurdity of probable outcomes had these treaties been ratified.

SAFETY CONSIDERATIONS

The investigatory process, which is inherent in the litigation of the issue of fault, has proven on many occasions to be beneficial to airline safety, and to the development of safety procedures now in use by the airlines.

No one wants plaintiffs putting their feet to the fire, so to speak; they are afraid of the examination into their alleged fault, which is inherent in our tort system. This has a most salutory effect and maximizes business practices designed to ensure the utmost safety in the operation of airlines everywhere, not just our domestic airlines, which operate at the highest level of safety.

Being scrutinized and having to open one's files can be embarrassing to say the least. An example that we all remember was the uncovering of a devastating memorandum in the Paris DC-10 air crash.

There, one of the aircraft manufacturer's engineers had drawn attention to the "inherent catastrophic failure mode" of the DC-10 and predicted that during the life history of the aircraft one would come apart killing everyone on board. This is precisely what happened when the Turkish airplane disintegrated over Paris. Will it make airline travel any safer to remove the potential for such an examination? I think not.

Proudly, I am from the trial lawyer discipline. If you want to see the forerunner of the Occupational Safety and Health Administration it is we trial lawyers who, over the past years and years and years, have brought care and concern and safety to the workplace. Trial lawyers attempt to do the same for the flying public as well.

To remove from potential discovery the carelessness—or even recklessness—of airlines, both foreign and domestic, is to thwart one of the two primary goals of the American tort system: prevention. To limit the possible recovery of an American family is to destroy the other goal of our tort system: compensation. The Montreal protocols are unique in that they would nullify both goals simultaneously.

SUPPLEMENTAL INSURANCE PLAN

The protocols would require the creation of a mandatory passenger insurance program. Proponents of the protocols insist that this supplemental compensation plan, coupled with the airlines' liability limit of $109,000, would adequately compensate 85 percent of the claimants involved in airline disasters over the past six years. This assertion is clearly suspect because of the lack of independent scrutiny and the obviously dubious documentation of the statistics.

Presently, airlines carry unlimited liability insurance for every passenger transported. The airlines themselves purchase this insurance and pass this expense on to the passenger as part of the cost of the ticket. The cost is 53 cents for an international round-trip flight. Thus, the protocols not only would shift the liability burden to the airline passenger, but they also would do so at a quadrupling of the price and perhaps even more.

This outrageous provision is a monumental rip-off. Why should an airline passenger be forced to pay up to eight times the amount airlines currently pay for unlimited liability insurance, and get so little insurance coverage in return? There was never a showing by the airlines or insurance companies at any Foreign Relations Committee hearing that the present system of insurance coverage was inadequate to meet the needs of the airlines at a reasonable rate. On the contrary, insurance experts assure me that the insurance market is as strong as ever and very capable of meeting the requirements of the airline industry.

What motivated the protocols' architects to design this obnoxious plan? By eliminating the insurance cost to international airlines and requiring the passenger to pay a higher fee for a diminished product, our U.S. airline travelers would be forced to subsidize the international airlines. I thought the object of these treaties was to protect the interests of the U.S. airline passenger, not those of foreign airlines, the majority of which are nationalized to boot.

To add insult to injury, in order to realize the insured $200,000, the passenger would be bound legally to establish provable damage up to that limit. Such a plan will not eliminate the red tape involved in a settlement. It will create more of it for the claimant.

Proponents of the treaties called this plan the second tier in a three-tiered passenger compensation system. In truth, it would slow the speed and certainty of recovery it was designed to accomplish and it would destroy the claimant's right to be fully compensated. This plan did nothing more than create another hurdle to jump before compensation could be received. A claimant would have to prove damages first to the airlines, then to Prudential, and finally to a private insurance carrier, if there are any. The supplemental compensation plan is not as advertised.

Furthermore, the legal validity of the plan is highly questionable. In 1977, the Civil Aeronautics Board (CAB) approved the supplemental compensation plan. This approval was immediately challenged in the U.S. Court of Appeals for the District of Columbia, and a motion to reconsider its approval was made to the Board. The basis of the challenge was twofold. First, it was alleged that the CAB lacked the statutory authority to require airline passengers to purchase airline accident insurance. Second, and not surprisingly, it was alleged that the CAB used erroneous statistics on which to base its decision and had not held proper on-the-record evidentiary hearings as required by the Federal Aviation Act.

What were the problems with the study on which the CAB made its decision in 1977? First, it relied on accident recoveries during the 1960 to 1974 time frame, and these statistics would be hopelessly out of date in light of the inflation and higher recoveries that have occurred over the past 10 years. Second, independent researchers found that the CAB's methodology was flawed because it excluded many of the higher recovery figures during the time period studied. It has never been rebutted.

The CAB has never answered the motion to reconsider the approval or the challenge in court.

Thus, it is obvious that the supplemental compensation plan recently sought by proponents of the protocols was not the security blanket it was made out to be. If we had adopted the protocols, we would have established a most dubious institutional precedent. Instead of being presented with the facts and rationale behind the development of an adequate plan, we would have been giving the President and the CAB carte blanche authority to decide on a plan themselves.

If we want to protect the Senate's role as an adequate check against the executive branch, we simply could not rubberstamp these treaties. We owe it to ourselves as Senators and representatives of U.S. citizens who are international air travelers to demand an updated plan. The CAB has the authority and capacity to provide us with a viable, up-to-date, truly compensatory plan. We cannot forgo our duty, our responsibility, to require such a verifiable and reasonable plan for consideration before we are asked to ratify these treaties. Withholding ratification is our only way to ensure that such a plan will be put in place to benefit U.S. citizens.

INADEQUACY OF RECOVERY UNDER THE PROTOCOLS

It is most obvious that the American international airline passenger would have been disadvantaged by these anachronistic treaties. The average American family would receive grossly inadequate damages if its breadwinner were killed on a flight governed by these treaties. A wage earner's lifetime earnings would far exceed the limitation of recoveries contained in the Montreal protocols.

As flawed as the present system is, by threatening to take their case to a jury on willful misconduct grounds in recent years, surviving families with a strong case often have received more than $600,000 in settlements from the airlines. Domestic flight settlements not covered by the international conventions limits have consistently averaged over $400,000, and individual settlements often exceed $1 million.

The trial lawyers have done a magnificent job of bringing safety to industry through their practices here in America. I have been

in these cases. I have seen them. I can tell you as a trial lawyer that people have come to me long after the adjuster has totally ignored them and tried to settle a case where the family knew something was wrong and they deserved far more. That has been the success of the trial practice and the individual protection, if you please, for the disadvantaged or the economically disadvantaged—let us say poor.

ATTORNEY'S FEES

I deeply share the concern regarding excessive attorney's fees. I deplore any attorney who would abuse a client by charging unreasonable and excessive fees. However, the isolated instances of outrageous and unethical charges for attorney's fees are no grounds for imposing restricted or limited liability. The courts and bar associations can restore a client who has been excessively charged for legal fees, but they generally cannot increase monetary recovery potential when it has been limited by law.

Furthermore, the average attorney's fee in airline disaster cases normally runs around 17 percent and drops with multiple cases; fees in excess of 20 percent are highly atypical. In addition, under the contingency fee arrangement, poor claimants as well as wealthy claimants have no difficulty arranging representation.

That is fundamental in the legal practice and in our society over many years. I will be glad to debate about the contingency fee. It sounds good at the clubhouse or on the Senate floor about getting a percentage, but when the client comes in you take that risk with him or her, and many times there is no recovery, even though there has been a trial. The client cannot pay for the investigatory fees and charges. He or she cannot pay for the inquiries and discoveries that take place, not just the lawyer's time. He or she cannot pay for the printing of the briefs and transcript of the record to go up on appeal.

I can go right into the tremendous investment that goes into the trial lawyer's case on a contingency basis. That must be understood and appreciated.

JUDICIAL COMPLICATIONS FOR THE PROTOCOLS

Let us assume for a moment that the protocols are ratified by the Senate. Proponents have stated that speed and certainty of settlement recovery is assured an injured claimant. This is something to look into thoroughly. On the contrary, the treaties would delay settlements, not expedite them.

A claimant would have two options. First, the claimant could sue the manufacturers of the component parts of the airplane. Second, he or she could sue the U.S. government.

The claimant procedurally joins the manufacturers with the airline as defendants, and the burden is usually shifted to the individual defendants to prove themselves innocent of culpability. Because manufacturers and airlines often have mutual insurance carriers, the end result is typically a proration of the liability according to culpability of the manufacturer's percentage of its composition of the aircraft. The judicial maze confronting the claimant is readily apparent. However, with the new liability limits imposed, the judicial wrangling among the component manufacturers will make claim settlements all the more difficult.

Recent case law decisions have developed a backdoor suit against the government on constitutional "unjust taking" grounds.

A recent U.S. Court of Appeals decision indicates that the U.S. government would very likely be subject to a plaintiff's claim for damages in excess of those limited by the protocols. In August 1982, the court in In Re Aircrash in Bali, Indonesia, on April 22, 1974, held that the plaintiffs had a right to compensation from the U.S. government if their claims had been unreasonably impaired by the $75,000 cap that the Warsaw Convention put on the airline's liability. The court further held that whether the recovery limitation imposed by the treaty consituted an unconstitutional taking without just compensation was a question within the jurisdiction of the Court of Claims.

Had the protocols been ratified, the international airlines would receive two subsidies: one from the passenger with mandatory supplemental insurance; the other from the U.S. government, which would pick up the inevitable excess liability. Can it truly be said that our protocols negotiators were looking out for our best interests?

On February 15, 1983, a U.S. district court decision was handed down that radically affects the liability limitation currently imposed by the Warsaw Convention. In the case of In Re Aircrash at Kimpo International Airport, Korea, on November 18, 1980, the court held that the current airline liability limitation set by the Warsaw Convention was not enforceable. The court found that the Warsaw Convention established the liability limit in terms of a gold standard that is so uncertain and ambiguous as to prevent enforcement of the limitation. Parties to the convention had used four different methods of converting the limitation's gold standard into their currency, which resulted in obvious disparities. Because there was considerable international disagreement on the basic conversion unit creating the liability limit, there could be no agreement as to the limit, and thus it was unenforceable.

The Kimpo court was the first to hold that a personal injury claim was not subject to the Convention's liability limits. It had been foreshadowed by a similar court holding involving the cargo liability limitations imposed by the Convention.

These recent cases effectively eliminate the Warsaw Convention. With the convention unenforceable, where does that leave the international airlines? Subject to unlimited liability.

Perhaps the rush to ratify the treaties during the lame-duck session was with an eye toward the Kimpo decision. You never heard mention of this scenario by the proponents of the protocols.

U.S. PRESTIGE IMPAIRED?

Instead of focusing on the needs of the U.S. citizen, emphasis has been placed on the need to protect national prestige.

I do not think there is anything prestigious about this nonsense. I am embarrassed by it.

Proponents acclaimed the treaties for their importance in maintaining our national prestige as the international leader in aviation.

We would become the international leader in a rip-off of the American traveling public, that is, the majority of passengers involved. We would be sending more foreign aid to the national governments that run these airlines.

They are all national entities. They all have national procurement plans. Here we would now be subsidizing those governments. What we need is an American desk at the State Department to look at the interests of the American citizenry and hear the American traveling public.

The United States would not have needed to twist the arms of foreign countries to get them to join these treaties. On the contrary, the foreign countries—for limited liability and lower insurance costs—would have been perfectly delighted to jump into these treaties immediately.

Foreign nations are purposely hesitating to act on the protocols. In doing so, they give U.S. proponents the ammunition for the "national prestige" argument. We must not let ourselves be fooled by this rhetorical appeal to a sense of national pride.

There is no embarrassment in rejecting these treaties. On the contrary, every Senator should be proud to have done so. We were elected to protect America's national interest, not to pawn it away.

UNIFORMITY

Protocols supporters would ratify the treaties, they say, for the sake of uniformity. Each year Americans constitute 50 percent of the international air-traveling public. Americans annually generate more than one-half the revenues that the international airlines receive. Yet what will Americans have to show for it under the protocols?

The poor widow whose husband has been killed in an air crash is not consoled by the "uniformity" provided by the protocols. This uniform means of limiting the monetary liability of negligent airlines is of no comfort to her. Americans, with one of the highest standards of living in the world, would be uniformly forced to settle just claims for less compensation than justified, less compensation than they would dare settle for here in the domestic market.

EXPANDED COURT JURISDICTION QUESTIONABLE

Proponents of the protocols vigorously argued the necessity of ratification on the basis of expanded jurisdiction that a claimant would get under the treaties. This sounds attractive, but the argument lacks any real substantive merit.

Under the Warsaw Convention a claimant presently can sue a defendant airline in four alternative places. These four options include: the domicile of the carrier; the carrier's principal place of business; the carrier's place of business through which the contract was made; and the place of destination, not of the flight, but of the entire transportation shown on the ticket.

The Montreal protocols would add a fifth place where a passenger could sue—the place of domicile, provided the airline has an establishment there. The illusory nature of this provision is obvious. In the overwhelming majority of cases, a passenger buys a ticket in the place of his or her domicile, where, under the above options provided in the Warsaw Convention, the passenger already has the right to sue. In nearly every case, it should be obvious that this added forum under the Montreal protocols would have a minimal positive impact on a claimant's case.●

OUTSTANDING FORT CAMPBELL EMPLOYEE

● Mr. SASSER. Mr. President, I want to take the opportunity today to commend Gary R. Petsch for being selected as the Department of the Army Handicapped Employee of the Year.

Petsch, a small engine mechanic at Fort Campbell, Ky., won the Army-level award over 19 other command

representatives and automatically becomes the Army's nominee for the outstanding Handicapped Federal Employee of the Year.

In October, Gary and his wife, Kelly, will be coming to Washington where he will receive a well-deserved meritorious civilian service award in a ceremony to be held at the Pentagon. Although totally blind due to complications from diabetes and glaucoma, Gary has accomplished many things. His courage and perseverance have allowed Gary to maintain a high degree of personal pride, despite his burden. He has become a major influence in hiring other handicapped persons at Fort Campbell.

In spite of poor health during his childhood, Gary graduated from high school and enrolled in a community college where he made the dean's list. Unfortunately, he had to withdraw due to failing eyesight.

He then began laser surgery treatment to correct his vision, but suffered a fall which resulted in permanent blindness. Gary enrolled in the Kentucky Rehabilitation Center for the Blind where he learned to read Braille and to deal with the emotional aspects of being blind.

After studying computer science at Brigham Young University for 2 years, Gary enrolled at Arkansas Enterprises for the Blind where he learned to repair small engines. During his study there, he invented a method to allow the blind to time engines without any aid. This step-by-step procedure has been very successful: It has been incorporated into the Kentucky Rehabilitation Center's training and has been the subject of articles in several magazines.

Mr. Petsch presently works in the maintenance and service department of the directorate of engineering and housing at Fort Campbell. His knowledge in the assembly and repair of gasoline engines is exceeded only by his character and good will. He works the same hours as his coworkers and is scarcely distinguishable except for his seeing eye dog, Valiant.

His supervisor and coworkers consider Gary an inspiration. His supervisor says that "one of the things that impressed me about Gary is the fact that he has taken the opportunity to do many worthwhile things with his life despite his handicap. He is doing a tremendous job, and we are all better people for having him work with us."

Aside from his work, Gary is active in community and church affairs. He is a member of, and served as, a Sunday school teacher at the Church of Jesus Christ of Latter Day Saints. He also enjoys golf, weightlifting, and bicycling. Gary Petsch is truly an extraordinary person.

The commendation follows:

MERITORIOUS SERVICE COMMENDATION

Mr. Gary R. Petsch is commended for his meritorious service as a Small Engine Mechanic, Directorate of Engineering and Housing, Fort Campbell, Kentucky. He has demonstrated perseverance, determination, and professionalism in the performance of his duties in spite of the loss of his vision. He performed in a superior manner in the repair of gasoline-powered mower engines, removing and replacing parts, timing gears, and performing tune-ups using the hand tools common to the trade. Utilizing his skills, he developed a method that allows the blind to time engines without aid. This method has been used in the training program at Arkansas Enterprises for the blind. He has been an inspiration to others and a positive influence toward enhancing opportunities for handicapped persons within the Federal civil service. In recognition of his outstanding achievements, Mr. Petsch is designated as the Department of the Army Handicapped Employee of the Year for 1983.●

ACID RAIN

● Mr. DOMENICI. Mr. President, over the last year, public concern has risen over the serious problem of acid rain. The heightened awareness of the issue has brought forth an onslaught of legislation to address the problem. Some of these proposals merit serious consideration by the Congress. Others may lead us down a path of folly.

On August 12 the Washington Post ran an op-ed piece by Paul Portney, a senior fellow at Resources for the Future. Mr. Portney has analyzed acid rain legislation introduced by Congressmen SIKORSKI and WAXMAN. His article points out some serious problems with the bill, and I ask that the full text of Mr. Portney's piece be printed in the RECORD.

The article follows:

HIGH-PRICE CURE FOR ACID RAIN

The federal government has a choice between two strategies to reduce the damage done by acid rain. One would cost a great deal more than the other. Congress seems to be moving toward the more expensive method, on grounds that it will save jobs in eastern and midwestern coal mines. But the price of protecting those jobs would be high, and the number of jobs at stake is small.

The case for prompt legislation to diminish acid rain appears increasingly strong.

The National Academy of Sciences and the administration's own Interagency Task Force on Acid Precipitation have pointed in recent reports to the apparent seriousness of the acid rain problem and to its likely causes. Congress now seems ready to reject th "do more research and pray" approach and pass a bill to force utilities to cut back emissions of the sulfur and nitrogen oxides that are thought to be the precursors of acid rain. Fixing attention on existing coal-fired electric power plants (which account for 65 percent of sulfur dioxide emissions in the United States), there are two ways to achieve the large reductions needed. These plants could install mechanical devices known as scrubbers which filter out the sulfur dioxide released when coal is burned in the boilers. (All new power plants built in the United States already face this requirement.) Or they could shift to coal with a lower initial sulfur content and thus address the problem at an earlier stage.

Neither approach is cheap. A scrubber would account for about $200 million of the $1 billion or so it takes to build a new 1,000-megawatt power plant. Retrofitting the very large, older plants built before scrubbers came along can be even more expensive. On the other side, low-sulfur coal, because of its environmental advantages and because some of it must be shipped from western mines to the East and Midwest, can be expensive. In fact, depending on its location, a power plant might have to spend an additional $15 a ton for low-sulfur coal, not a trivial sum to a plant burning several million tons a year.

But while the two means of sulfur removal are expensive, they are not equally so. If forced to reduce sulfur dioxide emissions by a fixed amount, some power plants would voluntarily choose scrubbers. But the overwhelming majority would find it more economical to shift to lower-sulfur coal.

One would think, then, that this presents no problem to those designing a plan to control acid rain. The plan should involve only three simple steps. First, decide the total amount by which annual sulfur dioxide emissions should be reduced. Second, apportion the desired reduction among existing plants. Finally, let each plant decide for itself how best to achieve its share of the cutback, allowing each to trade emission reductions with others as under EPA's current offset policy. Since each plant would choose the least expensive alternative, the total costs of the sulfur reduction program would be minimized. This "least-cost" approach would be good regulatory policy by either Republican or Democratic lights.

But not so fast. Take a look at H.R. 3400, introduced by Reps. Gerry Sikorski (D-Minn.) and Henry Waxman (D-Calif.), now destined to be the leading candidate among the competing acid rain bills Congress is considering. It would take an unfortunate step beyond the approach suggested above and force the 50 "dirtiest" power plants in the country to install scrubbers to meet their cutbacks even though most would prefer to go the low-sulfur coal route.

Forcing the installation of scrubbers would be about $1.6 billion per year more expensive than allowing these plants to chose for themselves, and it would produce no additional environmental benefits. These added costs would be borne by households all across the country, because another section of the Sikorski-Waxman bill would impose a tax on the generation of all nonnuclear electricity in the United States to help subsidize the installation of the scrubbers. (Why it would not be levied directly on the emission of sulfur dioxide is a mystery—it is that, not electricity, which causes acid rain.)

Why should the United States spend $1.6 billion more than necessary to guard against acid rain? Several justifications now floating around are too weak to bear repeating. There is, however, one very legitimate concern—the job losses that might result among the miners of high-sulfur coal if existing power plants are allowed to use low-sulfur coal instead of scrubbers as part of an acid rain control plan.

Even among those used to the boom-and-bust nature of coal mining, involuntary unemployment can be a bitter pill to swallow. But many of the miners would be re-employed in the same or nearby areas, since low- and high-sulfur coal are often found close together. In Appalachia alone, for in-

stance, many more mining jobs would be created than would be lost. At most, net job losses in the eastern United States under the least-cost approach would amount to about 2,000.

Since H.R. 3400 would cost $1.6 billion more than the least-cost approach, it would soon be forcing Americans to spend $800,000 a year for each mining job it saves, roughly 30 times what each of these miners could be expected to earn in a year. This sort of foolishness begs for a better solution—and one is at hand. Why not simply use some of the considerable savings possible under the least-cost approach to retrain or help relocate any miners and their families?

In fact, a scheme to compensate the unemployed could be created—one like the assistance given to loggers who lost their jobs when the Redwood National Park was expended. Under such a plan, miners involuntarily unemployed might receive their full pay for a period of five years or so with the payments gradually being reduced as new employment opportunities present themselves.

There is a good reason for Congress to be concerned about both acid rain and job losses. But the attempt to address both in H.R. 3400 does a disservice to environmental policy and employment policy alike.●

AEROSPACE EDUCATION FOUNDATION NAMES NEW JERSEY JUNIOR ROTC NATIONAL WINNER

● Mr. LAUTENBERG. Mr. President, on the opening day of the annual convention of the Air Force Association, the Air Force Junior ROTC unit at Scotch Plains-Fanwood High School in Scotch Plains, N.J., was honored as the winner of the annual Aerospace Education Foundation theme contest. I want to take this opportunity to call the performance of this unit to the attention of the Senate, because, remarkably, its successful entry came in the unit's first year of organization.

Junior ROTC units around the United States were asked to address themselves in 1983 to the theme "How We Prepare Ourselves for Leadership in America's Future." The cadets from Scotch Plains-Fanwood High School produced a videotape depicting a cadet's reflections on the meaning of leadership and the enty swept both its category and the overall prize.

As the winner of this annual Aerospace Education Foundation contest, Scotch Plains-Fanwood High received a distinctive plaque and a check for $2,000. But as a unit, these New Jersey cadets received a great lesson in life. They showed leadership and imagination and cooperation in their efforts.

Cadet 1st Lt. Randall Mazzullo, Cadet 2d Lt. Christopher Evans, and Cadet Sgt. Andrew Gibbs traveled to Washington to accept the plaque and check on behalf of their unit September 12. All three gave great credit to the other 140 participants in the Scotch Plains-Fanwood Junior ROTC program, but they had special expressions of gratitude and appreciation for their aerospace education instructors, Lt. Col. Leon D. Gordon and Chief M. Sgt. Robert Rybitski, and school principal, Dr. Terry Reigel.

I know that all of my colleagues will want to join in taking note of the example the Scotch Plains-Fanwood High School Air Force Junior ROTC unit has set in its first full year of organization. Cadets of the 821st know that this was no beginner's luck. They know they applied their skills and intelligence together to accomplish a meaningful task. In doing so, they have set a high standard for the unit and for themselves.

The Air Force Association has honored others from New Jersey at its national convention. AFA State president Frank S. Kula received both a Membership Achievement Award and a Medal of Merit. George Bochenek, Jack Carnicelli and Marvin Jones accepted Membership Achievement Awards on behalf of the New Jersey AFA chapters they head as presidents. And James P. Grazioso received a special AFA Presidential Citation for his work for the national, nonprofit association. I applaud this service and accomplishment toward a strong national defense.●

SUPER SENIOR SUNDAY 1983

● Mr. WILSON. Mr. President, September 25 marks Super Senior Sunday 1983, for the San Francisco Bay area. It is a fact-filled day of fun for senior citizens from the nine bay area counties. The event has a dual purpose. It provides senior citizens with a variety of information designed to better senior life and to help them remain independent. Super Senior Sunday also provides an opportunity for organizations serving senior citizens to meet and compare notes. Nothing as large or as comprehensive as this event exists in California.

Last year over 14,000 people attended Super Senior Sunday. They collected over 280,000 pieces of information on issues of interest to seniors. Due to last year's success, The American Association of Retired People and Lions Clubs in northern California are helping to make this year even more successful.

Mr. President, Super Senior Sunday has set a fine record. It provides an informative day for the senior population in northern California and a great opportunity to set up a vital information network not only for seniors, but for those who serve them.●

A TENNESSEAN VIEWS THE VIETNAM VETERANS MEMORIAL

● Mr. SASSER. Mr. President, ever since its dedication last November in Constitution Gardens, the Vietnam Veterans Memorial has been the object of a degree of reverence and attention seldom seen or sensed in American society.

No one has really captured just what it is that is responsible for this combination of factors and the extent to which the memorial has touched so many of us.

Recently, however, someone has come close. Joe Sweat, my friend and the director of the Tennessee Municipal League—the association representing the interest of the State's municipal governments—visited Washington, D.C. and came away with an impression of the memorial and the person responsible for its establishment, Jan Scruggs, a Vietnam veteran himself. Joe devoted an editorial column in a recent issue of Tennessee Town and City, the municipal league's weekly newspaper, to the memorial.

As one who earlier this year introduced legislation calling for the issuance of a commemorative stamp honoring the memorial, I am only too aware of the special impact this most recent of landmarks is having. Nearly half the Senate, for instance, cosponsored the legislation almost immediately; the Postal Service has a Vietnam Veterans Memorial commemorative stamp on its schedule of 1984 commemorative issues. Scores of thousands of Americans visit the memorial daily.

I believe that everyone will have a better feel for the meaning of the memorial and for the man who conceived of it when they share with me Joe Sweat's impressions. I ask that his editorial be printed in the RECORD at this point.

The editorial follows:

[From the Tennessee Town and City, Aug. 8, 1983]

SKYLINE

(By Joseph Sweat)

We could see lights cutting through the oppressive heat of the Washington night. Some were beams of light, others were flickers. And we knew instinctively that something was either very wrong or very right. Something important had people out using small lights on a very hot, muggy night.

The story of those weak, tiny lights in the Washington night is one I shall long remember. It is a story that says much about America, about the kind of nation we have fashioned for ourselves, our wonderful ability to correct our wrongs and keep the hope in our hearts as we continue the process.

On this particular evening my fiancee, Marilyn Edwards, and I had been to dinner in a Washington suburb. We had been the guests of Paul and Gertrude Corbin, a gracious and charming couple who have been at the heart of so much that is vital to the politics and government of this capital city for the past quarter of a century. Paul, earlier in the day, had been in charge of an impressive ceremony at the U.S. Supreme Court where the American Institute for Public Service bestowed its annual Jefferson Awards.

The nine recipients of the awards had ranged from the famous—like Paul Volcker, Kirk Douglas and Helen Hayes—to the not

so famous. One of the latter was young Jan Scruggs, and it is because of him that I shall never forget those tiny shafts and flickers of light on that hot night in Washington.

Jan Scruggs was an infantryman in Vietnam. He still carries nine pieces of shrapnel in his back to remind him of that far-off war, the war fought by so many men and women who too many in this country wanted to forget.

But Jan Scruggs would not let us forget. He conceived the idea of a memorial to the veterans of our nation's most controversial war. And he fought and fought and fought—in ways different from Vietnam, but with just as much energy—to convince Congress and over 500,000 contributors (who gave over $7 million) that we must have a memorial to our Vietnam veterans, that we must not forget.

And thereby hangs the tale of the tiny lights in the night.

Marilyn had suggested that we stop by the Lincoln Memorial that evening as we returned from the Corbins. That massive, white marble likeness of the 16th President always has a way of lifting one's spirit, turning one inward on the underlying quality of America's soul.

After standing in the hush of the marble, with the tourists seeming to almost tiptoe in and out, we decided—almost on a whim—to strike off through the trees toward the White House, in search of the memorial we had heard Jan Scruggs talk about so eloquently earlier in the day at the Supreme Court.

Soon, however, we discovered what everyone learns when seeking out this memorial at night; it has not one light to show it off, not even small lights on the paths leading to it.

In the daytime, you see quite readily that the memorial is a long, black marble wall. Upon this wall are etched the names of every single man or woman who died in our armed forces during that conflict in Southeast Asia. But the Vietnam Veterans Memorial, perhaps symbolically, is cloaked in darkness when the sun goes down.

And suddenly it dawned on us. With the kind of stab to the emotions that brings tears to the corners of your eyes, we realized the reasons for all the tiny lights in the muggy, Washington night: Americans with flashlights and matches and cigarette lighters were searching for the names of their dead.

As we got closer we could make out their forms. There were mothers and fathers, sisters and brothers, friends and schoolmates of the fallen, all searching in the night for names etched on the wall. Several were on their knees, trying to find names close to the ground. One man eagerly offered his leftover book matches to a woman searching for the name of her son.

As I stood there, watching this scene—really feeling it more than just watching it—I thought back to the events of the day and recalled how Jan Scruggs had said that this black marble monument he created was a memorial to the men and women who served in Vietnam, not to the war itself.

Perhaps it would be good for those of us devoted to building better cities to keep focused on the work of Jan Scruggs and why the institute honored him for the "Greatest Public Service by an Individual Thirty-five or Under." The type person that can create a monument which will send people into the hot night with matches looking for names is the same type person that can clear away slums and attract new industry and improve schools and stop pollution and make traffic flow.

Outfits like the American Institute for Public Service convince me there are so many people like Jan Scruggs out there in America, waiting for the call to help build a better America. And building a better America has got to begin with the building of better cities.

These were the things we thought about as we recalled Jan Scruggs saying he wanted the memorial to "begin the healing process and forever stand as a symbol of national unity." These were the things we thought about as we watched those little lights in the night.●

PROTECTION OF AMERICANS FROM EXTORTION AND VIOLENCE: THE CASE OF WALTER MUNGOVAN

● Mr. EAST. Mr. President, this last February, Senator GRASSLEY introduced S. 462, a bill that would amend the Hobbs Act by making clear Congress intent to punish those who resort to extortion and violence during labor disputes. Passing a bill of this sort has become necessary because in *United States* v. *Enmons*, 410 U.S. 396 (1973), the Supreme Court held that the Hobbs Act did not cover such violence. Let me say here that I firmly believe in the importance of collective bargaining, and that I believe that we should excuse minor, unavoidable incidents during legitimate strikes. I believe just as firmly, however, that a free society presupposes an orderly community. Congress must take action to preserve our freedom from fear.

On March 23, the Subcommittee on Separation of Powers held hearings on S. 462, and on July 19, it favorably reported the bill to the Committee on the Judiciary. During the hearing I was appalled to hear of some of the violent acts that have been committed with impunity because of the Enmons decision. Since that time, however, I have learned of a case that should add to the impetus for passage of S. 462. Walter Mungovan, a Vietnam war hero and successful custom homebuilder in Hawaii, has been subjected to a constant stream of death threats and to an attempted kidnaping. He is now in hiding under Federal protection. Yesterday an interview with his wife, Cher Mungovan, appeared in the Washington Times illustrating the indignities that have resulted from the Enmons decision.

Mr. President, I ask that this interview be printed in full in the RECORD at the conclusion of my remarks.

The interview follows:

[From the Washington Times, Sept. 12, 1983]

Q & A: Family Pays Price in Federal Witness Program

CHER MUNGOVAN ON UNION VIOLENCE AND THE FEDERAL WITNESS PROTECTION PROGRAM

(Walter Mungovan, a decorated Vietnam veteran, entered the federal witness protection program on the advice of the government earlier this year. His wife, Cher Mungovan, was interviewed by Washington Times columnist and national reporter Tom Diaz. The following is an edited version of that interview.)

Q. Mrs. Mungovan, you've not been able to see your husband, Walter, since the middle of May. Why?

A. He's in the government's Federal Witness Protection Program because of threats and fear for his life after he testified against two business agents from the AFL-CIO Carpenters and Joiners Union in Hawaii.

Q. How has your husband being in the witness program changed your lives?

A. It's completely split our family apart. In December 1980, my husband was probably the most successful custom home builder in Hawaii, with 20 employees. Since then, we've lost everything and my husband—who committed no crime—now must live like a hunted animal.

I had a choice at the time, I could have gone into the witness program. But we decided that I should stay out because we have civil suits in federal and state court, and if I were in the witness program there would be no way of pressing those suits. We also feel it's important to make Americans aware of the union violence going on in their own country.

Q. Do you know where your husband is?

A. No, I have no idea.

Q. Do you have any way of finding out?

A. No. Because it would break security for me to know.

Q. Do you communicate with him at all?

A. I'm only able to write letters. And once in a while he calls me. He's allowed to call me.

Q. Do you have children?

A. I have one son who's 12.

Q. Is he with you, or with him?

A. He's with me.

Q. How did you go from a normal, successful life in the state of Hawaii to this situation?

A. My husband was a union carpenter for 13 years. In 1979, he got his contractor's license and started building custom homes. Then the union targeted him. They tried to get him to sign a contract and told him that they would picket us if we didn't sign up. One union official told my husband that he was going to get another non-union contractor to sign up, no matter what—even if he had to torch his job.

Q. Torch his job?

A. Torch his job. When my husband came home and told me that, I said, "This is America. Why should we have to sign a contract if we don't want to?" We weren't paying wages below the union wage. We always paid them as much, or more, than union rates, plus benefits. So I told him to take his micro-cassette recorder and record the conversations. Because if they're going to set fire to one of our houses, they're not going to leave a note. We need some evidence. He started carrying a tape recorder, and after a few months of recording conversations we realized that we had them on perjury. That was when we started to use the tapes.

Q. How did you use the tapes?

A. After we refused to sign, they picketed three of our jobs. We went to the National Labor Relations Board in Honolulu and demanded an election to decide whether our employees wanted to be in the union. It was unanimous against the union. In fact, half of our employees at the time were already

holding union books and they didn't want the union to control our company.

Then we went to federal court and asked for an injunction to get the union off of our job. We had to go back twice. The first time the judge ruled that he couldn't decide the case, because the NLRB hadn't filed all of my husband's affidavits, although they had filed all of the union's. The second time the judge ruled basically that the case was double jeopardy, that we had brought the union back in on the same charges again, and he dismissed the case.

Now, up until this time, nobody knew we had the tapes, which we'd kept in a safety deposit box. We took them to the NLRB, with transcripts, and they got us another court date. We were sure that we would get our injunction because the tapes proved that the affidavits that they had filed in federal court and the statements and affidavits that they had filed with NLRB were lies. The NLRB sent copies of the transcripts of the tapes over to the union office on Friday morning. At lunch time, the union went in and said they wanted to settle our case.

The "settlement" the NLRB sgreed to was that the union would stay away from our jobs for 30 days—retroactive. So we got nothing out of the whole thing. We were so angry. The NLRB said that it was cheaper for them to settle it than it was to go to court.

Q. What more happened with the tapes?

A. We were so angry with the NLRB that we took the tapes to the Organized Crime Strike Force. They sent us to the FBI, who investigated and got prejury indictments against two union officials and an employee of a concrete company who had signed an affidavit on behalf of the union. All three were convicted and sentenced to six months in prison.

Q. One would think that was a happy ending to the story.

A. They all are out on appeal. The appeal will probably take a year. So nothing has changed. Nothing has changed as far as the impact it has had on our state.

Q. How did you go from there to your present situation?

A. Ever since we were first picketed, we've had threats made against us—particularly against my husband—threatening phone calls. We're going to kill you. You're a dead man. That type of thing. Our vehicles were vandalized. We had tools and lumber stolen. My family received threats. My brother had to go around denying that he was even related to me and Walter.

The FBI determined that there was sufficient reason for Walter to protect himself, and they had the police department issue him a permit to carry a .357 magnum, which he later changed to a .45 automatic. He carried that for the last year. Walter was in Vietnam in '65 and '66, a sergeant in the infantry. He came home with a lot of medals. He was a war hero, a disabled veteran. He said to me at one point, I didn't fight in Vietnam in the jungle for over a year to come back and be killed in a Maui canefield and not know who did it.

Q. How did it come about that he entered the witness program?

A. I really don't know exactly why the government suggested it. You know I'm not told everything. I really don't want to know everything. But during the trial we were staying under an assumed name in a hotel room, which the government got for us. We were in the room one day when two men came to the door posing as FBI agents and said that they had to take us off downtown for the office.

Q. Did you go with them?

A. Yes.

Q. What then?

A. I can't say.

Q. OK, anything you don't want to say, I don't want you to say.

A. There's a reason for it, the pending investigation.

Q. I see.

A. But after that, the FBI moved us into another hotel and put us under 24-hour guard. The next thing I knew the U.S. Attorney's Office had requested the marshals put him under the witness-protection program. There's a possibility that they will be bringing him back to Hawaii for further testimony. They want to make sure that he's alive.

Q. This has changed your life so that it will never be the same again, hasn't it?

A. It's completely disrupted our lives since the day it happened. Maybe it would have been easier to sign a union contract. It would probably have put us out of business the same way. We couldn't have competed back then, being a small construction company against the large union companies. The union knew that. The problem was, and the thing I want to make clear, was that they never made any attempt to encourage our employees to join the union. They weren't interested in our employees joining the union. They wanted our company to sign up. And then we would have had to let go all the people who worked for us, and gone to the union and hired new carpenters. And if those carpenters wanted jobs, they would have had to go to the union and pay the initiation fees and monthly dues.

Q. Why are you in Washington?

A. I've come here as last resort. The public has to become aware of the need to amend the Hobbs Act—the federal anti-extortion law—to make unions liable under federal law. The average American doesn't know what the Hobbs Act is, let alone the Hobbs amendment. And there's really no reason why they should know. It's only when something happens which directly affects you that you find out that you can't prosecute them.

Q. What is the Hobbs Act?

A. The Hobbs Act is the federal anti-extortion and violence law. But in 1973, the Supreme Court ruled in the Enmons case that it doesn't apply to unions. That case started when the Electrical Workers' Union had a dispute with a company in Louisiana. When the owner refused to negotiate, one of his substations was blown up and rifles were fired at his equipment. A federal judge said that because the union was "furthering legitimate union objectives" unions were exempt from the law. The Supreme Court agreed. So since 1973, union officials and employees have been able literally to get away with murder.

Sen. Charles E. Grassley, R-Iowa, has introduced an amendment to the Hobbs Act so it will cover union violence. I'm hoping that when Congress comes back from vacation, I can get appointments with each member of the Senate Judiciary Committee to make them aware that we desperately need this bill and this amendment. I also hope to be able to meet with President Reagan, to enlist his support.

Q. What sort of feeling do you have for the legislative system? Do you think it's going to work?

A. I think that it's very hard for senators and congressmen. They listen to testimony and they're given piles of documented information. It's impossible for them to sit and read all this. There are more than 3,000 separate cases of union violence recorded in the United States, including some where people have died. But there's no way that each member of these committtees can sit down and read all this documented information. I have absolutely nothing against unions per se, and the union members, because I don't believe that 90 percent of the time they know what the hierarchy is doing. It's the union officials that bother me. If unions could sell unionism on its own merits, then I wouldn't be here, my family wouldn't be in the position that it's in, and neither would a lot of other people in the United States.●

CONGRATULATIONS TO WILLIAM D. HUSSEY

● Mr. CHILES. Mr. President, I ask the Senate today to pay tribute to a man who, over the past quarter century has played a key role in the growth and development of Florida's financial services sector, and through whose good works the economy of Florida has been strengthened significantly.

William D. Hussey joined the Florida Savings and Loan League 25 years ago. He was fresh out of college at the time and the Savings and Loan League job was the first of his professional career. Bill remains with the Savings and Loan League today, having risen through the ranks of executive assistant, secretary, executive vice president and finally, in 1975, to president, the position he holds today.

Over the 25-year time span, Florida's savings and loan institutions' assets have grown from $2.2 billion in 1958 to $64 billion today. That is what I meant when I said Bill has contributed not only to his business, but to the economy of our State as well. Such phenomenal growth in savings and loan assets is a reflection of general economic growth. Since savings and loans are primarily in the business of mortgage lending, you can see by those numbers that jobs have been created in the construction industry and related industries, and the Floridians who sought to own their own homes were able over those 25 years to do so. There is tremendous public respect for and confidence in Florida's savings and loan business, and Bill Hussey can take major credit for that fact.

During my days as a member of the Florida Legislature and as a U.S. Senator, I have gotten to know Bill Hussey well. He has visited with us often, and as a trade association executive he has served his constituency with dedication. But in serving that constituency, Bill has never lost sight of the larger picture—the general well-being of all Floridians. It has been that attitude which has earned Bill the respect of so many in government, as well as of so many of Bill's colleagues among other trade association executives. This re-

spect has been demonstrated by his election to terms as president of the Florida Society of Association Executives, and the Savings Association Trade Executives, a national organization.

Bill has served on numerous task forces and committees of the Federal Home Loan Bank Board, the U.S. League of Savings Institutions and the Florida State Comptroller's Office as well as the Orlando/Winter Park Chamber of Commerce and the Florida Chamber of Commerce. Despite all of this activity, he has found time to author newspaper and magazine articles, as well as to be active in various other professional, governmental, and social groups along with his wife, Elizabeth, and sons William Jr., and Jeffrey.

I ask my colleagues to join me in congratulating Bill Hussey on his 25 years of service to the savings and loan business and the economy of Florida, and in wishing him every success in his future undertakings.●

JOHN E. PFRIEM

● Mr. WEICKER. Mr. President, Connecticut journalism lost one of its true leaders last week. John E. Pfriem, the president and publisher of the Post Publishing Co. of Bridgeport, died at age 60. He had been associated with the Bridgeport Telegram and Post since 1946 and had served as president of the company for the past 12 years. During his tenure, Mr. Pfriem orchestrated major technological innovations at the newspapers and witnessed their emergence as important and independent news sources in southwestern Connecticut.

On several occasions, I had the opportunity to visit Mr. Pfriem's office and discuss the affairs of Connecticut and the world with him. His insights into a vast array of issues impressed me as did his special affection for his hometown—Bridgeport.

Mr. President, I ask that the following editorial from the September 8, 1983, Bridgeport Post depicting Mr. Pfriem's distinguished journalistic career and his dedication to his community be printed in the RECORD.

The editorial follows:

JOHN E. PFRIEM

On Wednesday, John E. Pfriem died. We at The Post Publishing Co. have lost a highly capable leader and a true friend.

Mr. Pfriem unabashedly loved the newspaper business. A modest, self-effacing man, he had an extraordinary tenacity of purpose. Fate decreed that he become president of The Post Publishing Co. in 1971 when newspapers throughout the country were confronted by a multitude of problems, not the least of which was a shortage of newsprint.

Applying the business acumen he had acquired as vice president of the company when it was under the direction of his uncle, the late Walter R. Flicker, Mr. Pfriem coped with the challenges by establishing policies which were fair to readers and advertisers.

A man of quiet mien, Mr. Pfriem, through example, inspired and motivated employees. With dedication to the principles of journalism, he sought to have The Bridgeport Post, The Telegram, The Sunday Post and Saturday meet the prime obligation of a good newspaper—to serve its readers.

With this goal uppermost in his mind, Mr. Pfriem faced the most revolutionary advance in publishing since the 15th Century—the printing of newspapers by utilization of computer, video display terminals and other highly technical equipment. The Post Publishing Co. disposed of its "hot-type" machinery late in 1977. New offset presses were installed and existing units remodeled so that the newspapers would be attractive and easy to read.

It was characteristic of Mr. Pfriem to take pride in the fact that his mother, the late Alma F. Pfriem, an executive of the company for 40 years, took part in all major decisions related to the entry of The Post Publishing Co.'s newspapers into a new era.

At the same time, he personally launched programs designed to improve the content of the newspapers. The newsroom staff was increased and bureaus were expanded in neighboring communities to bring about better coverage of the greater Bridgeport area.

Conservative by nature, Mr. Pfriem sought professional and impartial judgment of his innovations. An extensive readership survey completed earlier this year showed clearly that the changes were more than well received by readers.

This native of Bridgeport studied at the Junior College of Connecticut (the forerunner of the University of Bridgeport), Boston University and the University of Kentucky. After serving with the U.S. Signal Corps in the South Pacific during World War II, he joined The Post Publishing Co. His first assignment was as a reporter. He covered Bridgeport politics and the General Assembly in Hartford. During this period, he developed a lively interest in government, which he maintained throughout his life.

In fact, early in 1974 at a Connecticut Daily Newspapers Association meeting, he volunteered to arrange and host a gubernatorial debate in Bridgeport in October. The session, featuring the late Gov. Ella T. Grasso and former U.S. Rep. Robert H. Steele, was hailed as the liveliest encounter of the campaign that year.

After gaining reportorial skills in the 1940s and early 1950s, Mr. Pfriem worked in several departments, including the composing room. In later years, this first-hand-experience proved extremely beneficial.

Though he maintained a low profile, Mr. Pfriem was deeply devoted to his native city. He was a generous benefactor of the Boys' and Girls' Clubs, plus several other organizations and institutions that he believed contributed to the well-being of the Park City. He never sought the limelight or public acclaim for his deeds.

As a member of the Library Board for 15 years, Mr. Pfriem did not take his responsibilities lightly. At meetings, he would not speak merely to hear his own voice. He knew that Bridgeport's library system was held in high regard by authorities in the field. Expenditures by the city for its libraries, he contended, were excellent investments in the future. This point he underscored through the years. Despite the fact that he was not a man who sought confrontations, Mr. Pfriem never backed away from any mayor or politician who sought to shortchange the libraries.

Confident that Bridgeport would someday become a thriving urban center, Mr. Pfriem vigorously supported construction of a new Route 25. Directly, he made his feelings known to three governors. The tendency of the General Assembly to finance newer highway programs in other parts of the state, he often lamented, was unfair to Bridgeport and its neighbors.

At the Post Publishing Co., there was a special empathy between Mr. Pfriem and his employees especially the men and women with many years of faithful service.

In 1973, he established the 25-Year Club to pay tribute to people whose labors and loyalties he sincerely appreciated. At the initial gathering and subsequent parties, it was not possible for Mr. Pfriem to mask his feelings—the genuine gratitude he harbored for their efforts.

The same was true when he hosted dinners for heads of departments and senior employees. Mr. Pfriem took special delight in announcing the names of the four employees with the longest terms of service. He invited these veterans of the trade to join him at the head table. These get-togethers were filled with good, old-fashioned fun. The tone of these delightful events was always set by Mr. Pfriem.

A firm believer in an open-door policy, Mr. Pfriem was readily available to employees, advertisers and readers. To keep all employees up-to-date on happenings, he started a company newspaper in 1973 which he personally named The Six Star Final.

Despite the internal demands on his time and talents, Mr. Pfriem shared his business discernment with the Connecticut National Bank (CNB) as a member of its Board of Directors from 1971 until October of 1982 when CNB merged with Hartford National Bank. He was appointed to the Hartford National Corp. Board, the panel which establishes policy for CNB and its subsidiaries. With assets of $4.4 billion, it is the second largest financial institution of its kind in the state. Not once in the past 11 months, did he travel to Hartford for a session without adequately preparing himself to address every item on the agenda. In Connecticut business circles, he was recognized as a man who carefully gathered all available information and staked out his position on the basis of salient facts.

Fellow publishers elected him president of the Connecticut Daily Newspapers Association and later appointed him to the Executive Committee. His opinions were sought and respected by his colleagues in Connecticut.

No editorial about John E. Pfriem would be complete if it did not note his avocation—sailing. A member of Fayerweather Yacht Club and a former commodore at Black Rock Yacht Club, he was a cruising-yacht racer. Whenever he raced, Mr. Pfriem was viewed as a formidable competitor who accepted the glories of victory graciously and the disappointment of defeat with style and grace.

As a youth, he began sailing on Long Island Sound—the body of salt water which Daniel Webster aptly named "The American Mediterranean." To Mr. Pfriem, the opportunity to sail on the Sound on weekends throughout the season was a reward for his labors of the previous workdays. Sailing was much more than a means of relaxation. It was a classical and invigorating experience.

During the week, he enjoyed luncheons at the Algonquin Club where his humor was

never meant to wound, but rather to provoke smiles. And he could take a joke in good nature.

The death of Mr. Pfriem at age 60 this particular year can be interpreted as proof that there is truth in the statement: Life is unfair. This is the Centennial Year of The Bridgeport Post. On February 7, 1883, The Daily Post was printed and circulated by George W. Hills. It survived and prospered. By 1918, The Telegram and The Sunday Post had come into existence. The potential of The Post Publishing Co. newspapers was envisioned by a newspaper executive in Washington and Cincinnati. Edward Flicker (a grandfather of Mr. Pfriem) purchased the company and the papers have remained in the family.

As a publisher and president since 1971, Mr. Pfriem held fast to the essential values of good journalism and sound business. With reluctance, a few years ago, he accepted from the University of Bridgeport Alumni Association a special award for his contributions to journalism. He sought no plaudits. John E. Pfriem did what he loved and loved what he did.

In truth, it can be said that he had many admirers and no enemies.●

GENERAL REVENUE SHARING

● Mr. SASSER. Mr. President, general revenue sharing, a program that is essential for the well-being of a great number of towns and communities throughout this country, may expire September 30 if it is not reauthorized promptly. We must take action to reauthorization general revenue sharing.

Revenue sharing is a well-established program that has proven to be very effective over the past 10 years. It is the least bureaucratic of the Federal programs; it has the lowest overhead cost per dollar of aid ever created by the Federal Government. This is a program we cannot just suddenly abandon.

The current debate regarding renewal of this program comes at a time when revenue sharing is needed most. In the wake of the recent recession, the State's revenue positions are suffering. The tax systems that States have, placing emphasis on income and sales taxes rather than property and excise taxes, are dependent on the health of the economy, an economy which has been suffering from a major recession. Since 1981, growth in the economy has slowed, unemployment has increased, and consumers are spending less. These events, along with a substantial reduction in Federal aid, have put the States' revenue positions in a terrible bind. If revenue sharing is not renewed to at least the current level, the fiscal problems of many local governments will increase considerably.

Mr. President, a great deal of comment has been made on the revenue sharing program, but no one speaks as graphically to the issue as the people who run local governments and use those revenue sharing checks to fund services and programs in their communities. Last month, I conducted a series of meetings with various local government officials from my State of Tennessee. During these meetings, we discussed five basic questions.

I ask that these questions and their respective replies be printed in the RECORD following my remarks.

The material follows:

Q. I. How much higher would your tax note be today if you had not had revenue sharing for the past 10 years?

A. 1. The tax rate would have been an average of 27 percent higher per year provided there was no revenue sharing. Lewisburg, Tenn., John Derryberry, Mayor.

A. 2. Rutherford County's tax rate would be approximately 25¢/100 of assessed valuation this year and for each of the past ten (10) years without revenue sharing. Rutherford County, John B. Mankin, county executive.

A. 3. In 1983-84 Coffee County experienced a 32.5 percent increase in property taxes, and without Federal revenue sharing the increase would have been 39 percent.

In 1982-83 Coffee County increase its sales tax and increase its revenue sharing from interest on investments and spent $783,000 in Federal revenue sharing on schools. Had revenue sharing not been available the tax rate would have been increased by 42 cents or 34 percent.

For prior years availability of Federal revenue sharing has meant an average of 10¢ on the tax rate each year. Coffee County, Don J. Darden, County Executive.

A. 4. Tullahoma receives approximately $215,000 per year in general revenue sharing. The tax rate would average from .30 to .60. Currently, it amounts to 29 cents for hundred of assessed value. Tullahoma, George Orr, Mayor.

Q. II. What programs has your government paid for with revenue sharing money since the program began?

A. 1. Revenue sharing has helped to maintain quality ambulance service and education. Woodbury, Tenn. Nolan Northcutt, County executive.

A. 2. With revenue sharing, Lebanon has been able to keep its fire and police equipment up to date. We have been able to keep our streets in much better repairs, paving a large percentage of them. Senior citizens have been provided a new home with some help from Federal revenue sharing. Waterlines have been extended. Maintenance on city hall, fire and police buildings has been accomplished.

Most of the projects would have been impossible without revenue sharing. City of Lebanon, Willis H. Maddox, Mayor.

A. 3. Revenue sharing has been used to renovate the heating and cooling system at the county hospital, for operating expenses in the general fund, paving rural roads, and schools' operating expenses. Coffee County.

Q. III. If revenue sharing is canceled, how much of a tax increase will probably be necessary to maintain essential services?

A. 1. For fiscal year 1984-85 approximately 25¢/100 of assessed valuation. Rutherford County, John B. Mankin, County Executive.

A. 2. If the revenue sharing funding was discontinued this year the city would be forced to increase the tax rate 20 percent for fiscal year 1983-84. Lewisburg, Tennessee, John Derryberry, Mayor.

A. 3. If revenue sharing is not extended, it would require a 45 to 50 percent increase in our property taxes to maintain the present operating level. Lebanon, Tennessee, Willis Maddox, Mayor.

Q. IV. What is the most important aspect of revenue sharing for your county?

A. 1. The most important aspect of revenue sharing is that we can provide what we perceive as important services to our citizens without bureaucratic influence. It can be used to provide many basic services.

A. 2. Revenue sharing keeps the county tax down and helps provide funds for essential services. Cannon County, Woodbury, Tenn., Nolan Northcutt, County Executive.

A. 3. Ability to defray local property.

We feel like this is about the only direct effect most citizens get on an ongoing basis from Federal Government. Rutherford County, John Mankin, County Executive.

Q. V. What aspects of this program should we change?

A. 1. One revenue sharing aspect we feel should be changed is the removal of the Davis/Bacon wage/hour requirements from the revenue sharing bill. Lewisburg, John Derryberry, Mayor.

A. 2. None. Cannon County, N. Northcutt, County Executive.

A. 3. If anything add more to Rutherford County's share. Rutherford, J. Mankin, Mayor.

S. 864—BUDGET ESTIMATE, FISCAL YEAR 1983

● Mr. McCLURE. Mr. President, with regard to S. 864, a bill to amend the Volunteers in the Parks Act of 1979, and for other purposes, the Committee on Energy and Natural Resources does not intend that this measure authorize any additional budget authority for fiscal year 1983 than that already available to the Department of the Interior. The committee intends that any fiscal year 1983 expenses incurred from the bill will be absorbed within funds otherwise available.●

DRUG TRAFFICKING AND DRUG ABUSE

● Mr. HELMS. Mr. President, the Foreign Relations Subcommittee on Western Hemisphere Affairs, which it is this Senator's privilege to chair, has been holding a series of hearings on drug smuggling into the United States. We have held hearings in Elizabeth City, Wilmington, and Raleigh, N.C., as well as Miami, Fla. Other hearings are planned.

Mr. President, it would be impossible to overstate the enormity of the drug problem facing this country. Estimates are that illegal drug trade is an $80 billion a year business in the United States. It is so bad in some coastal areas that we have even had reports of artificially high real estate prices resulting from the laundering of drug money.

One of the most striking elements of the drug problem is that it involves all socioeconomic strata of our society. For example, an article in the September 12 Wall Street Journal gives a rare insight into the use of cocaine by those in high positions in our Nation's

financial centers. I commend this article to the attention of my colleagues and the public as an example of the scope of the problem we now face.

This Senator is firmly committed to doing whatever is necessary to bring this matter under control. Getting a handle on the drug trade and eliminating the ill effects to our society will be cheap at any price.

Mr. President, I ask that "Use of Cocaine Grows Among Top Traders in Financial Centers," from the September 12, 1983, Wall Street Journal be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Sept. 12, 1983]

HIGH FLIERS: USE OF COCAINE GROWS AMONG TOP TRADERS IN FINANCIAL CENTERS

PROBLEM IS RARELY DISCUSSED, AN EXPERT SAYS, FOR FEAR OF REACTION BY INVESTORS

Mike is 28, a bond trader with a major Wall Street firm, and makes more than $100,000 in a good year. He likes his job. He likes cocaine too, off the job and sometimes on it.

He claims he isn't addicted to the costly white powder (at least $100 a gram); he just enjoys, he says, the sense of omnipotence it gives him. Mike buys most of his own but occasionally is given a gram or two by brokers who want to keep his friendship—and business.

"Sometimes, say when I've just made the company $20,000, I tell myself: You deserve a treat today," Mike says. "It makes me feel mildly indestructible and gives me a shot of energy, sort of like a bull snorting and hoofing the ground ready to attack a matador."

Interviews with dozens of users (whose real names aren't given, at their request) and professionals who monitor drug abuse reveal that cocaine use is extensive, accepted and steadily growing in financial centers from coast to coast. Employers in the securities, commodities and financial-services industry either don't want to acknowledge the problem, possibly out of fear that public trust in their employees' judgments will be damaged, or try to minimize it. But it is clear that the increasing use of the drug is exacting a price.

WRECKED CAREERS

Some of the brokers, dealers, traders, lawyers and executives snorting it—most of them young males with high-pressure jobs and high incomes to match—are making costly mistakes in business judgment. Sometimes they end up wrecking promising careers. Sometimes they end up dead.

Like Timothy Anderson, a whiz at trading Treasury bond futures in Chicago for Donaldson, Lufkin & Jenrette Securities Corp. He left the firm early last December to become an independent order-filler at the Chicago Board of Trade, and seemed to be doing well. But on Jan. 14 Mr. Anderson died from "acute cocaine toxicity," according to the Cook County medical examiner. Mr. Anderson was 26.

Cocaine first became the drug of choice in the financial community in the middle to late 1970s. Some users and others believe its use was declining—or was less visible—until the 1982-1983 bull market. With volume up and the market climbing, there has been a lot more money around (along with increased stress and tension) and thousands of new, young brokers and dealers to spend it.

SURVEYS ON WALL STREET

"There isn't any question that cocaine use is spreading even among more conservative and corporate types," says Douglas S. Lipton, deputy director for research and evaluation of the New York State Division of Substance Abuse Services. His office has done street checks and surveys that indicate a high degree of cocaine use among white-collar workers on Wall Street.

"We're talking about the core of the financial structure of this country," Mr. Lipton says. "But the banks and brokerage houses close their eyes to the problem and are loath to share information even informally because of the vast amounts of public money being invested and the real fear that any publicity would undermine confidence. Would you invest your money if you knew your broker was stoned more than half the time?"

Peter, the head of corporate finance at one New York securities firm, says, "Every trading desk on Wall Street is full of cocaine." Peter himself spent nine weeks at an expensive New York clinic to kick his $1,500-a-week habit. Prior to treatment, his typical day started with an early-morning snort to get going, frequent use during the day to keep up his energy and "social" use in the evening, usually while entertaining clients.

MISPLACED CONFIDENCE

"There's a lot of pressure in carrying big stock positions, and I wasn't a disciplined guy," says Peter, who really wasn't aware that cocaine had begun to fog his trading decisions. "The market could go down 15 points in one day, and I'd be out a million dollars. Yet I was still confident that I was doing the right thing, losses or no losses."

In Chicago, cocaine use is spreading in the city's commodities trading and financial centers. "A few people take a toot before the trading session and maybe a few times during the day," says one member of the Chicago Board of Trade, himself a user. "It's like drinking coffee." He estimates that 10% of the traders and brokers he knows use cocaine on the job.

Several Chicago-area psychiatrists specializing in drug abuse say that cocaine now trails only alcohol as an addictive substance and that securities professionals account for a significant portion of their practices. In New York, psychiatrist Richard Resnick adds: "I'm seeing more and more businessmen, particularly stockbrokers."

At the Lutheran Center for Substance Abuse in Park Ridge, Ill., the steady admission of traders and brokers enables medical director Donald W. Sellers to assemble a profile of a typical securities professional with a cocaine problem. He says nearly all are male, married, 30 to 45, and "very energetic, very imaginative and very intelligent . . . highly ambitious, competitive and self-confident."

(Cocaine isn't the only problem. In addition to alcohol and marijuana, users often take coke in combination with other illicit drugs, including Quaaludes, amphetamines and barbiturates. Heroin also seems to be taking hold in the financial community. "They get too frenzied and hyper if they don't cut cocaine with a sedative, and heroin appears to be the sedative of choice," says one researcher.)

Cocaine is a powerful energizer, and users describe a "rush" of sensory arousal that lasts for about 10 to 30 minutes, as well as a feeling of Herculean stamina and a surge of self-assuredness. While the drug isn't physically addicting like heroin and other opium derivatives, it can quickly become psychologically addicting, a crutch.

IT'S SHOWTIME

"You go to war every day in this business," says Richard, a former brokerage-house officer and reformed cocaine user who has a background in stocks, options and commodities. For him, cocaine was strength. "You do a line (of cocaine) and you think, 'It's showtime! I'm ready, fans!' " he says.

Samuel, an ex-user who worked for a half-dozen West Coast brokerage firms in less than a decade, says cocaine was widely used at each. While it initially seemed to help him and others think more clearly, says Samuel, before long more and more was needed to achieve the same effect—and occasional use turned into compulsive habit. That habit can eventually ruin the addict's career and his life.

"I have seen 20 guys blow themselves out of this business because of cocaine," says the head of a small New York brokerage firm. Several West Coast users concede that snorting cocaine until 3 or 4 in the morning means that they are in no shape to get up at 5 to be at their desks in time for the New York market openings.

STRANGE ALLERGIES

Paul, a 41-year-old former partner in a risk arbitrage firm, sought help a few years ago when his cocaine-centered drug habit was costing him about $2,500 a week. "Money wasn't ever a problem," he says. "But I began missing about two days of work a week, telling everyone I had a lot of allergies. That was easy, with all the sneezing I was doing."

Paul says he lost "millions" for his firm because of his drug-clouded judgment, part of it in last year's takeover battle for Marathon Oil Co. by U.S. Steel Corp. (Arbitragers buy and sell securities in different markets to take advantage of small differences in prices, and takeover fights can generate tidy profits for them.) "I set up a lot of funny strategies with put and call options, and they became pretty hard to unwind," he adds.

Paul dropped out of the securities business before he was ruined financially, but he has been suffering from unstoppable weight loss and rising blood pressure. There was a painful separation from his wife, and he isn't sure he has permanently controlled his cocaine habit.

RASH DECISIONS

Under the influence of the drug, brokers and traders may make rash decisions and refuse to alter them because they cannot believe they could be wrong. "When a position goes against you, you may double your exposure rather than get out of the market," says Frank, a professional trader in Chicago who speculates for his own account. Good money chasing after bad recently cost another trader $8,500 in 15 minutes. "Adding to a losing trade violates the No. 1 rule of trading," this man says, "but I was real coked up."

The habitual, heavy user may eventually descend into the paranoia called cocaine psychosis. The characteristic gregariousness of a trader, for example, often turns to suspicion and isolation. The once-manageable expense of his habit balloons out of control.

Jack, a former brokerage official who is currently undergoing psychotherapy to help him stay off cocaine, alcohol and other drugs, was consuming a quarter-ounce of cocaine daily—about $500 worth. Indebted to his supplier, he collateralized his exchange

membership to get a bank loan and lost the seat when the bank foreclosed.

There are lots of people like Jack, but it doesn't seem to matter. Cocaine is in. "It's a calling card, a way of saying, 'I'm cool, I'm hip, I'm successful,'" says a broker. It is used at Christmas parties from brokerage firms with a view of the Battery to those with a view of the San Francisco Bay. In Chicago, traders use the edges of their plastic identification badges to chop up "lines" of cocaine on the tops of toilet-paper dispensers in exchange bathrooms. Others use rolled-up dollar bills or hollowed-out Bic pens. And some snort it right on the exchange floor through nasal inhalers that don't hold medicine.

Cocaine has become a medium of exchange itself, as good as and sometimes better than cash. Business inducements—sometimes outright bribes—are given in the form of cocaine. In Chicago, a financial futures trader tells of commodity executives who use cocaine to entice business from New York-based institutional portfolio managers. In New York, a puckish bond trader says he wants to set up an independent company to cater to trader's whims. He would call it "Limos, Bimbos & Lines," providing, as he claims securities firms do informally, a limousine, a woman in a hotel room, and cocaine for customers.

Sometimes the coke passes in the opposite direction, from traders to securities dealers. "I have seen people get discounts on commissions through a passing of the bindle" (a folded piece of paper containing cocaine), says a former West Coast broker.

INDUSTRY'S INDIFFERENCE

For the most part, the reaction of the securities industry to growing drug abuse seems to range from indifference to ostrich-like denial. There are exceptions, such as the Los Angeles securities firm that recently called in undercover police to catch a suspected cocaine user-dealer among its brokers, but mostly the industry doesn't want to know what's happening or pooh-poohs the extent of cocaine abuse—at least publicly.

Four years ago the Chicago Board Options Exchange, the nation's largest stock-option marketplace, expressed anger at law enforcers when 30 federal agents arrested 10 suspected cocaine dealers on the trading floor as television crews filmed the action. Subsequent arrests by Chicago police of dealers from the CBOE and other exchanges have occurred away from the trading floors in a cooperative attempt to minimize bad publicity that could chase business away.

At the Chicago Board of Trade, the world's largest commodity exchange, Executive Vice President George Sladoje says, "We don't feel we have a problem." Anyone using cocaine at the exchange, he says, is a low-level clerical employee. But interviews with users make it clear that the cocaine trade flourishes among professionals even on the exchange floors, with dealing a profitable sideline for some clerks and runners who deliver orders and messages. Buying cocaine is "like ordering a pizza," says a financial futures trader. Chicago police agree. A recent undercover investigator at a major exchange was able to make a cocaine connection on his first day.

ATTENTION ON CLERKS

New York's largest securities firms deny in chorus that drug use is a major problem. The New York Stock Exchange has fired several employees in the past year because of on-the-job drug use, but a spokesman maintains that cocaine abuse there isn't any greater than in society at large. American Stock Exchange officials agree, although the Amex has taken steps to prevent drug use on the trading floor. And the Securities Industry Association, the largest trade group, is sponsoring a drug abuse and prevention seminar next month—but says the program is mainly a response to growing drug use among clerical employees.

Kingsley Barham, a former broker and reformed cocaine abuser, says the securities industry is deluding itself if it thinks the problem either is negligible or only affects lower-level employees. "They talk about a 'Know Your Client' rule, but they don't know their own brokers," he says. "In a sense, that protects the firms and exchanges, but it perpetuates the cocaine abuse; they would rather discharge a broker than try to salvage him."

Mr. Barham recently organized a basketball marathon in San Francisco as a way to raise both money and public awareness about cocaine abuse. But the event lost money, mainly because the expected support from the securities industry and other businesses never materialized. Undaunted, Mr. Barham says he will try again next year.●

AUTHORITY FOR FLOWERS IN THE CHAMBER

Mr. BYRD. Mr. President, I have discussed this with the distinguished majority leader and with Senator McCLURE.

There is a prohibition against flowers being brought into the Senate Chamber. I now ask unanimous consent that that prohibition be waived and that flowers be permitted in the Senate Chamber tomorrow during the eulogies which will be delivered with respect to the late, great Senator Henry Jackson. Those flowers will be placed on this table, which is where he sat when he was among us.

I make that request.

Mr. BAKER. Mr. President, reserving the right to object, and, of course, I will not object; rather, I reserve only for the purpose of gaining an opportunity to agree with the minority leader in his request. I think it is most appropriate and fitting, and I urge the respective caucuses of the two parties to consider formalizing that arrangement in the future.

I think it is a good practice, a good policy, and I thank the minority leader for making the request at this time.

Mr. BYRD. I thank the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR HELMS AMENDMENT TO SENATE JOINT RESOLUTION 158 TO BE PRINTED IN THE RECORD

Mr. HELMS. Mr. President, I have a proposed amendment to Senate Joint Resolution 158 which I wish to have printed.

As the Chair knows, generally the policy is not to have amendments printed, but in this case the subject matter being of the importance that it is, I desire to have the amendment printed tonight so that it will be available on the desks of Senators tomorrow.

I might add, Mr. President, that it is my intent on tomorrow to have available to me each of the proposals—and there are eight of them identifiable under section 2 of the amendment—available to be submitted one by one.

So I send the amendment to the desk and ask that it be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, there are a few items in our folder for unanimous-consent requests that appear to be cleared for action on both sides. They also appear to be routine in nature. I believe the minority leader is aware of them, and if he is prepared now, I will state these requests in sequence.

Mr. President, first a budget waiver. I would propose to call up the budget waiver to accompany S. 1729, and then pass the bill, if the minority leader has no objection.

Mr. BYRD. Mr. President, there is no objection on this side.

Mr. BAKER. I thank the minority leader.

BUDGET WAIVER

The resolution (S. Res. 194) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1729, was considered, and agreed to, as follows:

S. RES. 194

Resolved, That, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration

of S. 1729, to strike medals for the widow of Roy Wilkins, the Louisiana World Exposition, the families of American personnel missing in Southeast Asia, and Danny Thomas. Such waiver is necessary to permit consideration of an additional fiscal year 1984 authorization of appropriations for the Department of the Treasury to carry out the purposes of S. 1729.

Such waiver is necessary because S. 1729 was not reported by May 15, 1983, as required by section 402(a) of the Congressional Budget Act of 1974.

STRIKING AND PRESENTATION OF MEDALS

The bill (S. 1729) to provide for the striking and presentation of medals was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1729

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the President of the United States is authorized to present, on behalf of the Congress, to Aminda Badeau Wilkins, the widow of Roy Wilkins, a gold medal of appppropriate design in recognition of the incomparable contribution of Roy Wilkins to the struggle for civil rights and equality for all Americans. For such purpose, the Secretary of the Treasury shall strike a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary of the Treasury. There are authorized to be appropriated not to exceed $24,000 to carry out the provisions of this subsection.

(b) The Secretary of the Treasury may cause duplicates in bronze of such medal to be coined and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor, materials, dies, use of machinery, and overhead expenses), and the appropriation used for carrying out the provisions of this subsection shall be reimbursed out of the proceeds of such sale.

(c) The medals provided for in this section are national medals for the purpose of section 5111 of title 31, United States Code.

SEC. 2. (a) In commemoration of the Louisiana World Exposition to be held at New Orleans, Louisiana, in 1984, the Secretary of the Treasury (hereinafter referred to as the "Secretary") is authorized and directed to strike and deliver to Louisiana World Exposition, Incorporated, a nonprofit corporation, not more than seven hundred and fifty thousand medals, with suitable emblems, devices, and inscriptions to be determined by the Secretary in cooperation with the Exposition corporation. The medals, which may be disposed of by the corporation at a premium, may be delivered at such times as may be required by the corporation in quantities of not less than two thousand, but no medals shall be struck by the Secretary after December 31, 1984.

(b) The Secretary shall cause such medals to be struck and delivered at not less than the estimated cost of manufacture, including labor, materials, dies, use of machinery, and overhead expenses. Security satisfactory to the Director of the Mint shall be furnished to indemnify the United States for full payment of such costs.

(c) The medals authorized to be struck and delivered under this section shall be struck in gold, silver, or bronze and of such size or sizes as shall be determined by the Secretary in consultation with the corporation.

(d) The medals provided for in this section are national medals for the purpose of section 5111 of title 31, United States Code.

SEC. 3. (a) The Congress finds and declares that—

(1) two thousand four hundred and ninety-four Americans, military and civilian, are listed as missing or otherwise unaccounted for in Southeast Asia;

(2) those missing or otherwise unaccounted for Americans have suffered untold hardship at the hands of a cruel enemy while in the service of their country;

(3) the families of those Americans retain the hope that they will return home and the loyalty, hope, love, and courage of these families inspire all Americans;

(4) the Congress and the people of the United States are committed to a full accounting for, and release of, all Americans missing or otherwise unaccounted for in Southeast Asia; and

(5) the service of those missing and otherwise unaccounted for Americans is deserving of special recognition by the Congress and all Americans.

(b) The Speaker of the House of Representatives and the President pro tempore of the Senate are authorized jointly to present, on behalf of the Congress, to those American personnel listed as missing or otherwise unaccounted for in Southeast Asia, to be accepted by next of kin, bronze medals designed by an artist who is an intheater Vietnam veteran, in recognition of the distinguished service, heroism, and sacrifice of these personnel, and the commitment of the American people to their return. For such purpose, the Secretary of the Treasury shall strike bronze medals. There are authorized to be appropriated not to exceed $24,000 to carry out the provisions of this subsection.

(c) The Secretary of the Treasury may cause miniature duplicates in bronze of such medal to be coined and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor, materials, dies, use of machinery, and overhead expenses), and the appropriation used for carrying out the provisions of this subsection shall be reimbursed out of the proceeds of such sale.

(d) The medals provided for in this section are national medals for the purpose of section 5111 of title 31, United States Code.

SEC. 4. (a) The Congress finds and declares that—

(1) Danny Thomas founded the Saint Jude Children's Research Hospital, a nonprofit hospital dedicated to helping grievously ill children of all faiths and races, children living and children yet unborn;

(2) Danny Thomas founded ALSAC, Aiding Leukemia Stricken American Children, an organization which annually holds a teenagers' march to raise the $12,000,000 needed in annual maintenance costs incurred by the hospital;

(3) Pope Paul VI presented Danny Thomas with one of the highest honors he could bestow upon a layman—Knight Commander with Star in the Equestrian Order of the Holy Sepulchre of Jerusalem;

(4) The National Conference of Christians and Jews selected Danny Thomas as their Man of the Year;

(5) Danny Thomas was presented by the American Medical Association with its Layman Award, the highest honor it can bestow upon a nonmedical man and only the sixth such award given since 1948;

(6) Danny Thomas has given command performances for five Presidents—Presidents Roosevelt, Truman, Eisenhower, Kennedy, and Johnson;

(7) Danny Thomas gave of his time during World War II to entertain United States troops in North Africa, Italy, and the Philippines; and

(8) Danny Thomas has helped to alleviate the suffering of many children throughout the world and given them hope for a brighter future.

(b) The President of the United States is authorized to present, on behalf of the Congress, to Danny Thomas a gold medal of appropriate design in recognition of his humanitarian efforts and his outstanding work as an American. For such purpose, the Secretary of the Treasury shall strike a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary. There are authorized to be appropriated not to exceed $24,000 to carry out the provisions of this subsection.

(c) The Secretary of the Treasury may cause duplicates in bronze of such medal to be coined and sold, under such regulations as the Secretary may prescribe, at a price sufficient to cover the cost thereof (including labor, materials, dies, use of machinery, overhead expenses), and the appropriation used for carrying out the provisions of this subsection shall be reimbursed out of the proceeds of such sale.

(d) The medals provided for in this section are national medals for the purpose of section 5111 of title 31, United States Code.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ARAVAIPA CANYON WILDERNESS ACT

Mr. BAKER. Next, Mr. President, I would propose to go to S. 626, which is Calendar Order 352, if the minority leader agrees.

Mr. BYRD. There is no objection.

Mr. BAKER. I thank the minority leader.

The Senate proceeded to consider the bill (S. 626) to designate the Aravaipa Canyon Wilderness in the State of Arizona, which had been reported from the Committee on Energy and Natural Resources with amendments; as follows:

On page 2, line 19, strike "and", through and including "et seq)" on line 22;

On page 4, strike line 12, through and including line 19, and insert "and April 28, 1971, are hereby repealed";

So as to make the bill read:

S. 626

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Aravaipa Canyon Wilderness Act".

SEC. 2. The Congress finds that—

(a) the Aravaipa Canyon, situated in the Galiuro Mountains in the Sonoran desert region of southern Arizona, is a primitive place of great natural beauty that, due to the rare presence of a perennial stream, supports an extraordinary abundance and

diversity of native plant, fish, and wildlife, making it a resource of national significance; and

(b) the Aravaipa Canyon should, together with certain adjoining public lands, be incorporated within the national wilderness preservation system in order to provide for the preservation and protection of this relatively undisturbed but fragile complex of desert, riparian and aquatic ecosystems, and the native plant, fish, and wildlife communities dependent on it, as well as to protect and preserve the area's great scenic, geologic, and historical values, to a greater degree than would be possible in the absence of wilderness designation.

SEC. 3. In furtherance of the purposes of the Wilderness Act of 1964 (78 Stat. 890, 16 U.S.C. 1131 et seq.) certain public lands in Graham and Pinal Counties, Arizona, which comprise approximately six thousand six hundred and seventy acres, as generally depicted on a map entitled "Aravaipa Canyon Wilderness—Proposed" and dated May 1980, are hereby designated as the Aravaipa Canyon Wilderness and, therefore, as a component of the national wilderness preservation system.

SEC. 4. Subject to valid existing rights, the Aravaipa Canyon Wilderness shall be administered by the Secretary of the Interior in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness. For purposes of this Act, any references in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act and any reference to the Secretary of Agriculture with regard to administration of such areas shall be deemed to be a reference to the Secretary of the Interior, and any reference to wilderness areas designated by the Wilderness Act or designated national forest wilderness areas shall be deemed to be a reference to the Aravaipa Canyon Wilderness. For purposes of this Act, the reference to national forest rules and regulations in the second sentence of section 4(d)(3) of the Wilderness Act shall be deemed to be a reference to rules and regulations applicable to public lands, as defined in section 103(e) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1702).

SEC. 5. As soon as practicable after this Act takes effect, the Secretary of the Interior shall file a map and a legal description of the Aravaipa Canyon Wilderness with the Committee on Energy and Natural Resources of the United States Senate and with the Committee on Interior and Insular Affairs of the United States House of Representatives, and such map and description shall have the same force and effect as if included in this Act: *Provided*, That correction of clerical and typographical errors in the legal description and map may be made. The map and legal description shall be on file and available for public inspection in the offices of the Bureau of Land Management, Department of the Interior.

SEC. 6. Except as further provided in this section, the Aravaipa Primitive Area designations of January 16, 1969, and April 28, 1971, are hereby revoked.

Mr. BAKER. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments were considered and agreed to en bloc.

Mr. GOLDWATER. Mr. President, the bill before us, S. 626, the Aravaipa Canyon Wilderness Act, sets a precedent by bringing the first public land under the Bureau of Land Management jurisdiction under the protection of the wilderness system. Specifically, the proposal designates Arizona's Aravaipa Canyon an additional 2,626 acres of adjoining public lands as wilderness.

Located in southern Arizona, the 4,044 acre, 7½ mile long canyon, was in 1969 and 1971, set aside as the Aravaipa Canyon Primitive Area, creating BLM's first primitive area. Situated at the east and west entrances to the canyon is about 6,000 acres of land owned in fee by the Defenders of Wildlife Trust for the George Whittell Wildlife Preserve at Aravaipa Canyon ("Aravaipa Trust"). The trust manages an additional 20,000 or more acres, under State and Federal grazing leases, at the entrances to the canyon and on the plateau south of the canyon. The Bureau of Land Management holds title to the canyon itself.

The canyon, whose multicolored cliffs rise as high as 1,000 feet above the canyon bottom, has been referred to as the miniature Grand Canyon of Arizona. Supporting more than 158 species of bird and also bighorn sheep, mule, deer, fox, mountain lion, coyotes, bobcats, javelina, and other small animals, the canyon also has a permanent stream running about 15 miles.

President Reagan, last fall, recommended to Congress that this area be designated as wilderness. This is a noncontroversial bill, having the support of the surrounding community residents, local and national environmental organizations. The Energy and Natural Resources Committee has unanimously reported the bill and I hope, Mr. President, that my colleagues will see fit to join me in support of S. 626.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REMOVAL OF INJUNCTION OF SECRECY—TAX CONVENTION WITH THE KINGDOM OF DENMARK (TREATY DOCUMENT NO. 98-6)

Mr. BAKER. As in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Tax Convention with the Kingdom of Denmark (Treaty Document No. 98-6), which was transmitted to the Senate by the President of the United States on September 8, 1983; and ask that the treaty be considered as having been read the first time; that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

To the Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, the Convention between the Government of the United States of America and the Government of the Kingdom of Denmark for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Estates, Inheritances, Gifts and Certain Other Transfers, signed at Washington on April 27, 1983.

The Convention is the first of its kind to be negotiated between the United States and Denmark. It will apply, in the United States, to the Federal estate tax, the Federal gift tax, and the Federal tax on generation-skipping transfers and, in Denmark, to the duty on inheritances and gifts.

A principal feature of the Convention is that the country of the transferor's domicile may tax transfers of estates and gifts and generation-skipping transfers on a worldwide basis, but must credit tax paid to the other State on the basis of location or *situs* of specified types of property.

I recommend that the Senate give early and favorable consideration to the Convention and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *September 8, 1983.*

PROGRAM

Mr. BAKER. Mr. President, on tomorrow the Senate will convene at 9:30 a.m.

After the recognition of the two leaders under the standing order, there will be a brief period for the transaction of routine morning business until 10 a.m.

The Senate will devote the time between 10 a.m. and 12 noon to tributes and eulogies to our late colleague, Senator Henry M. Jackson.

At 12 noon, there will be an additional period for the transaction of routine morning business in which Senators may speak for not more than 15 minutes each, in which it is anticipated that a number of Senators will wish to speak on the situtation in Lebanon and perhaps particularly as that relates to the War Powers Act.

At 2 p.m. tomorrow, the Senate will resume consideration of the Korean plane resolution.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I know of nothing else to bring before the Senate today. I inquire of the minority leader if there is any measure he wishes to address.

Mr. President, I see no other Senator seeking recognition, and, indeed, I believe the time for the transaction of routine morning business has now expired. Therefore, I move, in accordnace with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m. tomorrow.

The motion was agreed to: and, at 5:32 p.m., the Senate recessed until Wednesday, September 14, 1983, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate September 13, 1983:

THE JUDICIARY

Kenneth W. Starr, of Virginia, to be U.S. circuit judge for the District of Columbia Circuit, vice George E. MacKinnon, retired.

Sherman E. Unger, of Ohio, to be U.S. circuit judge for the Federal Circuit, vice Robert L. Kunzig, deceased.

Morton R. Galane, of Nevada, to be U.S. district judge for the district of Nevada, vice Roger D. Foley, retired.

John F. Keenan, of New York, to be U.S. district judge for the southern district of New York, vice Lloyd F. MacMahon, retired.

John P. Vukasin, Jr., of California, to be U.S. district judge for the northern district of California, vice Stanley A. Weigel, retired.

Bruce D. Beaudin, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for a term of 15 years, vice John D. Fauntleroy, retired.

HOUSE OF REPRESENTATIVES—*Tuesday, September 13, 1983*

The House met at 10 a.m.

Rev. James A. Patrick, St. David's Episcopal Church, Columbia, S.C., offered the following prayer:

Dear God, ruler of the nations, whose will is good and gracious, and whose law is truth, guide the leaders of our land, that we may be a people of peace among ourselves, strong advocates of world peace, and a blessing to other nations of the world.

To the President and all in administrative authority, grant wisdom and grace.

To the lawmakers, the Senate and this House of Representatives, now assembled, give courage, wisdom, and foresight to provide for the needs of all our people and to fulfill our obligations in the community of nations.

To those serving our courts, give integrity and understanding that human rights may be safeguarded and justice served.

Teach our people to rely on Your strength, accept their responsibilities to fellow citizens by electing trustworthy leaders for the well-being of our society and the world. May each of us serve You faithfully and honor Your name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. BLILEY. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BLILEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 298, nays 18, answered "present" 4, not voting 113, as follows:

REV. JAMES A. PATRICK

(Mr. SPENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SPENCE. Mr. Speaker, it gives me great pleasure to present to the House of Representatives a constituent of mine, the Reverend James A. Patrick of Columbia, S.C., who is with us today to lead the House in the opening prayer.

Father Patrick is now serving as the first vicar of St. David's Episcopal Church in Columbia. Organized in April 1982, St. David's is the newest Episcopal Church in the Diocese of Upper South Carolina.

Prior to coming to St. David's, Father Patrick served as vicar of Trinity Episcopal Church of Abbeville, S.C.. He is a graduate of the school of theology of the University of the South at Sewanee, Tenn., and was ordained, first as a deacon and then as a priest, in the Episcopal Church at Trinity Cathedral in Columbia.

Before undertaking his commitment to the Christian ministry, Father Patrick was engaged in private practice as a certified public accountant in Winnsboro, S.C.. He holds a bachelor of science degree in business administration from the University of South Carolina and is a former member of the U.S. Marine Corps.

Since his ordination, Father Patrick has devoted his energies, in particular, to the special needs of senior citizens, serving on the bishop's Task Force on Ministry to the Aging. Both as a trustee of the Diocese of Upper South Carolina and as vicar of St. David's he has provided wise and compassionate counsel to his congregation in the challenging work of establishing and building their new church home.

It is with deep pride and honor, then, that I welcome Father Patrick and his family to Washington on this occasion and commend to this body his words of blessing and devotion.

● Mr. CAMPBELL. Mr. Speaker, it is with special pleasure that I join my colleague, Congressman SPENCE, in welcoming to the House of Representatives the Reverend James A. Patrick, his lovely wife, Pauline, and their son, James III. I came to know this fine family through their daughter, Cindy, who is my public information director and a valued member of my staff.

Father Patrick came to the ministry after a successful career as a certified public accountant. He and his family sacrificed a great deal so that Pat could graduate from the School of Theology, University of the South, as a master of divinity in 1980. Subsequently, he was ordained deacon of the Episcopal Church in June 1980, and priest in May 1981 at Trinity Cathedral in Columbia. Pat served as vicar of Trinity Episcopal Church in Abbeville until May 30, 1982, and is now establishing St. David's Episcopal Church in Columbia.

It is not surprising that Pat is taking on the enormous responsibility of establishing a new church, for his energy, enthusiasm, and dedication are unparalleled. And, there is no doubt in my mind that St. David's will rank as one of the finest Episcopal Churches in South Carolina with Father Patrick at its head.

Mr. Speaker, the willingness and ability to change careers in midlife says a great deal about a person's character—and that of his family. I am proud to call Pat, Pauline, James, and Cindy friends, and I thank Pat for his inspiring words this morning.●

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I rise for the purpose of making reference to the program for this week and next week. I trust that all Members have copies of the printed program schedule for this week.

Today we hope we will be able to conclude the Rehabilitation Act amendments on the education bill. Tomorrow, if things work well, we would take up amendments to improve the Worker Training Act.

Thursday we have scheduled the Coal Pipeline Act, all bills of significance.

In addition to this, there may be—and Members need to know this—there may be a unanimous-consent request from the chairman of the Committee on Foreign Affairs for immediate consideration either on Wednesday or Thursday of a resolution expressing the sense of Congress with respect to the disaster committed by the Soviet Union in shooting down the Korean passenger aircraft. That may come Wednesday or Thursday of this week.

Also the Members should be on notice that the conference report on the Defense authorization bill was filed yesterday and it would be eligible for consideration as early as Thursday and may be brought up then.

Next week's legislation will be announced as usual at the end of this week's business. However, Members should know that we expect votes on Monday next, September 19.

In addition to various suspensions, we expect to take up the State-Justice appropriation bill. So Members would be well advised to make their plans accordingly.

We will try to roll votes on suspensions, depending on the number that we have, so to the extent that it is reasonably possible, our votes might fall midafternoon or later. But I think it is important to put Members on notice that there will be votes on next Monday.

On Tuesday of next week we expect the probability of a resolution concerning the presence of American forces in Lebanon.

Additional programs will be announced later, but I think Members really ought to recognize that since Friday of this week and Friday of next week both have been promised as no business and in fact no session, it puts a strain on us to complete all that needs to be done in the other days. So there will be a Monday session and in addition to that we probably expect to stay fairly late on the days we are in session.

In addition to certain appropriation bills we may be considering, we probably will be faced with a continuing resolution which will have to pass the Congress before the 30th of this month, which is only 2 weeks from this coming Friday.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course I yield to the gentleman from Mississippi.

Mr. LOTT. With regard to Thursday, the gentleman pointed out that the Coal Pipeline Act is scheduled at this time and there may be perhaps even the defense authorization bill that would be eligible to be brought up. But does the gentleman have any idea on Thursday as to what time we might expect to wrap it up, because I understand there may be a memorial service for our former colleague from Georgia.

Does the gentleman have any idea about the time on Thursday afternoon?

Mr. WRIGHT. As I understand it, the plane is expecting to leave at 5 o'clock and, of course, an effort would be made to accommodate Members who desire to attend the memorial service.

Let us talk further as the week progresses and see if we can achieve some mutual agreements with respect to that question. We will try to cooperate and accommodate our colleagues who desire to attend that memorial service.

But the Members really need to be on notice that we need to accomplish a lot in the remainder of this month.

□ 1030

WHO WERE THESE "SPIES"?

(Ms. OAKAR asked and was given permission to address the House for 1 minute.)

Ms. OAKAR. Mr. Speaker, the blatant killing and destruction of the South Korean commercial airliner was one of the most brutal and immoral acts against innocent victims. The Soviet Union has offered no remorse and will not make any form of restitution to the American victims. They claim this plane was on a spy mission. But who were these so-called spies? Let us look at the list.

Was Sammy Ariyadej, 8 months, a spy, who was killed on this plane, were the teenagers Christian and Elizabeth

Carasco spies, was Celita Chuapoco, age 3, a spy, was the infant T. Guevara a spy, was Christa Metcalf, age 3, a spy, was her sister Rita, age 7, a spy? How about Corazon or Cicilia Ocampo, aged 2 and 4, who were also on this plane; how about Graham Park, age 2 and Sarah Park, age 4? These innocent children were killed.

Mr. Speaker, I believe the United States should take further action beyond the President's recommendation. I would set a halt in sending pipeline equipment and technology to the Soviet Union. I would like to see the Soviet shipments that are coming into this country that are affecting jobs in my State of Ohio, like the shipments of ferro-alloys from the Soviet Union dismissed and put a halt to so that we would finally do something to show that we mean business and we will not tolerate the Soviet Union's callous actions.

THE SOVIETS SHOULD NEVER BE ALLOWED TO FORGET THIS ILLEGAL AND COWARDLY ACT

(Mr. SAM B. HALL, JR., asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAM B. HALL, JR. Mr. Speaker, Funk and Wagnalls Standard Dictionary defines "base" as low in sentiment, morals—low in rank, cheap, contemptible, degraded, despicable, ignobile, infamous, low minded, mean, miserable, shabby, sneaking, sordid, squalid, vile, worthless, wretched.

Those are only a few of the words that express my utter contempt and revulsion for the Soviet Union by reason of their dastardly and inhuman action in shooting down Korean flight 007. The Soviets should never be allowed to forget this illegal and cowardly act.

I would hope that every Soviet leader in the United States and those around the world would read the CONGRESSIONAL RECORD of this Congress in order that they might learn firsthand just how low in esteem they are held by this Congress and by the people of the United States of America.

RUSSIA MUST NOT BE TREATED AS WE TREAT OTHER NATIONS

(Mr. PATMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATMAN. Mr. Speaker, in the 12 days since the Soviet Union shot down an unarmed commercial airliner with 269 civilians aboard, including a distinguished Member of this body, the world's revulsion and horror have scarcely abated. It is difficult to find words harsh enough to condemn the barbaric mind-set which brought about this despicable act.

Around the world, we continue to hear expressions of outrage and anger. In the U.N. Security Council, nations of the Third World have voiced their condemnation of this terrorism, and no one outside the Soviet sphere of domination has said a word in attempting to defend the illegal and uncivilized actions.

The Soviets have managed to shock even the sensibilities of those who had begun to accept their invasion of Afghanistan and repression in Eastern Europe—by engaging, first, in a barrage of lies about their actions, and then, when confronted with the evidence, by dismissing the Korean airliner as an American "spy mission."

A nation which is capable of applying the term "sacred" to its borders, but which expresses only lukewarm "regret" over the innocent passengers whose bodies are now washing ashore from the wreckage, cannot be treated as we treat other nations. There must be firm sanctions if we are to maintain our integrity as a responsible government in a civilized society.

A REASONED COURSE OF ACTION PREFERRED OVER SERIOUS CONFRONTATION

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, the national sense of outrage over the Korean Air Line massacre shows no signs of subsiding. People all over the world including nations in the Soviet bloc, continue to condemn the Soviets for their heinous acts of murder against 269 defenseless men, women, and children.

The civilized world has again seen the contempt for morality and decency so much a part of Soviet policy. They stand naked for all the world to see them as they really are. The Soviets have earned their title of "outlaws in the community of man" through their wanton disregard for international law and morality. The savagery of this particular action was only compounded by their arrogance in trying to cover up their obvious culpability in the matter.

I am in full agreement with the response by President Reagan. I consider it to be a rational and effective way to react to this most provocative of actions. His strong rhetoric and imposition of sanctions have prompted a series of unprecedented actions by the Soviets including unheard of public press conferences involving some of their most sensitive military officials. Yet none of these steps has changed anyone's mind relative to the responsibility of the Soviet Union for this crime against humanity.

To go beyond the President's reasoned course of action is to invite a more serious confrontation between our two nations. That would be the wrong step at this time.

CONGRESS AND THE PEOPLE MUST BE MORE INVOLVED IN FOREIGN POLICY

(Mr. LUKEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUKEN. Mr. Speaker, current developments in Latin America and in the Far East demonstrate very inconsistent American policies.

A high ranking Defense Department official is publicly calling for a military solution in Central America and denouncing negotiation, and the administration is about to announce more advisers in that strife torn part of the world.

Meanwhile, in Lebanon our forces are being authorized to call in American air strikes as three more Marines are wounded. A few weeks ago we were calling for all foreign troops to get out of Lebanon. Today our forces may be engaging the local Christians and Moslems. Moreover, we have just completed a mammoth unconditional grain deal with the Soviets, and at the same time we have moved to cut off grain to Nicaragua because it is a Communist client of Russian.

The conclusion I draw is that Congress and the American people must be more involved in trying to bring order into American foreign policy.

TRIBUTE TO THE LATE HONORABLE HENRY M. JACKSON

(Mr. DICKS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKS. Mr. Speaker, our Nation, this Congress, and the people of the State of Washington have lost a great leader with the death of Senator Henry M. Jackson on September 1. Scoop Jackson was a man of principle and a man of vision. Many of us in the Congress knew him through his views on national defense and on relations between the United States and the Soviet Union. He was truly a realist in the sense that he was deeply concerned about maintaining the balance of power between the world's two superpowers. But Scoop Jackson was also aware of the need to protect Government programs that aid the less fortunate, the elderly, and the unemployed. Clearly he favored a strong America, but his vision of a strong nation was one which emphasized being militarily strong as well as economically strong. A nation adequately armed, with full employment and a strong economy is best able to withstand challenges from the outside, and

Scoop Jackson's legislative legacy clearly reflects that total context of a strong America. But Scoop Jackson was more than the national leader we saw here in the Nation's Capital. At 3 days of services for him last week in his hometown of Everett, Wash., people came from near and far to mourn a good friend; one who always stopped on a streetcorner to offer a kind word; who never failed to mark a birthday, an anniversary, or send a get-well card to a list of personal friends numbering in the thousands. He was a neighbor, a good friend, and "our Senator" for all of us in Washington State, and we will miss him very much.

His death also represents the loss of more than 30 years of experience and seniority in the U.S. Senate, which will be impossible to restore soon. It is truly a loss for the people of Washington State, but it is also something that affects me very deeply. From the time when I was a Senate staff member 15 years ago, Scoop was always there to offer counsel and advice; and most recently to offer his strong support for legislative measures we joined forces on in Congress. No one can replace the influence that Scoop Jackson had on me, and certainly no one can replace his leadership of the Washington congressional delegation.

ENTREPRENEURSHIP

□ 1040

(Mr. WATKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WATKINS. Mr. Speaker, many of you know I am a proud product of vocational education. My background in vocational agriculture and involvement with the Future Farmers of America, the organization for agriculture students contributed to my being here today. I represent one of the most economically weakened rural areas of the country where agriculture is still the dominant industry. We desperately need other types of business and industry in this depressed area in order to build up our economic base.

As you might assume, business and industry is not overly anxious to locate in an economically questionable area. Therefore, any industry that comes to this area must be grown and cultivated with careful planning and training in mind. To do this, we need a great deal of help from vocational education.

Vocational education has assisted the citizens of Oklahoma in two ways: One is by providing training in those skill areas for new and expanding industries, and two, by encouraging the entrepreneur or that person who is interested in opening his/her own small business. I will not quote for you the statistics on new businesses opening and the percentage of those businesses that fail within 2 to 5 years of opening. Rather, it is important for you to know that vocational education through its secondary and adult programs is turning these statistics around and is serving as a tool through which students can be alerted to the opportunities of self-employment as well as providing actual training for the potential and existing small business owner. This becomes extremely important in a rural State like Oklahoma where we must encourage all of our creative people to transfer their talent to meaningful, productive businesses. And, thus leading toward economic productivity for themselves and their families and, of course, the citizens of Oklahoma.

I was pleased to learn that in at least 50 percent of the States, vocational education is now working in conjunction with local or State development agencies, local and State chambers of commerce and local governments to bring industry to these States. Vocational education provides the assurance to industry that the skilled workers needed for new industry will be available. And, that vocational programs across the Nation are infusing entrepreneurship or training for self-employment into all vocational programs.

In order to continue these efforts, increased Federal funding is necessary. State and especially local areas are not able to finance startup costs of these programs.

As a colleague, I urge you to support the increase in the funding ceiling for vocational education so that these efforts can continue to be possible.

CLOSER CONGRESSIONAL SCRUTINY NEEDED ON CENTRAL AMERICAN POLICIES

(Mr. MARKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARKEY. Mr. Speaker, I was amazed at the remarks of the third ranking official in the Defense Department who called this week for a military victory in Central America saying that negotiations alone cannot resolve current conflicts there.

He also suggested that the lukewarm congressional support for President Reagan's program of economic and military aid could force the United States to deploy troops in the region "as in Korea or West Germany."

The administration has consistently ignored the will of the Congress. They have not consulted with us, they have evaded the laws we pass, and now they seek to blame us for the failure of their policies.

The failure of Reagan's military approach is clear; the problem is that he is frozen into a policy of confrontation, and can only seem to respond with military escalation. President Reagan has painted us into a corner and his response is to ask us for more paint.

What the administration must realize is that military violence is not the answer in Central America; it is the root of the problem. By feeding and funding the violence the administration radicalizes the region and derails the peace initiative.

This apparent lack of restraint in the administration calls for much closer congressional scrutiny of the course of our Central American policies.

UNITED STATES MUST MAINTAIN STRONG NATIONAL SECURITY POSTURE

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr. Speaker, the dastardly, despicable and totally uncalled for shooting down of an unarmed South Korean airliner by a Soviet fighter resulting in the deaths of 269 innocent civilians cannot go unchallenged by the free world. This act of wanton murder must be punished.

I fully understand those who want to punish the Soviet Union by breaking relations, walking out of arms control negotiations, or imposing trade restrictions. But as much as we are all revolted by this act, we must keep our perspective and remain focused on what is best for U.S. national interests.

I commend President Reagan for his measured and careful handling of this crisis, but urge him to continue to demand that full restitution be made to the families of those killed and to the South Korean Government for the destroyed aircraft.

The Soviet Union, by this act, has shown the world its callous disregard for human life and its reliance on military force. It has clearly demonstrated once again the need for the United States to continue to maintain a strong national security posture.

THE NEW U.S. AUTO INDUSTRY

(Mr. CARR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARR. Mr. Speaker, one out of every seven people employed in America today works in or around and for the American auto industry. Yet, in recent years the American auto industry has been much maligned because of its lack of competitiveness with the Japanese and other foreign imports.

I am here today to tell the Members that there is a new, a brandnew, auto industry out there where labor/management relations are keyed to coop-

eration and quality. I am also here to tell the Members that there is a new auto industry which is designing cars in a new way and building them in a new way.

Yesterday in Pontiac, Mich., and then again in Los Angeles, Calif., the Pontiac Motor Division unveiled a brandnew, newly designed, newly manufactured product called the Fiero. It is a two-seater, midengine sports car, made of a fiberglass, plastic body skins, and a space frame.

Mr. Speaker, I am proud to say that the United Auto Workers and the Pontiac Motor Division have brought 12 of these automobiles to Capitol Hill today. And I extend an invitation to all of my colleagues and their staff to view the automobiles outside, rain or no rain, we will be driving cars and we want all to come and see the new U.S. auto industry.

A TRIBUTE TO GLENWOOD CREECH

(Mr. MICA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICA. Mr. Speaker, I would like to take a few minutes today to honor an individual who has made a major contribution to higher education in south Florida. Dr. Glenwood Creech retired from the presidency of Florida Atlantic University this past July, but not before he had dramatically changed the face and future of the university. Under Dr. Creech's outstanding leadership, FAU gained a new identity as a center of academic excellence, cultural awareness, and community pride.

As an alumnus of Florida Atlantic, I am deeply grateful to Dr. Creech for his vision and practical ability. As Representative from Florida's 14th Congressional District, I am proud to recognize the presence of an educational institution growing in excellence and credibility every year.

Glenwood Creech leaves Florida Atlantic University 10 years after he arrived, having offered skill, judgment, and creativity to help the young university establish a pattern of growth and stable development. Among his extraordinary accomplishments, Dr. Creech has been instrumental in the following areas:

The establishment of five Eminent Scholar Chairs at $1 million each;

The authorization for doctoral programs in engineering and business;

Authorization for the development of a lower division;

Opening of a new engineering building;

The establishment of an art gallery and botannical garden funded with private donations;

Opening of a 2,400 seat auditorium to serve the university and the community;

Steady growth in enrollment; and

Continuous program development.

These reflect the tangible accomplishments of Glen Creech. But they do not say enough about his impact at FAU. Glen and Martha Creech brought warmth and grace with them to the university. They offered personal, as well as professional strength and vitality to the university and the community. They are true friends of all of us who care deeply about the future of Florida Atlantic University.

I join other students, alumni, and friends of Florida Atlantic University in thanking Dr. Creech for his contributions to the quality of higher education in Florida. His strength and personal integrity have left an indelible stamp on FAU.

OUTRAGE EXPRESSED OVER SOVIETS' SHOOTING DOWN OF FLIGHT 007

(Mr. GRADISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRADISON. Mr. Speaker, I rise to express my outrage over the Soviet Union's unprovoked and barbaric annihilation of Korean Air Lines flight 007. The incident of August 31 is unjustifiable, and for the Soviets to plead self-defense is ludicrous.

While I support the initial actions taken by the President, I remain convinced that the most effective measures—those which will have the most impact on the Soviets—can only be exerted in concert with the world community. Seldom have we seen such a tremendous outpouring of revulsion over one incident and only the combined efforts of the civilized world against this uncivilized act will have a significant and long-lasting impact on the Soviet dictatorship.

This inhuman behavior reinforces my longstanding distrust of the U.S.S.R. It has, I believe, important lessons for any dealings we have with them. In particular, U.S. negotiators must approach arms control talks with this clear evidence of the Soviet's disregard for the norms of international behavior.

Mr. Speaker, I also take the opportunity to express my condolences to the family of our colleague, Larry McDonald, and to the families of the other 268 victims of flight 007.

NO, SAMANTHA, THEY ARE NOT JUST LIKE US

(Mr. PHILIP M. CRANE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PHILIP M. CRANE. Mr. Speaker, I, as I am sure everybody else in this body, was descended upon by the media upon the news of the barbaric act perpetrated by the Soviet Union in the predawn hours of September 1. Many of them asked me if I were shocked or surprised by this act. And I responded by saying how could anyone be shocked or surprised by such an atrocity committed by those gangsters who preside over that dung hill called the Soviet Union.

The fact of the matter is, the man who rules that country stands accused before the court of world opinion right now for having authorized the assassination attempt upon Pope John Paul II. As a result, why should anyone who would authorize an attempted assassination of the Pope be at all reticient about taking 269 innocent civilians on that flight? He is also the man who presided over the butchery of Budapest in 1956; he is the man who presided over the persecution of Prague in 1968. So why should anyone be surprised that he would authorize the shooting down of 269 unarmed civilians? He is the man who helped to orchestrate the invasion of Afghanistan and who sanctions in violation of all international law the use of chemical and biological weapons. So why should anyone be shocked or surprised by this latest atrocity? No, Samantha, they are not just like us.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agreed to the following resolution:

S. RES. 212

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Honorable LAWRENCE P. MCDONALD, late a Representative from the State of Georgia.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased.

The message also announced that the Vice President, pursuant to Public Law 91-551, appointed Mr. SASSER as a member, on the part of the Senate, of the Board of Regents of the Smithsonian Institution, effective September 12, 1983.

□ 1050

TRUE SOVIET GOVERNMENT CHARACTER REVEALED

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, on August 31 my office received a press

release from the Consulate General of the Soviet Union in San Francisco regarding the visit of nine of our U.S. Senators to Moscow last month.

The release stated:

> Talking with them, Yuri Andropov has characterised (sic) the present-day state of relations between the U.S.S.R. and the United States as tense virtually in every field. They have become such not because the Soviet side has chosen so. The Soviet Union would like to have with the United States a level of concord ensuring normal, stable and good relations in the mutual interest of both sides and to the great benefit of world peace.

These words might suggest to some that the Soviet Union has good intentions of a commitment for peace and global disarmament. Why 24 hours later, in a fiery flash, would a Soviet fighter callously and unmercifully shoot down a defenseless commercial airliner with 269 people aboard, including our colleague, Larry McDonald? Larry stood as a vocal opponent of the practices of the Soviet Union. Perhaps no other Member of Congress lectured as consistently and forcefully against the aggression of the Soviets, and in a final ironic turn his verbal foe became his physical opponent. If the Soviet Union felt justified in downing a commercial airliner, why have the Soviet people not been told that 269 people died? It is clear that the Soviet leadership does not subscribe to the same rules of conduct that we do.

Let us hope that the American people will not be fooled by good wishes of good will that we hear uttered from the leadership of the Soviet Union, blaming any problems in the world today on our leadership. Let it be crystal clear that it is not the United States but, rather, the Soviet Union that is the reason we have not engaged in a successful arms negotiation to this point. It is the Soviet Union, not the United States, that stands as a barrier to freedom in this world. It is the Soviet Union, not the United States, that is the threat to the world. These things we should keep in mind as we negotiate with them, as we must. However, we should not be at the bargaining table with any Pollyannish ideas about their acceptable behavior or their standards or their values.

NICARAGUA VOTES AGAINST U.N. CONDEMNATION OF SOVIET UNION

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, yesterday the world spoke to the issue of the shooting down of the Korean airliner. The world spoke in the United Nations. Nine nations voted to condemn the Soviet Union for their actions; two nations voted against that condemnation. Two nations voted to say that we should not even have a slap on the wrist of people who shoot down civilian airliners and kill 269 people; two nations said that that act of barbarism is a perfectly acceptable way to behave in the world. Two nations, the Soviet Union, of course, being one. They have already shown their stripes. But the other nation was Nicaragua, a nation that we have heard an awful lot about on this House floor over the last few weeks. Two nations, the Soviet Union and Nicaragua, said you should be able to behave like barbarians and get away with it in the world community.

RUBEN F. ORTEGA JR. ASSISTS IN BRINGING AID TO DISPLACED PEOPLE OF EL SALVADOR

(Mr. McNULTY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McNULTY. Mr. Speaker, yesterday I indicated on the floor of this Chamber my admiration for the actions of our colleague, BILL MCCOLLUM of Florida, in bringing aid to the displaced people of El Salvador. During the first week in August the gentleman from Florida successfully delivered and distributed some 5,000 pounds of free medical supplies to the desplezados in that nation, and presently is ironing out the logistics for future, similar deliveries.

But I would be remiss, Mr. Speaker, if I did not mention that the gentleman from Florida has been ably assisted in his efforts by a member of my staff, Ruben F. Ortega, Jr. Ruben is a native of Douglas and a longtime resident of Sierra Vista, both of which are in Cochise County, Ariz., in my district.

When Mr. MCCOLLUM made the decision to deliver an initial 2½ tons of medical supplies to El Salvador, he received complete cooperation from the American Embassy in San Salvador as well as the coordinator of the supply lift, Project Hope. But he was concerned that he and his staff might need additional assistance with the language barrier they were sure to encounter in Spanish-speaking El Salvador. Congressman MCCOLLUM and his staff had known Ruben on a social and professional level for some months, and were aware of his proficiency with the Spanish language. He was thus a natural choice to accompany them on their mission.

I know, Mr. Speaker, that the opportunity to assist the gentleman from Florida in his exception and commendable mission was an exciting and valuable experience for Ruben Ortega. I hope my colleagues will join me today in paying tribute to his role in this most humanitarian venture.

TRIBUTE TO THE LATE HONORABLE HENRY M. JACKSON

(Mr. PRITCHARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRITCHARD. Mr. Speaker, last week our State and our Nation lost a great public servant. Henry M. Jackson, who we all thought was indestructible and who had served this Nation for 44 years here in the Capitol, passed away. He was known as "Scoop" to everyone in our State and to everyone in the Capitol. A magnificent public servant, who had strong views, and always stayed very loyal to his views, no matter how the wind was blowing in a particular year for political viewpoints.

Scoop Jackson had friends all over our State. He was the son of a Norwegian family. He came from a mill town—Everett. He is mourned by all our State, those who voted for him and those who voted against him. And I can tell you as a politician there were not many who voted against Scoop.

His service in the House and in the Senate has left an imprint on America, an imprint that will be felt down through the years. He was sensitive and caring, not only in public life, but also as a family man. I know that the delegation from the State of Washington and all other Members in Congress wish his wife, Helen, son Peter, and his daughter, Anna Marie, our heartfelt sympathy in this very difficult time.

America will miss Scoop Jackson.

TRIBUTE TO THE LATE HONORABLE HENRY M. JACKSON

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, I take the well to join my colleagues from Washington and others in expressing my deep sorrow at the death on September 1 of this year of Senator Henry M. Jackson. Senator Jackson served for over four decades in the Congress of the United States, six terms in the House and the remainder of his service in the U.S. Senate. He was an extraordinary man, extraordinary in his commitment to those values which brought him to the Congress and which he expressed so cogently and eloquently at every level of our politics, including the national level where he sought twice the Democratic nomination for President.

In a time when one colleague said that some of us in the Congress have short attention spans, Senator Jackson maintained a steadfast and coherent expression of belief in a strong national defense and in a secure America, but not just in military terms. He

never lost his commitment to the view that the Government can and should be a consistent instrument for the improvement of the life of all Americans and particularly for those who need that support and concern.

Senator Jackson was to those who have had the honor to serve on his staff—as I did—a teacher, a teacher mostly by example, a teacher whose steadfastness, whose honesty and whose integrity are a model for everyone who engages in public service.

In the words of George Will, the national columnist and a friend of Senator Jackson, "He was the finest public servant I have known." This is the judgment that many will make. It is a judgment that I share. I extend, as all of us I know wish to do, our condolences to Mrs. Jackson and to Peter and Anna Marie.

Last night the House adjourned out of respect for Senator Jackson, after enacting a resolution of condolence which parallels that expressed by the U.S. Senate.

Mr. PERKINS. Mr. Speaker, will the distinguished gentleman yield?

Mr. FOLEY. I yield to the distinguished chairman of the Committee on Education and Labor.

□ 1100

Mr. PERKINS. First let me state to the distinguished gentleman from Washington that I had the privilege of serving with Senator Jackson in the 81st Congress. I have never served with a more capable and able gentleman than Senator Jackson. He took the lead back in 1949 in the enactment of the Marshall plan, where we had destroyed much of Central Europe by our own bombers, to give those countries economic assistance.

He was a leader all through that session until he went to the Senate. He was one of the most pleasant gentlemen that anyone ever served with. He was truthful. One could go to him and talk to him and he would tell you his views very frankly and forthrightly.

I know not only the State of Washington but the whole United States will miss this great statesman.

Mr. FOLEY. I thank the distinguished gentleman from Kentucky.

Mr. Speaker, I would advise Members that a special order will be arranged for next week.

WE WILL ALL MISS SCOOP JACKSON

(Mr. LOWRY of Washington asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOWRY of Washington. Mr. Speaker, of course the whole Nation and the whole world as well as the State of Washington has lost a great leader in Henry Jackson. The services for Senator Jackson showed just how much this man meant to everyone. The dean of our delegation, TOM FOLEY, gave one of the finest talks I have every heard in my life, and so did our colleague, AL SWIFT, representing the Second Congressional District, from Everett, from where Scoop Jackson had started and put in so much of his time. Everyone in this House would have been very proud to have seen the job done by them.

Scoop Jackson's two children, 17-year-old Peter, and 22-year-old Anna Marie, really were the testimony to what a man as an individual Scoop Jackson was. If you could have seen the way they stood and talked about what their father had meant to them as a father, it really lets you know the quality of the human being we have lost.

It was 1970, when I was a young Democrat, that Scoop Jackson first helped me. There is not actually a young Democrat in the State of Washington who could not stand up and tell that same story. As TED KENNEDY said at the eulogy in Everett, Wash., Scoop Jackson was for a strong national security but he never once wanted to pay for it out of the mouths of hungry children or out of costing unemployed chances to get jobs or out of education programs. He was for a strong America in all ways.

PRECIPITOUS ACTION IN SYRIA IS A MISTAKE

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, Congress returns this week to face the perplexing question of what the U.S. policy toward Lebanon should be.

Mr. Speaker, I think three points are clear: First, the United States will never be able to put all the pieces together in Lebanon. The country has so many different factions, religious, political, and cultural, that for us to try and create a unified Lebanon is a task far beyond our power.

Having said that, the second point, I think, is also clear: the U.S. immediate withdrawal from Lebanon will be interpreted not only by the people of the Middle East but also by the rest of the world as an immediate defeat for the United States and as a victory for the Syrians.

Given these two points, the third point that it would behoove all of us to pay attention to is that precipitous action in the Middle East usually fails. The United States never should have placed troops in Beirut in the first place. It was a precipitous action, not a thoroughly thought-out policy. Had we not forced Israel to curtail her activities at that point and entered the conflict ourselves, I think that Lebanon itself would have been in a lot better shape than she is today.

To act precipitiously again would be a major mistake.

DOWNING OF SOUTH KOREAN AIRLINER WAS ACT OF BARBARITY

(Mr. COUGHLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COUGHLIN. Mr. Speaker, Americans of all political persuasions and people throughout the world continue to express indignation over the Soviet Union's wanton shooting down of a South Korean airliner with 269 persons aboard.

The downing of this unarmed civilian airliner was an act of barbarity, whether a calculated Soviet policy decision or the isolated act of an individual commander.

As the lies continue to flow out of Moscow, it becomes apparent that the Soviet military commanders intentionally were responsible for the massacre of 269 innocent civilians. These revelations clearly illustrate a number of terrible truths about the Soviet Government and its system:

First, the Soviets do not share, nor do they care, for the basic human values that distinguish a civilized society;

Second, the Soviet military is capable of monstrous actions regardless of the innocent mistakes or lack of maliciousness on the part of others;

Third, a frightening ineptness and incompetence marks the highest levels of the Soviet military command; and

Fourth, the Soviet leadership believes that it can disdainfully treat the rest of the world with the same arrogance and contempt it exercises toward its own people.

These lessons must always be taken into account when dealing with the Soviets. Whether we like it or not, we must negotiate over crucial issues such as nuclear arms control with this other great superpower. We must never forget, however, that we are doing business with a ruthless regime whose values are contrary to ours.

I hope that the many well-meaning but gullible people in our Nation and in other countries will remember the Soviets for what they really are and not for what they would like them to be.

IT IS "PUT UP OR SHUT UP" TIME ON EDUCATION

(Mr. MINETA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINETA. Mr. Speaker, today the House will be considering H.R.

3520, amendments to the Rehabilitation Act. I strongly support this legislation and urge its adoption by the House.

It is put up or shut up time. Are we willing to fund education or not? It is fine to say the burden must shift to State and local governments, but they are simply not able to take up the slack. Faced with cuts in Federal assistance and declining tax revenues due to the recession, local governments are in difficult straits financially. It is just not practicable to say they should shoulder more of the burden.

Throughout the last decade, educational spending comprised about 2.3 or 2.4 percent of Federal spending. Under President Reagan's budget that portion would drop by half, to 1.2 percent by 1988.

I cannot understand how anyone can object to the obviously reasonable and necessary levels in H.R. 3520. Spending money in and of itself may well not solve problems; but refusing to spend money, especially in education, hardly counts as a long range, thoughtful solution either.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. KAZEN) laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
September 12, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in clause 5, rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope received from The White House at 3:20 p.m. on Monday, September 12, 1983 and said to contain a message from the President whereby he transmits proposed legislation entitled, "National Productivity and Innovation Act of 1983."

With kind regards, I am,

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

NATIONAL PRODUCTIVITY AND INNOVATION ACT OF 1983—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-110)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on the Judiciary and ordered to be printed:

(For message, see proceedings of the Senate of Monday, September 12, 1983, at page S11983.)

□ 1110

EXTENDING AND IMPROVING THE REHABILITATION ACT OF 1973

The SPEAKER pro tempore. Pursuant to House Resolution 283 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3520.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3520) to extend and improve the Rehabilitation Act of 1973, to provide for the operation of the Helen Keller National Center for Deaf-Blind Youths and Adults, to create a select commission on Federal assistance to disabled Americans, and to increase certain authorizations of appropriations for programs within the jurisdiction of the Committee on Education and Labor, with Mr. BONIOR of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, September 12, 1983, all time for general debate had expired.

Pursuant to the rule, the bill will be considered under the 5-minute rule by titles, and each title shall be considered as having been read.

The Clerk will designate title I.

The text of title I is as follows:

TITLE I—AMENDMENTS TO THE REHABILITATION ACT OF 1973

SHORT TITLE

SECTION 101. This title may be cited as the "Rehabilitation Act Amendments of 1983".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR VOCATIONAL REHABILITATION SERVICES

SEC. 102. (a)(1) Section 100(b)(1) of the Rehabilitation Act of 1973 (hereinafter in this title referred to as "the Act") is amended by inserting at the end thereof the following: "There is further authorized to be appropriated for such purpose $1,037,800,000 for fiscal year 1984, $1,141,100,000 for fiscal year 1985, $1,254,600,000 for fiscal year 1986, $1,379,400,000 for fiscal year 1987, and the amount determined under subsection (c) for fiscal year 1988.".

(2) Section 100(b)(2) of the Act is amended—

(A) in the first sentence by striking out "and" immediately before "$60,000,000" and by inserting immediately before the period at the end of such sentence ", and such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986"; and

(B) by striking out all of the second sentence.

(3) Section 100(b)(3) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for each of the three" and inserting in lieu thereof "fiscal year 1984, and each of the two".

(4) Section 100(c)(2) of the Act is amended to read as follows:

"(2)(A) If in fiscal year 1987 the percentage change published under paragraph (1) indicates an increase in the price index, then the amount authorized to be appropriated under subsection (b)(1) for fiscal year 1988 is the amount authorized to be appropriated for fiscal year 1987 increased by such percentage change.

"(B) If in fiscal year 1987 the percentage change published under paragraph (1) does not indicate an increase in the price index, then the amount authorized to be appropriated under subsection (b)(1) for fiscal year 1988 is the amount authorized to be appropriated for fiscal year 1987.".

(b) Section 102(c)(2) of the Act is amended by striking out "beyond any reasonable doubt".

(c) Section 112(a) of the Act is amended by inserting "and no less than $3,500,000 for fiscal year 1984 and each of the two succeeding fiscal years," after "fiscal years,".

(d) Section 121(b) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR AND REVISIONS IN RESEARCH AND TRAINING

SEC. 103. (a) Section 201(a)(1) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for each of the three succeeding fiscal years" and inserting in lieu thereof "fiscal year 1984, and for each of the two succeeding fiscal years".

(b) Section 201(a)(2) of the Act is amended by striking out "$50,000,000" and all that follows through the end of such paragraph and inserting in lieu thereof "such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

(c) Section 204(b)(1) of the Act is amended by inserting at the end thereof the following:

"Rehabilitation Research and Training Centers shall include both comprehensive centers dealing with multiple disabilities and centers focused on particular disabilities. Centers need not be automatically terminated at the end of a project period and may be renewed on the basis of a thorough evaluation and peer review including site visits. Training of students preparing to be rehabilitation personnel through centers shall be an important priority and grants shall not be prohibited from including faculty support for teaching of credit and other courses offered by the institutions of higher education affiliated with the center.".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR AND REVISIONS IN SUPPLEMENTARY SERVICES AND FACILITIES

SEC. 104. (a) Section 301(a) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986" and by striking out "1983" and inserting in lieu thereof "1987".

(b) Section 302(a) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

(c)(1) Sections 304(a) and 304(c) of the Act are amended by inserting "qualified" immediately before "personnel" where it first appears in each such subsection.

(2) Section 304(b) of the Act is amended by striking out "will be" and all that follows through "institutions, to" and inserting in lieu thereof "shall be targeted on areas of personnel shortage which may".

(3) Section 304(c) of the Act is amended by inserting at the end thereof the following: "The Commissioner shall submit annually (together with the budget submission for the forthcoming year for the Rehabilita-

tion Services Administration) a report indicating and justifying in detail how the current year's training funds are allocated by professional discipline and other program areas. The report shall also identify specifically the Commissioner's shortage findings, how funds proposed for the succeeding year would be allocated under the President's budget proposal, and what findings of shortage of personnel justify such allocations.".

(4) Section 304 of the Act is amended by redesignating the second subsection (d) as subsection (e).

(5) Section 304(e) of the Act (as so redesignated) is amended—

(A) by striking out in the first sentence "$34,000,000" and all that follows through the end of such sentence, and inserting in lieu thereof "such sums as may be necessary for fiscal years 1984, 1985, and 1986."; and

(B) by striking out the second sentence.

(d) Section 305(g) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for the three succeeding fiscal years" and inserting in lieu thereof "fiscal year 1984, and for the two succeeding fiscal years".

(e) Section 310(a) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

NATIONAL COUNCIL ON THE HANDICAPPED

SEC. 105. (a)(1) Section 400(a) of the Act is amended by striking out "with the Department of Health, Education, and Welfare" and inserting in lieu thereof "within the Federal Government".

(2)(A) On the effective date of the Rehabilitation Act Amendments of 1983, the National Council on the Handicapped shall be an independent agency within the executive branch and shall not be an agency within the Department of Education or any other department or agency of the United States.

(B) There are transferred to the Chairman of the national Council on the Handicapped all functions relating to the Council which were vested in the Secretary of Education on the day before the date of enactment of this Act. The Chairman of the National Council on the Handicapped shall continue to exercise all the functions under the Rehabilitation Act of 1973 or any other law or authority which the Chairman was performing before the date of the enactment of this Act.

(C) References in any statute, reorganization plan, Executive order, regulation, or other official document or proceeding to the Department of Education or the Secretary of Education with respect to functions or activities relating to the National Council on the Handicapped shall be deemed to refer to the National Council on the Handicapped or the Chairman of the National Council on the Handicapped, respectively.

(b) Section 401 of the Act is amended by—

(1) striking out "and" at the end of paragraph (5);

(2) striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and"; and

(3) inserting after paragraph (6) the following new paragraph:

"(7) provide to the Congress, on a continuing basis, such advice, recommendations, and additional information as are considered appropriate by the Council or the Congress.".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

SEC. 106. Section 502(i) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR EMPLOYMENT OPPORTUNITIES FOR HANDICAPPED INDIVIDUALS

SEC. 107. (a) Section 617 of the Act is amended by striking out "$35,000,000" and all that follows through the end of such section and inserting in lieu thereof "such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

(b) Section 621(a)(1) of the Act is amended by inserting ", designated State units," after "individual employers".

(c) Section 623 of the Act is amended by striking our "1982" and inserting in lieu thereof "1986".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR COMPREHENSIVE SERVICES FOR INDEPENDENT LIVING

SEC. 108. Section 731 of part E of the Act is amended—

(1) in subsection (a) by striking our "$80,000,000" and all that follows through the end of such subsection, and inserting in lieu thereof, "such sums as may be necessary for fiscal years 1984, 1985, and 1986."; and

(2) in subsection (c)(1) by striking out "the fiscal year ending September 30, 1979," and all that follows through the end of paragraph (1), and inserting in lieu thereof "fiscal years 1984,1985, and 1986.".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 109. (a) Section 612(b) of the Act is amended by striking out "Comprehensive Employment and Training Act of 1973" and inserting in lieu thereof "Job Training Partnership Act".

(b) Section 204(b)(3) of the Act is amended by striking out "303(b)" and inserting in lieu thereof "311".

(c) Section 731 of part E of the Act is amended by redesignating such section as section 741.

EFFECTIVE DATE

SEC. 110. This title shall take effect October 1, 1983.

AMENDMENTS OFFERED BY MR. WILLIAMS OF MONTANA

Mr. WILLIAMS of Montana. Mr. Chairman, I offer amendments to title I.

The Clerk read as follows:

Amendments offered by Mr. WILLIAMS of Montana: Page 2, strike out lines 12 through 17, and insert in lieu thereof the following:

is amended by inserting "(A)" after "(b)(1)" and by inserting at the end thereof the following: "There is further authorized to be appropriated for such purpose $1,037,800,000 for fiscal year 1984, and the amount determined under subsection (c) for each of the four succeeding fiscal years.

"(B) In addition, there are authorized to be appropriated for such purpose such additional sums as may be necessary for each of the fiscal years 1985, 1986, 1987, and 1988. Any amount appropriated pursuant to this subparagraph shall be allocated in accordance with section 110(a)(4).".

Page 3, after line 19, insert the following new subsection (and redesignate the succeeding subsections accordingly):

(c) Section 110(a) of the Act is amended—

(1) by striking out "section 100(b)(1)" each place it appears in paragraphs (2) and (3) and inserting in lieu thereof "section 100(b)(1)(A)"; and

(2) by inserting after paragraph (3) the following new paragraph:

"(4) For each fiscal year beginning on or after October 1, 1984, for which any amount is appropriated pursuant to section 100(b)(1)(B), each State shall receive an allocation (from such appropriated amount) in addition to the allotment to which such State is entitled under paragraphs (2) and (3) of this subsection. Such additional allocation shall be an amount which bears the same ratio to the amount so appropriated as that State's allotment under paragraphs (2) and (3) of this subsection bears to the sum of such allotments of all the States.".

Page 3, strike out lines 5 through 17.

Mr. WILLIAMS of Montana (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. WILLIAMS of Montana. Mr. Chairman, the amendment I am offering this morning is a compromise between the amendment circulated by my Budget Committee chairman, Mr. JONES, and the bill reported by the Education and Labor Committee and its Select Education Subcommittee on which I serve. My amendment maintains the entitlement nature of the program through fiscal year 1988. It maintains the fiscal year 1984 authorization of $1,037,800,000 in the bill as reported and increases the authorization for fiscal years 1985–88 by the consumer price index for all urban consumers (section 100(c)(3)) as defined in current law. It maintains these out year authorizations as an entitlement as defined in current law. This amendment satisfies the section 303(a) violation of the Budget Act.

Where my amendment differs from the amendment circulated by my Budget Committee chairman is that it provides an additional second-tier "such sums as necessary" authorization for fiscal years 1985–88. This authorization provides the proper discretionary authority to the Appropriations Committee and is not part of the entitlement. These funds would be allocated to States as an amount which bears the same ratio to the amount so appropriated as that State's entitlement allotment bears to the sum of such allotments to all States.

This compromise amendment comes about as a result of discussions between staff of the Education and Labor Committee, the Budget Committee, the Speaker's office, and my office. Perhaps this is a true compromise since both of my committees are not completely thrilled with the result.

I urge my fellow members of both the Education and Labor and Budget Committees to support this amendment.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Montana. I yield to the chairman of the Budget Committee.

Mr. JONES of Oklahoma. Mr. Chairman, I thank the gentleman for yielding.

I want to commend the gentleman from Montana (Mr. WILLIAMS) on his efforts to work out this compromise. I think this is an acceptable compromise from the standpoint of the Budget Committee and the Budget Act.

My personal objection was not to the substantive content but to the fact that the bill as it came out of committee took the entitlement and expanded it beyond the projected consumer price index increases. That would have tied the hands of future Congresses to that level. I think this compromise clearly takes care of the Budget Act violation, and it clearly points out that the entitlement nature of this program is not to be changed from that which presently exists in current law.

A lot of people, myself included, are concerned about indexing of entitlement programs and think that there should be changes in this, but I do not believe we should deal with this on a piecemeal basis. I think we should deal with indexing and with entitlements on an across-the-board, general basis, and I hope that later this month we will be able to do that with some legislation of mine that is now pending that would restrain the growth of indexing entitlement programs.

But, Mr. Chairman, I think this compromise is perfectly acceptable. It meets the budget resolution that was passed by Congress, and I urge support of the gentleman's amendments.

Mr. WILLIAMS of Montana. Mr. Chairman, I appreciate the support of the chairman of the Budget Committee.

The CHAIRMAN. The time of the gentleman from Montana (Mr. WILLIAMS) has expired.

(On request of Mr. MURPHY, and by unanimous consent, Mr. WILLIAMS of Montana was allowed to proceed for 5 additional minutes.)

Mr. MURPHY. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Montana. I yield to the chairman of the Select Education Subcommittee.

Mr. MURPHY. Mr. Chairman, I would like to give some background to my colleagues concerning the reasoning that went into the funding levels H.R. 3520 provides for the basic State grant entitlement for rehabilitation services.

A great deal has already been said on both sides of the aisle about the cost effectiveness of vocational rehabilitation. Most Members seem to be well aware of the fact that it actually costs the Government more not to rehabilitate persons with handicaps than it does to invest in the services they need to become employed, productive citizens.

This is, in fact, one of the relatively few Federal programs in which we cannot only count on a rapid return on our investment—with repayment in full within just 4 years—but can also take pride in our method of doing it. This program has been so free of scandal over its 63-year history, and so well accepted by the States and the disabled community, that many Members probably never hear about the rehabilitation act until it is due for reauthorization. For a $1 billion Federal program, that lack of notoriety is surely a mark of success.

But in reviewing this enormously successful program this year, our committee found a serious problem which is jeopardizing the continued effectiveness of the States in serving their handicapped constituents: That is, a decline in the resources available to provide services, and a consequent serious reduction in the number of persons with handicaps being served and rehabilitated.

While more than 1,240,000 handicapped persons were being provided the services they needed to become employed in 1975, last year there were almost 300,000 fewer handicapped persons being served—a decline of 23 percent.

The number of successful rehabilitations declined between 1974 and last year by more than 134,000, a 37-percent reduction.

These declines in service levels directly correspond to the loss of purchasing power in the program, which began in 1976, with significant losses of more than 30 percent between 1979 and 1982.

Although most States now provide far more than the required 20-percent match for these Federal dollars, the fiscal strains of the past few years have brought about drastic cuts in State rehabilitation personnel, a reduction in the numbers of handicapped persons being brought into the program, and the imposition in 33 States of selection processes that place restrictions, based on severity of disability, on those who are eligible for service.

This situation could become a spiral of decline very difficult to reverse if Congress does not quickly begin to restore the lost purchasing power of the program and allow States to regain lost ground.

The funding levels in H.R. 3520 recognize that the most serious losses began in 1979, and that after 1979 the numbers of even the most severely disabled clients—those who have a priority under the act—began to decline. For this reason, the bill phases-in, over a 4-year period, a restoration to the fiscal year 1979 purchasing power level.

The number of persons with work disabilities is increasing each year—not decreasing. Spinal cord injuries alone occur at the rate of approximately 10,000 annually. In the blink of an eye a friend or relative of any of us could become a candidate for rehabilitation services.

I would ask my colleagues to consider these facts, and to consider whether it would be responsible action to keep rehabilitation at a status quo that is lower than it has been in 14 years.

Guaranteed cost-of-living increases may protect programs from further decline, but for a program which is so greatly in need of restoration, I hope you will agree that the status quo is not sufficient.

□ 1120

With great reluctance, Mr. Chairman, I accept the amendment offered by the gentleman from Montana (Mr. WILLIAMS), because, being realistic, I have talked to many of my colleagues yesterday and again this morning. I believe that the clause that we put in to escalate those services to what I believe is a sufficient level perhaps would not pass. But the gentleman from Montana allows the Budget Committee, allows this House, allows the Appropriations Committee in the coming years to take into consideration the recommendations on funding we made in H.R. 3520. I hope that "such sums as are necessary" in future years will meet our intended goals for this very important act.

Mr. WILLIAMS of Montana. I thank the subcommittee chairman and I join him in his support for adequate funding this year and in the out years. As he knows, I was a somewhat reluctant participant in this compromise but believed that this was the best that this House could do.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Montana. I yield to my colleague and a member of the committee, the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding and for his amendment.

I have several inquiries.

First, would this amendment only affect titles I, II, and III or the rehabilitation sections of the bill?

Mr. WILLIAMS of Montana. The gentleman's understanding is correct.

Mr. BARTLETT. Second, my understanding of this amendment is that it would in no way establish some sort of a funding floor. Does the gentleman concur that this does not put a floor but in fact continues with authorization?

Mr. WILLIAMS of Montana. That is correct. It maintains the out year authorization as an entitlement as defined in current law and therefore

does not violate the floor requirements of the Budget Act.

Mr. BARTLETT. So the gentleman's amendment would essentially leave open above the Consumer Price Index so that such sums language so that the Appropriations Committee could appropriate more than the Consumer Price Index but they would not be required to do so?

The CHAIRMAN. The time of the gentleman from Montana (Mr. WILLIAMS) has again expired.

(On request of Mr. BARTLETT and by unanimous consent Mr. WILLIAMS of Montana was allowed to proceed for 1 additional minute.)

Mr. WILLIAMS of Montana. The gentleman is correct with regard to the flexibility that is historically accepted here and with regard to the Appropriations Committee's ability to fund above the CPI. But, of course, the rights of both the minority and the majority are protected for those years and we, of course, can go to the Appropriations Committee and encourage whatever levels we wish.

Mr. BARTLETT. I would have no objection to the gentleman's amendment and I commend the gentleman for his amendment.

Mr. WILLIAMS of Montana. I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Montana (Mr. WILLIAMS).

The amendments were agreed to.

The CHAIRMAN. Are there further amendments to title I?

If not, the Clerk will designate title II.

The text of title II is as follows:

TITLE II—REAUTHORIZATION OF THE HELEN KELLER NATIONAL CENTER FOR DEAF-BLIND YOUTHS AND ADULTS

SHORT TITLE

SEC. 201. This title may be cited as the "Helen Keller National Center Act".

CONGRESSIONAL FINDINGS

SEC. 202. The Congress finds that—

(1) deaf-blindness is among the most severe of all forms of disabilities, and there is a great and continuing need for services and training to help deaf-blind individuals attain the highest possible level of development;

(2) due to the rubella epidemic of the 1960's and recent advances in medical technology that have sustained the lives of many severely disabled individuals, including deaf-blind individuals, who might not otherwise have survived, the need for services for deaf-blind individuals is even more pressing now than in the past;

(3) helping deaf-blind individuals to become self-sufficient, independent, and employable by providing the services and training necessary to accomplish that end will benefit the Nation, both economically and socially;

(4) the Helen Keller National Center for Deaf-Blind Youths and Adults is a vital national resource for meeting the needs of deaf-blind individuals and no State currently has the facilities or personnel to meet such needs;

(5) the Federal Government has invested approximately $10,000,000 in capital, equipment, and operating funds for such Center since it was established; and

(6) it is in the national interest to continue to provide support for the Center, and it is a proper function of the Federal Government to be the primary source of such support.

AUTHORIZATION OF THE CONTINUED OPERATION OF THE HELEN KELLER NATIONAL CENTER FOR DEAF-BLIND YOUTHS AND ADULTS; REPEAL OF PRIOR AUTHORIZATION

SEC. 203. (a) Section 313 of the Rehabilitation Act of 1973 (29 U.S.C. 777c) is repealed.

(b) The Secretary of Education shall continue to administer and support the Helen Keller National Center for Deaf-Blind Youths and Adults in the same manner as such Center was administered pursuant to section 313 of the Rehabilitation Act of 1973, to the extent such manner of administration is not inconsistent with any purpose described in subsection (c) or any other requirement of this title.

(c) The purposes of the Center are as follows:

(1) To provide specialized intensive services, or any other services, at the Center or anywhere else in the United States, which are necessary to encourage the maximum personal development of any deaf-blind individual.

(2) To train professionals and allied personnel at the Center or anywhere else in the United States to provide services to deaf-blind individuals.

(3) To conduct applied research, development programs, and demonstrations with respect to communication techniques, teaching methods, aids and devices, and delivery of services.

AUDIT; MONITORING AND EVALUATION

SEC. 204. (a) The books and accounts of the Center shall be audited annually by an independent auditor in the manner prescribed by the Secretary and a report on each such audit shall be submitted by the auditor to the Secretary at such time as the Secretary shall prescribe.

(b)(1) The Secretary shall establish procedures for monitoring, on a regular basis, the services performed and the training conducted by the Center.

(2) The Secretary shall, in addition to the regular monitoring required under paragraph (1), conduct an evaluation of the operation of the Center at the end of each fiscal year. A written report of such evaluation shall be submitted to the President, the Clerk of the Hosue of Representatives, and the Secretary of the Senate within one hundred and eighty days after the end of the fiscal year for which such evaluation was conducted. The first such report shall be submitted for fiscal year 1983.

AUTHORIZATION OF APPROPRIATIONS

SEC. 205. (a) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this title for fiscal year 1984 and each of the four subsequent fiscal years. Such sums shall remain available until expended.

(b) Any appropriation Act containing any appropriation authorized by subsection (a) shall contain a statement of the specific amount being made available to the Center.

DEFINITIONS

SEC. 206. For purposes of this title—

(1) the terms "Helen Keller National Center for Deaf-Blind Youths and Adults" and "Center" mean the Helen Keller National Center for Deaf-Blind Youths and Adults, and its affiliated network, operated pursuant to section 313 of the Rehabilitation Act of 1973 and continued under this title;

(2) the term "deaf-blind individual" means any individual—

(A) who has a central visual acuity of 20/200 or less in the better eye with corrective lenses, or central acuity of 20/200 if there is a field defect such that the peripheral diameter of visual field subtends an angular distance no greater than 20 degrees,

(B) who has a chronic hearing impairment so severe that most speech cannot be understood with optimum amplification, and

(C) for whom the combination of the impairments described in subparagraphs (A) and (B) causes extreme difficulty in attaining independence in daily life activities, achieving psychosocial adjustment, or obtaining a vocation,

and such term includes any other meaning the Secretary may prescribe by regulation; and

(3) the term "Secretary" means the Secretary of Education.

CONSTRUCTION OF ACT; EFFECT ON AGREEMENTS

SEC. 207. This title shall not be construed as modifying or affecting any agreement between the Department of Education or any other department or agency of the United States and the Industrial Home for the Blind, Incorporated, or any successor to or assignee of such corporation, with respect to the Center.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 208. (a) The table of contents of the Rehabilitation Act of 1973 is amended by striking out "Sec. 313. Helen Keller Natioinal Center.".

(b) Section 310(a) of the Rehabilitation Act of 1973 is amended by striking out "(other than section 313),".

The CHAIRMAN. Are there amendments to title II?

If not, the Clerk will designate title III.

The text of title III is as follows:

TITLE III—NATIONAL COMMISSION ON FEDERAL ASSISTANCE TO DISABLED AMERICANS

SHORT TITLE

SEC. 301. This title may be cited as the "National Commission on Federal Assistance to Disabled Americans Act".

FINDINGS

SEC. 302. The Congress finds that—

(1) an extensive Federal investment is made in disabled Americans through entitlement and discretionary programs;

(2) given the increased emphasis on community-based services, on fuller integration in schools and the work place, and on greater independence and the reaffirmation of the right to dignity of disabled Americans, Federal programs which assist disabled Americans must be targeted in an appropriate and coordinated manner to complement this emphasis;

(3) Federal programs that assist the disabled have overlapping, contradictory, unique, and sometimes restrictive requirements that prevent coordination of, limit access to, and constrain the potential of such programs;

(4) before the Congress can consider statutory options which, to the extent appropriate, redirect the emphasis of programs and remove barriers to the individual and collec-

tive effectiveness of programs, a careful and comprehensive review of the issues must be made; and

(5) a national commission is needed to review and debate the issues and then make recommendations to the President and Congress regarding necessary statutory revisions in existing Federal legislation which assists disabled Americans.

PURPOSE

SEC. 303. It is the purpose of this title to establish a select commission—

(1) to examine Federal legislation which helps disabled Americans through education, income support, rehabilitation, training, medical assistance, housing, transportation, and food acquisition programs;

(2) to focus national attention on the need to identify and remove unwarranted barriers to the effectiveness of such programs given the national emphasis on community based services for and the integration and independence of disabled Americans; and

(3) to provide Congress and the President with specific statutory recommendations for improving current legislation.

ESTABLISHMENT

SEC. 304. There is established a select commission to be known as the National Commission on Federal Assistance to Disabled Americans (hereinafter in this title referred to as the "Commission").

DUTIES

SEC. 305. The Commission shall—

(1) review all statutes pertaining to Federal programs which assist disabled Americans;

(2) make a priority listing of such programs based on the number of disabled Americans they assist and the Federal costs of such programs;

(3) assess the extent to which such programs provide incentives or disincentives to the establishment of community-based services for disabled Americans, promote the full integration of such individuals in the community, in schools, and in the workplace, and contribute to the independence and dignity of such individuals; and

(4) recommend to the President and the Congress legislative mechanisms for increasing incentives and eliminating disincentives in Federal programs assisting disabled Americans.

REPORTING

SEC. 306. The Commission shall—

(1) submit to the Congress and the President an interim report of its recommendations within twelve months of its first meeting; and

(2) submit to the Congress and the President a final report of its recommendations not later than eighteen months after its first meeting.

MEMBERSHIP

SEC. 307. (a) The Commission shall be composed of sixteen members as follows:

(1) one member appointed by the Secretary of Education;

(2) one member appointed by the Secretary of Health and Human Services;

(3) one member appointed by the Secretary of Labor;

(4) one member appointed by the Secretary of Transportation;

(5) one member appointed by the Attorney General;

(6) one member appointed by the Secretary of Agriculture;

(7) one member appointed by the Secretary of Housing and Urban Development;

(8) one member appointed by the chairman of the Committee on Finance of the Senate;

(9) one member appointed by the ranking minority member of the Committee on Finance of the Senate;

(10) one member appointed by the chairman of the Committee on Labor and Human Resources of the Senate;

(11) one member appointed by the ranking minority member of the Committee on Labor and Human Resources of the Senate;

(12) one member appointed by the chairman of the Committee on Education and Labor of the House of Representatives;

(13) one member appointed by the ranking minority member of the Committee on Education and Labor of the House of Representatives;

(14) one member appointed by the chairman of the Committee on Ways and Means of the House of Representatives;

(15) one member appointed by the ranking minority member of the Committee on Ways and Means of the House of Representatives; and

(16) the Chairman of the National Council on the Handicapped (or a delegate).

(b) Members shall be selected for appointment based on their knowledge of or direct experience with Federal programs which assist disabled Americans.

(c) Members of the Commission shall be appointed for the life of the Commission.

(d) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(e)(1) Except as provided in paragraph (2), members of the Commission shall each be paid at a rate equal to the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including traveltime) during which they are engaged in the actual performance of duties of the Commission.

(2) Members of the Commission who are officers or employees of the United States or Members of Congress shall receive no additional pay, allowances, or benefits by reason of their service on the Commission.

(f) The Chairman of the National Council on the Handicapped shall act as chairman until the first meeting of the Commission when the Commission shall elect a chairman from among the members.

(g) Members shall be appointed within ninety days after the date of enactment of this title.

(h) The first meeting of the Commission shall be held not later than one hundred and twenty days after the date of enactment of this title. The Commission shall meet as often as is necessary to carry out its duties under this title. The date and time of all meetings of the Commission shall be at the call of the chairman or a majority of its members.

EXECUTIVE DIRECTOR AND STAFF

SEC. 308. (a) The Commission shall have an executive director who shall be appointed by the chairman of the Commission and who shall be paid at a rate not to exceed the maximum rate of basic pay payable for grade GS-18 of the General Schedule.

(b) Subject to such rules as may be prescribed by the Commission, the chairman of the Commission may appoint and fix the pay, at a rate not to exceed the maximum rate of basic pay payable for grade GS-18 of the General Schedule, of such additional personnel as the chairman considers appropriate.

(c) The executive director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 ans subchapter III so chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay payable for grade GS-18 of the General Schedule.

(d) Subject to such rules as may be prescribed by the Commission, the chariman of the Commission may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay payable for grade GS-18 of the General Schedule.

(e) Upon request of the Commission, the head of any department or agency of the United States is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out this title.

POWERS

SEC. 309. (a) The Commission may, for the purpose of carrying out this title, hold such hearings and conferences, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(b) Any member or agency of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) The Commission may secure directly from any department of agency of the United States information necessary to enable it to carry out this title. Upon request of the chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(d) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

TERMINATION

SEC. 310. The Commission shall cease to exist ninety days after its final report is transmitted to the President and Congress.

AUTHORIZATION OF APPROPRIATIONS

SEC. 311. There is authorized to be appropriated such sums as may be necessary to carry out this title. Any sums appropriated under the authorization contained in this section shall remain available until expended.

EFFECTIVE DATE

SEC. 312. This title shall take effect October 1, 1983.

The CHAIRMAN. Are there amendments to title III?

If not, the Clerk will designate title IV.

The text of title IV is as follows:

TITLE IV—OTHER AUTHORIZATIONS

MODIFICATION OF CERTAIN RECONCILIATION ACT LIMITS

SEC. 401. (a) Subject to subsections (b) and (c), there are authorized to be appropriated for fiscal year 1984 for programs under the jurisdiction of the Committee on Education

and Labor such funding levels as are assumed under the first budget resolution (H. Con. Res. 91, as it passed the House on March 23, 1983) for fiscal year 1984.

(b) The authorizations of appropriation established under subsection (a) of this section supersede, and are not in addition to, the authorizations of appropriations (or the limitations thereon) established under the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35), but the authorizations of appropriations established under subsection (a) do not supersede (and are not in addition to) any authorization of appropriations enacted after the date of enactment of the Omnibus Budget Reconciliation Act of 1981.

(c) For the purposes of subsection (a), the programs under the jurisdiction of the Committee on Education and Labor for which funding levels are assumed, and the levels which are so assumed, in the first budget resolution for fiscal year 1984, shall be deemed to be the following:

(1) The compensatory education program under chapter 1 of the Education Consolidation and Improvement Act of 1981, $3,830,000,000.

(2) The impact aid program under the Act of September 23, 1950 (Public Law 815, 81st Congress), and the Act of September 30, 1950 (Public Law 874, 81st Congress), $505,000,000.

(3) The education of the handicapped programs under the Education of the Handicapped Act, $1,226,000,000.

(4) The vocational education program under the Vocational Education Act of 1963, $825,000,000.

(5) The adult education program under the Adult Education Act, $112,000,000.

(6) The arts and humanities programs under the National Foundation on the Arts and Humanities Act of 1965, $273,900,000.

(7) The museum services program under the Museum Services Act, $10,800,000.

(8) The community services program under the Community Services Block Grant Act, $398,000,000.

(9) The low-income energy assistance program under the Low-Income Home Energy Assistance Act of 1981, $2,250,000,000.

(10) The special supplemental food program for women, infants, and children under section 17 of the Child Nutrition Act of 1966, $1,360,000,000.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 25, strike lines 5 through 7, redesignate succeeding subparagraphs, and insert thereafter the following:

EDUCATION OF THE HANDICAPPED ACT

SEC. 402. Notwithstanding any other provision of law, there are authorized to be appropriated $1,500,000,000 to carry out the education of the handicapped programs under the Education of the Handicapped Act.

Mr. ERLENBORN. Mr. Chairman, I move to strike the last word.

I take this time to direct a question to the chairman of the committee. My recollection does not include that the committee adopted any amendments in committee before we reported this bill but my memory may be incorrect. I am uncertain as to this amendment.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman.

Mr. PERKINS. The gentleman's recollection is not correct. The committee amendment increases the funding for the education of the handicapped as offered by the gentleman from Pennsylvania (Mr. MURPHY).

Mr. ERLENBORN. It was adopted in the committee?

Mr. PERKINS. It was adopted in the committee.

Mr. ERLENBORN. I thank the chairman and I yield back the balance of my time.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

AMENDMENT OFFERED BY MR. BARTLETT

Mr. BARTLETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARTLETT: Strike out line 1 on page 24, and all that follows through line 5 on page 26.

Mr. BARTLETT. Mr. Chairman, it is with some sense of sadness that I approach the debate here today, sadness for the lives of those disabled Americans who are depending on the continuation of the Rehabilitation Act which is in jeopardy today; sadness that the House would even consider playing politics with those lives; and sadness for other Americans in the economy that this House would add so cavalierly $1.6 billion, a 34-percent increase, to 10 unrelated programs without the benefit of hearings or authorization levels or committee markups or any further consideration.

Mr. Chairman, what the Bartlett amendment would do would be to simply restore the Rehabilitation Act to the purposes of rehabilitation, to delete those 10 unrelated programs that range from museum services to chapter 1 that are unrelated to each other and that are unrelated clearly to the purposes of retraining and rehabilitating 1 million disabled Americans that can be and expect to be rehabilitated and allowed to rejoin the economy with productive lives.

These 10 programs, Mr. Chairman, are unrelated but they all have certain things in common. Cumulatively the addition of these 10 programs in title IV would have in common that they would place the Rehabilitation Act in jeopardy and those lives of those 1 million Americans that are served by rehabilitation, of which statistically 26 percent, or over a quarter of a million, are fully rehabilitated and restored to productive lives, one of the most successful Federal, State, and local partnerships in existence, a 63-year bipartisan history that would go down the tubes today. For every $1 invested in a handicapped individual through rehabilitation programs the person's earning power increases by $10. Title IV would jeopardize this important investment.

□ 1130

The other thing these 10 programs have is that the cumulative effect of this 34-percent increase, both in the $1.6 billion in increases as well as the signal that we would send to Americans that we are not serious about Federal spending, we are not serious about the deficits, we are not serious about interest rates and we are not serious about the unemployed, these increases, and no one disputes the underlying programs, because my amendment would not have any effect on the underlying 10 programs, many of which are very popular in this House.

But those programs would continue on their present course and with their present authorization, legislation, without title IV and even if the Bartlett amendment passes. But the issue for those 10 amendments is the precipitous and unwarranted and ill-conceived increases without a hearing, without a markup and circumvention of the process.

These 10 amendments in title IV also have in common the damage that they would do to the House procedures, the manipulation of the House rules to add extraneous amendments and to make them technically germane, and the damage to the economy and they all have in common the damage and the jeopardy to the lives of those persons awaiting rehabilitation. Some would make education the issue, but education is not the issue today, because all of the programs are not education-related. But even those that are, these education programs are not in jeopardy; only rehabilitation is in jeopardy. Education is not the issue.

Make no mistake, a vote for the Bartlett amendment to delete title IV is not a vote against education. These programs would continue. But a vote for the Bartlett amendment is a vote for rehabilitation and for those of us in the House that believe in rehabilitation and believe that the Rehabilitation Act can help very real people who need our help, I would urge them to vote for the Bartlett amendment.

Now the Bartlett amendment, the speakers that will speak for it today, it is not just those of us in the House that are concerned, but the rest of the economy and the rest of the country, beginning with those 35 million disabled Americans and the 1 million disabled Americans that would be helped, the U.S. Chamber of Commerce, National Taxpayers Union, National Federal of Independent Business, have all urged this Congress, for the sake of rehabilitation and the continued growth of this economy to oppose title IV and to support the Bartlett amendment.

Perhaps most significantly the message came from the National Rehabilitation Coalition that says clearly this title is not relevant to the Rehabilitation Act or the rehabilitation program.

With this one vote the House today can prove that the House cares about the economy, that we care about deficits, that we care about interest rates and at the same time we can prove that we care about rehabilitation and the rehabilitation of those 1 million Americans who are watching our vote today.

I thank the House and urge adoption of the amendment.

Mr. HAWKINS. Mr. Chairman, I move to strike the last word and rise in opposition to the amendment.

Mr. Chairman, I find it a little resentful that anyone would suggest that those who support education in this Nation of ours is in any way jeopardizing the economy and dealing in unnecessary spending that is unwise and not truly effective.

The interest that I personally have in opposing this amendment is that I believe that it is unreasonable to expect that chapter 1, formerly title I of the Elementary and Secondary Education Act, would be cut the way that it has been cut by those who have supported the Gramm-Latta concept.

The importance of educating the most disadvantaged children in our Nation should be of concern to all of us. It seems to me to be very unwise to continue the cuts that have been made.

Since Gramm-Latta has been operating.

Chapter 1 has proved to be a very successful program. These disadvantaged children are now beginning to show success, to show improvement in their ability to understand simple language and to do simple arithmetic.

I think it is unreasonable to say that in a nation such as ours, which is competing with other nations of the world, particularly the industrialized nations that are spending much more on education and on training than are we, that in some way we should preserve these cuts.

The other day I happened to run across a little item of interest, I think, in connection with this, in terms of the economy.

In 1982, for example, excess interest costs in the Federal budget amounted to $60 billion which is about one-third of the deficit.

Now, it seems to me, rather than talking about reducing assistance in many instances of only a few million dollars in most desirable programs, those who want to help the economy shoud be addressing this excessive interest cost.

In 1982 alone this $60 billion was more than twice what we spent for the total amount spent in education. Now, certainly one cannot say that those who benefited from this excess interest cost are to be served by this body rather than those who benefit from education.

Reference has been made to manpower programs. Well, in that same year we spent only $3.4 billion for all of the manpower programs, for all of the employment and training programs, to put people to work, to train them and to make them productive American citizens, along with education.

And yet, we spent more than 15 times this amount on interest costs. So, it seems to me rather than attacking these simple but highly desirable programs, including title I, which is to serve the most disadvantaged young people, that we should be attacking the policy that has permitted the Federal Reserve Board, a creature of this body, to hike up interest rates and to serve only a few special interest groups.

I think that this amendment is certainly not well thought out, with all due regard to the gentleman and his motives which I know to be certainly of the highest order, but it just seems to me that the time has come when we should address why we have all of this excess spending, why it is that we have a hugh deficit and to put the blame where it belongs and not attempt to whittle away at vital domestic programs that are causing us, I think, to move backward rather than forward as a progressive nation.

I think the amendment is certainly unwise and not only is chapter 1 jeopardized, but impact aid, adult education, education of the handicapped and many of the other educational programs that over the years we have seen fit to enact in this body.

I therefore urge opposition to the amendment.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I think the Members should understand what title IV is and the effect of striking title IV.

A little historical perspective is in order. In 1980 we had a Presidential election. President Reagan was elected on a promise to try to bring some rationality to the fiscal structure of our Nation. That had great appeal and was considered by most to be the prime reason for his success in that election.

In 1981 the Congress, though divided between the one House and the other in its political control of those Houses, still was able to gather the votes in this House, as well as the other body, to implement the policies that had been espoused by President Reagan when he was the candidate in 1980.

The result of that was that the utilization of the budget process; a budget resolution highly controversial, highly partisan but yet gathering a majority of the votes in this Chamber was adopted. To implement that budget resolution, to reduce spending of the Federal Government under some sort of control, the Reconciliation Act of 1981 was adopted.

□ 1140

In that act appropriation levels for these as well as other programs were established, not just for fiscal 1982, which was the subject of that bill primarily and the subject of the budget resolution primarily, but also for the out years, for fiscal 1983, fiscal 1984. We are now talking about fiscal 1984 and the budget levels established in that Reconciliation Act.

What title IV in the bill, as reported by the committee, does is to make a blanket attack on the judgment made in the 1981 reconciliation bill.

Now I listened to my good friend and colleague from California (Mr. HAWKINS) and he said that the amendment to title IV had not been well thought out. Let us look at title IV itself and see how well thought out that has been.

The genesis of title IV was a very simple amendment adopted in committee to a successor bill, not to this bill, but one that was the Rehabilitation Act reported under another number earlier.

Without notice to anyone, without any hearings, without debate to any great extent, an amendment was adopted that said in effect all programs under the jurisdiction of the Education and Labor Department will have set as their authorized level the figures included in the 1984 budget resolution. that is all it said. It did not specify an individual program, it did not specify any dollar figure, it did not result from any judgment by the Education and Labor Committee, but merely said it will be set, all of these authorizations will be set at the level established in the 1984 budget resolution.

The literal interpretation of that would have required reductions of some authorizations and increases in others, depending upon what version of the 1984 budget resolution one referred to, and the amendment adopted by our committee was silent on that point. Was it the House passed version, the Senate passed version or the version finally adopted after the conference committee had reached agreement? That amendment, that well-thought-out amendment by our chairman did not even say which version.

We all know, I think, from the publicity attendant afterward what happened to that amendment. Without authorization someone on the committee and I do not blame the staff, I am certain it was done at the instruction of members. They took this simple

amendment amounting to some 65 words approximately and turned it into an amendment that was over 200 words, 250 words, and specified programs and specified dollar amounts, did not include any of the reductions, but only the increases.

Now that is the thoughtful process, the thoughtful process that is behind title IV in this bill, so thoughtful, so in violation of the rules, as a matter of fact, that the Rules Committee did not give a rule to that bill, we have this H.R. 3520 as the successor bill, repeating now in title IV what had been drafted in the dark of the night after the first committee action.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. ERLENBORN) has expired.

(By unanimous consent, Mr. ERLENBORN was allowed to proceed for 5 additional minutes.)

Mr. ERLENBORN. Mr. Chairman, let me say at this point that I have been deeply disappointed that we have not had voices, more voices in this Chamber and in our committee and on particularly the other side of the aisle speaking up for the integrity of the legislative process to condemn that sort of action, to change a bill after it was reported by the committee and before it was reported to the House.

I do not think anyone did this with malice, I really do not believe that. I think it is a reflection of the fact that this Chamber has been controlled by one party for so long and that every committee of this House has been controlled by this same party for so long that they no longer think that they are constrained by the rules, that they can do just about anything they want without reference to the Members, without action by the committee.

I do not think anyone really who was involved in this process did it with any malice whatsoever. It was so blatant. It was so obvious that I do not think anyone thought they could slip it through. They just thought they did not need to ask because whatever was done because it was done by the majority party, would be supported by the majority party and, unfortunately, they were proven right. Unfortunately for the integrity of this body they were proven right that it has been supported by every Member of the majority party in our committee when they again reported out the bill with the spurious amendment now made legitimate by including it in H.R. 3520.

But to get back to our historical perspective what we are being asked to do here today on the basis of this history is to throw out the results of the work in 1981 to try to get our budget under control. We were facing in 1981 less than a $100 billion deficit and we were all worried. Last year during the campaign—and I had a primary challenge and I remember being very vocal in this—we were facing the possibility of a $100 billion deficit and people were concerned. Both liberals and conservatives.

We are now facing the reality of a $200 billion deficit for fiscal 1984, the reality of a $200 billion deficit, and that concern does not seem to exist any longer among my colleagues on the other side of the aisle because they want to take actions like this to increase authorizations, to increase spending, and on the basis of this kind of thoughtful record of no hearings, no debate, and drafting in the dark of night.

I do not think anyone who is at all serious about trying to get our fiscal house in order could support title IV. I think anyone who really believes that we want to maintain the economic recovery that has recently begun will support the amendment to strike title IV, would support amendments or bills individually after hearings and after discussion possibly to adjust appropriation levels or authorization levels, but not in a blanket fashion like this, without any due consideration.

It is for these reasons that I believe that the amendment of the gentleman from Texas should be adopted.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

Reference is made to 1981 and the budget level of 1981. It is not true that this amendment is in conflict with the recently passed budget resolution which we passed just a few months ago and that title IV, as it is now drafted, would actually implement the position this body has already taken with respect to these authorizations?

Mr. ERLENBORN. Well, I understood that it was up to our committee to determine these authorization levels. Usually authorizing committees do that. I understood that the usual process was to introduce legislation, to have hearings, to give an opportunity for the public and the administration to be heard, for Members on both sides of the aisle to debate the question and then to make a thoughtful determination.

I am just saying that the gentleman may be right, this may repeat what has been done in another piece of legislation, but it certainly is not the proper legislative process for setting authorization levels.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. ERLENBORN) has expired.

(At the request of Mr. HAWKINS and by unanimous consent, Mr. ERLENBORN was allowed to proceed for 1 additional minute.)

Mr. HAWKINS. If the gentleman will yield further, the gentleman seems to be defending Gramm-Latta, which was a position worked out by amendment on the floor here, not by the Education and Labor Committee.

So that now it would seem to me if that is what the gentleman is defending, the gentleman is in a sense refuting his position that the most recent budget resolution was a process of floor action rather than committee action.

□ 1150

But it seems to me there is an inconsistency that the most recent actions of this body did approve the very authorized levels that title IV would implement. And the Bartlett amendment would destroy, in effect, what we did a few weeks ago in the adoption of that budget resolution.

So it seems to me that if there is any thoughtful thinking, it is on this side rather than on that side.

Mr. ERLENBORN. If I could recapture my time to answer by good friend, let me say that I supported and voted for Gramm-Latta in 1981, as did the majority of the Members at that time.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. ERLENBORN) has expired.

(By unanimous consent, Mr. ERLENBORN was allowed to proceed for 1 additional minute.)

Mr. ERLENBORN. And let me say that if there are changes in Gramm-Latta to be made, I think they should be made in a thoughtful manner, after hearings and after discussion and after debate within our committee, not in this blanket fashion. That is the point that I am making.

I am not saying that I would be opposed to any changes and every change suggested—I might support some and oppose others—if they were done in a thoughtful manner; but just take this approach in having a blanket increase in these authorized levels is not thoughtful and proper way to legislate.

Let me also say that it has to be done in the context of the fiscal and economic conditions that we face today. And I believe that this approach flies in the face of proper fiscal management.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, would the gentleman then concur with the chairman of the committee in his memorandum where he says on page 2 that "it is important to note that the budget resolution is not binding below the budget function"?

In fact, the first budget resolution establishes spending levels for broad categories, but not down to the detail of each program.

Mr. ERLENBORN. That is exactly right. We have only broad figures, not down to this detail.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the authorization increases provided in this act are essential for all of the people who are directly involved with the programs and for this country. Never have we needed these programs as badly and as immediately as we need them now. The President has been saying this over and over in the last few weeks. And it would appear that members of his own party, who have justified all sorts of unusual behavior in the last couple of years here by saying they were following the President, choose not to follow what he is clearly indicating to the American people at the present time and has been since he discovered a few months ago that the American people are deeply concerned about our ability to train and retrain and continue to train the people in our American educational system.

And ironically the bulk of the money we are talking about in this title goes to State programs, the very people that the President has suggested should be assuming greater responsibility in improving the quality of education and training for everyone.

Now, I would like to make a couple of points about title IV, which Mr. BARTLETT attempts to strike, and suggest to you that the striking of this title really guts this bill, if I can use indelicate language. It is absolutely essential that this bill move now, that we meet with the Senate, that we get a bill completed before the end of this month, because the vocational rehabilitation program that is reauthorized by this bill will otherwise expire.

Let me turn to title IV which Mr. BARTLETT wishes to strike. First, it has been alleged here that the 10 authorization increases were not the product of careful deliberation. The gentleman who preceded me in the well repeated that several times. Well, I do not know of any time in my 10 terms on the Education and Labor Committee when I have seen a particular part of any bill given more careful and thoughtful consideration and actually being acted upon by the committee and by this body more times before the issue is brought before the House.

The fact is that all of these increases, with the exception of that for the handicapped children, were debated, discussed, and approved by the Education and Labor Committee on three separate occasions, once when the committee authorized the programs prior to Gramm-Latta.

I find it ironic to have somebody citing Gramm-Latta and then talking about not changing Gramm-Latta unless you do it carefully and thoughtfully. Is there anybody in this country who still believes there was anything careful or thoughtful about the way in which this body acted on Gramm-Latta? No one, not even its strongest proponents, knew what it looked like at the time that we voted on it. And if that is an example of careful and thoughtful consideration, it may be one of the reasons why some of us hope fervently that people like that will not be in the majority in this body in the future.

The second time that the committee considered this title was when the committee adopted its recommendations for the first budget resolution earlier this year. There was a considerable amount of debate in the committee at that time.

And then again when the committee approved this bill.

Now, that is three times within the committee. In addition to that, the Budget Committee considered these numbers, and the House considered them. If you look at the 1984 first budget resolution, you will find that all of the increases here are consistent with what the House has already committed itself to. And, I might add, it is consistent with what the other body has already committed itself to in the first budget resolution.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. FORD) has expired.

(By unanimous consent, Mr. FORD of Michigan was allowed to proceed for 3 additional minutes.)

Mr. FORD of Michigan. It seems to me that what we come down to is really very simply this: We have been making a slow but sure effort to recapture and rehabilitate some of the programs that were crippled by the ill-considered, ill-timed, and unfortunate Gramm-Latta resolution and the reconciliation that came out of it, and that our committee knew at every stage of consideration of this legislation that this was one small step toward repairing some of the damage that was done when all these programs were lumped into the total budget during the consideration of Gramm-Latta.

Now, if this bill was coming to the floor at some new quantum leap into the future, with somebody's pie-in-the-sky idea of what we ought to be spending on programs on the basis of just trying to add more money to existing programs, I could understand the logic of the arguments being made from the other side. But when you examine this in the context of the actions already taken by this House and already taken by the Senate, you will find that these authorization increases are a responsible response that says: "All right, we have decided that Gramm-Latta went too far in putting the brakes on these programs. We have decided also that the current status of the economy in this country and the valued efforts being made by the people of this country and business and industry, as well as our institutions, toward an economic recovery ought to be encouraged. And one small way in which we can encourage that recovery is at least to demonstrate that we are not taking this step to back off on the kind of support services that are necessary to underpin a real recovery, not a temporary recovery for some people, but a real recovery for the country that will make us once again a viable and strong economic factor in the world.

□ 1200

I think that nothing is more essential that we are going to do this year on this floor than to send to the people a message that we are in favor of a postive response to the questions raised by the President and others by the passage of this bill intact.

I urge my colleagues to vote against the effort to gut the bill by striking title IV.

Mr. GUNDERSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, assume if you will for just a second that Halloween has arrived early this year; and assume if you will, or if you can believe, that there were no commission reports on education in this country in 1983; that instead of a public outcry in support of education in this country, there has been a public outcry against education and all education funding.

If you would add those 2 events together, you would probably come up with a scenario like we have here today—which would say that we will try to masquerade in on a very innocent, legitimate, bipartisan, bill reauthorizing rehabilitation programs for the disadvantaged Americans among us. Now, you are going to try to sneak into that bill a little bit of funding for some education programs, because you assume such funding cannot stand on its own merits and you know there is no public support for it in this country.

That is exactly what we are doing here this afternoon. Take a look, if you will, at the process that got us here, mentioned by the gentleman from Illinois earlier.

This bill, or its predecessor, was considered by the subcommittee, it was considered by the full committee, and went to the Rules Committee with this strange amendment, known as title IV. The amendment was so strange that the Democratic Rules Committee said, "Come on, guys; this is too much. It cannot work. It is not fair. It is not at all proper to the bill."

So they had to go back and start over. They had to go back and rewrite the bill, reintroduce a new bill so that they could come up here today and debate this, try this Halloween event,

without being called nongermane in their amendment on title IV.

Take a look, if you will, at the bill in front of you. Title I, amendments to the Rehabilitation Act of 1973. Title II, reauthorization of the Helen Keller National Center for Deaf-Blind Youths and Adults. Title III, National Commission on Federal Assistance to Disabled Americans.

Is there anybody who disputes any of that? In the 63 years that this bill has been in effect, there has never been controversy, there has never been anything but bipartisan support for this particular proposal until now, September 13, 1983, when we see this little game being played at the jeopardy of 1 million disabled Americans in this country.

Let us understand a couple of things. The question is not at all the funding of the programs in title IV of this bill that is being debated. Every program in title IV of this bill is already authorized and is going to be around regardless of what we do with title IV today. They are going to be here. If you want to debate funding for those programs, you want to debate funding for education for fiscal year 1984, my friends, do it when we get to the HHS appropriation bill or do it when we get to the continuing resolution. That is where we ought to have the litmus test this year as to what our commitment at the Federal level will be for funding of education programs.

Second, let us understand that there is nothing in this amendment which constitutes a litmus test on education. Somehow or other we are getting the impression out here today that either you are for or against education, depending on how you vote on the amendment on title IV.

I did a little work, taking a look at some of the numbers that we have. The fact is, if you would take the 1983 appropriation levels for the 10 programs in title IV and you would take not the Democrat but the Republican budget recommendations on those numbers, you would find that the Republicans, the minority, have called for a minimum increase of between $350 million and $400 million just in those 10 programs.

If you want to make it even more stark in the contrast, the fact is, if you take a look at those numbers, what the Republicans have recommended for these 10 programs is over $2 billion more than the President requested for fiscal year 1984.

There is nobody in this body today, it ought to be clearly understood, who is saying let us cut these 10 programs, or even let us hold them at their own level. We have indicated elsewhere and we will indicate in the proper process through appropriations bills or continuing resolutions what that funding level ought to be.

The real question that we are debating here today with this particular amendment is: What are we going to do with 1 million disabled Americans in this country, those people whose program expires on October 1 of this year?

At the very worst, if title IV is kept in the bill and the bill passes this House and goes to conference, we are going to have a long, acrimonious conference between the House and the Senate. One of the speakers before me, one of my colleagues, said this has always been bipartisan. Let me tell you what is bipartisan in the Senate.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. GUNDERSON) has expired.

(By unanimous consent, Mr. GUNDERSON was allowed to proceed for 3 additional minutes.)

Mr. GUNDERSON. Let me tell you what is bipartisan in the Senate. The Senate has passed a clean Rehabilitation Act reauthorization with nothing like title IV. They have already come down where they are at on this thing. So, if we go to conference with them, the whole debate is going to be over title IV, which does not belong in this bill, which certainly will delay it beyond October 1, and even if the conference committee comes out with title IV in it, we have a Presidential veto.

So then, all of a sudden we have to come back to the drawing board and start all over and do it without title IV. We have, somehow this year, been fairly successful in this body and in this Congress to be able to pass appropriations bills and authorization bills thus far that the administration and the Congress have been able to agree on, despite I think, for prospects for such success expected earlier on this year.

So the real question we get at then is: What are we going to play today? As I said yesterday to those of you who were here, play politics if you want with budgets. That is legitimate. It is part of the process in this body. Play politics, if you want, with tax policy. That is part of the process. Play politics, if you want, with education and with education votes. We expect that in this body. Play politics, if you want, with foreign affairs.

But I do not think there is one of us, not a one of us in this body, who has the right to play politics with the future and the lives of 1 million disabled Americans, and that, my friends, is what we are going to do if we do not remove title IV from this bill.

PERFECTING AMENDMENT OFFERED BY MR. LAFALCE

Mr. LAFALCE. Mr. Chairman, I offer a perfecting amendment.

The Clerk read as follows:

Perfecting amendment offered by Mr. LAFALCE: Page 26, after line 5, insert the following new section:

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF ACT

SEC. 403. Notwithstanding any other provision of law, there are authorized to be appropriated $28,000,000 for fiscal year 1984 to carry out the National Technical Institute for the Deaf Act.

Mr. LaFALCE. Mr. Chairman, I offer this amendment on behalf not only of myself, but also on behalf of Representatives CONABLE and HORTON.

In 1965, Congress passed the National Technical Institute for the Deaf Act. Something else happened in that year also. There was a great rubella epidemic. If we substract 1965 from 1983–84, it will be realized that that rubella epidemic means that the number of people knocking on the entrance door to the National Technical Institute for the Deaf has increased tremendously because of the rubella epidemic that took place years ago.

□ 1210

As a matter of fact, last year there were approximately 300 students entering NTID, as it is called, and this year there are close to 600 students entering NTID.

Now, the Gramm-Latta resolution authorized $26,300,000. That clearly would have been grossly inadequate in fiscal year 1984. We need more money. Yet the chairman of the Appropriations Subcommittee with jurisdiction over this is reluctant, understandably, to appropriate more than is authorized. The Reagan administration, recognizing the need for additional money, has requested not $26.3 million but $28 million.

The amendment offered by myself and by the gentleman from New York (Mr. CONABLE) along with the gentleman from New York (Mr. HORTON), simply authorizes $28 million, a 6.5-percent increase, to bring the authorization in line with what the appropriation request of the Reagan administration is. It is a minimal increase in comparison to the tremendous increase in the number of new entrants this year in NTID.

Mr. CONABLE. Mr. Chairman, will the gentleman yield to me?

Mr. LaFALCE. I am delighted to yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I appreciate the gentleman's taking the leadership on this amendment. The National Institute for the Deaf is actually in my district, although it adjoins that of the gentleman very closely. It is a tremendously constructive institution.

OMB itself favored a $28 million appropriation in order to reflect the increased demand for the services of this institution as a result of the rubella epidemic in the early 1960's, and it has been simply a technical omission, a technical problem, that has kept the full $28 million from being authorized.

The gentleman's amendment, as I understand it, would correct that.

Mr. LAFALCE. That is correct.

Mr. CONABLE. Mr. Chairman, I would like to identify myself with the effort the gentleman is making here, which I believe has support from the administration, as well as from Members on both sides of the aisle, because of the obvious need clearly demonstrated and accepted by all parties. I thank the gentleman for the leadership he has taken on this issue.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. LAFALCE. I am delighted to yield to the gentleman from New York.

Mr. BIAGGI. Mr. Chairman, I thank the gentleman for yielding, and I commend him and his colleagues, the gentleman from New York (Mr. CONABLE) and the gentleman from New York (Mr. HORTON), for their joint participation in this amendment.

Clearly this is another illustration where Congress is acting in a thoughtful way. Although rubella was part of our American history, its consequences continue.

Mr. LAFALCE. Mr. Chairman, I think this would be a case of both Congress and the administration acting in concert in a thoughtful way.

Mr. BIAGGI. Mr. Chairman, that is clearly the case.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. LAFALCE. I yield to the distinguished committee chairman.

Mr. PERKINS. Mr. Chairman, the current authorization ceiling set by Gramm-Latta for the National Technical Institute for the Deaf, NTID, for fiscal year 1984 is $26,300,000. NTID has presented evidence that this level of funding is insufficient to accommodate those students who are enrolling this fall.

To date, NTID has 578 paid freshman registrations for this fall compared to 340 in a normal year and a projected enrollment of nearly 1,250 students as compared to 993 last year.

The LaFalce-Conable-Horton amendment increases the authorization level for NTID for fiscal year 1984 to $28,000,000. This is an increase of only $1,700,000 over the fiscal year 1983 current funding level.

Mr. Chairman, we accept the amendment on this side. We feel that it is an excellent amendment.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. LAFALCE. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, may I inquire, was the gentleman's amendment an amendment to the Bartlett amendment which is currently under consideration?

Mr. LAFALCE. Mr. Chairman, it is a perfecting amendment, and if my amendment is accepted, it is my understanding that we would immediately go back to the consideration of the gentleman's amendment. It would in no way negate the amendment offered by the gentleman from Texas (Mr. BARTLETT).

Mr. BARTLETT. I understand.

Mr. LAFALCE. It would be just an intervening amendment to perfect title IV.

Mr. BARTLETT. So it is not an amendment to the Bartlett amendment?

Mr. LAFALCE. It is a perfecting amendment ot title IV itself.

Mr. BARTLETT. Mr. Chairman, I commend the gentleman, and we accept his amendment.

Mr. GOODLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Rehabilitation Act Amendments of 1983. But, unfortunately, I have been told by many that what we have done in title IV is done primarily to embarrass the President, realizing that, of course, he would have to veto the bill and realizing that next year is the Presidential election year.

That is politics, and I guess that is normal. But I also resent it because it really embarrasses me. There is not any Member in the last 2 years, I do not believe, on my side of the aisle at any rate, that has stood more, and many times alone, in trying to do the very best we possibly could for title I or chapter 1 or education for the handicapped or vocational education or WIC, and there is not any Member who would be more receptive to trying to do something logically and under careful consideration for all of those programs at this point.

But basically what we have done here is make the handicapped hostage to all other interests. We are holding them hostage to all other interests.

I am sure that most everybody understands that with title IV the bill would have to be vetoed, and then, of course, as I indicated, the work that needs to be done at the present time in relationship to the Rehabilitation Act goes down the drain.

I would like to again caution my colleagues that just throwing money at educational problems from the Federal level is not going to solve those problems. What we need to do with all of the programs that are included in title IV is to look very carefully at those programs and see what we can do to improve them. We cannot do that in the manner in which my committee did it and in the manner in which we are doing it now.

So I would hope that we could take those issues in title IV separately. We have time to do that. With the speed with which title IV was adopted in committee, it is obvious to me that we could use that same kind of speed and look at each one individually, provide the necessary increases and the necessary improvements, and get the cooperation of the local school districts and the States so that we in fact may do a better job.

Again, let me say that what we are doing here is basically holding the handicapped hostage to all the other interests, and we are going to kill the effort for this reauthorization of the Rehabilitation Act. So I would hope that my colleagues would think seriously about what we have done in committee in relationship to title IV, and that we do what we have to do, which is basically to pass the Rehabilitation Act Amendments of 1983 and then look expeditiously at the other programs and see how we can improve those programs, which in all probability would include some increased funding.

Again I would plead with my colleagues not to cause the Rehabilitation Act Amendments of 1983 to go down to defeat eventually because of a veto and to handle that issue now and then very deliberately handle the other issues that are included in title IV, because, as I said, there is no stronger supporter of most of those programs than I.

Let us look at another item in title IV—impact aid. How much consideration have we given to it? None. The impact that we presently have is not being addressed by the Congress of the United States. We are still focusing on an old impact aid program that in many instances is no longer needed or necessary and in other instances is needed. But the real impact, of course, is in the area of the new refugees that have come into the areas such as Dade County and California and many other places.

I have introduced legislation, and we have had a bipartisan effort along that line, but we have done nothing basically to help those people.

That is why I say it is so important that we look at each issue in title IV separately and do the kind of things that have to be done to improve the educational system in our country. But let us not destroy the Rehabilitation Act Amendments of 1983 simply because we are trying to embarrass someone or simply because we think this is the way to go without giving it very much thought.

Mr. Chairman, let us pass the Rehabilitation Act Amendments of 1983, and then let us deal deliberately and as quickly as possible with those items that are in title IV.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the perfecting amendment.

Mr. Chairman, I rise in strong support of the amendment offered by my friend from New York which increases the fiscal year 1984 authorization level

for the National Technical Institute for the Deaf to $28 million.

NTID is an outstanding example of our efforts to provide quality educational opportunities to the handicapped so that they can compete in the job market. Historically, the unemployment and underemployment rate for deaf Americans has run very high, which led to the establishment of NTID by the Congress in 1965. As a branch of the Rochester Institute of Technology, NTID serves both men and women while allowing them access to the broader educational facilities of the RIT campus.

Each year approximately 3,000 deaf students are graduated from high schools nationwide, of which NTID is able to admit 350. Due to the Rubella epidemic that swept the United States between 1963 and 1965, there will be over 7,200 deaf 19-year-olds this year. This fall's admission level for the entering class of NTID is nearly 600, almost twice the number normally accepted. Clearly, Congress must recognize the impact of the Rubella epidemic by authorizing these desperately needed funds for NTID.

I would point out to my colleagues that the President understood the severity of NTID's problem when he recommended $28 million in funding for the Institute. Additionally, the other body has passed authorizing legislation setting funding at $28 million.

I urge my colleagues to recognize the needs of the hearing impaired by supporting this important amendment.

□ 1220

Mr. BARTLETT. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the LaFalce amendment.

I would just make one point. If the Bartlett amendment is passed, which deletes titles IV, I would then move to add the LaFalce amendment as a separate title so that this National Institute for the Deaf amendment would still be adopted by this House.

I yield back the balance of my time.

The CHAIRMAN. The question is on the perfecting amendment offered by the gentleman from New York (Mr. LAFALCE).

Mr. KILDEE. Mr. Chairman, I move to strike the requisite number of words and rise to oppose the Bartlett amendment.

Mr. Chairman, I am really disappointed over the questioning of motives on this bill. We even heard the expression "playing politics."

I personally am convinced of the sincerity on both sides of the aisle and certainly among the members of this committee. I am, as I say, disappointed that we would question motives.

For all of my professional career as a teacher, and my 18 years in the legislative career, I have fought hard for vocational rehabilitation and I am fighting hard for that today. I do not diminish my fight when I also try to take care of these other programs that were emasculated by Gramm-Latta.

So let us not question sincerity. I do not question your sincerity over there and I would not question ours over here.

We have heard that there has been a lack of hearings on this bill. There were no hearings, zero hearings, when you brought out that big New York telephone directory size Gramm-Latta bill. There was no hearing on that, yet we were urged to vote for that.

In my 18 years of legislative experience I have never seen greater violence done to the legislative process than was done in Gramm-Latta, and we are trying to repair the results of that violence today.

We are being very consistent in trying to execute that repair. Our procedure on H.R. 3520 is most faithful, follows the rules, and is extremely faithful when we compare it to that legislative debacle in 1981.

I want to point out, too, that this body is the body that is always fresh from the people. Every 2 years every Member of this body has to give an accounting of his or her stewardship. We gave an accounting of our stewardship subsequent to the passage of Gramm-Latta in 1981 and the people spoke and they spoke loud and clear. I think we are trying to respond to the words they spoke to us and we are trying to restore some of the damage that was done in Gramm-Latta.

You say no hearings. We have had countless hearings. You have been there; I have been there. I go to hearings. I have here a long list of hearings on these components in title IV.

We had weeks of hearings. We had hearings on title I. We had hearings from March 23 through April 21 on title I. That is like an eon of hearings compared to the zero hearings on that which we are seeking to repair: Gramm-Latta.

So do not fault us for a procedure. The violence to procedure is what has led to what we are trying to do right now, to restore these programs. All we are doing in restoring these programs is keeping our own word as expressed by both Houses of Congress. We are trying to raise these levels to the levels presumed in the first budget resolution, no more than that.

Did we mean it when we passed that first budget resolution? I meant it. I am sure the Republican-controlled Senate meant it.

If we meant it let us follow through on that declared intention. So let us not really question sincerity. Let us not question certainly procedure when we are trying to undo the damage of that procedure in Gramm-Latta.

Mr. GUNDERSON. Mr. Chairman, will the gentleman yield?

Mr. KILDEE. I will be glad to yield.

Mr. GUNDERSON. I only rise to ask a couple of questions for clarification. If we are going to talk about procedure, if we are going to assume that, No. 1, there are all kinds of hearings in our committee on title IV, and I do not ever recall any organized hearings on title IV as it is written, but let us assume they were there, I think the gentleman would have to admit also then that we ought to assume that the Budget Committee had all kinds of hearings on the President's proposed budget which was the beginning of Gramm-Latta.

Would the gentleman not agree that there were hearings then?

Mr. KILDEE. I absolutely do not. I do not think that they took the input from our committee. They gave us a short time and then Gramm-Latta did not listen to our input.

That was written in Dave Stockman's shop, not here. It was written at the other end of the avenue. I deny what the gentleman says. He is wrong.

Mr. GUNDERSON. Then I guess the gentleman is in disagreement?

Mr. KILDEE. Totally; absolutely.

Mr. GUNDERSON. Would the gentleman yield further?

Mr. KILDEE. I would be glad to yield.

Mr. GUNDERSON. I think the second point that needs to be brought out here, we hear the charge about the fact that nobody knew what was in Gramm-Latta. I was here when we debated Gramm-Latta and I was here when that whole budget resolution came up. I recall very correctly that there was a major effort to print Gramm-Latta as a substitute to the budget resolution brought to the floor and, if I recall, the majority would not let us do it.

We had to defeat the rule in order to bring that up and get it printed and that is why no one knew what was in it.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. KILDEE) has expired.

(By unanimous consent Mr. KILDEE was allowed to proceed for 1 additional minute.)

Mr. KILDEE. In response to the gentleman, we certainly know that no one knew what was in it unless they were omniscient, which is reserved to the Almighty, and no one could know all that was in Gramm-Latta. But let me remind the gentleman that you do not have to eat a whole egg to know that it is rotten. There was enough in there to let us know that it was not to be voted for. I yield back the balance of my time.

Mr. LOTT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of H.R. 3520 and the Bartlett amendment.

Mr. Chairman, I really did not realize that we were going to get into this much of a debate on Gramm-Latta or on procedures. We could, certainly, have an interesting discussion on the procedures that have been involved in getting this bill to the floor of the House, particularly the curious way it was handled in the Education and Labor Committee, without casting aspersions on any member of the committee.

It was also interesting in the Rules Committee. The bill had to go before the Rules Committee twice before it was granted a rule.

I think that, to say the least, the gentleman from Texas (Mr. BARTLETT) has done an outstanding job in presenting his amendment and on the facts involved and surrounding this amendment. There are a lot of questions as to whether or not the bill and the committee's amendment was handled properly from a germaneness standpoint.

There is a question about having this omnibus legislation brought to the floor of the House instead of just the rehabilitation legislation that we expected.

Also, we are talking about additional funds in a bill that was already pretty substantial. This bill authorizes $6.2 billion over 5 years for rehabilitation programs.

But I want to emphasize just a couple of points. I do not want to get into procedure. I think the Members need to know that it was a very unorthodox way that this legislation was brought to the floor.

I want to talk a little bit about what we are doing here and the risks we are taking. This is a very popular program. It has bipartisan support.

The Rehabilitation Act amendments would pass overwhelmingly with few objections. It is a good program.

But now, through this unorthodox procedure, we have the addition of $1.6 billion for the number of other programs, admittedly most of them very good programs, many of which I have supported. We are talking about the additional amount for impact aid, a 30-percent increase for education to the handicapped, a 13-percent increase for vocational education, and 18-percent increase for adult education—all wonderful, good programs. But it is not as if they did not already have some authorization. This is additional authorization.

This is obviously an attempt to go back and rehash Gramm-Latta and try to recoup some of the responsible savings that have been made over the past 2 years.

The thing that is interesting to me is that we have just returned here to the House after a long recess. I have talked to Members on both sides of the aisle and I have heard them say "Oh, while I was at home I heard a lot of talk about Lebanon and I heard a lot of talk about the Korean passenger airline incident, and I heard talk about Central America," but every Member heard talk about the economy.

□ 1230

There was an underlying comment at every meeting, about the economy, concern about interest rates, and the deficit. And I am sure we all decried the deficit when we were back in our districts. We said it was horrible and that it can be the one thing that could lead to higher unemployment, to inflation going backup, and to higher interest rates; we said we ought to do something about it.

My colleagues on the other side of the aisle say that the way to deal with it is to raise more taxes. Well, I did not have a single person tell me while I was home that we should raise more taxes to reduce the deficit. Nobody said, "Hey, I am undertaxed." They said, "Your people need to go up there and get your house in order. You should find ways to reduce spending."

They did not limit it to social programs or education programs, I am sure they would apply it across the board. "You do a better, more responsible job of reducing spending to reduce the deficit."

So, we come back here to the House and we are going to deal with these problems that we heard about when we were back home. What is the first thing we do? We take up a bill, a good one, but through this unusual procedure we have a title that would add an additional $1.6 billion. The first act we take in the House of Representatives, after having been home for this district work period, is to add more spending, more money to the deficit.

So, I ask my colleagues to look seriously at the Bartlett amendment. Let us pass the Bartlett amendment and then let us go on and reauthorize the Rehabilitation Act as it should be passed, as an individual, clean bill.

Now, the second part of what I wanted to say here today is my concern about the callous way, really, that we are dealing with this very important program. You have to admit that we run the risk of this program being altered substantially in the Senate, or maybe being held up in the Senate, because of what is included in title IV. Even if it should get through the Senate and through the conference it runs the risk of a veto. Why would we take the risk of this important, good legislation being vetoed and having to comeback to the floor of the House, to fight another battle and delay this good program?

Let us pass the Rehabilitation Act amendments clean.

We could deal with these other issues and we will deal with these other issues as the year progresses.

So, I have to question the procedure, although I am sure it was done with good intentions on both sides of the aisle. This is not the way to do it. We are flirting with danger in risking the passage of this legislation, as it should be.

The leadership urges the membership to support the Bartlett amendment.

Mr. BIAGGI. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the Bartlett amendment.

I think it is unfortunate that we confuse procedure with substance and the merit of the bill. The question of procedure, however, deserves some attention. It is not the first time it was raised on the floor. As a matter of fact it was raised in committee, it was raised before the Rules Committee, it was raised in the press releases, the type of which I think performed a disservice to the members of the committee.

Comments were made that the bill was not given any thought, title VI, at least, was not given any thought. I wonder if people understand what the full implication of that statement is. It impugns the committee, it casts reflection on the chairman, and it diminishes the efforts that we collectively make.

"Title IV without any thought"? You have heard that we have had hearings, extensive hearings on the individual issues and they have been sustained.

But you have also heard that the House is responsible for so many problems of overspending. It is said this side of the aisle has controlled the House over the years. I think that is a condemnation or at least it was intended to be a criticism of the people of this country who have sent these Representatives to the House.

I do not think that people would apologize for their choices because over the years the increases have been made to provide additional benefits to the educational community. And if I recall correctly, in the seven terms that I have been on that committee, even the gentleman from Illinois (Mr. ERLENBORN) for whom I have the greatest respect and admiration, because his contribution is substantial and very meaningful, we disagree oftimes and there are times of agreement, but if I recall correctly, he voted for many of these bills to come out of committee.

So, if he is about to charge that we are spending too much for education, I would suggest that he look to his own record. I do not think he should look to it with shame or apology; I think he should look to it with pride because he has responded to the needs of our country.

The statement was made the legislation was considered in the dark of night. How ominous a statement that is. But that is in the record. The gentleman from Illinois made that statement. I wonder sometimes if emotion does not take full sway. "In the dark of the night" makes it sound so surreptituous, so evil, so clandestine, when nothing could be further from the truth.

I talk to this in terms of the criticism of procedure because we are here today at the moment of truth, if you will, to have manifested our respective opinions.

Also reference was made to the Rules Committee.

Senator CLAUDE PEPPER, the chairman of that committee, said there was some controversy and he suggested that we return. It is not the first time it has been done. It has been done many times. It was done in order to eliminate the controversy, as best we could. A whole new bill was offered and reconsidered and passed.

That is the bill we are talking about today. And the Rules Committee gave us that rule. So, when we talk about procedure I would suggest clearly that we put that aside, put it aside; it is a strawman that has no place in our deliberations. Let us talk about the merits.

Let us talk about title IV with some programs, very, very essential programs that have been proven to be cost-effective and they work, and they work.

Only they work because we continue to put them forward, yes, even on a bipartisan basis. And I respect the other Members on the other side of the aisle who are on the committee who worked very diligently and the author of this amendment is one of those gentlemen. And I disagree but I certainly respect his right to offer it and to make his point.

But, with every review, every review of these 10 items proves that they are cost-effective and they work.

Now, Gramm-Latta is held out to be the sacrosanct, alpha and omega provision that this Congress enacted a number of years ago. Perhaps that was the temper of the times.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. BIAGGI was allowed to proceed for 3 additional minutes.)

Mr. BIAGGI. Some people who voted for that resolution at that time have since come to regret it. And Congress, this year, in March of this year, with the first budget resolution, voted for an additional $1 billion.

This vehicle provides us with an apportunity to provide additional moneys. I do not believe the President will veto this bill, I really do not. Ofttimes it is offered as an argument to diminish the advocates of the legislation but more often that threat fails to materialize.

I know the President is concerned about education. I am pleased with his approach to the quality of education. He could not find fault with these 10 programs, clearly not find fault.

Someone suggested we are playing power-play politics. I could not disagree more.

Those are extraneous, irrelevant matters, those are just arguments offered in the form of criticism but not dealing with substance.

Yes, the major thrust of the bill is vocational rehabilitation, which no one questions. The 10 provisions in title IV, I do not believe anyone questions. They just question perhaps the additional funding. Well, the Congress spoke in the early part of this year, the Congress allowed $1 billion additional; it is important that we pass this legislation and important that we pass it fast because next week the Appropriations Committee will be dealing with this matter.

□ 1240

And if we fail to pass it today, they will not have the authorization to appropriate. And failing in this authorization legislation we will have performed a disservice.

I regret having to take the floor against the gentleman's amendment, but I feel very strongly about it, and I think when all is said and done, and this legislation is passed by the House, and hopefully by both parties, that my judgment will be vindicated and that the President will, in fact, sign the bill.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. BIAGGI. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding.

I respect the gentleman from New York a great deal and we have worked together on a number of different items. I would simply remind the gentleman no one on this side of the aisle that I have heard has spoken against these 10 programs, but against a 34-percent increase in these programs is such a precipitous manner. There is no one over here who has spoken against chapter 1 or the museum services, but we have spoken against a $1.6 billion increase that is suddenly presented onto a bill that is only $1 billion in the first place.

Mr. BIAGGI. I could not agree with the gentleman more. I know that. And I know the gentleman's sentiment and I know the sentiment of many Members on the gentleman's side of the aisle, but clearly, the undeniable fact is there is not one on the gentleman's side who has ever offered to increase the authorization. I think these programs deserve additional funding.

Mr. BARTLETT. I thank the gentleman.

Mr. MURPHY. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

The gentleman from Mississippi wondered how we got into Gramm-Latta. Well, perhaps he was not on the floor when the gentleman from Illinois mentioned historical perspective and said that in 1981 Gramm-Latta brought rationality to our fiscal structure.

That rationality produced a $210 billion national deficit with continued high unemployment in his district and in mine, a national deficit $140 billion higher than any prior administration's top level of deficit.

And yet at the same time in that summer of 1981 $50 billion annually, for the entire duration of this administration, $50 billion was cut from programs to help Americans, to be spent in America, and to help American programs.

How do you account for a $50 billion annual cut, many of them in public education, and yet hand us the bill of goods that it was fiscal rationality?

And following the $50 billion annual cut, now going well into the third year, the President came out with a Commission on Excellence in Education, which produced for him the results that we have been hearing in the Education Committee since the summer of 1981. Yes, there is criticism against public education. And my good friends on the other side say, you cannot throw money at a problem and solve it, but I tell my colleagues you cannot continue to take away billions of dollars in Federal support for public education and all of the programs that are included in title IV and thrust that burden upon our local school districts. In Pennsylvania, in my district, that is what I heard when I was home. Every school district millage had increased and the answer is obvious, the more we cut from the Federal responsibility and the more money we send overseas for a number of projects that are not related to the welfare of Americans, the more that is going to be thrust back on our local school districts.

Five of these 10 programs are directly connected with public education, chapter 1, impact aid, vocational education, adult education and handicapped education. Two more, raising it to seven, are closely tied to education, the arts and the humanities and museum services. Well over the billion of the $1.3 billion that is being asked for are for educational programs to aid a deteriorating situation that is recognized by the minority, the President and the majority. Clearly we have to do something.

I tell my friends in the handicapped community that when this amendment was offered I specifically asked my chairman for a meeting of all of

the subcommittee chairmen. Yes, I am concerned with the handicapped in this bill in titles I, II, and III.

And following that meeting I was convinced that our handicapped bill was not in jeopardy, but that we faced a very serious time element, as pointed out by the gentleman from New York, that we had to do something for these other programs to give the Budget Committee and give the Appropriations Committee some credence to their work.

Now we are accused of sneaking in bills without consideration that cannot stand on their own and of taking action in the dark of the night. Well, I offer the gentleman an option. Withdraw his amendment and introduce 10 separate amendments and we will consider each one of these separately and the gentleman will see on rollcall votes in this House how each one of these educational programs can and would stand on their own.

No, they have chosen to have a group amendment to strike them all and then point to the least popular and say this just is not the time and this just is not the way to do it.

It was not done in the dark of the night, although my committee staff thanks the gentleman for the compliment that they worked late at night to draw these amendments. And I know the staff of the gentleman from Kentucky (Mr. PERKINS) works late in the night, but I submit to all the Members of the House how this came about.

We had meetings of our subcommittee members. Hearings have been held consistently for 2½ years on the educational needs by our committee. We have voluminous testimony and we are convinced that these programs are valid.

We then offered an amendment by the chairman before the full committee. The full committee debated acrimoniously for well over 2 hours on the first day that the amendment was offered. I was there and heard the debate.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. MURPHY) has expired.

(By unanimous consent, Mr. MURPHY was allowed to proceed for 4 additional minutes.)

Mr. MURPHY. Mr. Chairman, following that debate a rollcall vote was held by full committee, in daylight, and the measure was passed.

We went before the Rules Committee some weeks later and it was again vigorously debated by both the majority and the minority on its germaneness and the chairman and I asked the Rules Committee to fully consider it. They did. And we ordered them, that because of the dissatisfaction of our minority Members and to give the minority every opportunity to reexamine the figures we would take the matter back to full committee.

A new bill was drafted. A new full committee meeting was held. All of the statistics were present and read. It was the only measure in my 7 years here in the House that I have seen debated twice before the full committee and twice before the Rules Committee because we wanted it to be done in the light of day and, yet, these accusations persist.

I can only hope that the gentleman from Texas will reconsider my offer and withdraw his amendment and offer a separate amendment for each one of the subtitles in title IV and let us consider on a rollcall vote each measure. Then the gentleman will no longer have any doubt. I assure the gentleman that this body favors every small item in title IV. It will not even restore us to 1979 funding levels for our public educational program. This country, this Congress, and this President, will be shirking from our duty if we do not aid and assist our local school districts in the serious plight of education today.

□ 1250

Mr. BATEMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment. I want to note, however, that my support for this amendment does not in any way diminish my strong support for the impact aid program.

I do plan to support the authorization levels for inpact aid contained in the Department of Defense authorization conference report. These levels which are higher than those contained in H.R. 3520, represent a much more realistic committment to helping local school districts compensate for revenue lost due to the presence of Federal facilities.

The district which I represent provides an excellent example of the problems faced by communities where the presence of Federal facilities both diminishes local tax revenue and increases the demand for educational and other local services.

York County and the cities of Hampton, Newport News and Poquoson serve as the headquarters for the Army's transportation and training commands, as well as the home of the Tactical Air Command, the Naval Weapons Station and NASA's Langley Research Center. These facilities are an integral and welcome part of the peninsula community. However, unlike their private industry counterparts, these Federal installations take land out of the tax base and at the same time create a greater demand for local services.

Adequate impact aid funding is an absolute necessity if areas which support a large Federal presence are to continue to deliver quality education.

I am supporting this amendment because I feel that these increased authorizations should not be attached to this important piece of legislation. As the gentleman from Texas who serves on the Education and Labor Committee has pointed out, legitimate, responsible improvements in services and opportunities available to disabled Americans should not be "held hostage" by inclusion of matters which are not directly related. If certain of these programs deserve increased authorizations, and some of them such as improved aid may well deserve increased support, then separate authorization legislation should be brought before the House and Members should be given the opportunity to examine each program on its own merits.

Mr. HARRISON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like to speak briefly in response to two arguments that have been made here by the gentlemen on the other side. We were told by one gentleman that we must pass the Bartlett amendment because title IV—and I think this is a direct quotation—makes a blanket attack on the judgment made in the 1981 budget resolution.

By the same logic, Mr. Chairman, I would suggest that to pass the Bartlett amendment makes a blanket attack on the judgment already made in the 1983 budget resolution. And intervening between 1981 and 1983 was a thing called the 1982 election, and that somewhat changed the composition of this House. Some of the people who supported the judgment of the 1981 budget resolution are no longer here because their constituents also made a blanket attack on the 1981 budget resolution.

That leads me to a few words on what I consider the most bizarre argument that has been made in opposition to title IV. That is the argument that because title IV is part of the Rehabilitation Act and because an expression has been put forth by the Director of the Office of Management and Budget that he would recommend a veto of the Rehabilitation Act if title IV is included when it reaches the President's desk, that somehow or other we must take title IV out because otherwise the bill will be vetoed, and if the bill is vetoed we will be responsible for 1 million handicapped people losing the benefits of the Rehabilitation Act.

I submit, Mr. Chairman, that the person who would be responsible for a veto depriving 1 million handicapped persons of the benefits of the Rehabilitation Act is the person who uses the pen to sign the veto. Mr. Chairman, when I was taught about American Government, more years ago than I want to remember, I was taught that the two branches of Government, the

executive and the legislative, were coequal and that the legislative must exercise its best judgment and the executive must exercise its best judgment.

So I submit, Mr. Chairman, that the legislature has exercised its best judgment. The other body and we have passed the 1983 budget resolution. All title IV seeks to do is authorize levels contained in that resolution.

Now to say to us that you cannot do that because the executive disapproves, that somehow or other you will be responsible because the executive will veto the bill, is to deny the equality between the branches of Government and to suggest a relationship that was fairly common between the French monarchy and the estates general, that the legislature could do only that which the executive approves, but is not and should not be indicative of the relationship between the coequal branches of the Federal Government. I think that we today should continue in the best judgment of this Congress, should defeat the Bartlett amendment and sustain title IV. And then the executive will have to exercise his best judgment. If the 1 million handicapped people of this country are denied the benefits of the Rehabilitation Act, let it be known that the hand that signed the veto caused the harm.

Mr. KOGOVSEK. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I stand in opposition to the amendment offered by the gentleman from Texas (Mr. BARTLETT) to strike title IV. Congress has once already approved an increase in funding for education programs through the first budget resolution passed not too long ago. We approved an increase in the budget for education because we have come to realize that our previous cuts have severely hurt hundreds of thousands of people dependent upon them.

We are only dealing with the most important and most effective education programs in the title IV increases. The chapter 1 program, which has been hailed as the most successful elementary education program the Federal Government has ever established. It has helped thousands of disadvantaged children gain a proper education. The education for the handicapped program, which assists local schools with the expensive process of educating the handicapped. The vocational education program and the adult education program, which is particularly important today because of the unemployment situation in our country.

Title IV will allow the Appropriations Committee to make increase in these programs, if they see fit, and not violate Gramm-Latta ceilings. Congress has once already voiced its support for increases in education, we must continue our support for education again today. I urge my colleagues to vote "no" on the Bartlett amendment.

Mr. PENNY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I note with interest some of the statements in support of this amendment. On the one hand, we are told that we should not decide the issue of authorizations for these various programs in this bill, that we should instead debate these items during the appropriations process or that we should debate these as we consider the second budget resolution for this year.

The fact remains that the first budget resolution of this year has decided the issue of our commitment to quality education, and the provisions of title IV of this bill simply ratify that commitment to education reflected in the first budget resolution.

We are also told time and again that those who support striking title IV really stand in support of most, if not all, of the sections of title IV, but they just feel that as a package we must oppose it and debate those programs separately. If they support those programs, if they support in fact increases in those programs separately, why then can they not support title IV in its entirety?

Others have spoken eloquently on our side of the aisle in defense of title IV and all of the programs contained therein. I want to elaborate on just one of those programs.

Title IV of the vocational rehabilitation amendments, H.R. 3520, provides the authorization for a program which is unfortunately often seen as unimportant, arts and the humanities.

I believe that the product of a quality education is a fully educated individual. In order to be fully educated, one must not only be proficient in "reading, writing, and arithmetic," but must also have broadened perspective by studying such areas as the arts and humanities. Through studies of the humanities one learns to understand the past, which is necessary in order to appreciate the present and anticipate the future. Familiarity with the cultural aspects of our society increases tolerance, acceptance, and understanding of opposing opinions, customs, and factions.

The importance of the arts and humanities is well-recognized. In the words of John Fitzgerald Kennedy: "* * * art establishes the basic human truths which must serve as the touchstone of our judgment."

H.R. 3520 provides an opportunity to nurture cultural development throughout our country. Most of these arts and humanities dollars are administered by the National Endowment for the Arts and National Endowment for the Humanities. These funds are then awarded as State grants.

It is interesting and important to note that this authorization increase will simply leave arts and humanities funding at last year's appropriation level.

I appreciate the opportunity to vote in support of title IV of H.R. 3520 by opposing the Bartlett amendment. A vote of support for quality education is a "no" vote on the Bartlett amendment.

PERFECTING AMENDMENT OFFERED BY MR. GREGG

Mr. GREGG. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Perfecting amendment offered by Mr. GREGG: On page 25, after line 25, insert the following new subsection:

"(d) No education funds authorized pursuant to this title shall be expended in any school district or other political subdivision responsible for education unless such school district or political subdivision has a procedure for determining functional literacy as a condition for graduation from secondary public schools."

Mr. GREGG. Mr. Chairman, I introduce this amendment for the purpose of addressing the issue of why we are spending all this money. It is clear to me that there is a commitment in this House to spend a considerable amount of money at the Federal level on education. It is also clear to me that we should be asking for and getting in return for that expenditure something besides the failure of education which we have gotten over the last 20 years.

The recent report of the President's Commission has clearly shown that we are a nation which has serious problems with our educational system. One of those problems is that we are producing in many school districts students who leave their high school, after their high school education, receive a diploma and yet do not have a functional level of literacy. To say the least, they certainly do not have even the type of literacy which we need if we are going to be an expanding economy and for them to be competitive in the economy.

That is not fair to the students and it is not fair to the taxpayers who are footing the bills to pay for those students.

Thus, my amendment is really quite simple. It just asks and calls on those school districts to be more responsive to the needs of the taxpayer when he expends those dollars on education by requiring that there be a functional literacy test at the secondary school graduation level so that we will have a return for our dollars which is identifiable as versus vague as it has been over the last 20 years, which return over the last 20 years has unfortunately produced the shallow and ineffective education system which we find ourselves confronted with today.

So this is a simple amendment. I do not see why it should be controversial, and I would hope that it would be accepted by the majority.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Kentucky.

Mr. PERKINS. I thank the gentleman for yielding.

First, Mr. Chairman, let me say that I regret to oppose the amendment. I know the gentleman offers the amendment in good faith, but this amendment is nothing but a Federal control amendment. We never would, in the first instance, have enacted any of our school legislation if we had put this type of amendment in the bills.

In fact, it violates the prohibition against Federal control of education, section 432 of the General Education Provisions Act: No provision of any applicable program shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision or control over the curriculum, program of instruction, administration, personnel, or any educational institution, school or school systems or over the selection of library resources, textbooks, and so forth and so on.

We, in all of our legislation since 1949, have never put a provision of Federal control in any of our legislation. It is so simple. The gentleman is in good faith. We all want to see functional illiteracy eliminated just as soon as we possibly can, but I do not think that we could assist the States or the local school districts much from Washington by depriving them all of funds in this instance.

It would be my suggestion that we vote down this amendment, Mr. Chairman.

Mr. GREGG. Mr. Chairman, reclaiming my time, I find it exceptional if not incredible that the chairman of the Committee on Education and Labor would oppose an amendment which requires simple functional literacy as a return for the $1.6 billion of extra money which the taxpayers are being asked to foot over here.

The taxpayers of this country have been paying for one of the most expensive educational systems in the world, and what have they gotten for that? Well, according to the recent commission, they have not gotten what they should be getting. They have found that their return on that dollar has not been very strong. So why should we not, as a Congress, in addressing a national policy of education, which I believe is the position of both parties, that we should have a national policy on education, at least ask as a minimum that functional literacy be the return for the tax dollars that are being spent.

I just cannot believe that this Congress is willing to expend $1.6 billion and essentially throw it out there and say, "Well, we do not really care whether we get back for that any sort of value, any sort of education." That is not fair to the students.

The CHAIRMAN. The time of the gentleman from New Hampshire (Mr. GREGG) has expired.

(By unanimous consent, Mr. GREGG was allowed to proceed for 2 additional minutes.)

Mr. GREGG. That is not value for the taxpayers, and it is certainly not fair to the students. The students have a right to know that there is going to be some standard by which they are going to be tested once they graduate from that secondary school.

We do not tell the secondary schools the standard. We do not direct the books. We do not do any of the things in the sections just read by the chairman. All we say is, very simply, that there be some sort of procedure, and the procedure is left up to the local school districts, to determine functional literacy.

Is that an onerous requirement? No, it is not an onerous requirement. It is a very simple, reasonable requirement which I think we, as the representatives of the taxpayers whose dollars we are shepherding, should at least ask as a minimum for the expenditure of those dollars.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I would be happy to yield to the chairman, the gentleman from Kentucky.

Mr. PERKINS. I thank the gentleman for yielding.

Mr. Chairman, let me say that I think everybody agrees with the gentleman in principle, but this is simply a matter for the States and the local school districts, and we have no business trying to tell those people what to do and exercise Federal control in an area of this type.

Mr. GREGG. Mr. Chairman, if I may reclaim my time, I find it difficult to believe that what the chairman is saying is consistent with the amendment as proposed. The fact is that the amendment does not tell the local school districts how to determine functional literacy. It does not tell the States how to determine functional literacy. It just says, "Please, set up a procedure where we who are spending the money and paying for this education can have some feeling that we are getting a return on that investment, that we are going to get functional literacy out of the students which we are paying for."

That is not demand or directing a great deal out of any school district in the country.

Mr. MILLER of California. Mr. Chairman, I rise in opposition to the amendment.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I thank the gentleman for yielding, and I rise in opposition to the amendment.

Mr. Chairman, I rise in favor of title IV of H.R. 3520.

In a March 1983 speech, Secretary of Education, Terrence Bell, remarked that upgrading the Nation's schools is up to the individual States. "The State legislatures must levy the taxes and appropriate the money," he lectured the Michigan educators.

If the States had listened to Secretary Bell, we quite possibly would not be debating this bill. But the Republican-controlled State legislature in Colorado, for example, missed that lecture. And Colorado school students will suffer for it.

Since 1977, the State legislature has reduced income tax to the point where, recently, the Governor was suddenly informed that the State faced a $88 million shortfall. Rather that slow or stop the tax rate reduction, the legislature recommended a $55 million reduction in all State budget functions, $22.5 million to be taken from public education. For Denver Public Schools, this translated into a possible loss of $3 million above the $18 million deficit the school system already faced.

I am sure Colorado is not the only State to shirk its responsibility and ignore the recommendations of several administration-inspired national education studies about how to achieve excellence in the schools. Excellence, these reports conclude, means dedicated teachers, competent administrators, wise curriculum planning, and yes, money from all levels of government.

The Federal portion of total school revenue is a mere 7.7 percent, hardly a lavish Federal giveaway. Title IV does not seek to significantly alter that funding ratio. Nor does it forget our fiscal responsibility. We took the Gramm-Latta 3-year budget reduction medicine for 2 years and lived with a reduced Federal role of education funding. But that budget restriction assumed State ability and willingness to pick up the funding slack left by Congress.

Obviously, States are not doing that. What makes this so tragic is that the slack means hundreds of thousands of children will go poorly educated and professionally unprepared.

One program title IV seeks to strengthen that illustrates the dangers of this funding slack is compensatory education. Denver's share of compensatory money for the 1983-84 school year is $5 million to help teach over 5,000 students in elementary and secondary schools. Compensatory education there is used to improve reading skills, language skills, and math skills.

These skills are exactly what the President's Commission on Excellence in Education called "the foundation of success for the after-school years and, therefore, forms the core of the modern curriculum."

For the Federal Government to ignore the needs of students abandoned by State legislatures is to build their foundation of success on quicksand.

Mr. Chairman, I urge passage of H.R. 3520.

Mr. MILLER of California. Mr. Chairman, I rise in opposition to the Bartlett amendment. I think that, in fact, this discussion was settled sometime earlier this year with the passage of the budget resolution when this Congress, in responding to the elections, repudiated the horrendous cuts that were made by Gramm-Latta in the education programs of this country. To simply suggest that we should put it on automatic pilot and we should proceed from Gramm-Latta forward, I think, is an argument that cannot hold up to scrutiny.

What disturbs me most is the kinds of programs that the amendment would seek to cut funding from are those programs that are the very most effective programs the Federal Government funds with respect to education.

□ 1310

And that is not so because I say so. That is so because by all of the audits from previous administrations and by this administration, and by the testimony of the Secretary of Education directly telling this committee that he could not quarrel with the results, the effectiveness, or the impact of chapter 1, it was proved, but he simply did not want to spend the money. But he agreed in fact that the children did read better, they computed better, and they retained longer than those disadvantaged children who were not able to participate. He did not quarrel with that.

The Under Secretary of Agriculture and Mr. Stockman did not quarrel with the fact that for every dollar we spend in WIC, we save $3 in Federal hospital costs because we have healthy children and we have healthy births. The only question was whether or not we were going to engage in that kind of preventive activity. But again, they did not want to spend the money.

They acknowledged that there were tens of thousands of women who have been certified by the medical profession to be at nutritional risk and have a great likelihood of giving birth to a low-birth rate baby, with all that entails in the trauma to the child, to the mother, and to the family, and in cost to the taxpayers. They did not deny that, and in fact the program is effective.

They did not deny that millions of children who are handicapped have been helped because of our expenditures in education to the handicapped who used to receive their education in boiler rooms and in basements or who in fact were barred from public schools. They did not deny that those children are now receiving an education from which they were barred or that their opportunities for employment are enhanced. Not at all.

So what we are doing is we are taking the very programs that are designed to help the constituency which this Federal Government has made a commitment time and again to protect and to make sure that they had access to that education, and we are now seeking to turn the clock back and deny them the access to that education. I think it would be a terrible mistake for the Congress to go on record as doing that.

We have in fact repudiated the stands of Gramm-Latta with respect to educational expenditures. There is nobody in the national discussion on education who believes that we can get a better quality education by applying less money.

There certainly needs to be many reforms, and I think the gentleman from New Hampshire has addressed one. But each and every State is struggling with the issue of literacy, with graduation requirements, with course subjects, with longer school days, and with teacher proficiency requirements. But that is a proper role for the State departments of education; that is not the role for the Federal Government. I think that is the determination that has come out of the great 3-week debate that we had on the National Agenda on Education, that it is for the States to engage in the policies of reform and the policy of such requirements.

Mr. Chairman, I hope that the Bartlett amendment is voted down.

Mr. BARTLETT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Gregg amendment.

Mr. Chairman, I rise to support the Gregg amendment because if today we want to reauthorize, as the other side seems determined to do, 10 unrelated programs to rehabilitation, then the Gregg amendment is a logical extension of that reauthorization.

The House is beginning to realize, as we are watching the debate, that we have now drifted away from rehabilitation, where we should have been, and drifted into a debate on each of the other 10 programs.

One of the Members whom I respect very much a few moments ago made an eloquent defense of arts and humanities, which is a terribly good program. The issue today is, and ought to be, the jeopardy that title IV places on the prospects for 1 million Americans to be restored to productive lives. The amendment of title IV has nothing whatsoever to do with rehabilitation.

The Gregg amendment sort of brings us up short and says that if we are going to look at these other 10 programs, these are the kinds of amendments and considerations that perhaps our committee and other committees—and perhaps there will be other amendments on this floor—will offer to amend these 10 unrelated programs, because the House will want to do its will.

Let me bring us up short and talk about the numbers and the precise dollar amounts in both sets of the Rehabilitation Act. The Rehabilitation Act itself represents a spending for State grants of $1.037 billion, about a billion dollars. We struggled with that. We have had hearings since April. We increased the funding for rehabilitation by 9.9 percent, and yet, Mr. Chairman, this comes to us on the last day. We have heard the procedures recited on both sides, and there is no doubt as to the facts. Perhaps it was not in the dark of night, but it was in the dark of 9 a.m. before very many members of the committee saw this title IV. We added in $1.6 billion in increases to 10 unrelated programs.

Mr. Chairman, the point is that this committee in title IV adds more in increases than the original Rehabilitation Act proposed in the first place. Perhaps we have our priorities confused. Perhaps the committee should have debated the priorities, and perhaps we should have said, "Well, wait a minute. Perhaps disabled Americans would deserve a 34-percent increase, and we should have the other programs have a 9.9-percent increase." But we never debated that.

The Gregg amendment, Mr. Chairman, in short, demonstrates conclusively why title IV should be deleted, because amendments and propsals and thoughts such as the Gregg amendment should be considered by this House through the committee process and by the House as we would debate purely on the Gregg amendment. The argument has drifted all day, but it comes back to the jeopardy of the economy and the total jeopardy of those 1 million disabled Americans who are depending on this House to do the right thing on their behalf by passing a rehabilitation act that can become law by October 1.

The CHAIRMAN. The Chair will state that unless there are other Members who wish to speak to the Gregg amendment, the Chair will put the question on the Gregg amendment.

For what reason does the chairman of the committee, the gentleman from Kentucky (Mr. PERKINS), rise?

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words.

First, Mr. Chairman, let me ask the minority if they are serious about having a vote on the Gregg amendment. Is that what those gentlemen are wanting to do right now?

Mr. GREGG. Mr. Chairman, if the gentleman will yield, it is my intention to ask for a vote on this amendment, yes.

Mr. PERKINS. Mr. Chairman, as far as I am concerned, we can vote now on the Gregg amendment but not on the Bartlett amendment.

Is the Gregg amendment an amendment to the Bartlett amendment? Or is it a perfecting amendment?

The CHAIRMAN. The gentleman will suspend for just one moment. The Chair could not hear the gentleman from Kentucky and requests that he use the microphone.

Mr. PERKINS. Mr. Chairman, if I understand the Gregg amendment, it is a perfecting amendment to title IV, is that correct?

Mr. GREGG. Mr. Chairman, if the gentleman will yield, that is correct, as I understand it. That is what I submitted it for, and I assume the Chair has ruled to that effect.

Mr. PERKINS. Mr. Chairman, I certainly do not understand it as a perfecting amendment, and we are not through with debate on title IV.

If the Chair wishes to put the question on the so-called perfecting amendment, I have no objection.

Mr. GREGG. Mr. Chairman, if the gentleman will yield, I believe there are other Members who wish to address the Gregg amendment prior to the vote.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Gregg amendment.

The CHAIRMAN. The gentleman from Illinois (Mr. ERLENBORN) is recognized for 5 minutes.

Mr. ERLENBORN. Mr. Chairman, I do not intend to take the full 5 minutes.

Let me just say, Mr. Chairman, that the chairman of my committee has made the point that the Gregg amendment would violate the current law against Federal control of education. He read the section of law to which he had reference. I certainly agree with the philosophy behind that section and with the wording of that section, and in my opinion the Gregg amendment in no way violates that section or the philosophy behind it.

In no way would the amendment, offered by the gentleman from New Hampshire (Mr. GREGG), tell any school district what the course, curriculum, textbook, or any other content of their educational program must be. The amendment merely says, as the gentleman has indicated, that for the billions of dollars that this Federal Government is investing in State and local educational programs we ask merely that they establish a procedure for determining the functional literacy of our high school graduates before they are given their diplomas.

I think that is the least that we can expect for the Federal effort in our educational system, that our educational systems will make as a precedent to graduation from high school that the graduates be functionally literate. We know from all the literature that has come out in recent years that unfortunately that is not the case today. For anyone to support an additional $1.6 billion over the other billions of dollars of Federal funds we are already spending, without wanting to get in return for that at least functional literacy from our educational system, is to me, the height of folly and impossible to understand.

□ 1320

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I will be happy to yield to my colleague from Illinois.

Mr. HYDE. I thank my colleague for yielding.

Is the gentleman, and I am sure he is, familiar with the six R's that our high schools and colleges are spending too much time in teaching? Remedial 'riten, remedial reading and remedial 'rithmetic?

It seems to me the purpose of the Gregg amendment is not to establish a process nor to mandate a method, but to establish a goal, a very general but very important goal: simply to have graduates who can read and who can write and who can add a simple column of figures, functional literacy.

To say in setting that as a goal, as we supply the millions of dollars we are asked to supply, is somehow an encroachment that seems to me to be overkill.

I certainly think the Gregg amendment has great merit to it in simply setting the goal that we hope to attain in the dim, distant future of functional literacy for our graduates, and I thank the gentleman for yielding.

Mr. ERLENBORN. I thank the gentleman for his contribution. I agree with his remarks.

I think we have had, since the report of the Commission on Excellence in Education, a very good national debate on what our educational system should be and the goals that we should have for the system. I think this is one of the very minimal goals that we should establish. This certainly is not the end of our Federal attention to our educational system, but certainly we should begin setting these Federal goals and this is one of the very basic goals.

I would hope the amendment would be adopted.

Mr. FORD of Michigan. Will the gentleman yield for a question?

Mr. ERLENBORN. I am happy to yield to the gentleman.

Mr. FORD of Michigan. Perhaps the gentleman could help us. Everybody is using the term functionally literate over there like it was an exact. I know what two and two used to be. It comes out four no matter how you do it.

How does the gentleman define functional literacy for the purpose of this amendment?

Mr. ERLENBORN. I will be happy to answer the gentleman.

I think in the educational literature it is defined, but my understanding is that we are giving high school diplomas to people who are unable to read and fill out simple applications for jobs, are unable to read the instructions that would allow them to perform those jobs, are unable to read railroad timetables, are unable to function in the society because they do not have those skills of reading and writing and communication that are the very basics.

I think that a system that has been promoting students from one grade to another merely because of time spent in class and giving a certificate or a diploma indicating that they have achieved a certain level of education when they have not achieved at least functional literacy is a disservice not only to these children, these millions of children and adults even today who are functionally illiterate and unable to operate in our society, but to society as a whole.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I am a little bit surprised at the gentleman from Illinois because I know he has been on the committee for a long time and that he has been an outstanding student of the American educational system during his years on that committee and he knows well that you cannot find anywhere in this Capital or anywhere else a piece of educational literature, as he described it, that would define the term "functional literacy" beyond saying that functional literacy is that literacy which is adequate to make a person capable of the function which you ask them to perform or react to.

By that test, for example, a kid who is still alive on the streets of New York or Chicago or Detroit in the toughest part of the city at 15 is presumptively by some standards functionally literate or he would not still be alive on the street.

By that same standard, a person who is perfectly functionally literate for an oral examination, "Do you want to take this job as a laborer on this job where you have to rake up, clean up, and pick up" would not be functional-

ly literate if he was applying for a job as an apprentice computer operator.

So functional literacy is not defined by the educational system. It is defined by the function that a person confronts and the literacy necessary to perform that function to carry out the responsibilities.

We are living in an age where many people function very well in our major cities with such things as street signs, directions on expressways, and so on. We have found a few years ago that people function even though they could not read. But they had learned how to memorize certain words, the shapes of signs, and we have, as a matter of fact, adopted a system of international signs now that tell you pretty completely whether you can read or not exactly what it is you are supposed to do or not supposed to do.

To suggest that the U.S. Department of Education, for the implementation of this amendment, would be able to write a regulation that would tell a local school district, either a major school district with hundreds of thousands of students or a small rural school district with 50 or 60 students, they they can define functional literacy by anticipating what these kids that are coming out of their system will be confronted with for all time in the future is to suggest that they have the wisdom over there when they have finished that minor task to decide how many angels can dance on the head of the pin.

I suggest that the regulation that would be necessary to keep from cutting off funds from every educational institution, whether local, county, or State, in the country would be so complex that the Internal Revenue Code would pale in its complexity by comparison.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Illinois.

Mr. HYDE. I tend to agree with the gentleman from Michigan. I think the word "functional" does cast an ambiguity around what we are really driving at. Illiterate or illiteracy is pretty clear.

Mr. FORD of Michigan. Would the gentleman be so good as to define a person who is so pretty clearly illiterate?

Mr. HYDE. By illiterate, by my definition, it is one who cannot read or write and that would be an illiterate person.

Mr. FORD of Michigan. At what level of comprehension?

Mr. HYDE. At any level of comprehension, a person who cannot read or write. But notwithstanding that, I would suggest a definition for pornography once used by a Supreme Court Justice might apply. I cannot define it, but I know it when I see it.

Mr. FORD of Michigan. I thank the gentleman for his expert testimony on pornography.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

I rise in opposition to the amendment, with all due respects to my colleague from New Hampshire.

There are two things involved. One is the procedural question: Do we simply on the spur of the moment bring up an amendment that has all kinds of complications, or do we go through the committee process and examine this?

If this is to be a legislative body that functions effectively, the committee system ought to work. That is No. 1.

The second question is the substance question and here it may be that what the gentleman from New Hampshire offers is sound. It may be.

We have a problem in this country, and frankly we have hidden this problem. We have 23 million functionally illiterates, and I hope my friend from Michigan (Mr. FORD) will forgive me for using the phrase, 23 million functionally illiterate adult Americans.

I was concerned enough about it that I had subcommittee hearings on the problem. I called an informal meeting with the Secretary of Education and the wife of the Vice President, Mrs. Bush, and some others, to talk about it. We had a couple of breakfast meetings and I am pleased to say that what the President announced the other day emerged from those breakfast meetings.

It is a problem and it may be that this is the proper answer.

But I suggest that no one here knows if this is the right answer, including my good friend from New Hampshire.

What we ought to do is that we ought to hold some hearings on the subject and I think my friend, the chairman of the full committee, who has provided leadership in so many areas, would readily agree to hold hearings on this kind of an approach.

I do not want to be speaking for the gentleman from Kentucky but would the gentleman agree to that?

Mr. PERKINS. Will the gentleman yield?

Mr. SIMON. I yield to the chairman.

Mr. PERKINS. I certainly would agree. No Member has ever been denied the opportunity for a hearing before the committee, and we would certainly invite the gentleman from New Hampshire if he is serious about this amendment, or any other amendment, to come before the committee on any occasion. We will set a special day at his convenience.

□ 1330

Mr. SIMON. I think what the gentleman has done, the gentleman from New Hampshire, is to make a contribution here. We have agreed there should be hearings on the subject. We ought to tackle it. I hope the gentleman from New Hampshire either will withdraw his amendment with that assurance or, if he does not withdraw it, I hope the House will reject the amendment with the understanding that it is a problem of major dimensions that has to be tackled by this body eventually.

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I would be pleased to yield to the gentleman.

Mr. GREGG. I thank the gentleman for yielding.

Mr. Chairman, it appears to me there is an agreement here that there is functional illiteracy within the terms of what most of us perceive here, perceive that term to represent, for a large segment of the American population.

The gentleman (Mr. SIMON) refers to 23 million. I assume from the hearings that that is probably a fairly valid figure. That is 10 percent of the people in this country.

That means that 10 percent of the people in this country went through a public school system which delivered them to functional iliteracy.

It seems to me we do not have to have hearings on that. We do not have to have any more hearings on that than we have to have on the $1.6 billion we are about to spend. What we do have to have is some action. We in the Congress have to have a responsibility to react to the needs and demands of the taxpayers out there who are footing that $1.6 billion. To say then you are not going to spend that money, we are not going to spend another $1.6 billion and throw it down the drain as we have done with so much money before this.

So I believe the time has come for us to fish or cut bait, to make a decision right here, right now as to whether we stand for something in our educational system or whether we are going to just continue to throw money at that system.

Mr. SIMON. I respect my colleague from New Hampshire and he is right when he says we ought to have action, but we ought to have action based on knowledge. We ought to know what we are doing. It may be that in throwing this dart out here the gentleman (Mr. GREGG) is going to hit the target, but it may be that it will be going very, very far from the target.

The CHAIRMAN. The time of the gentleman (Mr. SIMON) has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 2 additional minutes.)

Mr. SIMON. Before this House moves precipitously, on the spur of the moment, on something that in-

volves billions of dollars in this country, before we move on that, let us find out where we are; let us hold the hearings, let us examine the problem.

Let us grapple with it, let us have action, yes, but let us know what we are doing.

Mr. CHENEY. Mr. Chairman, I rise in support of the Gregg amendment.

Mr. Chairman, I had not planned to speak on this bill today or on this issue but I must say the gentleman from New Hampshire, I thought, made an extremely telling point. I am surprised, frankly, that the majority did not seek simply to accept the amendment as basically a sound idea and to proceed from there. I hear a lot of discussion about the fact that somehow this provision has been offered at a time on sort of a surprise basis, without adequate hearings, on a bill that really deals with rehabilitation. Although we all know the bill itself is not accurately labeled, that most of us are prepared to support a bill which reauthorizes the Rehabilitation Act, but what we do not like are all of the add-ons that deal specifically with education.

I believe the suggestion that we ought to wait now, somehow, and proceed with hearings before we move to something that is simple, suggesting that the States and local units of government ought to have a local requirement for some method by which we determine literacy, begs the question.

For nearly 20 years the Federal Government has been providing billions of dollars to assist with education at the elementary and secondary levels.

I am not a member of the committee. I cannot claim to be expert on the workings of all those programs but I have seen enough, and I think all Americans have seen enough, to have very serious doubts about the way in which those funds are being spent.

There is no question about the desire of all Americans to try to improve our educational system. I am certain that is true of the gentleman from Kentucky, the distinguished chairman of the committee, and the other Members who serve on the committee.

But I find it difficult to believe that after 20 years we find ourselves, having expended billions, prepared to authorize billions more in this legislation without having any idea at all whether or not the programs work. And now we suggest a very minimal, simple test such as a requirement that those individuals who progress through the programs, who have been the beneficiaries of the funds that we provide, who have supposedly received an education, pass a basic fundamental literacy test. The suggestion that we somehow should not do that is appalling. It strikes me we have every reason to have confidence in our local school boards.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. CHENEY. I will be happy to yield in a moment to the distinguished chairman.

We have every reason to have confidence in our local school boards and States, that they are perfectly capable of determining and establishing requirements that have to be met before somebody is granted a high school diploma. We do no one, least of all our children, a favor when we put them through an educational system that perpetrates the fraud that somehow they are competent and educated and able to cope with modern society and get a job and prosper as an important part of our American system when in fact they are not able, even, to read or write.

It strikes me that the amendment that the gentleman from New Hampshire suggests is eminently reasonable. All it suggests is, before these funds are expanded, local jurisdictions should have established a way to make certain that people who are graduating from high school have in fact achieved a basic minimal level of literacy—a perfectly simple proposition.

I would urge my colleagues in the House to approve the amendment.

I would at this time be happy to yield to the distinguished chairman of the committee.

Mr. PERKINS. I thank the gentleman for yielding.

Mr. Chairman, let me first say that within the committee system, and many times on the floor of the House, functional illiteracy has been discussed for the past 30 years. I recall back when we first enacted the adult basic education bill in the early 1960's, the real purpose of it was to take care of functional illiteracy insofar as adults were concerned.

Concerning the local boards of education, the school districts throughout the Nation, I would venture to say you would only find a handful that do not presently have procedures set up to determine those who are functionally illiterate; for example, if they cannot read or write, that is one way they used to define it.

But be that as it may, to come in here and tell the State agencies and local school agencies and WIC people and everybody else that they cannot receive money under title IV is unreasonable, the way this amendment is constructed.

The CHAIRMAN. The time of the gentleman (Mr. CHENEY) has expired.

(By unanimous consent, Mr. CHENEY was allowed to proceed for 2 additional minutes.)

Mr. CHENEY. Mr. Chairman, I yield further to the chairman of the committee.

Mr. PERKINS. It is unreasonable and I would think if you and Mr. GREGG and others who want some constructive amendment adopted, would come before the committee, and if we could work out some language without interferring with the local school districts' authority, I would be delighted to cooperate with the gentlemen.

But to just add on Federal control and say that is it will hamstring our educational process and programs throughout the country.

You are going to bring about more illiteracy, by denying youngsters whom we are serving the title I money.

Mr. CHENEY. Mr. Chairman, if I may reclaim my time.

Mr. PERKINS. I say to you that this is a bad amendment.

Mr. CHENEY. Mr. Chairman, I would like to reclaim my time.

Mr. PERKINS. This amendment should not be considered, should be withdrawn at this time or else voted down.

The CHAIRMAN. The gentleman will suspend. The time belongs to the gentleman from Wyoming (Mr. CHENEY).

Mr. CHENEY. I thank the Chairman.

If I might respond to the distinguished gentleman from Kentucky, it seems to me it is even more irresponsible for us to continue to spend the kind of funds which have been expended without any idea whether or not it is going to produce a result.

The gentleman suggests there may be in fact the screening and testing systems out there now, but whatever they are, somehow, 23 million Americans have gotten through that screen, have been the recipients, if you will, of inadequate educations.

This body is derelict in not having carried out its responsibilities to see to it that in fact we produce the result we claim we want for all of our children.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. CHENEY. I would be glad to yield to the gentleman from Louisiana (Mr. ROEMER).

□ 1340

Mr. ROEMER. I thank the gentleman from Wyoming for yielding.

Mr. Chairman, I want to compliment my friend and colleague from New Hampshire for his amendment because it puts the focus on what the money is all about.

Now as I understand the amendment of the gentleman from New Hampshire, he sets no rigid scale or standard that the local school districts have to meet. He asks rather that they have a procedure to determine the extent of the problem to which this money is directed.

Now it seems strange to me that those of us on my side of the aisle who generally support quality education and often support funds such as these

for such programs do not stand up and address and support the issue raised by our colleague from New Hampshire. If we ask America's taxpayers to keep spending money on public education, which I think we ought to do, then why should we not ask the local school districts, who take this money willingly, to set some standards and procedures to determine functional illiteracy.

I compliment the gentleman once again.

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentleman from Kentucky (Mr. PERKINS) is recognized.

There was no objection.

Mr. PERKINS. Mr. Chairman, first let me state that we have many studies evaluating the effectiveness of title I funds. They show reading achievement gains for title I target groups, for the last 10 years between 1971 and 1980. The percentage of correct responses in a national reading assessment was 38.4 for the low achieving 9-year-olds in 1971. And in 1980 it was 47.2, a change of 8.8 percent. And black 9-year-olds scores rose from 49.7 to 59.6 in 10 years, up 9.9 percent. Disadvantaged urban 9-year-olds' scores rose from 52.8 to 58.0, up 5.2 percent. And on and on.

But this money, the bulk of this money in title IV, about $350 million, is going to be spent on chapter 1, which primarily helps children below the fifth grade. And think about how foolish it is to punish these disadvantaged youngsters throughout America with an amendment of this type.

We have all of these gains and achievements. I believe you thought up this amendment to take up time. Of course we will work out something constructive if the law needs to be amended, but to kill time in this manner and try to punish disadvantaged youngsters is a terrible situation.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

I would just point out and again I recognize the sincerity of the gentleman from New Hampshire and we do have a problem with teenage and adult illiteracy. But, for example, and I have just read the amendment for the first time, I have read the amendment and I know that in some States a procedure exists where mentally retarded young people with limited skills, but who have learned certain skills and because they have learned certain skills not including the ability to read and write, they are given a graduation certificate.

Now, if this amendment is adopted, the Congress is going to say to those States, you either have to take away from those young people any kind of graduation certificate, the heavy hand of the Federal Government, or you do not get any Federal funds.

That is one of many kinds of complications that I see in this amendment.

The gentleman has called our attention to a real problem. We ought to focus on the problem. But to come up on the spur of the moment with this kind of an answer, just is not the way we ought to be legislating. We ought to be looking at things carefully and I hope we do so. I hope the amendment is rejected.

Mr. OWENS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment because I think it is premature. We were debating before the consideration of an amendment to strike title IV and I think that title IV is germane in terms of the amendment that has been offered here about functional illiteracy.

We are talking about imposing new regulations, new requirements on the States at a time when we have eroded the basic infrastructure of the educational program. What we were trying to do with the title IV programs, most of which deal with education, is to put back some of the funds needed to rebuild that educational infrastructure.

What you are asking is that a new requirement be imposed on the States. I do not speak for my State of New York because we already have a requirement of a basic competency test which high school youngsters must pass before they can receive a diploma. That is in place.

One of the results of that, however, is that large numbers of youngsters do fail the test and they still want to get a high school diploma. Where do they have to go after that? Most of them go into adult education programs seeking some kind of additional training to come back to take the test again in order to qualify for a diploma.

So the burden is shifted to the adult education programs and we have here today under consideration in the title IV portion of the package funding for the adult education program, a mere increase of $12 million, which incidentally is less than the cost of one Army attack helicopter, which is about $13 million.

So, for a small amount of money that is included in the title IV package as one of the components we would be providing more money for adult education. And that kind of money would be needed to pick up the burden that would be created by the large numbers of youngsters who would still be seeking a high school diploma through some other means if they are thrown into the situation where they failed to pass a functional illiteracy test.

There are all kinds of functional illiteracy considerations that school boards and people in the education field are concerned with. They are concerned with computer literacy and they are concerned with information literacy. There are a number of different kinds of literacy which they are talking about. And the big problem is—and the great frustration is—they cannot any more begin to realistically meet the goals in any one of these areas because of the tremendous cuts that have been imposed by the Gramm-Latta bill before.

The impact of the Gramm-Latta cuts are just beginning to come home dramatically back in the districts. I have heard many speakers say that the title IV package does not have public support. The title IV package does not have priority. It has great public support, great public concern, all of these programs in the title IV package which deal with education are very much on the minds of my constituency and I think they are very popular programs throughout the country. I found people are very concerned about when the action will happen behind the President's talk about education. When is the money coming to restore some of these programs? When is the money coming for the new programs. We need money for computers to enhance computer literacy. They assume that if the President is talking about some new initiatives and some new importance, new values that are being assigned to education, that this is a priority of the President. It is a priority certainly of the President, it is a priority of Congress, it is a priority of the whole country. So we should deal with these priorities first before we talk about imposing some new kinds of regulations and new kinds of requirements on the States.

I think it is very important to note that when we talk about public concern for these programs that I received a call yesterday from the chairlady, Mrs. Rachell Mitchell, of one of the school boards in my district and her call said, "Fight for the title IV programs." At the time I was not in the office and I did not talk to her. So I did not know that she was in the hospital. But this morning I received a call which said that same chairlady of the school board was dead. She called from her intensive care hospital bed. Mrs. Mitchell considered these programs that important.

And I think that is not an unusual example in terms of people who are related to education, whether they are teachers or parents or school board members. They are worried about the erosion of the programs that exist already. They are worried about the fact that the impact of the Gramm-Latta

cuts are coming home and because there is a great deal of talk about education and yet there is no action. I think that this action this morning to try to move forward with education programs as envisioned in the title IV package is an action which is consistent with what we are saying.

□ 1350

We are not frustrating people by saying things and offering no action and no funding behind them. On the other hand, the amendment at hand runs counter to what we have been trying to do. At the same time, it proposes no new funds, no new initiatives and no programs, really, to go with the requirement, it wants to impose a new set of regulations and new set of requirements on the local school boards and local educational structure without funding.

I am against the amendment. I hope we will move hastily to vote the amendment down.

Mr. CHANDLER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I very reluctantly speak against the amendment, but I am just fresh from 3 days of town hall meetings on the subject of education in my district in the State of Washington, and people there are as concerned as they are throughout the rest of the country about the quality of education. One of the themes I heard over and over, especially from the educators there was: "We are drowning in paperwork."

And the question was raised about a Fortune Magazine article—I think it was the month prior—that raised the question about the enormous expenditure for administration in education and how that has increased, not decreased, but increased over the last few years, both in numbers of people and in expenditures.

The concern that I have for this amendment is that, once again, here we are at the Federal level trying to fix education, not with any dollars to do it with, but again a regulation, a stipulation that passes down to the local school district the requirement for compliance. And whenever you have a requirement for compliance you have people out there forcing that compliance.

I believe that you would end up with more people working to process paper than you would in the classroom, and that is not where we need people in education. We need them in the classroom.

I would urge my colleagues on that point alone to vote down this amendment.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, the issue here is literacy. I would suggest that perhaps we need a little bit of that right here on the floor, because it is apparent to me that not very many people have bothered to read the amendment who are speaking on it and are speaking in opposition to it.

First, this imposes no regulations, this imposes no procedures. All the amendment says is that there has to be some kind of procedure in place. That can be any kind of procedure. It does not say the students are either going to pass or to fail the procedure, or whatever the test might be that they establish for this. All it says is that if you are going to expend Government money, if you are going to expend Federal money, you have got to have some sort of way of measuring whether or not you have had a successful educational effort.

When you hear the people talking, out across the country, about education, what they are concerned about is the failure in our schools. When they measure failure, they are saying that failure is there because people cannot read and write who are graduating from high school. And there is something awfully wrong about that. I do not think there is a Member of this body who does not agree that there is something wrong when you have kids graduating from school, getting a diploma, who can neither read nor write.

Now, if we are going to have an expenditure of lots of Federal money, then it seems to me that what we ought to be doing is saying that there ought to be some goals achieved. And basic among those goals is reading and writing. That is all this amendment is really talking about. Let us make certain that out there in the country-side where they are expending all of the money that they have got some way of measuring whether or not they got anything for the money, namely, did they get a process in place that brought about more reading and writing. And that ultimately benefits parents because parents then have some way of measuring school districts; they have some way of knowing whether their school district is doing as well as the one next door; they have a way of telling whether or not the schools of their State are doing as well as the schools in other States. It gives them an opportunity to have more effect on the process in the local realm. I think that is a plus for education.

I am also rather amazed to hear people suggest that all of this may be well and good but what we have got to do is to allow the committee process to work in this kind of instance, that we should not be out here on the floor debating these kinds of issues, we should not take them up here, let the committee process work.

Well, this whole bill that we have before us raises questions about the committee process. This is the bill, remember, that the first time out never got through the Rules Committee because it was rewritten after the committee had acted and it was brought to the Rules Committee in such form that there were no committee deliberations of the material that was ultimately in the bill. So it had to be recalled back to the committee, and I guess they had a couple hours of hearings and then produced a new bill. That is not the committee process at work. There was no chance for hearings on some of the things that have been raised by the gentleman from New Hampshire. And now we hear it said, "Well, he can come before the committee and talk about these things later on." Well, later on we will have passed this bill, we will be down the road, the money will be expended, and we will not have resolved whether or not people should read and write in our schools.

So I would hope that anybody who thinks that ultimately one of the goals that we ought to be achieving in education in this country should be to give basic assurance to parents that their children when graduating from our schools can read and write will vote for the Gregg amendment.

Mr. CHANDLER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Washington.

Mr. CHANDLER. Mr. Chairman, I am one of the Members who did read the amendment, and it does require that there be in place a test to tell whether the students are achieving or not in education.

Now, what assurance can the gentleman give us that all 300 school districts in the State of Washington are going to apply and will have a meaningful test if there is not some kind of compliance requirement from the Federal level?

Mr. WALKER. If the gentleman would take a look at the amendment again—and serving with the distinguished gentleman on at least one committee, I know well he reads, and reads very well—I would say there is nothing in here about a test program. All it says is that a school district or political subdivision have a procedure for determining functional literacy as a condition for graduation from secondary public schools. It does not say that there has to be a test. It does not recommend any procedure. It simply says that such a procedure must exist.

Now, I would assume that some places may use a test, some places may figure out innovative ways of coming to this same procedure. But all this requires is in general that there has to be something of that type.

Mr. CHANDLER. But that was the point I was trying to make. In my view, either this requirement becomes

meaningless or, if you have some kind of compliance program, that school districts will just be able to tell you, "Why, sure, we are doing it," and, believe me, they have proven they can do that in other ways.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 1 additional minute.)

Mr. WALKER. Mr. Chairman, I yield further to the gentleman from Washington.

Mr. CHANDLER. I appreciate the gentleman's courtesy.

Mr. Chairman, I am just concerned that once again we are trying at the Federal level to fix something that we would be much better off to leave alone to those people who cared enough to come out to the town hall meetings in my district who are very concerned, who are working with their school boards, who are working on all aspects of education. I know how well-meaning this is. I do think we are voting against literacy if we vote against this amendment. But I do think we are voting against what would become a burdensome requirement.

Mr. WALKER. If I may regain my time, I understand the gentleman's concern. But there is nothing in this amendment that sets up those kinds of regulations. All it says here is that some procedure has to exist. So it seems to me that what we really are voting on is the substance of the amendment, whether or not you think that schools that accept Federal money should in some way address the issue of literacy.

Mr. ACKERMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the amendment before us, while it might have some merit, in my opinion is rather deleterious because it detracts from the amendment that we are focusing on, and that is whether or not we will fully fund this bill.

In 1816, Thomas Jefferson wrote: "If a nation expects to be ignorant and free, it expects what never was and never will be." This statement is particularly apt as we debate H.R. 3520. This proposal, which has my strong and unequivocal support without the amendment that guts it, or the one immediately before us that detracts from it, is an important and vital component of any national plan to remedy the inadequacies of our educational system. These shortcomings have all too often been placed on the back burner of our national agenda. This year, however, has been unofficially designated "The Year of Education" and now we have the opportunity to pay more than lipservice to our own rhetoric.

This legislation not only reauthorizes a number of very necessary programs which assist the disabled in entering the work force, but also restores much needed funds to many critical instructional and supportive educational programs. H.R. 3520 brings the authorizations of these programs in line with the first budget resolution which passed this House just 3 short months ago. For example, the proposal calls for $1.36 billion to put food into the mouths of indigent women, infants, and children and also funds compensatory education programs covered under chapter I of the Education Consolidation and Improvement Act with $3.83 billion to assist disadvantaged children.

My colleagues on the other side of the aisle have, in voting for H.R. 3520, the opportunity to affirm their commitment to the improvement of our schools and educational programs.

□ 1400

To vote for the amendment that detracts from it or the one that guts it would be to condemn millions of schoolchildren to educational mediocrity at best, and a lifetime of ignorance and failure in the job market at worst. Certainly, money alone cannot be a panacea for the many maladies that confront our educational and instructional system, but without adequate funding we would find our schools unable to educate.

This is not a Democratic or a Republican issue; it is an issue for a special interest group. That special interest group is our children, the future of this great country. It is an issue with which we can demonstrate our dedication and commitment to making education the highest priority. We can demonstrate to our constituents that we recognize the improvements that are needed in the classrooms of this Nation. And most important, we can send a message to the White House and to the Nation that this House is willing to put its money where its mouth is.

Thomas Jefferson realized the national interest in education almost 200 years ago. It is time, my colleagues, to reaffirm your commitment. I urge you to defeat both amendments and vote for the bill.

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. ACKERMAN. I yield to the gentleman from New Hampshire.

Mr. GREGG. I thank the gentleman for yielding.

Mr. Chairman, the gentleman opened his statement and he closed his statement quoting or referring to Thomas Jefferson and his famous quote about ignorance and freedom.

I would submit to the gentleman that he has made a case for why we have to have functional literacy, or at least some way to evaluate whether we are addressing the issue of functional literacy.

The opposite of ignorance would probably be literacy, and functional literacy would be a lesser degree of that. Clearly, Jefferson, who was our leading writer of letters and political thought in the history of this Nation would be aghast to think that 10 percent of this country is going through the public school system and graduating as functionally illiterate. We, as a nation, have an obligation to address that issue.

Mr. ACKERMAN. I agree with the gentleman that Thomas Jefferson might be aghast at a prospect of 10-percent illiteracy, but he would be turning over in his grave at the prospect of the Federal Government imposing such restrictions and regulations upon the States.

Mr. ROEMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from New Hampshire. A couple of quick points.

It seems that we are back only 2 days and we have another awkward and awful moment in the House of Representatives where we meet head on with two conflicting desires: First, to provide a sound fiscal policy for America such that interest rates can go down and job opportunities can go up; and on the other hand the need to deal with the very best education we can provide for our children.

In this bill today those two goals and dreams run head on. It seemed to me, on first hearing the amendment of the gentleman from New Hampshire that his amendment was a chance to bridge the two divergent dreams to allow for increased funding for education which the gentleman from New York and others so eloquently spoke for, and I agree with them. On the one hand, to allow for that increased funding, but on the other to allow the taxpayer, who is concerned about high interest rates, who is concerned about a blanket approach to specific problems, to allow them to hope that functional literacy will be the goal of our expenditures. I am for more money for education. I think most people here in their hearts are.

But this amendment offered by the gentleman from New Hampshire gives us a chance to, yes, call on the American taxpayer to give more, and many feel they give too much already, but at the same time assuring him and her that their tax money will have minimal standards of procedure to determine functional literacy.

What if the only thing we got from this amendment was a targeted assessment of where our problem is in Louisiana or Texas or Tennessee or Mississippi? The name of this game is not

who gets the money. The name of this game is not which side of the aisle wins. The name of this game is to give our children the very best, and that means an education system designed not to keep people at work in some department, but designed to make our children have the very best opportunity to read and write.

Thomas Jefferson was right. A nation that expects to be both free and ignorant expects what never was and never will be. He said it in 1803, and it is true today. I think the gentleman from New Hampshire has given us a chance to do both things: Tell America that we are willing to spend more money for the very best; but tell them also that we are willing to set functional literacy as our goal.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I would be glad to yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Chairman, many States today have requirements that the local States have established, and even some school districts have established within a State their own requirements for testing. I agree with the thrust of what the gentleman from New Hampshire is trying to do, but I have a problem with the Federal Government once again intervening and dictating to our State educational systems another thing that they have to do.

How do you reconcile that, because I think the gentleman has basically the same philosophy that I do in this area? Other than discrimination, what other areas does the Federal Government now have a mandate such as this would be in order to be eligible for Federal funding.

Mr. ROEMER. Mr. Chairman, if I may reclaim my time, let me respond by saying that, although I guess I would be called a fiscal conservative in that I would shepherd our dollars wisely and well, I hope, I think there is a place for Government in our lives. It says so in the Constitution. It says so in the spirit of the way I act.

One of the legitimate places seems to be a relationship with our various branches of Government toward quality education. It does not take a great stretch of the imagination to see that if we are going to spend an additional $1.6 billion of our dollars that we require the minimum kind of procedure to determine performance on the part of our local school districts.

The principle of responsible standards of usage for tax money provided is necessary and often applied in Federal programs.

The CHAIRMAN. The question is on the perfecting amendment to title IV offered by the gentleman from New Hampshire (Mr. GREGG).

The question was taken; and on a division (demanded by Mr. GREGG) there were—ayes 17, noes 37.

□ 1410

Mr. GREGG. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1420

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from New Hampshire (Mr. GREGG) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentleman from Kentucky (Mr. PERKINS) is recognized for 5 minutes.

There was no objection.

Mr. PERKINS. Mr. Chairman, I rise in opposition to the Bartlett amendment.

Let me state first that if we do or do not defeat the Bartlett amendment and I certainly hope we do defeat the Bartlett amendment, this afternoon conferees will be appointed and I will do everything possible to get a conference with the other body early next week. So I do not want anyone to feel that we are here trying to do anything to delay reauthorization of vocational rehabilitation. We are here to help vocational rehabilitation.

We are just carrying out the budget resolution today and our amendment is within the budget resolution, and these programs that we increased need these increases in title IV to bring them back from the cuts of the last few years.

Let me state that I firmly believe the President of the United States will sign this bill. He has stated time and time again this year that we should do something about education in this country.

The House Committee on Education and Labor surveyed the members that constituted the President's Commission on Excellence, and 10 out of those 12 members of the President's commission stated that we needed more Federal money.

This debate has not been going along those lines this afternoon. This amendment, in one sense of the word, would hamstring the spending on the programs that have been doing so much for the disadvantaged youngsters of this country and for vocational education.

I think the $350 million that we increase title I is well justified. We are only serving about 47 percent of the eligible title I children throughout the Nation today, primarily children up through about the fifth grade. I would think that many of you, since we cut back on title I here in the early June days of 1981, in the Gramm-Latta II, have received calls from your districts about title I teachers being laid off who teach the disadvantaged youngsters, and their achievement scores and levels show that we are making much progress in this area.

I would think that the modest increase that we gave you in vocational education in this bill is very much needed.

There is not a vocational school in this country today that has not had to cut back its operations because of the Gramm-Latta vote in 1981. We are only trying to keep up with inflation and deal with all of the unemployment we have in this country and the thousands of students in practically every area of America who cannot enter vocational school to learn some kind of a trade or craft.

This is what we are voting on here today and I say to you in my humble judgment, when the President looks at the vocational rehabilitation bill and looks at these programs, he will sign this bill because this is what he has been talking about for the last 6 months.

There was no other feasible way, my friends, to get this bill before you today, to get these increases before you. We would never have gotten them to conference with the other body had we proceeded one by one. It would have been impossible to go to conference in the other body.

□ 1430

The CHAIRMAN. The time of the gentleman (Mr. PERKINS) has expired.

(By unanimous consent, Mr. PERKINS was allowed to proceed for 1 additional minute.)

Mr. PERKINS. So, we have had these omnibus bills for many years, coming out of our committee and coming from the Senate committee. It is true enough, originally some of these programs were not germane because we did not introduce a clean bill.

I did not think that there would have been this much "hooray" when we went before the Rules Committee.

And then when that turned out to be so, there was only one thing for us to do, to introduce a clean bill so that all of the educational programs and other programs would be germane to the vocational rehabilitation bill. And we did that immediately.

And we come before you today with a good bill, a bill that I think the President of the United States will sign and a bill that every Member of this Chamber should vote for. We cannot afford to let all of our good vocational teachers go or title I teachers go and that is what we are doing unless we support this bill.

Mr. HARTNETT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Bartlett amendment.

I yield to my colleague, the gentleman from Texas (Mr. BARTLETT), so he may explain where we are with regard to title IV of this bill.

Mr. BARTLETT. I thank the gentleman for yielding, because it seems to me as we have been here for the last several hours, that this debate has in too many ways shifted the focus away from what should be, and should have been for these last 5 months, the real focus of the reauthorization of the Rehabilitation Act, and that is the rehabilitation of those 1 million Americans in fiscal year 1984 who are counting on this program.

The Rehabilitation Act, in fact, would be reauthorized in the first three titles with what one could describe and is, as the chairman, the distinguished chairman described, a modest increase of 9.9 percent in the increase for rehabilitation. The difficulty is in title IV of 10 other unrelated programs. Title IV would propose an immodest increase of 34 percent, for a larger increase in these other unrelated programs than is in the rehabilitation program all together. I would bring the House's attention to some points that have been made but really we need to think about as we go into vote. Most important is that without a doubt title IV threatens the continuation of the rehabilitation program. Its passage has already been delayed by 5 months. There is no forward funding provided past October 1. By adding the extraneous material in title IV with its procedural defects and $1.6 billion increase the future of the Rehabilitation Act is politicized and is threatened and is in jeopardy. No. 2, title IV represents a precedent-setting manipulation of the House rules. If title IV is successfully passed by this body and is not deleted then a precedent will have been established where a majority may adopt nongermane amendments at the committee level and reintroduce the reported bill to make that extraneous matter technically germane but inherently extraneous.

Title IV represents in a nutshell the use and a misuse of a popular, bipartisan effort to facilitate consideration of other unrelated legislative initiatives. The Rehabilitation Act has received strong bipartisan support through its 63-year history. This represents a departure from that. Title IV inappropriately converts single-focus legislation, the reauthorization of one piece of legislation, the Rehabilitation Act, to omnibus legislation.

Title IV adds $1.6 billion in new spending above the 1984 reconciliation levels of those 10 programs. Title IV forces this House to choose between support for the rehabilitation program and support for responsible fiscal policy. The people in this country, we heard them in our districts during the recess, are crying out for reduced deficits, reduced interest rates, for reduced unemployment, for a Congress that will respond to the needs and the wants of its people, to be able to go back to work, reduce interest rates, and that can only be done not by increasing Federal spending by $1.6 billion, by 34 percent on our first day back, but by examining those programs and by, in fact, considering each program on its own and by putting that restraint, keeping the restraint on the increases in Federal programs. Title IV intrudes on the authority of the Budget Committee. The House Budget Committee has the authority to prepare budget resolutions, and, once passed by the House, conference with the Senate. But title IV dictates specifically fiscal year 1984 authorization ceilings in the program for title IV and it is unclear whether the authorization levels in title IV are program level targets which the Appropriations Committee must accept. Title IV has already today, and in the last 5 months, has diverted floor debate from where we should have been debating and that is where we could have contributed to the substantial substantive and bipartisan legislative history of rehabilitation.

Title IV makes the rehabilitation program and title IV subject to and liable for Presidential veto. Whether or not the President vetoes this bill, title IV has already delayed the act to well beyond October 1. It has made consideration with the Senate more difficult and a conference much more costly and delayed.

I would urge this House on this day to vote with a heart for the lives of those 1 million Americans who are placed in jeopardy today, and to vote with our head at the same time for continued, careful and specific consideration of those 10 programs for a sound economy that will allow Americans to go back to work, for reduced interest rates, by reduced Federal spending and reduced deficits.

I thank the gentleman for yielding.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to this amendment.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to my distinguished friend, the gentleman from Illinois.

Mr. SIMON. I thank the majority leader for yielding.

Mr. Chairman, I simply want to join in his expression of support for H.R. 3520 and simply point out to my colleagues in the House that today Switzerland and Japan have a higher average income than the United States and it is not because of any huge, vast resources thay have; it is because they have invested in their human resources. And that is what we want to do. I commend my colleague, the majority leader.

Mr. WRIGHT. I thank the gentleman for his, as always, well reasoned statement.

It seems to me that this particular vote is the best test we are likely to have as to whether we are truly serious about responding to the President's Commission on Education and to the genuine needs of education in America.

It is a really very interesting thing: The President appointed a commission to report on the needs of America's educational system. That Commission reported that we need to spend more money on education; that we are short changing education in our scale of priorities.

To hear the President and others representing the administration respond to that mandate by the Presidential Commission, one would think it had made up such recommendation at all. The President has embraced the issue in rhetoric, but his deeds belie his words.

Let us get a clear picture of the badly deranged state of priorities which have existed in this country in these last 2 years following adoption of the Gramm-Latta bill of 1981.

In the past 2 years we have reduced all social programs by some $47 billion annualized. We are spending $47 billion less this year than we were in 1980 on these domestic needs.

Yet, we have increased military spending by approximately $100 billion a year. And we have reduced Government revenues by about $135 billion a year through the excesses of the 1981 tax cut.

Now, for anybody to suggest that the amounts we are restoring for badly needed educational programs in title IV of this bill amount to excessive spending, or that the deficit might be blamed somehow upon education, would be thoroughly outrageous.

□ 1440

During a 3-year period in which annual expenditures for military

goods and hardware have increased by 40 percent, expenditures for educating America's young people have been reduced by 20 percent.

This year for the first in many, many years the number of young Americans in colleges, as a percent of those of the age group eligible to be attending college, has not increased. It has decreased. That is social retrogression.

I suggest to my colleagues that we shall not be first in defense, it matters not how sophisticated our weapons systems may be, if we settle for second best in education. We are not going to be first in the competition among the nations, no matter how sophisticated may be our machines of production, unless we continue to be first in education.

And what has been the President's response? The President's response has been try to do away with the Department of Education, to reduce funding for student loans whereby students of modest economic circumstances can afford to attend college, to reduce vocational education, to reduce adult education, to reduce compensatory education, to reduce research, to reduce public educational support in general.

Compensatory education has been reduced by 17 percent. Vocational education has been cut by 12 percent, and the President's budget request this year would have had us reduce it by an additional 39 percent below the already inadequate level of last year's spending. Guaranteed student loans have been cut by 27 percent. Job training programs, by 35 percent.

Now the amounts of money contained in title IV are wholly encompassed within the budget resolution that the Congress adopted earlier this year. By no stretch of the imagination can anyone call this a budget buster. With the adoption of the Williams amendment earlier today this bill has been brought absolutely into conformity with the budget resolution. It is within the budget. It simply restores to a somewhat more humane level our investment in the education of our young.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(At the request of Mr. PERKINS and by unanimous consent, Mr. WRIGHT was allowed to proceed for 5 additional minutes.)

Mr. WRIGHT. Mirabeau B. Lamar, one of the early Presidents of the Republic of Texas before that area which the gentleman who is the author of the amendment (Mr. BARTLETT) and I represent in Congress, became a State, said that, "The cultivated mind is the guardian genius of democracy."

We see that same truth expressed weekly on the masthead of Newsweek magazine, wherein we read the slogan, "A well informed public is America's greatest security."

And of course the Holy Scripture gives us the same assurance when it tells us, "You shall know the truth and the truth will make you free."

I think what all of those things say is that education and democracy must advance hand in hand. They are inseparably interlinked. You just simply cannot have a long-term advance in education without political freedom and you simply cannot maintain political freedom without education. You can no more have a nation that is half educated and half illiterate than you can have an egg that is half good and half rotten.

The education of all of America's children is the grand promise that we held out. We set out to create a nation in which everybody could have a piece of the action and to that end we strove to make it possible for the humblest youngster to have access to a first-class education as his or her birthright.

It seems to me that we indulge a dangerous folly when we reduce our investment in education; if in the name of national defense we increase our investment in defense weaponry without recognizing the correlation between the two.

Last year we graduated some 56,000 young Americans from our universities in scientific, mathematical, and engineering disciplines. Japan, with only half our population, was graduating about 77,000. Russia was graduating some 300,000 young people with what they called engineering degrees. I will acknowledge that their engineering degree is not equivalent to ours.

But surely it must behoove us to do those things necessary to restore our commitment to making this Nation of ours first among the nations in the education of its citizenry, else we shall not be first in anything else.

It is not good enough simply to say we will take money from the public schools and give it to those parents who can afford to send their children to private schools; and it is not good enough simply to say we are going to restore prayer in the public schools. As much as I am for the latter, the point is this: We must not merely pray for better education, we must be willing to pay for better education, otherwise we shall not have better education.

And this vote is the test of whether we are willing to pay for better education. So therefore, if you would pass that test I suggest that you vote "no" on the Bartlett amendment.

Mr. ROEMER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I came today prepared to support my good friend, the chairman of this fine committee and their work for the very reasons that the majority leader just outlined, because the majority leader is right, education is the key to our future and it does not come cheap, nor does it come without some debate and some reason and some priorities.

But in listening to today's debate, I find that this bill is not about education so much as it is about money, power, and politics. Read the Democratic Study Group's print about this bill. I read to my colleagues from page 3:

> The bill increases FY 1984 authorization for 10 programs that are under the jurisdiction of the Education and Labor Committee, but are unrelated to rehabilitation.

Those are not my words, those are the Democratic Study Group's words.

And look at the 10 programs. I can support without equivocation increases in half or more of the 10. Take them in line. WIC. Our colleague from California (Mr. MILLER) was correct when he said the program pays dividends. It ought to be increased in its funding, not decreased or even hold the line.

Take chapter 1, title I, as it is often called, to help the disadvantaged among us. It ought to be increased. You could take these programs and increase title I by 10 percent. Increase WIC by 10 percent. Increase handicapped education by 10 percent. Increase vocational education by 5 percent, adult education by 5 percent, and yet spend only one-third what this bill spends in an increase.

What does the bill have in it? What does it have in its blanket omnibus 10-percent increase? Money for low-income energy assistance. Maybe that is a worthy program, but under the topic of education?

I said earlier on the floor today that this is one of those awkward and awful moments where when you read the legislation and believe the dream for better education you find that the reality just does not hold a candle to what is being said.

It seems to me and I will repeat it, it was said earlier, that Thomas Jefferson was right when he said that a nation that expects to be both free and ignorant expects what never was and never will be.

What did we do together in committee? We rejected the one amendment that would bridge the gap between the need for better education and the desire to hold a strong fiscal policy.

□ 1450

That was the amendment from the gentleman from New Hampshire which puts functional literacy at the heart of this increased money.

I told my friend, the chairman, that I would be willing to vote for the increased money if we knew that functional literacy was the goal and the

target of that increase. But what did we do in our wisdom—not just yours, I was part of it—in our wisdom? We said "no" to the gentleman from New Hampshire. And what do we have left? A bill that is comprised mainly of nonrehabilitation money under the guise of a decent and quality education.

Let me say now that I will be willing to vote tomorrow or next week for increased money for title I, for increased money for vocational education. We need that. But I voted against Gramm-Latta 2 years ago. I voted against it because I do not believe in the policy of legislation without reason. I do not believe in the policy of omnibus spending without rhyme or reason, as we have done here.

I now yield to my chairman.

Mr. PERKINS. Mr. Chairman, let me say to my distinguished colleague from Louisiana that I appreciate his sincerity. But in this bill we increase the money for the disadvantaged youngsters $350 million. We increase vocational education practically $100 million. And I am sure if the gentleman feels that we are too high, he could offer an amendment to reduce those amounts. But I see nothing here contrary to the gentleman's views, since he supports more money for vocational education and more money for title I for the disadvantaged. And that is where the bulk of the money happens to be in this bill.

Mr. WILLIAMS of Montana. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, unlike my colleague, the gentleman from Louisiana, who came prepared to support this bill today, I came prepared to oppose it if need be, despite the fact that I am an educator and a member of the Select Education Subcommittee. But I also, like all of my colleagues here in the House and as a member of the House Budget Committee, believe that the discipline of the budget must have a high authority in our actions on authorization and spending bills.

And so it was that this morning I offered my amendment which brought this bill into line with the House budget. That amendment, to my surprise, was accepted without vote, accepted by the House Budget Committee chairman, accepted by both the full Education Committee chairman and the Select Education Subcommittee chairman and accepted by the minority.

This bill is now clearly within the budget.

My colleague from Louisiana is correct: This bill is not just about education, it is about money and power and politics. Let us try to run the schools in this country without money. Let us try to help the disadvantaged, those who need vocational education, the handicapped, without appropriate spending at not only the Federal level but at the State and local level. It cannot be done. It is an impossibility. And those who claim it has have been proved by history to be wrong time and time again.

Yes; this bill is not only about money, but it is about power. And in passing this bill today and in rejecting the amendment that is now before us, the Congress of the United States will be responding to the power of the American people, who are insisting that more, not less, money be spent on education. The latest national and accepted poll that we have before us shows that 70-percent-plus of the American people are asking for more, not less, money for education.

And is this bill about politics? Yes. This place and this country is about politics, the will of the people, and education cannot be separated from it.

Ms. OAKAR. Mr. Chairman, will the gentleman yeild?

Mr. WILLIAMS of Montana. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I would like to just mention to my friend, the gentleman from Louisiana, that the WIC program indeed is an educational program. Beyond nutritional programs for children and pregnant women, it does give nutritional education and health care to pregnant women, and it gives that same kind of education and care to children under 5.

I am a former teacher. No one can ever tell me that there is not a relationship between a child being hungry or being malnourished and getting a good education.

In addition, the handicapped children of our country are blatantly discriminated against. This bill attempts to fill that void and that gap. There are 36 million handicapped people in this country, and the parents of handicapped children—who really never get the fair share and the full share for their child so that the handicapped child can be educated to his or her capacity—always feel slighted and cheated. I think that this bill attempts to correct this inequity.

I cannot understand how that part of title IV is not an educational program. So I certainly want to join my colleague in urging defeat of what is a very disrupting and gutting amendment to the entire bill.

Mr. WILLIAMS of Montana. I thank the gentlewoman, and I would remind her of something of which she is well aware, and that is that ever since the Presidency of John Fitzgerald Kennedy, with one slight exception, the children in this country have moved out of poverty at the rate of about 713,000 children per presidential term, with the exception of this administration, which is now only three-quarters finished, and we find 2 million more children have slipped back into poverty. That slippage is as unprecedented as it is tragically unnecessary. We need to redirect America's compass, and this bill will help to do that.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Bartlett amendment.

Mr. Chairman, I certainly am not going to take 5 minutes, but I think a couple of things have to be said. Someone once said you cannot be too rich and you cannot be too thin, and I agree with both of those comments, for very obvious reasons. And you cannot put too much money in education. And I agree with that. Although some oversight as to how it is spent and who gets it and how accountable they are is important.

I recall reading in the newspapers in my area in Chicago over the weekend that the teachers' union has found over 1,000 jobs on the Chicago Board of Education that never showed up on their budget. And they found them because they were federally funded, and nobody really knew they were there. Of course, the teachers' union is upset because they think that this is money that could go for their pay raises, and well it might, for all I know.

Now, rehabilitation for those who are disabled is an important program and goal and aspiration that Congress for many years in a bipartisan manner has supported, and this program, this Rehabilitation Act, deserves the full support of both sides of the aisle.

But what has happened here is that we are learning from the other body that you can take a bill that has a noble purpose and Christmas-tree it and add other baggage to it because the strength of the main purpose will have to carry the other baggage. But in doing that—it is clever politically—you are trivializing, you are denegrating, you are eroding the main purpose, which is the Rehabilitation Act.

Now, I agree with my dear friend from Cleveland (Ms. OAKAR), for whom I have enormous admiration and respect, that the women's and infants' and children's program deserves all the support it can get, and it does have an aspect of education somewhere in there. But the low-income energy assistance program ought to be able to stand on its own two feet. It ought not to have to be thrust under the umbrella of the Rehabilitation Act. I am for low-income energy assistance, but I am not for burdening a bill that is useful and needed with what undoubtedly will invite a veto because of these additions totaling $1.6 billion, authorizations that have already been adopted by this body in lesser amounts.

The National Foundation on the Arts and Humanities, gee, that is wonderful, but it has nothing to do with rehabilitation of disabled persons.

□ 1500

I suggest to the people of conscience and concern and compassion that they are trivializing rehabilitation to put all of this baggage on this bill and, therefore, I must support and will support the Bartlett amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. BARTLETT).

The question was taken; and on a division (demanded by Mr. BARTLETT) there were—ayes 12, noes 24.

RECORDED VOTE

Mr. BARTLETT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 124, noes 283, not voting 26, as follows:

[Roll No. 329]

□ 1510

The Clerk announced the following pairs:

On this vote:

Mr. Pashayan for, with Mr. Derrick against.

Mr. Craig for, with Mr. Young of Alaska against.

Mr. Corcoran for, with Mr. Tauke against.

Messrs. CONTE, SAM B. HALL, JR., MOLINARI, McGRATH, and LENT changed their votes from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1520

(By unanimous consent, Mr. PICKLE was allowed to speak out of order.)

DEAR ABBY AND THE NOTCH

Mr. PICKLE. Mr. Chairman, my colleagues, and especially "Dear Abby" readers, one thing we have all learned in the past week is that something written in "Dear Abby" is faster than a telegram and more powerful than the evening news. When "Dear Abby" says to write your Congressman, people do not just listen, they act.

Unfortunately, the letter on the social security notch in a recent "Dear Abby" column was partially wrong and somewhat misleading.

As a result of the 1977 social security amendments, there is a difference in benefits between people born before and after January 1, 1917. Everyone born after that date will receive lower social security benefits than they would have gotten if we had not passed those amendments in 1977. Pure and simple, this is the "notch" that the "Dear Abby" letter complained about.

There will not be a $100 difference in benefits between those born in 1916 and 1917 except in a limited number of cases at the maximum benefit levels.

The change does not affect only those born between 1917 and 1921. It affects everyone born after these dates as well.

And, finally, there is no correction available for the notch because the notch is not the problem.

As many of you know, the Congress decided in 1972 to index social security benefits to the cost of living; in other words to give social security beneficiaries a cost-of-living increase every year. I might add that at the time we thought this was a conservative measure.

What we did not realize then was that each time we gave retirees a raise we were also increasing amounts in the benefit table used to compute benefits for new and future retirees. At the same time, the workers whose future benefit would be based on this increased benefit table were also getting wage increases on their jobs.

The result was that new retirees began receiving benefits that reflected the same period of inflation twice: through the increased benefit table and through increases in their earnings that had occurred at the same time. This double-whammy benefit increase, combined with the very high inflation of the 1970's, meant that overall benefit levels increased far

more than anyone had ever anticipated, and the system was rapidly going broke. If this system had been left in place, many people would be getting benefits higher than what they earned while they were working.

In 1977, then, Congress did the right and logical thing: we decoupled this system and put in the formula we have today which affects people born after 1916. This formula provides benefits which keep pace with wage increases over the person's working lifetime, and that keep pace with price increases once the person retires. But the new formula by itself was not enough to solve the financing problem.

You may remember in March we passed a social security financing bill that solved a long-term financing deficit of 2.09 percent of taxable payroll. Well, in 1977, the long term deficit we faced was over 8 percent of payroll, four times as high, and caused primarily by the very high benefits from this flawed benefit calculation. By 1977, benefits had already gotten so high that we could not afford to pay all future beneficiaries at that rate, and we had already raised taxes as much as we thought possible.

So, when we put the new formula into effect in 1977 we lowered overall benefit levels by about 5 to 7 percent. Everyone who turns 62 after 1978 is going to get lower benefits than they would have gotten if we had not passed the law. This may not be a pleasant fact, and not very many people are going to be happy about it. But the alternatives were steeper tax increases or a bankrupt system.

The "Dear Abby" letter was particularly confusing in its reference to the 1917-21 group. People born in these years do come under a transition formula—but this only gives them possibly higher benefits than they would receive under the new formula. Everyone born in 1922 or later is under the new formula. The new formula provides steady benefit levels which, for a worker with average earnings, will equal about 41 percent of their final wages.

If we want to go back and fix this so-called problem now by raising benefits back up, it would cost at least $9 billion in the first year probably $20 billion the second year, and much more each year after that. The Congress has just barely finished work on the Social Security Amendments of 1983, in which we raised revenues and reduced benefits for a total of $169 billion over the next 7 years. I must honestly say that I do not believe the public, upon reflection, is going to ask Congress to go back and raise an additional similar amount in order to pay benefits that soon would be higher than preretirement earnings.

It is unfortunate that we have had this occurrence, which has caused much consternation among Members and the public alike, and I hope we can set it aside as quickly as it has reared its head.

□ 1530

AMENDMENT OFFERED BY MR. MOORHEAD

Mr. MOORHEAD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MOORHEAD: Page 25, line 20, strike out "(8)" and insert in lieu thereof "(8)(A)".

Page 25, line 22, strike out the period and insert in lieu thereof the following:

", except that for the fiscal year 1984, 25 percent of a State's allotment percentage shall be the percentage of the total amount authorized to be appropriated under such Act which a State is eligible to receive for such year based on the low-income home energy costs in such State during the fiscal year 1983.

"(B) For purposes of this paragraph—

"(i) the term 'low-income home energy costs' means the total amount of expenditures for home energy by low-income households, and

"(ii) the term 'low-income households' means households with incomes which do not exceed an amount equal to 125 percent of the official poverty line which is applicable to the State in which such household is located.

"(C) The Secretary (after consultation with the Secretary of Energy) shall compile information as necessary to compute allotment percentages under subparagraph (A) and shall compute such percentages."

Mr. MOORHEAD. Mr. Chairman, I rise to offer an amendment to the low-income energy assistance program which would make more equitable the formula for distributing whatever funding level is ultimately given to the program.

The Committee on Energy and Commerce which shares jurisdiction with the Committee on Education and Labor was tentatively scheduled to mark up its version of the authorization for this program. Evidently today's action on the floor preempts my committee from working its will. As you know, our committee has two energy subcommittees, each of which marked up bills on the low-income energy assistance program.

There were differences and these were scheduled to be worked out in the full committee. One of the changes that would have been proposed was this amendment to both update and make more equitable the formula for distributing LIEAP funds.

The actual text of this amendment, along with the analysis supporting it, is the product of a joint effort by Democratic and Republican staffs of the Subcommittee on Fossil and Synthetic Fuel.

Mr. CORCORAN, our colleague from Illinois, the ranking Republican of that subcommittee, who could not be here today, had worked out an agreement with Mr. SHARP to pursue this formula change in the full committee.

Hopefully it will gain the support of the full House. This may be our only opportunity to make this necessary change.

Let me explain my amendment. The LIEAP program currently allocates its funds based upon formulas which incorporate the ability of the poor to pay energy costs only as a minor factor. The major data used are heating-degree days and total residential energy costs, factors which are relevant to energy expenditures as a whole but not to low income consumers.

This amendment would reform the formula so the ability to pay, or in this case the inability to pay, is as much a factor as the weather.

The amendment requires that 25 percent of the formula be based on low-income energy costs. In other words, the formula must reflect the actual history of expenditures for home energy by the poor in each State.

When one compares how this formula change affects the distribution of the funds noted in the charts I have made available, and reproduced in the RECORD at the conclusion of my remarks, an interesting thing happens: The money goes where it is needed. If we are to have this program at all we owe it to ourselves to put the money in the hands of the most needy.

Another interesting thing happens and that is that money is not distributed to States which year after year show unused allocation of funds.

Mr. PERKINS. Mr. Chairman, will the gentleman from California yield to me?

Mr. MOORHEAD. I will be happy to yield to the chairman.

Mr. PERKINS. The gentleman from California showed me a copy of the amendment a few minutes ago. Perhaps I should state that both the Ways and Means Committee and the Committee on Energy and Commerce have jurisdiction along with the House Committee on Education and Labor over this program. But in the change of formula, if I understand it, you propose to shift funds under the low-income energy program more toward States which rely on natural gas instead of oil for heating, is that correct?

Mr. MOORHEAD. It makes the use of natural gas by the poor a factor as much as the use of oil by consumers in general. In other words, under the present formula in the bill, the people that use natural gas, the poor people in those areas get very little assistance; whereas they would get more under this change.

However, in my amendment 75 percent of the formula would still remain exactly as it is in the bill.

I would change only 25 percent to say that the money would go where

the poor are actually spending the money for their fuel.

Mr. PERKINS. Under regular procedure, I would have objection to the amendment but inasmuch as the House Committee on Ways and Means and the Committee on Energy and Commerce are very much interested in the formula, and I have had very little opportunity to do much studing about the situation, I would hope that the gentleman would defer consideration of the amendment until these gentlemen come to the floor.

How does the gentleman feel about deferring consideration of it?

Mr. MOORHEAD. I would really like to have it considered today.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. COATS and by unanimous consent, Mr. MOORHEAD was allowed to proceed for 3 additional minutes.)

Mr. MOORHEAD. I would, Mr. Chairman, of course, be willing to work out these formula changes with the chairman and with other committees involved. I think there is no other opportunity, however. Our committee, the Committee on Energy and Commerce, was going to consider this issue. I think this amendment that I have would have been adopted in the Commerce Committee but the bill is going to be past us. We will no longer have a chance.

Mr. PERKINS. Do the other committees knows that you are introducting this change in the formula today?

Mr. MOORHEAD. The members of my committee I think do, at least a substantial number of them do.

It was going to be offered by another person. I agreed to take it on upon my return from our latest trip to our districts.

Mr. COATS. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman.

Mr. COATS. I thank the gentleman for yielding.

Mr. Chairman, I wonder, the chairman expressed an interest in working to adjust the formula and the gentleman from California indicated that both the energy subcommittees of the Committee on Energy and Commerce are dealing with this, in fact, through quite an involved process, and are working toward a solution to this. We feel constrained to offer the amendment today because the money has been included in the Rehabilitation Act and this may be our only chance. I am wondering if the chairman would agree to withdraw the funding for this particular program which is a long way from the Rehabilitation Act's original purpose so we could address that and perhaps work with him in finding a proper solution to this.

□ 1540

Mr. PERKINS. If the gentleman will yield, this bill concerns the funding aspects of the Low Income Energy Assistance Act. Many members on the committee were interested in this particular provision. It would be my hope however that we could defer consideration of the formula change until a later date.

Mr. MOORHEAD. When could it come up so that any change would not already be foreclosed?

Mr. PERKINS. The authority for the program does not expire until next year. And it has got to come up within the foreseeable future—I would think this year or early next year. We will cooperate with the gentleman along this line and get the bill out.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from New York.

Mr. GREEN. I thank the gentleman for yielding.

I would hope the gentleman would consider deferring it because this does make very major changes and ones which, by and large, affect the most northerly coldest States. My own State, New York, would lose almost $45 million under this change in formula. And as I go down the list I see States like Connecticut, Idaho, Maine, Massachusetts, Minnesota, and Montana.

The CHAIRMAN. The time of the gentleman from California (Mr. MOORHEAD) has expired.

(At the request of Mr. GREEN and by unanimous consent, Mr. MOORHEAD was allowed to proceed for 5 additional minutes.)

Mr. GREEN. If the gentleman will yield further, and going down the list, North Dakota, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, and Wisconsin. By and large, it is the coldest States in the country that are getting hurt under this amendment. And while I understand the gentleman's concern at the very rapid escalation of natural gas prices, it seems to me that a change in the formula which makes such marked impact on some States and no States which at first blush would seem to have the greatest energy problems because of their cold climates, really deserve more consideration than we are going to be able to give the ins and outs of this formula on the floor this afternoon in consideration of this bill.

Mr. MOORHEAD. Actually more than half of the States and most of the big States—not counting New York—do benefit from the change. But a lot of the States that lose from the change have not been spending the money that has been allocated to them under the low energy assistance.

The States that are getting the benefits under this program, the poor, have actually been spending money in the same ratios that my formulas call for. And, for that reason, they have a need for the money. There will not be that money just lying fallow there in States that cannot find a place to expend it. We will be able to use it and it will be much more equitable.

There is 75 percent of this money that is going to go under the old formula, which is very complicated; 25 percent will go to the poor for which the present program does not provide, putting to use money which would otherwise go unused. In fact, this change reduces the opportunity for abuse of this LEAP money. You cannot object to the poor who need the money getting it in the proportion that they are spending the money for energy.

Mr. GREEN. Again, I am really not equipped to deal with the ins and outs of this formula at this time and I doubt that many Members here are. But the problem I see is that the gentleman has a very marked change in where the money is going from the coldest parts of the country to the warmer parts of the country. And it seems to me that any change in a low-income energy assistance program, which by and large takes money from the colder States where the high energy costs have fallen most heavily on the poor, is something that certainly deserves more examination than it is going to get here on the floor this afternoon.

And in view of the fact that two other committees, frankly, whose jurisdiction in this area and whose expertise in this area is greater than the committee whose bill is on the floor this afternoon, are looking at the subject matter, it would seem to me that that is the place where the complications of this formula, which the gentleman in the well has pointed out, really ought to be dealt with.

Mr. MOORHEAD. I would love to have it decided in those committees, but we are on the floor with a bill at the present time and that bill will in due course go to conference and will become law, I would assume. Unless we make these changes, the chances are they will never be made.

Mr. COATS. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Indiana.

Mr. COATS. I thank the gentleman for yielding.

The gentleman from California makes exactly the right point. The two committees with the greatest ability to decide what the formula ought to be and to make it fair and equitable, who have held the hearings and heard the testimony, were attempting to work out a solution to the formula, but we are not precluded from doing that because the authorization is here before us today on a nonrelated bill

that has nothing to do with low-income energy assistance and I think we all know that if this goes through today we will probably have no opportunity to adjust that formula.

And further, in response to the gentleman from New York, it is not the transfer of money from the cold States to the warm States. It is a change in the formula which will better compensate those people that are most impacted by heating costs.

Let me read some of the States that more money will go to, States that now are not adequately funded. Alaska, I do not call that a warm State. Colorado, Illinois, Indiana, Maryland, Michigan, Ohio, West Virginia, Wyoming, Kentucky, the State of the chairman, those are the States that would benefit from this formula change.

What we are simply trying to do is on only 25 percent of the formula shift some funds to areas that are impacted by natural gas costs, costs that have risen dramatically, while oil costs have fallen. The State of New York, for instance has not been able to use all of its energy assistance. In fact, last year the State which received 13 percent of the total assistance available only was able to spend 79.2 percent. We are not denying any assistance to any family in need in New York State.

The CHAIRMAN. The time of the gentleman from California (Mr. MOORHEAD) has again expired.

(At the request of Mr. COATS and by unanimous consent, Mr. MOORHEAD was allowed to proceed for 1 additional minute.)

Mr. COATS. If the gentleman will continue to yield, we are not denying any energy assistance to lower income people in the State of New York. We are simply saying that since they have not been able to spend it all and therefore have transferred it to other programs, let us shift that money to low-income people in other States that are underfunded because the formula is skewed toward the use of oil and away from the use of natural gas. We are not denying oil users assistance. We are simply saying let us balance it out and give those low-income people who have been impacted the most in the last few years with natural gas costs rising a little share of the money that is available here. And again, this is our only opportunity to do it. Unfortunately, this comes up under a bill that has nothing to do with energy assistance, but we have to address it here because that is our only opportunity.

Mr. MOORHEAD. Mr. Chairman, in closing I would like to point out that this amendment compensates the poor for the recent rise in natural gas prices; the current formula does not.

The amendment sends the money where the poor spends its money on energy. The current formula sends money to the States which are often in serious surplus.

The amendment more fairly distributes the proceeds of the program based on where the need is, where the poor are, where expenses for energy are the highest. It would, I think, give us a better formula and I ask for an "aye" vote.

The chart referred to follows:

LOW-INCOME ENERGY ASSISTANCE PROGRAM

[Distribution of funds]

	Percent share current law formula	Dollars at $1.975 billion (fiscal year 1983)	Dollars at $2.25 billion (current)	Moorhead amendment	
				Percent share new 75/25 formula	Dollars at $2.25 billion (new)

West Virginia	0.91	17,972,500	20,475,000	0.97	21,781,489
Wisconsin	3.58	70,705,000	80,550,000	3.24	72,897,360
Wyoming	0.30	5,925,000	6,750,000	0.30	6,848,464

Mr. GREEN. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to this amendment because I do not think this is the bill on which we should be making a major adjustment in the low-income energy assistance formula. Plainly the Education and Labor Committee did not presume to do that; it simply moved forward with additional funding under a formula which already exists. It is letting the committee which has more expertise in the energy area continue to do its work on what is an appropriate adjustment, if any, in this formula.

The fact that the States that benefit under the existing formula have taken advantage of the option in the low-income energy assistance program to use the funds they get under the formula to help the poor in other ways than the specific mechanism provided in the statute simply reflects the fact that the low-income energy assistance program provides essentially a crude mechanism for helping the poor.

□ 1550

So, recognizing that the poor suffer from higher energy costs in a whole variety of ways, in addition to those that are directly associated with housing, the law currently allows States to exercise an option to help low-income people, who plainly have been the worst sufferers from the very high energy costs we have faced since 1973, by providing assistance to them in other forms than the direct mechanism in the low-income energy assistance law. To use the fact that under their circumstances and with their low-income families they have done just what this Congress contemplated they would do to try to make this statute workable, to use that as an excuse for diverting large amounts of funds away from those States principally in the coldest part of the country largely to States in the warmer part of the country seems to me to misunderstand past congressional intent with respect to this legislation and to be a very real travesty of justice.

So again I would urge my colleagues not to use this afternoon, when we are involved with matters primarily relating to education and the handicapped, to try to rewrite a very complicated formula, particularly when another committee with more expertise on this subject is actively engaged in that endeavor and when there will be ample opportunity, as already has been made clear, to deal with the formula problem under circumstances when the House will better be able to consider it.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I have the utmost respect and affection for the gentleman from California, the author of the amendment. He is a fine and able and valued Member of this body. It is with some regret that I rise in opposition to the amendment.

I would observe to my colleagues that my own State gets a significant benefit under this. I think that that is very desirable and appealing. The amount of money that Michigan and Michigan citizens would receive under this amendment is a highly desirable thing from the standpoint of both our State and the citizens of our State. But the harsh fact of the matter is that the allocation of resources inside this country for weatherization, for low-income assistance and for other matters is a very complex and a very difficult matter. It is one which requires very careful attention to assure fairness and to meet the very legitimate and real concerns of the poor and to meet the concerns of conservationists who are desirous of seeing to it that our national purse is well spent for the purposes of meeting the needs of the poor and the impoverished and also for providing for weatherization to deal with the problems of making more heat and cooling efficient the homes of the persons in our country. And that is a point which should be well borne in mind as this body considers this particular amendment.

It should be observed, with all respect for my dear friend, the author, that at no point have adequate hearings or consideration been given to the points which are raised in the amendment.

Beyond that, it should be observed, with a very limited number of Members on the floor on a Tuesday, at 4 o'clock, when the business of the House has been chronicled as involving relatively limited matters of controversy, that adequate notice to Members who would be affected by the outcome of this particular amendment has not been made available.

In consequence, I cannot offer to my colleagues, as the chairman of the committee that deals with this issue, assurances that there are not unforeseen surprises and glitches inherent in this amendment, because it shifts massive sums of money around the country from one State to another, from one region to another, with consequences that cannot altogether be understood both by the body at this particular time and by individual Members as they try to analyze and understand the amendment.

Now, I do not want it said that the gentleman from California has not made a fair presentation or that he has not presented to the body documents which indicate a shift in the allocation of formulas amongst the several States. But the precise consequences of this amendment are not fully understood by this body, cannot in the limited amount of debate which will take place.

I would observe that it was with considerable surprise that I found that this amendment was on the floor. I was at the time the amendment was offered headed for my office to meet with persons on matters relative to committee business. But I am compelled to simply observe to the House the concern that I feel for writing this kind of legislation at this time in this fashion and under these circumstances and to observe that the fixing of formulas on complex and difficult questions of this kind should be dealt with in committee, with careful analysis and with a full appreciation of all of the consequences.

Now, the legislation which this amendment would amend expires within a year, and there will be an abundance of time for the House and for the Congress to again address the question of how the moneys should be spent, how they should be allocated, whether there should be more funds or less funds made available. A cold-weather State like New York loses enormous amounts of money. The entire New England region will lose significant amounts of money.

Now, perhaps we should get down to this business of beggaring our neighbor and quarrelling over the amounts of money available under a constrained budget, or perhaps it should be that the House in a more wise fashion should see to it that we have a formula which not only allocates the money well, on the basis of reasoned and careful hearings, but also that the House should see to it that adequate funds are made available to address the entirety of the question and see to it that we have enough money to meet the needs of the poor and to provide for the conservation responsibilities, which are very important here, of assuring that there are sufficient amounts of money available in all places, not only to meet the needs of the poor, but also to see to it that we share the money for heating and cooling and for making efficient the dwellings and the conservation practices of this country in an appropriate fashion and in an appropriate manner.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DINGELL) has expired.

(On request of Mr. COATS and by unanimous consent, Mr. DINGELL was allowed to proceed for 1 additional minute.)

Mr. COATS. If the gentleman will yield, I wonder if I could ask the distinguished chairman of the Commerce Committee a question, or at least just make a statement. I appreciate the fact that perhaps there is a better forum for this formula to be debated, but I wonder if the chairman could

also appreciate the fact that perhaps there is a better legislative vehicle for these funds to be authorized, because it certainly cuts out those members of the two appropriate subcommittees that have worked long and hard and who have been attempting to provide meaningful energy assistance for low-income people. It does not give us an opportunity to properly present our case.

Mr. DINGELL. Mr. Chairman, the gentleman raises a very good point. The two energy subcommittees of the Commerce Committee have worked long and hard to try to resolve this issue, and they are still working together trying to get down to a decent set of figures that will satisfy them. And this will, of course, short circuit that undertaking. The gentleman raises a very good point, and I commend him for it.

Mr. COATS. I thank the gentleman.

Mr. MOORHEAD. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from California.

Mr. MOORHEAD. There is one question concerning New York. They had $251 million given to them, as I understand it, under the bill.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DINGELL) has again expired.)

(By unanimous consent, Mr. DINGELL was allowed to proceed for 2 additional minutes.)

Mr. DINGELL. I yield further to the gentleman from California.

Mr. MOORHEAD. They had $251 million appropriated for 1983 and spent $209 million. Under this formula they would have $241 million. I do not understand how they can be losing money if they are going to have considerably more than they are going to be able to spend.

Mr. DINGELL. Well, I think that is a question that should be responded to after we have had adequate hearings, to go into it, to find out all of the reasons and understand the questions and achieve a formula which is basically fair.

I am sure the gentleman means the very best in offering this amendment, and I certainly do not want any of my comments to reflect in any way adversely on the gentleman. But this is just not the way that this kind of an amendment should be done. It should be considered in committee, a full understanding should be able to be presented to the body so that everybody understands what the amendment does.

Mr. MOORHEAD. If the gentleman will yield further, the whole section that we are now taking up that this would amend has been adopted the same way, and our committees have not had an opportunity to work on them either.

Mr. DINGELL. I am fully prepared to address that question in committee as soon as the subcommittees are able to come to an understanding over the allocation of these funds. As I pointed out to the House, this is a very difficult question, and it is not one which can be easily handled here.

Mr. NIELSON of Utah. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak in favor of the amendment.

□ 1600

Mr. Chairman, I sit on both the Committee on Education and Labor and the Committee on Energy and Commerce. The weatherization bill came before both committees. The gentleman from Illinois (Mr. ERLENBORN) successfully amended the bill to reduce the amount from $3 million to $2¼ million, in line with the budget resolution of the House of Representatives.

In the Committee on Energy and Commerce, we have not yet taken the bill, but we have been negotiating for months. Representative OTTINGER and Representative SHARP have been negotiating on this formula for some time. It has gone before the Energy and Conservation and Power group and it is not just a new item. It has been under discussion for some time in that committee.

The fact is, most of the States which the gentleman from New York (Mr. GREEN) has mentioned had money left over and did not use their allocation. Other States had run out of money some time ago.

I am surprised that the chairman of the Committee on Energy and Commerce could be so gracious in this particular regard because his committee has been undercut by putting this bill in, as it is, with the rehabilitation bill. This is one reason why the Bartlett amendment should have been adopted, because of these title IV parts which have not had their consideration either in that committee or in any other committee.

I am also surprised that the gentleman could be so gracious as to give back the money Michigan dearly needs because of its high coal and natural gas costs.

I would like to be just as gracious. Utah would lose under this amendment. But Utah did not use all the money it was allocated and had money to give back.

I think we ought to get a formula which is fair and right. The Committee on Energy and Commerce members worked very hard to have a formula which is better than the one we have now, and while I agree with the gentleman from Michigan (Mr. DINGELL), that we ought to do this in committee and not on the floor, we have not been allowed that privilege since the Bartlett amendment did not pass and, therefore, I support the amendment as an improvement over what we have now.

Mr. SWIFT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. As a member of the Committee on Energy and Commerce, it seems to me that we need to clarify something that has become confused here.

The bill that the Committee on Education and Labor is bringing out does not extend the authorization of this program, as I understand it; it merely increases the authorized amount for the remainder of the existing authorization of the program. It does so with the existing formula. Therefore, it seems to me that it is not the Committee on Education and Labor that is bringing to the floor a formula that has not had the opportunity to be thoroughly considered by the committee; it is the people who are proposing the amendment who are bringing it to the floor and not giving it the opportunity to be fully heard in committee.

The fact is that this program is going to have to be reauthorized within a year anyway, at which time the three committees which hold jurisdiction are going to have to speak to it, including the Committee on Energy and Commerce, at which time any formula change would be appropriately considered. It is totally inappropriate to bring it up now.

I stress again, it is not the Committee on Education and Labor that is proposing a change in the formula; it is this amendment that is proposing a change in the formula without adequate hearings and without an opportunity for the committees with the greatest expertise to be heard.

Mr. OTTINGER. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I rise in strong opposition to this amendment. Without any hearings, indeed without any notice to me that this amendment was going to be brought up, this would attempt to change the formula for low-income energy assistance, making vast changes in what the various States receive.

We work very closely with the chairman of the Committee on Education and Labor, the gentleman from Kentucky (Mr. PERKINS) and in view of the fact that different versions of this bill were reported out by two subcommittees of jurisdiction on our committee, agreed that the best way to go would be with the Committee on Education and Labor increase in funds and leave the very complicated and contentious questions of formula changes to later determination. That determination ought to be made with great care and

after full hearings. It ought not to be made on the basis of an amendment that is offered at the last minute on the floor, with none of the interested parties having any notice or opportunity to be heard whatsoever.

For those reasons, Mr. Chairman, I very strongly oppose the amendment of the gentleman from California.

Mr. CONTE. Mr. Chairman, I rise in opposition to the amendment.

I can speak for the needs of the poor under this program.

In the last 3 years, I have put over $1.5 billion back into low income energy that the administration proposed to cut. I follow this program closely and know a little bit about it.

The truth of the matter is that there have been a number of proposals this year to change the formula. The administration has proposed one that would benefit the North Frost Belt States.

Mr. SHARP and Mr. MOORHEAD have proposed one that would benefit more Southern States.

Mr. OTTINGER has proposed one that would deal with natural gas.

The truth of the matter is that we do not at this point know enough about what formula would be better than the one we have now, if any would be.

I am concerned about this situation, and particularly concerned about our lack of information.

In fact, in this year's Labor-HHS education appropriations bill, I have included report language requiring much more collection of data than we have done for any year since 1981. It is my hope that this information will allow informed decisions next year, when we have to consider reauthorization of the program.

Right now, however, we are shooting in the dark. We know that low income energy assistance reaches only about 40 percent of those who are eligible. To pretend that we know enough to take from some poor people and give to others is preposterous.

This amendment should be defeated and the issue should be considered with much more deliberation as part of the reauthorization process next year.

Mr. MICHEL. Mr. Chairman, I support this amendment because it enables us to more effectively allocate the low income energy assistance funds to where the real needs are.

The amendment would require that actual energy costs to low income people be taken into account. In other words, States where such costs are higher would receive more funds. My own State of Illinois, for instance, would receive an additional $14 million.

In addition, the amendment would take into account current heating costs in the allocation of funds, not heating costs of the late 1970's. The existing formula, in other words, does not take into account the substantial rise in natural gas prices that has taken place during the past year.

In my own district, natural gas prices have gone up by more than 70 percent. A formula that does not take these changes into account cheats the poor of assistance they need and are entitled to.

If ever there was a fairness amendment, this it is. I urge its adoption.

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to ask the gentleman from California, in view of all the colloquy here this afternoon, if he would be willing to withdraw the amendment at this time.

Mr. MOORHEAD. If the gentleman would yield, I would really prefer voting on it today.

Mr. PERKINS. All right, let us have a vote, Mr. Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. MOORHEAD).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. COATS. Mr. Chairman, I demand a recorded vote, and pending that I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a recorded vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three hundred eighty-four Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Indiana (Mr. COATS) for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. The Chair will announce that this is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 226, noes 174, not voting 33, as follows:

[Roll No. 331]

□ 1630

The Clerk announced the following pairs:

On this vote:

Mr. Burton of Indiana for, with Mr. Roe against.

Mrs. Martin of Illinois for, with Mr. Howard against.

Mr. Pashayan for, with Mr. Forsythe against.

Mr. Stump for, with Mr. Young of Alaska against.

Mr. Corcoran for, with Mr. Tauke against.

Mr. Craig for, with Mr. McDade against.

Mr. Gingrich for, with Mr. Schulze against.

Messrs. CHANDLER and HERTEL of Michigan changed their votes from "aye" to "no."

Messrs. BRITT, ANNUNZIO, CARR, HERTEL of Michigan, and LIPINSKI, Ms. OAKAR, and Messrs. EDWARDS of California, GIBBONS, and ROSE changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. WRIGHT

Mr. WRIGHT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WRIGHT: Add at the end of the bill the following new title:

TITLE V—SPECIAL IMPACT AID FOR IMMIGRANT CHILDREN EDUCATION

SHORT TITLE

SEC. 501. This title may be cited as the "Emergency Immigrant Education Act of 1983".

DEFINITIONS

SEC. 502. As used in this title—

(1) The term "immigrant children" means children who were not born in a State and who have been attending schools in any one or more States for less than three complete academic years.

(2) The terms "elementary school", "local educational agency", "secondary school", "State", and "State educational agency" have the meanings given such terms under section 198(a) of the Elementary and Secondary Education Act of 1965.

(3) The term "elementary or secondary nonpublic schools" means schools which comply with the applicable compulsory attendance laws of the State and which are exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954.

(4) The term "Secretary" means the Secretary of Education.

AUTHORIZATIONS AND ALLOCATION OF APPROPRIATIONS

SEC. 503. (a) There are authorized to be appropriated for each of the fiscal years 1984, 1985, and 1986, such sums as may be necessary to make payments to which State educational agencies are entitled under this title and payments for administration under section 504.

(b)(1) If the sums appropriated for any fiscal year to make payments to States under this title are not sufficient to pay in full the sum of the amounts which State educational agencies are entitled to receive under this title for such year, the allocations to State educational agencies shall be ratably reduced to the extent necessary to bring the aggregate of such allocations within the limits of the amounts so appropriated.

(2) In the vent that funds become available for making payments under this title for any period after allocations have been made under paragaph (1) of this subsection for such period, the amounts reduced under

such paragraph shall be increased on the same basis as they were reduced.

STATE ADMINISTRATIVE COSTS

SEC. 504. The Secretary is authorized to pay to each State educational agency amounts equal to the amounts expended by it for the proper and efficient administration of its functions under this title, except that the total of such payments for any period shall not exceed 1.5 per centum of the amounts which that State educational agency is entitled to receive for that period under this title.

WITHHOLDING

SEC. 505. Whenever the Secretary, after reasonable notice and opportunity for a hearing to any State educational agency, finds that there is a failure to meet the requirements of any provision of this title, the Secretary shall notify that agency that further payments will not be made to the agency under such title, or in the discretion of the Secretary, that the State educational agency shall not make further payments under such title to specified local educational agencies whose actions cause or are involved in such failure until the Secretary is satisfied that there is no longer any such failure to comply. Until the Secretary is so satisfied, no further payments shall be made to the State educational agency under such title, or payment by the State educational agency under such title shall be limited to local educational agencies whose actions did not cause or were not involved in the failure, as the case may be.

STATE ENTITLEMENTS

SEC. 506. (a) The Secretary shall, in accordance with the provisions of this section, make payments to State educational agencies for each of the fiscal years 1984, 1985, and 1986 for the purpose set forth in section 507.

(b)(1) Except as provided in paragraph (3) and in subsections (c) and (d) of this section, the amount of the grant to which a State educational agency is entitled under this title shall be equal to the product of (A) the number of immigrant children enrolled during such fiscal year in elementary and secondary public schools under the jurisdiction of each local educational agency described under paragraph (2) within that State, and in any elementary or secondary nonpublic school within the district served by each such local educational agency, multiplied by (B) $500.

(2) The local educational agencies referred to in paragraph (1) are those local educational agencies in which the sum of the number of immigrant children who are enrolled in elementary or secondary public schools under the jurisdiction of such agencies, and in elementary or secondary nonpublic schools within the districts served by such agencies, during the fiscal year for which the payments are to be made under this title, is equal to—

(A) at least 500; or

(B) at least 5 per centum of the total number of students enrolled in such public or nonpublic schools during such fiscal year;

whichever number is less.

(3)(A) The amount of the grant of any State educational agency for any fiscal year as determined under paragraph (1) shall be reduced by the amounts made available for such fiscal year under any other Federal law for expenditure within the State for the same purpose as those for which funds are available under this title, but such reduction shall be made only to the extent that (i) such amounts are made available for such purposes specifically because of the refugee, parolee, asylee, or other immigrant status of the individuals served by such funds, and (ii) such amounts are made available to provide assistance to individuals eligible for services under this title.

(B) No reduction of a grant under this title shall be made under subparagraph (A) for any fiscal year if a reduction is made, pursuant to a comparable provision in any such other Federal law, in the amount made available for expenditure in the State for such fiscal year under such other Federal law, based on the amount assumed to be available under this title.

(c)(1) Determinations by the Secretary under this section for any period with respect to the number of immigrant children shall be made on the basis of data or estimates provided to the Secretary by each State educational agency, unless the Secretary determines, after notice and opportunity for a hearing to the affected State educational agency, that such data or estimates are clearly erroneous.

(2) No such determination with respect to the number of immigrant children shall operate because of an underestimate or overestimate to deprive any State educational agency of its entitlement to any payment (or the amount thereof) under this section to which such agency would be entitled had such determination been made on the basis of accurate data.

(d) Whenever the Secretary determines that any amount of a payment made to a State under this title for a fiscal year will not be used by such State for carrying out the purpose for which the payment was made, the Secretary shall make such amount available for carrying out such purpose to one or more other States to the extent the Secretary determines that such other States will be able to use such additional amount for carrying out such purpose. Any amount made available to a State from an appropriation for a fiscal year in accordance with the preceding sentence shall, for purposes of this title, be regarded as part of such State's payment (as determined under subsection (b)) for such year, but shall remain available until the end of the succeeding fiscal year.

USES OF FUNDS

SEC. 507. (a) Payments made under this title to any State may be used in accordance with applications approved under section 508 for supplementary educational services and costs, as described under subsection (b) of this section, for immigrant children enrolled in the elementary and secondary public schools under the jurisdiction of the local educational agencies of the State described in section 506(b)(2) and in elementary and secondary nonpublic schools of that State within the districts served by such agencies.

(b) Financial assistance provided under this title shall be available to meet the costs of providing immigrant children supplementary educational services, including but not limited to—

(1) supplementary educational services necessary to enable those children to achieve a satisfactory level of performance, including—

(A) English language instruction;

(B) other bilingual educational services; and

(C) special materials and supplies;

(2) additional basic instructional services which are directly attributable to the presence in the school district of immigrant children, including the costs of providing additional classroom supplies, overhead costs, costs of construction, acquisition or rental of space, costs of transportation, or such other costs as are directly attributable to such additional basic instructional services, and

(3) essential inservice training for personnel who will be providing instruction described in either paragraph (1) or (2) of this subsection.

APPLICATIONS

SEC. 508. (a) No State educational agency shall be entitled to any payment under this title for any period unless that agency submits an application to the Secretary at such time, in such manner, and containing or accompanied by such information, as the Secretary may reasonably require. Each such application shall—

(1) provide that the educational programs, services, and activities for which payments under this title are made will be administered by or under the supervision of the agency;

(2) provide assurances that payments under this title will be used for purposes set forth in section 507;

(3) provide assurances that such payment will be distributed among local educational agencies within that State on the basis of the number of children counted with respect to such local educational agency under section 506(b)(1), adjusted to reflect any reductions imposed pursuant to section 506(b)(3) which are attributable to such local educational agency;

(4) provide assurances that the State educational agency will not finally disapprove in whole or in part any application for funds received under this title without first affording the local educational agency submitting an application for such funds reasonable notice and opportunity for a hearing;

(5) provide for making such reports as the Secretary may reasonably require to perform his functions under this title; and

(6) provide assurances—

(A) that to the extent consistent with the number of immigrant children enrolled in the elementary or secondary nonpublic schools within the district served by a local educational agency, such agency, after consultation with appropriate officials of such schools, shall provide for the benefit of these children secular, neutral, and nonideological services, materials, and equipment necessary for the education of such children;

(B) that the control of funds provided under this title and the title of any materials, equipment, and property repaired, remodeled, or constructed with those funds shall be in a public agency for the uses and purposes provided in this title, and a public agency shall administer such funds and property; and

(C) that the provision of services pursuant to this paragraph shall be provided by employees of a public agency or through contract by such public agency with a person, association, agency, or corporation who or which, in the provision of such services, is independent of such elementary or secondary nonpublic school and of any religious organization; and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this paragraph shall not be commingled with State or local funds.

(b) The Secretary shall approve an application which meets the requirements of subsection (a). The Secretary shall not finally disapprove an application of a State educa-

tional agency except after reasonable notice and opportunity for a hearing on the record to such agency.

PAYMENTS

SEC. 509. (a) Except as provided in section 503(b), the Secretary shall pay to each State educational agency having an application approved under section 508 the amount which that State is entitled to receive under this title.

(b) If by reason of any provision of law a local educational agency is prohibited from providing educational services for children enrolled in elementary and secondary nonpublic schools, as required by section 508(a)(6), or if the Secretary determines that a local educational agency has substantially failed or is unwilling to provide for the participation on an equitable basis of children enrolled in such schools, the Secretary may waive such requirement and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of this title. Such waivers shall be subject to consultation, withholding, notice, and judicial review requirements in accordance with section 557(b) (3) and (4) of the Education Consolidation and Improvement Act of 1981.

Mr. WRIGHT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

POINT OF ORDER

Mr. ERLENBORN. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman from Illinois (Mr. ERLENBORN) will state his point of order.

□ 1640

Mr. ERLENBORN. Mr. Chairman, I make the point of order against the pending amendment on the grounds that section 503 of the pending amendment violates section 402(a) and 303(a) (1) and (2).

In addition, Mr. Chairman, I make a point of order against the amendment in that section 503(b)(1) violates sections 303(a)(4) and 401(c)(2) of the Budget Control Act.

Now, Mr. Chairman, section 303(a) of the Budget Control Act states that it shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution or amendment thereto which provides: First, new budget authority for a fiscal year; or second, an increase or decrease in revenues to become effective during a fiscal year.

Mr. Chairman, 503(a) of the pending amendment creates new budget authority in that it states that there are authorized to be appropriated for each of the fiscal years 1984, 1985, and 1986 such sums as may be necessary to make payments to which State educational agencies are entitled under this title and payments for administration under section 504.

Mr. Chairman, the effect of section 503(b)(1) and later provisions of this amendment, the amendment providing for $500 per pupil entitlement under this bill for this new impact act program to be funded jointly from 503(a), which is the direct budget authority, and 503(b)(1) which authorizes transfers from other existing budget authority, violates 401(c)(2) in that it creates new entitlement authority.

For these reasons I believe that the pending amendment violates these provisions of the Budget Act and is subject to this point of order.

The CHAIRMAN. Does the gentleman from Texas (Mr. WRIGHT) wish to be heard on the point of order?

Mr. WRIGHT. Yes, Mr. Chairman, I would like to be heard.

As I understand the gentleman's point of order, he argues that this amendment would not be in order because it would create a new entitlement and because it would be contrary to and excessive of the budget resolution.

With respect to the latter, I should simply point out that this does not create any entitlement which would be triggered absent an appropriation. There would have to be an appropriation in order for these moneys to be made available to the school districts which the amendment would make eligible for said moneys.

503(a), Subsection b, provides that to the extent the Congress should fail to appropriate adequate funds, there would be a rateable reduction to each of the States otherwise made eligible.

In other words, by its own provisions it contains a means of restraining the entitlement that otherwise would be created within the amounts that are appropriated by Congress.

Nothing thus far has been appropriated. This is simply an authorizing proposal. It is no more violative of the provisions cited by the distinguished gentleman from Illinois than are other provisions already adopted in this legislation in title IV in that they also create, just as this new title would create, an additional eligibility for Federal assistance.

Inasmuch as the Supreme Court has ruled that it is the responsibility, under the Constitution, of every school district to provide educational opportunity for all of the children residing within that district, whether legally or not, then quite clearly, it falls within the responsibility of the Federal Government to be able, if the Congress in its wisdom so determines, to provide assistance to those school districts upon whom this burden has been imposed by decree of the Supreme Court.

The CHAIRMAN. Does the gentleman from Kentucky (Mr. PERKINS) desire to be heard on the point of order?

Mr. PERKINS. I do, Mr. Chairman.

Mr. Chairman, I concur in the argument made by the gentleman from Texas that the amendment is germane. It is not an entitlement. This amendment creates no entitlements. The program is purely an authorization of appropriations. All grants are subject to reduction if appropriations are not sufficient.

There is nothing here that is nongermane about this amendment. The amendment is germane.

Mr. ERLENBORN. Mr. Chairman, I would submit, respectfully, that the arguments of the gentleman from Texas and the gentleman from Kentucky neither of them addressed the issue of violation of section 303(a) of the Budget Control Act which prohibits the consideration of bills or amendments creating new budget authority until the first concurrent resolution on the budget for such year has been agreed to, pursuant to section 301.

And the provisions of this amendment create new budget authority for fiscal years 1984, 1985, and 1986.

I might also state in support of my point of order, Mr. Chairman, that the amendment may well also—depending upon the interpretation of the Parliamentarian—violate section 402(a) of the Budget Control Act, which prohibits the consideration of bills or resolutions creating new budget authority unless they are reported before May 15.

Now, I submit that this bill was not reported before May 15.

There is a waiver for the bill, but there is no waiver in the rule for amendments to the bill.

Now it could be argued, Mr. Chairman, that because the rule does not prohibit the consideration of an amendment, but only bills and resolutions, that therefore this does not apply.

I would submit, however, that if this amendment is adopted, we will then, in further consideration of the bill, be considering a bill which at that time after the adoption of this amendment would contain new budget authority that had not been reported in the bill before May 15. So that is one additional reason for the sustaining of my point of order.

Mr. WRIGHT. Mr. Chairman, very briefly I would like to be heard. In the first place, it is my distinct impression, and I believe would be confirmed by a reading of the act, that section 402(a) of the Budget Act does not apply to amendments, but only to bills.

Second, that a waiver of that section has been obtained with respect to this bill.

□ 1650

Third, that the language proposed in this amendment provides nothing by way of educational spending authorization beyond that which already has

been done in the bill itself and that inasmuch as this bill is permitted to come before the House and is being considered by the House under a waiver of section 402(a), and since section 402(a) has no application whatsoever, by its own terms, to an amendment per se, then the amendment is germane and the amendment would be in order.

The CHAIRMAN. The Chair is prepared to rule.

On the first question that the gentleman from Illinois raised with respect to the amendment, an amendment is not covered by the May 15 reporting deadline in section 402(a) of the Budget Act and, therefore, that point of order is not sustained.

With regard to the issue of budget authority, the Chair would rule that the amendment contemplates that budget authority would rest in an appropriations bill. This is an authorization proposal that is being put forth by the gentleman from Texas.

Now, with respect to the third question that was raised by the gentleman from Illinois on the question of an entitlement, the Chair will read the Congressional Budget Act definition of "entitlement," in section 401(c)(2)(C) of that act, and I quote:

> . . . to make payments (including loans and grants), the budget authority for which is not provided for in advance by appropriation Acts, to any person or government if, under the provisions of the law containing such authority, the United States is obligated to make such payments. . . .

Now, the Chair would point out that in section 503(b)(1) of the amendment by the gentleman from Texas, language pertaining to ratable reduction is being offered by the gentleman from Texas, which negates the entitlement features which the gentleman from Illinois alludes to by giving discretion to the Appropriation Committee and, therefore, the Chair would rule that indeed it does not constitute an advance entitlement that the gentleman referred to. The point of order is overruled.

The Chair will recognize the gentleman from Texas to speak on his amendment.

Mr. WRIGHT. I thank the Chair.

Mr. Chairman, first, let me acknowledge my debt and gratitude to my distinguished colleague from Texas (Mr. DE LA GARZA) who assisted in the drafting of this amendment and who has been working on this project for a very long while.

This corrects an inequity that was inadvertently placed upon many school districts throughout the United States by the ruling of the U.S. Supreme Court to the effect that the Constitution requires that a school district must provide education for all children residing within that district whether or not they be there legally or illegally.

I do not find fault with the Supreme Court's ruling. I think, surely, it is far better that these young people shall be in school learning the English language than that they should be out upon the streets furtively seeking to avoid detection.

But as all of us know, there has been a great influx of immigrants into this country, some legal and a great many illegal. I do not know how many undocumented workers there are in the country. I do not think anybody has any accurate count of them.

I have had the pleasure during this recent recess period and previously of attending some schools, some elementary schools and some middle schools, which are undertaking the herculean task of trying to teach young people of disparate racial and linguistic backgrounds the English language and trying to give them a mastery or our language in the shortest period of time possible in order that they then would be equipped to cope with the subject matter and stay abreast of their fellow students in their regular classes.

I have been deeply impressed by the dedication and the capacity of some of the teachers who have given their time and their energies to trying to bring out of these young minds an understanding of the English language and an ability to function as residents of this land of ours.

I have been impressed by the ability of little Vietnamese children, as well as little Hispanic children, and one little Chinese boy, who have been so proficient in learning the English language that now they are assisting their other little colleagues to learn.

But it costs a very great deal of money to provide this specialized training because it cannot be done in large classes. One must take these children in small groups and try to bring them along in the rapidity with which they have a capacity to assimilate a working knowledge of the English language. Without that, they are going to be mental cripples on our society and they are going to be crippled in their capacity to be functioning citizens and human beings.

So it is truly a humane thing that is being done. But the tragedy is that it costs a very great deal of money to provide this kind of education. And the tragedy is further compounded by the fact that in many instances the greatest numbers of these children fall within those neighborhoods and, therefore, in those school districts which, unfortunately, have the lowest tax base and, therefore, are the least affluent to provide on their own and without the benefit of some Federal assistance this kind of specialized training.

Mr. WIRTH. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Yes, I yield to my friend, the gentleman from Colorado.

Mr. WIRTH. Mr. Chairman, I rise in support of the amendment offered by my colleague Mr. WRIGHT. Last year, the Supreme Court ruled that local school districts must educate children of aliens. Regardless of how one feels about this decision, there is no doubt that this left the States, the local school districts, and the local taxpayer with a heavy financial burden to bear. As a result of the recession and of limits on spending abilities, States and local governments are already scraping the bottom of the barrel without having the additional financial burdens of this decision placed solely on their shoulders.

The cost of educating alien children is estimated at $2,500 per child. In my own State of Colorado, where it is estimated that roughly 5,000 alien children are attending public schools, this education is costing the State approximately $12 million.

The Federal Government has a clear responsibility to help in providing these children with an education. This amendment will do that as well as relieve part of the financial burden these States and local communities and taxpayers are facing. The amendment would provide $500 to local school districts each year for each alien child enrolled—only one-fifth of the financial burden these schools must bear. This is a fair and effective solution, and I urge my colleagues to support this amendment.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to my distinguished friend from Texas (Mr. DE LA GARZA), the cosponsor of this amendment.

Mr. DE LA GARZA. I thank the majority leader for yielding and for taking the lead in this very important national issue, which is the education of our children. I would like to state that the majority leader has very succinctly proposed a solution or a part solution to a very intricate and troublesome problem.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(On request of Mr. DE LA GARZA and by unanimous consent, Mr. WRIGHT was allowed to proceed for 5 additional minutes.)

Mr. DE LA GARZA. Eventually, the intricacies of the educational problem come down to one point: financing.

I only take it to my area of Texas, that possibly we could take care of the children that have impacted on our schools, but with one exception, that no funds are allocated by the State of Texas for buildings. All of the buildings have to be by the local school districts. And these districts that have been impacted are many of the poor-

est of the poor, and this is one way to assist them. In order parts of the country, the assistance may be of a different nature; but in my area, it is because there is no facility within the constitutional framework, and the imposition has come from the Federal Government, from our Supreme Court, and therefore this will be of tremendous assistance.

Again, I thank the distinguished majority leader and also the chairman of the committee who has been very cooperative throughout the process.

Mr. PERKINS. Mr. Chairman, will the distinguished majority leader yield?

Mr. WRIGHT. I promised that I would yield to the gentlewoman from California (Mrs. BOXER), and then, of course, I would be delighted to yield to the distinguished chairman of the Committee on Education and Labor.

Mrs. BOXER. I thank the gentleman for yielding.

Mr. Chairman, for the purpose of creating legislative history, I would like to ask a question of the gentleman from Texas.

Referring to the part of the amendment headed "Uses of Funds," section 507, do I understand that the term "overhead costs" in that part would include necessary costs for the local education agency in counting the children covered under this program and in monitoring the activities required under the bill and administering the program?

□ 1700

Mr. WRIGHT. Yes, the gentlewoman from California is entirely correct in her interpretation of the meaning of the term "overhead costs." Clearly it would include costs incurred by local school systems in making child counts and in monitoring the activities under the bill and administering the program.

I appreciate the interest the gentlewoman has expressed in this legislation.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I surely will yield to my friend, the gentleman from Pennsylvania.

Mr. GOODLING. I thank the gentleman for yielding.

The Chairman, I asked the majority leader to yield just to make the point that during my argument against title IV in the manner in which we did it was the fact that, for instance, we were reauthorizing an impact aid program that is many, many years behind its time and has really nothing to do with the real areas that are impacted at the present time.

If we would take that bill and correct it, as some of the legislation that we have passed would do, then the problem the gentleman is talking about would also be handled in the manner in which we gave it a lot of consideration.

Mr. WRIGHT. I would say to the gentleman that he makes a point in that regard, but I think this is a separate matter that has come along with such force and rapidity in the last few years that it has virtually inundated some school systems in States like New York, California, Florida, Texas, Illinois, Michigan, and other States.

It is a widespread problem, but it tends to be isolated in certain school districts and is a very specialized problem.

Mr. GOODLING. And this is what we tried to do with the impact program which we got passed in the House. Unfortunately, it had never gone the entire route. That is my argument against reauthorizing in title IV without giving consideration to the real areas that are impacted, such as Texas, California, Miami, et cetera.

Mr. WRIGHT. I appreciate the gentleman's contribution.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from New York.

Mr. FISH. I thank the majority leader for yielding.

Mr. Chairman, this question, as the gentleman rightly said, has come to a head because of a Supreme Court decision about the issue of the impact of children of illegal aliens. Those who would benefit from the provisions of the Simpson-Mazzoli Act, the targeted assistance provisions in the Refugee Authorization Act which is pending, demonstrate that in a broader context this has been a matter of great concern to the Subcommittee on Immigration and Refugees and International Law of the Committee on the Judiciary of the House.

As I look at the amendment offered by the gentleman from Texas, I do have some questions over its scope because if I understood him, the reason he brought this up was because of the Supreme Court decision dealing with the children of illegal aliens.

Section 502, under definitions, says the term "immigrant children" means children "who are not born in a State." So I take it that the status of the child is totally irrelevant.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(On request of Mr. FISH and by unanimous consent, Mr. WRIGHT was allowed to proceed for 5 additional minutes.)

Mr. FISH. Mr. Chairman, by defining the covered class as children "who were not born in a State," we then can be including, along with illegal aliens, the children of permanent residents, refugees, and indeed U.S. citizens who were born abroad of American parents.

Mr. WRIGHT. I would say the bill defines immigrant children as those children born outside of the United States and its territories, if they have not completed 3 years of schooling in the United States.

I think it was necessary to have as broad a definition as possible, I would say to my friend from New York, in order to accommodate all cases. There are cases involving legal as well as illegal immigrants to the United States which are equally deserving if you look at the child from the standpoint of that child's needs, and I think that is what we seek to do here, as the Supreme Court decision impels us to do, in fact, in that it rests upon the most fundamental constitutional guarantees of equal rights.

Since that is the case, yes, I think that is true. I think we have to be just as broad in our application as we possibly can.

Mr. FISH. If the majority leader would yield further, then, I just want the Members of this body to understand that the children of immigrants to the United States have been educated as long as we have had public education. If the rationale for this amendment is a Supreme Court decision that deals with the children of illegal aliens, that is not what this amendment addresses. It addresses something far, far broader than the rationale, the basis on which it is brought up.

I have no idea, and I do not think anybody else in this Chamber can enlighten me, as to how many children this would cover, but we know for every 1 million it would cost a half a billion dollars.

Mr. SMITH of Florida. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Florida.

Mr. SMITH of Florida. I thank the majority leader for yielding.

Mr. Chairman, I would like first to respond to the question posed by the gentleman from New York (Mr. FISH).

If I am not mistaken, the decision by the Supreme Court in Texas was that it made no difference and, in fact, was irrelevant whether the children were children of illegal aliens, legal aliens, or any other children. In fact, all children were entitled to the same right to an education.

So the premise on which I think the gentleman was questioning the language of the amendment of the gentleman from Texas is not valid because it was not that only illegal aliens' children were entitled, but all children were to be treated in exactly the same fashion.

Now, with reference to this amendment, let me please support the gentleman from Texas on the amendment. For these reasons, which transcend, in fact, merely the language of

the amendment itself, and let me go to the heart of the economic issue.

Ladies and gentlemen, we will be called upon over the years to continue funding not only education but all processes in the social service area. Do not think of the short-term costs to the United States of educating these children; think of the long-term cost if, in fact, we do not pay for the education of these children. We are consigning these young people into a life that will ultimately lead them to the kind of situation where we will have to fund greater dollars in the criminal justice system, fund greater dollars in our crime system in general, and all those other social welfare agencies which will be impacted when they who are disadvantaged and remain disadvantaged do not have the opportunity to participate at this very early level.

More appropriately, when we have this kind of situation with children, what we are doing is denying what we in the United States were founded upon, what our belief has been since the very first day that this country was founded, in that all men are created equal and that the opportunity to be there, in fact, as an equal is extended. It is not merely lip service that we ought to pay to the Constitution of this country; it is, in fact, the practical effect of what the Constitution says.

We in Florida have many of the problems that are inherent in the solutions that are being sought by the majority leader through this amendment. We would urge the adoption because—remember also, and my final point, whether we fund the money from the Federal Government, which I think is the appropriate way, or whether we allow the States to do it because the courts are going to mandate it, someone eventually, the taxpayer, is going to have to pay the bill.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has again expired.

(On request of Mr. SMITH of Florida and by unanimous consent, Mr. WRIGHT was allowed to proceed for 5 additional minutes.)

Mr. SMITH of Florida. Mr. Chairman, if the gentleman will yield further, whether we fund the money here or have to fund it locally, eventually it will have to be paid.

The question is: Shall the local communities continue to be asked to pay for a problem that is national in scope as opposed to something that the community itself created? I believe that your answer, if you understand the scope of this problem, is that it is a national problem and should be paid for out of the National Treasury because it is a national solution that needs to be given, and I would urge the adoption of the gentleman's amendment and commend him for bringing it to the floor.

Mr. WRIGHT. I thank the gentleman.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Florida (Mr. SHAW).

□ 1710

Mr. SHAW. Mr. Chairman, I thank the majority leader for yielding.

Mr. Chairman, I would like to compliment the gentleman from Texas for what I believe to be a very fine amendment, addressing a most difficult problem. It is a difficult problem both for Texas and Florida and for many other States, as the gentleman from Texas enumerated in his opening comments.

In Florida we have no control, nor does any State, over who crosses our borders. This is a Federal responsibility. Over the years we have seen our immigration law erode to a great degree. We have found that this body has a great deal of difficulty dealing with this issue because of the many interests and the many people who are involved and who are also affected by what this body might do in this particular area.

Nonetheless, I think the gentleman from New York (Mr. FISH) was quite correct when he said we are talking about an extraordinary amount of money. However, we are not talking about money that is not going to be spent; we are talking about money that is going to be spent by State and local governments if this body does not address the problem.

This is a Federal responsibility. It is a problem that has been brought about by Federal action. It is a problem that is Federal in nature, and it is the Federal responsibility, as set forth in the Constitution, to determine the immigration policy of this country. And lately, the Texas Supreme Court has spoken out on this particular issue.

Mr. Chairman, now it is time for the Congress to act, and act correctly, by making this authorization and following it up by the proper appropriation in order to fulfill this funding.

Mr. Chairman, I certainly support the gentleman's amendment.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I simply want to rise in support of the gentleman's amendment. This has been a long time in coming. We have discussed this problem in this Congress for many, many years.

I know that the gentleman from Texas (Mr. WRIGHT) has raised this issue many times. It is a question of fairness. We want to be fair to the children because they certainly should be educated, and we also want to be fair to the taxpayers.

The fairness in this is that the local school district that is impacted by a problem that is not of its own making should not be the sole one to have to bear the burden. That is the fairness in this thing. It is a national issue, and it ought to be addressed as the gentleman from Texas seeks to address it.

Mr. Chairman, I commend the gentleman for his amendment.

Mr. WRIGHT. Mr. Chairman, I thank the gentleman from Florida (Mr. FASCELL).

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I thank the distinguished leader for yielding.

I would just simply like to say to the gentleman that I think he has made a very persuasive case, and he obviously has strong support for the amendment. But to me it seems like this is putting the cart before the horse, because with the gentleman's amendment we do attend to a problem but we do not solve the underlying cause of that problem.

The underlying cause is that we do not have a national immigration policy. The underlying cause is that we have a border which is honored more in the breach than in the observance. It is porous, it is open to passage back and forth, and I think until this Nation and this Congress are willing to take up the nettlesome topic of immigration reform which has been pending for the last 3 years we are going to have more and more opportunities for the gentleman to offer amendments to other bills, trying to solve problems which affect his State and other States in the South and the Southwest.

It seems to the gentleman from Kentucky that a much more orderly process would be to take up the immigration reform bill which offers some hope and some opportunity to curtail the illegal flow into the States like the gentleman's State. That to me would be the orderly process.

Again let me say that I do not have any illusions about the gentleman's amendment and its popularity, but it does strike the gentleman from Kentucky that at some point this Congress, whether it likes it or not, and whether it seeks to avoid controversy or not, will have to take up the bill which is pending before the Rules Committee in order to give some comprehensive solution to the problem of the illegal entry into this Nation which has become an absolute flood. Of course, the gentleman from Texas is a leader of the Congress and will have a great deal to say about whether this Congress takes up that legislation.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has again expired.

Mr. DE LA GARZA. Mr. Chairman, I ask unanimous consent that the gentleman from Texas (Mr. WRIGHT) be allowed to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. LUNGREN. Mr. Chairman, reserving the right to object, a moment ago I heard a number of calls for a vote here, and I am afraid that at the termination of the gentleman's talk there is going to be rather quick action here. There are a number of us who have a slightly different point of view on this subject.

I would hope that the rest of the Members would indulge us to allow the gentleman's time to be terminated at some reasonable time. If they want to speak for 5 minutes, they can take time on their own.

I do not object at this time, but I think that common courtesy would allow some of the rest of us to speak.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. Mr. Chairman, may I respond very briefly to the comments of the gentleman from Kentucky (Mr. MAZZOLI), and then I surely will yield to my friend, the gentleman from Texas (Mr. DE LA GARZA).

I agree with the gentleman that this bill does not come to grips with the underlying cause of the problem, which is the fact that we lack an adequate immigration policy. I further agree with the gentleman that Congress should come to grips with this problem by taking action on an immigration reform bill. To that end, I have expressed to the gentleman privately, and will now express to him publicly, my desire to see that legislation considered on this floor.

But I would say that to cause the children to wait for educational opportunity or to cause the school districts impacted by these children who suffer the extra burden which they must assume and cannot in many cases financially afford until we have made an entirely new immigration policy for the Nation would be manifestly unfair to the children and to the school districts. This proposal, while it does not solve the root cause of the problem, at least addresses itself to the problem from that standpoint.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield to me for just 30 seconds?

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield to me?

Mr. WRIGHT. Mr. Chairman, let me yield to the gentleman from Texas. I promised that I would yield to the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Chairman, very briefly, first let me say that the gentleman from New York (Mr. FISH) knows that this has not been brought up just because there was a Supreme Court decision. The gentleman from Texas has been working on this problem long before that. The Supreme Court decision has compounded the issue.

Second, let me say to the distinguished gentleman from Kentucky (Mr. MAZZOLI) that this has nothing to do with the pending legislation and the immigration practices which allowed for more people with youngsters to come in, and that is true whether we have a new bill or do not have a new bill.

Let me say also that my staff and some of the rest of us have attempted to address this issue within the immigration legislation, and we have received no cooperation. We finally gave up.

We do not know if that bill would pass. Let me say also that if the gentleman from Kentucky thinks that these new immigration amendments are going to stem the flow, he is living in wonderland.

Finally, let me say that the only issue addressed in the so-called immigration reform is in this amnesty, and, yes, there is provision for children if there is amnesty granted. Otherwise the problem was that more children, because of State law or because of Federal law, were being taken into local school districts with no additional funds being provided for the exceptional needs of these children.

Regardless of the immigration law, regardless of anything else, the laws of the State and the rules of modern society say that we have to educate the child. We say, yes, we are willing to do that, but where is the money going to come from?

Ms. FIEDLER. Mr. Chairman, will the gentleman yield on that point?

Mr. WRIGHT. I am glad to yield to the gentlewoman from California. I will yield to the gentlewoman from California, then I will yield to the gentleman from Texas (Mr. KAZEN). I would then like to relinquish the floor because I know there are others who want to speak.

Ms. FIEDLER. Mr. Chairman, I would make just one point on that.

The gentleman knows that I was formerly a member of the Los Angeles School Board. We have many, many thousands of children in that school system who are in the system after having come here illegally.

There are a whole host of special funds which benefit those students, and I want to remind the Members of the House of that. We receive bilingual funds which assist those who need language assistance. We also receive the title I funds which help to provide some assistance to those who are disadvantaged from an economic standpoint.

So I want to remind the House that there are additional resources which the Federal Government is providing to students who are disadvantaged and also to those students who have some special language needs. I want the Members to consider that as they listen to the debate.

We are not without resources. We have some resources. The question in my mind is whether or not there are enough resources in this country to provide an additional $500 for children of illegal aliens when we may not be able to provide those kinds of additional resources for the children of the average taxpaying citizen.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to my friend, the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, let me commend the gentleman from Texas (Mr. WRIGHT) for having introduced this amendment along with my other colleague, the gentleman from Texas (Mr. DE LA GARZA).

This problem has been worked on for years. It has been worked on for years in this Congress. I come from one of those districts that this amendment would help tremendously.

I may agree with the gentlewoman from California (Ms. FIEDLER), but I know of no program that will give us brick-and-mortar money, and this is what is needed more than anything else.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has again expired.

(On request of Mr. KAZEN, and by unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

□ 1720

Mr. KAZEN. Will the gentleman continue to yield?

Mr. WRIGHT. I yield to my friend from Texas.

Mr. KAZEN. I know of no program that will give my school districts that were forced to take and educate these children that we speak of, either legal or illegal aliens, and my taxpayers locally, and remember, I remind the gentleman that this is a national program and a problem, as the gentleman from Florida stated a while ago. But I am very, very sensitive to this amendment because I represent the metropolitan area with the highest unemployment in this country. I have no tax base. We have done everything we can locally by bond issues to build new schools to house these children that through no fault of ours, in our localities, were placed in our schools.

So, therefore, since this is a Federal problem, certainly we should have a Federal solution.

As far as the gentleman from Kentucky is concerned on his bill, it has absolutely nothing to do with what we are talking about at this particular stage. The problem is with us. The school year has just begun.

My schools are under tremendous pressure. We do not know where in the world we are going to get the money and certainly the quicker we get this amendment adopted the quicker we get aid to those schools and the better off those children are going to be.

I commend my colleague for this amendment and rise to very strongly support it.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to my colleague from New York.

Mr. WEISS. I thank the gentleman for yielding and want to commend him for offering this very important amendment. I rise in strong support of the amendment.

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we have heard some very fine words about the problems and the needs of these children. I do not think there is anybody who can dispute that or disagree.

I also think there is another principle involved that we have adhered to in the past and that is that these types of issues should be dealt with in comprehensive legislation. The gentleman from Kentucky spoke a few minutes ago, and we have before us pending in this Congress, pending in the last Congress, the only legislation that will reach the roots of the problem that this amendment is attempting to deal with and that is the Simpson-Mazzoli Immigration Reform and Control Act. Until that is adopted you are never going to arrest the surreptitious entry into the United States; you are never going to discourage it, and these problems will be with us.

I say this is an opportunity for us to recognize that that is the basic need that we face here.

I think there are a few things that even though this amendment obviously is very popular should be on the record and known by all of the Members of the House before we vote. In the first place, the situation that arose in Texas is unique in that there the legislation was attempting to distinguish between the children of legal and illegal aliens and that it is not typical in other States. The court there very properly said that this was not a proper action.

But here we are bunching the two together as if we had never educated the children of immigrants. There is not a person in this room who is not the descendent of a child of an immigrant who was educated at public expense in the United States.

In order to deal with a very narrow problem we are making a very fundamental change. I suggest that the legal immigrants that are brought in under the formula in the definition in this bill, are not here as a result of a failure of national policy. It is entirely different to lump lawfully admitted permanent residents, refugees that are the result of consultation between the Congress and the Executive and those that come here illegally and are a burden, we all understand fully well, on the local taxpayers and local government.

I suggest that the appropriate place for this legislation to be considered is in the context of our immigration policy and not on this bill that is before us this afternoon.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. FISH. Surely I yield.

Mr. DE LA GARZA. I appreciate my friend yielding.

I just want to clarify the issue as I stated before, that this problem had arisen in many areas of the United States, not necessarily in Texas, and I had introduced legislation to this effect before the court decision in Texas and eventually the Supreme Court decision with relation to illegal aliens and the impact in our district was before this legislation.

I would like to inform the gentleman that I introduced legislation and the Education and Labor Committee has had hearings on my legislation. It has been documented and every possibility has been explored.

The problem has been that there has been no elementary, secondary education bill within that timeframe.

This is the first vehicle that we have had available to us to bring this legislation.

But it is not like we just came up today with an amendment that has not been studied and no hearings have been had.

Mr. FISH. I am sure it is not and, as my friend well knows, in the Refugee Act reauthorization we were well aware of the impact on 40 counties in 10 States and have a targeted assistance provision.

In the Simpson-Mazzoli bill, anticipating the vast numbers in the legalization process, there is an education assistance provision targeted on that.

Now we have another group and the gentleman is as concerned as I am about the education of these illegal aliens or we would not be, both of us, in support of legalization. We want to make them productive people, so obviously we have to educate them.

I would say to the gentleman, if he will support the Simpson-Mazzoli bill, then I will support an amendment to the Simpson-Mazzoli bill if the gentleman sponsors it that there is targeted to the very group we are talking about, which is the children of illegal aliens, and not children that would be as broad as including American citizens.

Mr. LUNGREN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise as a Member representing an area that probably, outside of those communites that are directly on the United States-Mexican border in Texas, is affected more than any other. We have as many refugees in my district as any.

My hometown, it has been said, has more Cambodians living in it than any place outside of Phnom Penh. We have Vietnamese. We have all types of people from Southeast Asia. We have a large number of Hispanics from south of the border, Mexico, and many other areas.

I have been requested by people in my district to support this amendment. I will not support this amendment, however, because this is another example of Congress' ad hoc approach to a major issue that is before this Congress. And it is consistently before this Congress.

I am not going to embarrass any Members who have spoken in support of this amendment by asking whether they will support a comprehensive immigration bill. This is not the place for that.

Nonetheless, I find it rather ironic that some who have worked rather diligently in the past so that we would not have a final serious consideration of the immigration bill in a previous Congress come forward now and say this is a Federal responsibility. These people are here because the Federal Government has not done the job. We have not had an opportunity to deal with this question; therefore, the taxpayer must pay, and pay, and pay, and pay.

I understand why we have not dealt with the immigration bill here. I have been beset by the many interests involved in it. There are certain members of the business community who do not want to have an immigration bill because they utilize the system of a sub rosa foreign job program where they use illegal aliens to their economic benefit.

I understand why some labor unions do not want to deal with this, because they think that this will interfere with their ability to unionize workers. I do not believe that to be the case but they feel that to be the case.

I understand how other Members do not want to deal with the issue of legalization because that is a controversial issue and you cannot really get a political benefit, no matter what you do, on it.

And so what do we do? We do absolutely nothing on the comprehensive

approach, and time and time again people come up with little pieces of the problem and say the solution is money, money, money, money, money.

We have an impact aid program. It is dealt with in this bill in title IV. We tried to deal with that just a few minutes ago on this floor and we were denied by a vote of the majority.

□ 1730

It was a vote taken here. That is the will of the majority not to delve into that question.

We are not even going to question whether the impact aid program now on the books works in conjunction with the new realities, including the fact that we have a large number of undocumented aliens in this country and many of them children going to our schools. We are not going to deal with that. We are going to raise money on the impact aid program but we are not going to deal with it and we will deal it over here.

We have a regfugee assistance program that deals with the assistance. Under the terms of this, this would be a double bonus to my area, because they would get the refugee assistance, and, under the gentleman's definition, the refugees as long as they have not been here more than 3 academic years would also qualify as immigrant children.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I would be happy to yield after I have concluded my remarks.

The gentleman had about a half hour to talk about it.

Mr. WRIGHT. That is right.

Mr. LUNGREN. We also have certain defense programs here where you impact it. Now, under the terms of this bill, you are an immigrant child if you happen to be born outside the States of the Union. Let us say you were with your parents, your parents happened to be servicemen or women overseas, you come back on assignment and you would qualify under this bill.

We have permanent resident aliens who come into this country under the regular procedure to begin on their way to citizenship who presumably have a dedication to this country and are on the regular road to citizenship and participation in taxation in this country; as long as they have been here less than 3 years, they would qualify.

The point is we are attacking it from many different discordant ways. We are not dealing with the issue as a whole. The Simpson-Mazzoli bill deals with it.

I am not saying just because many of us worked for 5 years on it. In point of fact, we have looked at it and we have recognized you are not going to deal with the issue unless you deal with it in a comprehensive fashion.

If we bite off a piece here, there is all the less reason for other Members to compromise in a comprehensive approach to the bill. All we do is allow the continuation of the flood across the border, and I tell my colleagues in March of this year, in just the San Diego section, the Chula Vista sector, somewhere between 50- and 70-mile section of that 1,960-mile border, we had 50,000 apprehensions in 1 month. People on the border will tell you that for every apprehension, between two and four successful entries are made.

So, just in the San Diego area, we had between 100,000 and 200,000 successful entries. We will have over 1 million people who will be apprehended by our Government this year for being here illegally. That means between 2 and 4 million successful entries are made.

What do we do with it? We pass out a bill out of our committee on May 27, we then send it to four other committees; we still do not have a commitment that bill is going to be on the floor, we do not have a commitment we are going to be given time to deal with this issue. What do we do in the meantime? Bleed the taxpayer a little more; the taxpayer, allow him or her to believe that as long as we spend money here or there.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. LUNGREN was allowed to proceed for 5 additional minutes.)

Mr. LUNGREN. What are we going to do? We are going to tell the taxpayer, just spend $500 more per individual that is defined in this category.

Now, we have heard that this does not just deal with illegal aliens or undocumented aliens. That is absolutely true. But what is the purpose of the bill?

The purpose of the bill, at least as far as the Governor of Texas is concerned in letters that he sent to Members is to take care of the problems that are created by giving education to those who are here as undocumented aliens. Now, maybe the Governor of Texas is wrong in that. But I think we know that is the general purpose of it.

I assume the reason the bill is written this way is because it would be very difficult to construct language that would be limited to just those who are here illegally. Why? In most cases, it is against the law to ask them whether they are here legally or illegally. Therefore, we cast a huge net designed to bring in many, many people already covered by other special programs. I suppose, as I say, I should be happy. You are trying to foist upon me and my constituents extra Federal moneys, because we are going to get assisted by the refugee program; on top of that, we are going to be assisted by this program; to the extent we have military installations here, we are going to be assisted by that program, and I have some military installations in my area. But I have discovered that the Federal taxpayer is also the local taxpayer and the State taxpayer. You can look high and low for that special species of homo sapiens called the Federal taxpayer, but it turns out to be the same point. At some point in time, I think they are going to ask us, "Why are you paying four or five times for certain individuals when we are having trouble on the local school district level applying it just to those individuals?" These programs are set up so that money has to go to those programs to assist those people.

Additionally, as one gentleman just reminded me, we have the bilingual program which does assist those who are here under this category by and large.

And my question is, why do we deal with it this way? Why do we continue to deny the American people a vote on an extremely important issue, that of immigration reform, and instead deal with it this way?

I know the gentleman from Texas said this is not going to stem the flow. I agree with him. But why deal with this after you have the problem? Let us try and stem the flow and deal with it in the legislation we have.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I will be happy to yield to the gentleman from Texas.

Mr. DE LA GARZA. First, I have no quarrel with the gentleman's sentiments and with his feelings on this legislation.

Mr. LUNGREN. I hope the gentleman will help us in supporting this bill.

Mr. DE LA GARZA. I would like, though, to clarify for the record that, no, the bill was not drafted for the illegal, in relation to the Supreme Court decision. This gentleman from Texas had introduced this legislation long before that, because the problem existed at that time.

Second, this amendment does not provide for a double bounty.

On the contrary, it provides that it shall be reduced, if the school district receives from the refugee program, parole asylee, or other immigrant status, if there is any other program already providing, then this would not apply.

Mr. LUNGREN. To the extent they would receive refugee assistance if they wanted to get more, they would qualify for it.

Mr. DE LA GARZA. They would not under this—they would not under this.

The problem is that the educational problem did not fit. Every time we had a refugee act here, I got up and spoke, I said, "You are helping the refugee, fine—I will go along with that; but we

have another category that does not fit in." And again I would like to emphasize to my colleagues that, no, it is not related to whether our immigration system is working or not working, the illegals are coming or the illegals are not coming.

The basic problem is that the flow of legitimate, legal immigrants has been such in the postwar years that it has added to the burden of the local school districts. Many of them cannot—under the State on local financing, are unable to provide for it.

Mr. LUNGREN. May I ask the gentleman a question on that? The gentleman says they will not receive assistance under this if they receive it in another way. If the bilingual program, as I understand, is to assist those students who have difficulty with the major language in this country, English, if that is being directed at those who have that difficulty, does not that make more sense then to have one merely at those who qualify by virtue of where they were born, whether or not they have no difficulty with English; whether or not their parents being here are taxpaying members of that society?

The CHAIRMAN. The time of the gentleman (Mr. LUNGREN) has expired.

(On request of Mr. DE LA GARZA and by unanimous consent, Mr. LUNGREN was allowed to proceed for 3 additional minutes.)

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I yield to the gentleman.

Mr. DE LA GARZA. That is what is so complicated about this particular issue, you see.

The problem of nonproficiency in the English language applies in my area to citizens. So the bilingual problem is unrelated to noncitizens, to legals or illegals.

Mr. LUNGREN. I understand that.

Mr. DE LA GARZA. That is a separate problem.

Mr. LUNGREN. Would the gentleman also acknowledge, however, that those who are here illegally by and large have difficulty with the language as well?

Mr. DE LA GARZA. Yes. And in many instances, as rare it may be, not as much, because the minute they cross that border, they try and get into the norm.

Mr. LUNGREN. So as the gentleman suggests they need assistance less then the American citizens here?

Mr. DE LA GARZA. No, no, I am not going into who needs more or less. All I am saying to the gentleman is that—trying to correct the record—that this legislation provides that if you are receiving, because of the immigration provision, that because of the refugee parole asylee, or other immigrant status of the individual served by such funds shall be reduced by the amount made available for such fiscal year under any other Federal law for expenditure within the State. So, it is not like you are going to get a double.

□ 1740

Mr. LUNGREN. Would the gentleman then answer another question, that is, if we do pass the Simpson-Mazzoli bill, which allows for legalization of many people who obviously would qualify under this, they would not be considered refugees, parolees, asylees, but rather would be considered—and not regular immigrants, they would be under an entirely new category which would be legalized temporary resident aliens, then permanent resident aliens—do they qualify under this or not?

Mr. DE LA GARZA. The provision provides "or other" immigrant status under the Rodino bill, Simpson-Mazzoli—whatever we are calling it now—it leaves them in a limbo. It does not provide for permanent and it does not provide for the amnesty. It leaves them in a limbo.

The amendment says "or other" immigrant status. I do not think that it is apropos for a discussion of the technicalities of the immigration bill because the educational aspects that we are trying to address are unrelated to whether you stem the flow or not stem the flow. The issue is here now already.

Mr. LUNGREN. If I may reclaim my time to just ask the gentleman, then the gentleman would not support the amendment that is now in the Simpson-Mazzoli bill authored by the gentleman from California (Mr. EDWARDS) that would give 100 percent reimbursement to the locality for those individuals involved in the legalization program, but would prefer the $500 allotment contained in this; is that correct?

Mr. DE LA GARZA. It is two different issues.

The CHAIRMAN. The time of the gentleman from California (Mr. LUNGREN) has expired.

(At the request of Mr. DE LA GARZA and by unanimous consent, Mr. LUNGREN was allowed to proceed for 1 additional minute.)

Mr. DE LA GARZA. It is two different issues. the gentleman from California (Mr. EDWARDS) says we are giving you this status so therefore we are imposing upon a local school district so therefore we are giving you this amount. The issue which we address is unrelated to that.

Mr. LUNGREN. I appreciate that. And if I might just make one thing clear, when I said they were doubling up I did not mean that it would necessarily be entirely on money they already are getting, but rather that it would give a double bonus in a sense, a double protection, to particular communities, because there has been an argument every year as to what the absolute amount of money should be in the refugee program. This would be, in essence, a double protection into those jurisdictions that once we thought that the refugee program was on its way and these students either did not need any more support or would get less than $500, they would be doubly protected by this definition which, although it was not directed specifically to refugees, would include them in the larger net by the larger definition.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I yield to the gentleman from Illinois.

Mr. HYDE. I thank the gentleman for yielding.

This, it seems to me, is a temporary anesthetic that defers and misdirects our attention from a time bomb. If you are going to solve this problem, let us solve it comprehensively and not keep putting on the chemicals that make the pain go away because it will come back worse next week. Let us deal with the immigration problem comprehensively and stop the Anacin and the aspirin and pretending it is not there.

The Members who want this are actually deferring addressing this very explosive problem.

The CHAIRMAN. The time of the gentleman from California (Mr. LUNGREN) has again expired.

(At the request of Mr. COLEMAN of Texas and by unanimous consent, Mr. LUNGREN was allowed to proceed for 1 additional minute.)

Mr. COLEMAN of Texas. Mr. Chairman, if the gentleman will yield, I think the point needs to be made because continually I have heard about this double enrichment and unjust enrichment to those school districts across this country that are now under the obligation and under the duty to educate the children of undocumented workers.

I think it needs to be pointed out that this amendment, which I support very strongly, unfortunately does not come anywhere near, in fact, it comes to about one-sixth of what it takes to educate one of those children. So this amendment, while you suggest it may be taking in more children than necessary, absolutely does not expend more money than is necessary. In fact, in my view, it certainly spends a great deal less. And I think that point needs to be made.

Plus the other gentleman who just spoke suggested that somehow we have got to solve the immigration problem with this amendment.

That is not the intent of this amendment.

Mr. LUNGREN. If I may reclaim my time that was not the gentleman's suggestion. He was suggesting that when we deal with a band-aid approach we

never come around to the major approach.

It really astonishes me that the rule could allow this amendment to be brought forward and be within the rule of this bill and yet the Rules Committee, for whatever reason, cannot act on the immigration bill and have us at least deal with that in a comprehensive fashion.

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the Wright amendment.

Mr. Chairman, first, let me assure the Members that I will not take the 5 minutes.

We all admit that we have this problem and I think we all feel that we should do something about the problem. The local educational agencies certainly cannot cope with the problem of this size when the illegal aliens in 99 percent of the cases neither have money nor property, no resources.

The amendment offered by the gentleman from Texas (Mr. WRIGHT) is a very modest one. If there is any other legal aliens involving the $500 figure, the money will be deducted, and I think the amendment has been well thought out.

So far as I know, there is no opposition to the amendment on this side. I am hopeful, Mr. Chairman, that the amendment will be adopted.

This amendment creates a new Federal program aiding in the education of legal and illegal alien children. It is necessary because:

First, the U.S. Supreme Court has ruled that school districts must educate illegal alien children even though most illegal alien parents own no property and pay few, if any, local taxes.

Second, there is currently no Federal program aiding in the education of illegal alien children although the Federal Government is really responsible for them having entered the country.

Third, this program is modest—providing only $500 for each child. The average per pupil expenditure in the United States today is $2,900; and many of these alien children need extra bilingual and remedial aid on top of the usual cost of education.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take my full time, but we have been involved in a very interesting debate. And I think a few points have been very soundly made. And one is that we have deferred the major event, we hope only deferred it. Some might say that we have delayed it to the point of death.

And the major event, of course, is the full fledged debate on immigration reform.

We are talking today about one of the effects but not the cause. The cause of this problem is the fact that we have no border control. The cause of this problem is that we have a free and porous entry into this Nation and that does cause difficulties to States like Texas and the border States.

But to solve it this way does not solve the underlying problem.

Second, I think there is a kind of implicitness in the discussion of the fact that the people who have come in without documents, who have illegally entered this Nation, are somehow impoverished and somehow net takers and net dependents. And that is not always the case.

These people have come into this Nation for one reason and one reason alone and that is to work and work they do. And in many cases they are contributing taxes. And in many cases they are leaving their sales taxes in the stores.

And I, having chaired 3 years of hearings on the immigration reform bill, still have not had presented to me a persuasive case that these people do not in the end product contribute in a plus factor to the economy, which would in effect say that they are already paying for their cost of education, they are already paying for their cost of health care and social services.

And we had hearing after hearing on this topic and it is a very difficult thing to analyze, I will admit, but the data that we had put before us does not make a persuasive case that these people, these undocumented workers, as they have been adequately and aptly called, are net takers which suggests that they do pay into the States and which suggests that the States do not have any qualms and no compunction about taking this money now and yet the States continue to come in and ask for more, for more payments, more waivers and for more opportunities to have reimbursements.

I do not again suggest that the State of Texas and other States do not have specific problems, but they are dealt with, we think, very correctly and in a comprehensive fashion in the immigration reform bill and to deny that immigration bill the opportunity to be heard and perhaps to solve these problems, at least to advance a comprehensive approach to these problems, is to simply put off until later what one of the other gentlemen has said is a ticking time bomb. And we think we are prepared today to take up the major bill and we think that is the way the problem ought to be dealt with.

□ 1750

Mr. McCOLLUM. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Florida.

Mr. McCOLLUM. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman has made several very good points. As the gentleman knows, as the chairman of the Subcommittee on Immigration on which I serve, and of whom I am very proud, I have been a long-time advocate and in somewhat disagreement with the gentleman over the issue of direct and 100-percent reimbursement of the States' educational costs for refugees and also for those who come in here if we legalize anybody.

But I think that this amendment is too broad. I think it is inappropriately offered at this time. I think it is much better that we deal with the issue in the immigration bill and in the refugee bill that are up before this Congress and that we target the type of reimbursement that we give to those that we put into some form of legalized umbrella.

We have got a lot of illegals in here today, in this country. Nobody knows exactly how many. We have got a lot more people who may or may not be illegal who will be encompassed by this amendment. One thing is for certain. If we do give the 100-percent reimbursement to the States—and it is a national problem. I know the gentleman and I have had many discussions on that. We may disagree on the fine points of that. But I believe that it is a national problem and the Federal Government does need to reimburse. And yet at the same time, it is my agreement with the gentleman that this amendment should be defeated, that we should address this problem in a much more narrow forum and focus on the bill.

Mr. MAZZOLI. Let me salute the gentleman from Florida and say to him that there is no one in this entire House who has worked harder and more indefatigably than the gentleman from Florida in trying to move an immigration reform bill. So I thank him for his help in the past, and I look forward to working with him.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Texas, the majority leader.

Mr. WRIGHT. I guess I understand what the gentleman from Kentucky and the gentleman from New York and one or two others are trying to do. They are trying to hold any help for the school districts hostage to get votes for the immigration bill. I have already told you I am going to do what I can to schedule the immigration bill. But we are dealing with two entirely different subjects. One is the subject of how do you stem the illegal flow of immigration. That is one subject. Maybe somebody has got a broken arm, maybe at the same time he has a very bad case of a heart attack. You do not postpone dealing with one until you can deal with the other.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has expired.

(On request of Mr. WRIGHT and by unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. WRIGHT. The gentleman is entirely incorrect when he suggests that school districts and States are enriching themselves by the presence within the borders of their geographical confines of illegal immigrants, in that those people pay sales taxes. Sales taxes are not what support schools. It is property taxes that support the schools in almost every jurisdiction.

These people, for the most part, who have come in illegally do not own property. Therefore, they are not on the property rolls. Therefore, the schools are not getting any payment.

All we are trying to do is address a very simple problem that exists. About $500 per student is certainly not unjust enrichment for a school district which undertakes the responsibility of spending about $2,500 or $2,600, on an average, to provide the very specialized training that will assist that child. This is directed to the child. It is not directed to the law. It is not directed to the border. It is not directed to some high-blown new system of reforming our immigration policy. This is directed to reality. There are children in the streets who need to be in the schools, and those children who are in the schools need to be educated. That is what this directs itself to, and it does not make any difference whether we do or do not pass the immigration reform bill, that problem is still going to remain. And if you want to hold this simple amendment hostage until you can pass some broad immigration reform that satisfies you, you may never address the problem.

I suggest it is a way of putting off the problem rather than addressing the problem. I suggest it is as simple as the Presidential proposal of addressing a problem by appointing a commission to study the problem, as the President appoints a commission to study hunger, why people are hungry. Everybody knows why they are hungry. They are hungry because they do not have enough to eat. And usually they do not have enough to eat because they do not have a job. It is just that simple.

These young people need education, they need specialized education. It costs money. The Supreme Court has said our local school districts must provide that service. We have the responsibility to help them.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has again expired.

(By unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. Mr. Chairman, I certainly do not want to delay my colleagues in getting home tonight, but this is an important issue. I just want to answer the gentleman from Texas, who is an eloquent speaker and makes a very strong point.

I would just like to say that the gentleman from Kentucky has no intention of holding any bill hostage, like this, for example, or the children of the State of Texas. What is being held hostage, the gentleman from Kentucky would assert, is the immigration reform bill which affects 220 million Americans, not just the people in Texas, not just the people in California.

So if anything is being held hostage, in the judgment of the gentleman from Kentucky, it is the overall approach, not necessarily the version which is pending in the Rules Committee because, as I have said many, many times in the past, it is imperfect, but I would contend it is the least imperfect bill that we have before us at this time and, under the rules that any assembly operates on, that is the kind of thing which ought to come out as the mechanism for this Congress to make its mind up and exercise its wisdom.

The House may decide that the gentleman from Kentucky is absolutely wrong, in which case, fine, it passes whatever bill it wishes. But all the gentleman from Kentucky is saying is that this effort, which in effect nibbles at the problems but does not get at the underlying root causes, is not the logical and symmetrical way to approach the problem.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. I thank the gentleman for yielding.

Mr. Chairman, I again would like to say that this amendment should not be held hostage to any other kind of program, but this amendment should be part of a discussion of impact aid and how we revise impact aid and how we make existing impact aid effective. That is what we are talking about.

These children are impacting the school districts. I have an awful lot of impact aid that comes to my district that has nothing to do with any impact, but that is the way the formula is written. And it is about time we take issue with the impact aid problem that we are faced with and do the kinds of things that have to be done to help Texas, to help Florida, to help California. But to do it piecemeal, no one knowing exactly what they are doing, certainly is not going to solve the problem.

I would like to make one other comment.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has again expired.

(On request of Mr. GOODLING and by unanimous consent, Mr. MAZZOLI was allowed to proceed for 1 additional minute.)

Mr. GOODLING. In most States, financing public education is done, to a great extent, by a flat income tax in that State and by an employment tax on the local level, an income tax on the local level. We are getting away rather rapidly in many States from that impact being on property taxes. So let us handle this with the entire impact aid problem that we are faced with.

We talk about it every year, the nine that I have been here, but we do not do anything about it. I have money coming to my district that should not be coming there. It should be going to the impact that you are talking about, it should be going to Dade County, Fla., and to some other places. But we never tackle that problem. We just add additional programs rather than really tackling the serious problem that we are faced with.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. WRIGHT).

The amendment was agreed to.

Mr. HAYES. Mr. Chairman, today in my first appearance before this body, I would like to rise in support of a very important program, the Rehabilitation Act Amendments of 1983 (H.R. 3520) which extends and improves the vocational rehabilitation programs for disabled Americans. As was debated yesterday, title IV of this bill increases the authorization of appropriations for 10 major education and social services programs in order to implement the higher funding levels assumed for these areas in the fiscal year 1984 budget resolution.

I would like to encourage this body to support the Rehabilitation Act and title IV. Without title IV, the important and necessary work done by the Budget Committee on education and social service programs would be lost. In the budget resolution, Congress assumed extra funds for these programs. The need in our communities for additional assistance in areas such as compensatory education, vocational education, adult education, impact aid, education of the handicapped, low-income energy assistance, the community services block grant, and feeding programs for women, infants, and children is obvious.

The Budget Committee saw this need when it provided the extra funds in the budget resolution. The Education and Labor Committee saw this need when it introduced the Rehabilitation Act and included title IV. I see the need when I look at the city of Chicago and see those people who utilize these programs. This body should also see the need, and support those who are truly needy, by voting to pass this bill.

● Mr. FAUNTROY. Mr. Chairman, I want to take this opportunity to express my support for the Rehabilita-

tion Act Amendments (H.R. 3520). The bill would authorize $1,037.8 million in fiscal year 1984, $1,141.1 million in fiscal year 1985, $1,254.6 million in fiscal year 1986 and $1,379.4 million in fiscal year 1987 for the basic State vocational rehabilitation entitlement program under the Rehabilitation Act of 1973. H.R. 3520 would authorize an amount for fiscal year 1988 based upon increases in the Consumer Price Index of the previous fiscal year.

The bill would remove the fiscal year 1984 authorization ceilings set by the Omnibus Reconciliation Act of 1981 for programs under the jurisdiction of the Education and Labor Committee and authorize levels assumed by the first budget resolution for fiscal year 1984 for the following programs:

Chapter I (compensatory education) of the Education Consolidation and Improvement Act of 1981.

Impact Aid.

Vocational education.

Adult education.

Arts and humanities.

Museum services.

Community service block grant.

Low income energy assistance.

Special supplemental feeding program for women, infants, and children (WIC).

The fiscal year 1984 first concurrent budget resolution targeted a $1 billion increase for education funds over the current fiscal year 1983 $15.3 billion funding level. In order for the Appropriations Committee to have the flexibility to fund education programs at the budget resolution level, the authorization ceilings for chapter I, vocational education, adult education, impact aid, and the Education of the Handicapped Act must be raised.

The National Commission on Excellence in Education's report, "A Nation At Risk," has challenged the education community to better meet the educational needs of our children. I believe that insuring these minimal funding levels for existing highly successful programs is the first step toward meeting this challenge.●

● Mr. GILMAN. Mr. Chairman, I rise in support of H.R. 3520, the Rehabilitation Act reauthorization, which provides for the continuation and progression of a program that has given new life to those among us who are physically disabled.

This legislation contains provisions that incorporate all sectors of disabled services in a coordinated manner. The bill will help all the disabled, including those with multiple disabilities, become more productive members of society. An important section in this measure will sever the National Council of the Handicapped from the Department of Education and establishes the Council as an independent agency within the executive branch, that would regularly advise Congress.

Specifically, the reauthorization includes an annual increase in funding of 9.9 percent for the next 4 years, returning the act to its 1979 real funding level. Thereafter, starting in fiscal year 1988, funding will increase according to the Consumer Price Index to preserve this real level. The primary purpose of these funds is for vocational rehabilitation. However, the bill also provides for research and development of new technologies and training methods, demonstration projects to improve service systems, training and employment projects with industry, and also independent living programs, which is the last step for a disabled person to fully adjust to normal life. Another important aspect of H.R. 3520 is to provide information and advice to clients and applicants regarding the types of aid available under this act. Without this service the programs would be worthless if those eligible are ignorant of the benefits available to them.

This bill also establishes the temporary National Commission on Federal Assistance to Disabled Americans. That commission would be charged with identifying problems and making specific statutory or regulatory recommendations. These would be embodied within a report that would be submitted to both the President and the Congress. The report would provide a one-time indepth study of the services available to the disabled and note either incentives or disincentives within these programs that affect community integration or community based services.

One of the many institutions that will benefit from the adoption of H.R. 3520, is the Helen Hayes Hospital located in my congressional district. Established in 1900, it is the second oldest hospital service in New York State for the treatment of physically disabled individuals. The Helen Hayes Hospital offers complete medical, surgical, social, vocational, and educational services for children and adults who are or who are likely to become physically disabled or handicapped.

The Helen Hayes Hospital offers rehabilitative services for stroke, amputation, paraplegia, and metabolic bone disease victims. The outpatient department sees over 1,200 patients each month with specialized clinics in orthopedics, cerebral palsy, arthritis, stroke, head injury, spinal injury, and sports medicine. This facility is able to take a patient from the time of a diagnosis or occurrence of a debilitating disease or injury, through to the rehabilitation of that patient so that he or she may reenter the work force and participate as a functioning, contributing member of society. The Helen Hayes Hospital is just one of hundreds of similar institutions that depend upon the funds and services made available through the Rehabilitation of the Handicapped Act.

Mr. Chairman, this reauthorization is an investment in America. The resource it continues to develop will bring real meaning to lives which might otherwise be lost to despair. The benefits will be reaped in the lives of those who receive the aid and those of us who are fortunate enough to be associated with them.●

● Ms. KAPTUR. Mr. Chairman, I rise today to support H.R. 3520, the Rehabilitation Act Amendments of 1983. This is one of the most important proposals this body will consider this year. By passing H.R. 3520, we will reaffirm the commitment of the Federal Government to meeting the educational needs of all our citizens, and especially the needs of the disabled, the disadvantaged, and the poor. This renewal and rededication is necessary in a time when important education and other assistance programs have seen their support slip away.

Title I of H.R. 3520 would reauthorize the Rehabilitation Act of 1973, which is due to expire on October 1. This landmark legislation established programs to assist our mentally and physically handicapped people. The largest component of this effort has been the State grant program, which provides funds for vocational rehabilitation services to help handicapped persons gain employable skills.

The Rehabilitation Services Administration which administers the Rehabilitation Act, has estimated that every dollar invested in rehabilitation services returns $10 to the public coffers as rehabilitated persons become taxpayers, grow less dependent on public support, and begin to live independent lives free of institutional care. And this return is accomplished in as little as 4 years after training is completed.

H.R. 3520 contains other provisions of vital importance to handicapped Americans. Under this proposal, programs for independent living, training of rehabilitation professionals, and critical research would be continued. The Helen Keller Center for Deaf-Blind Youths and Adults, the only facility of its kind, would be given the independent status it has long deserved. The same would be done for the National Council on the Handicapped. And the proposed National Commission on Federal Assistance to Disabled Persons is sorely needed. The House needs to stand firmly behind its commitments to disabled Americans.

Title IV of H.R. 3520, would raise the fiscal year 1984 authorization ceilings for compensatory education (chapter I), vocational, adult, and handicapped education, low-income energy assistance, community services block grants, the women-infants-chil-

dren nutrition program, and other important services.

Earlier this year, the Congress held out a promise to those Americans who depend on these programs. This body approved the conference agreement on the first concurrent budget resolution for fiscal year 1984 on June 23 by a vote of 239-186. That spending plan balanced demands for various Federal programs and permitted increased funding for various Federal programs, and was the result of over 2 months of deliberation and debate.

The hope and the promise of the proposed fiscal year 1984 budget are devoid of meaning unless we support title IV of H.R. 3520. During consideration of the budget resolution, we know that to fulfill its promise the authorization ceilings on certain programs would have to be raised. That time has come. Today we either keep our word, or hide behind the stringent authorization ceilings passed 2 years ago in the Omnibus Budget Reconciliation Act of 1981—Public Law 97-35—which turned its back on needy Americans.

Can anyone argue on the merits against the need for increased authorization levels? The programs involved have proven their worth time and again. The chapter 1 compensatory education program has been lauded by the Secretary of Education; and the success of the vocational education program is beyond question. The administration has tacitly acknowledged the existence of poor nutrition in this country by its appointment of a task force on hunger.

Can anyone argue that more funds are not needed for the programs addressed in title IV? I don't think so. Chapter 1 currently serves only 47 percent of the eligible children; the WIC program needs $1.36 billion in fiscal year 1984 just to meet current service levels. The authorization enacted 2 years ago is only $1.126 billion. And the Education for All Handicapped Children Act, which has done so much to bring these children into society's mainstream, has fallen short of its original goal of funding 40 percent of the national average per-pupil expenditure for each handicapped child. This year, that act has funded only 9 percent of such expenditures. And this year, only 36 percent of eligible households received assistance under the low-income energy assistance program. Title IV would maintain the current level of assistance under this program and provide funds to further help the truly needy.

Mr. Chairman, I have carefully examined the arguments advanced by those opposed to title IV. Those arguments do not criticize either the programs or the need for higher authorization ceilings. Rather, they protest based on procedural grounds, and they invoke the specter of Presidential veto. The procedural argument involves germaneness, the proper authority of the Budget Committee, and the grouping of these programs in a single bill. Mr. Chairman, the Budget Committee, in its work on the first concurrent budget resolution, endorsed higher spending for these programs. And, the authorization ceilings we seek to raise were established in an omnibus bill that affected these and other programs. In short, title IV is not the unprecedented, revolutionary proposal which its opponents claim it to be.

Finally, Mr. Chairman, the entire matter should be placed in its proper perspective: Title IV commits no money to any program. It merely gives the Appropriations Committee the widest possible flexibility in its consideration of the funding levels for these programs in view of the first concurrent budget resolution and the effects of the recession. The funding recommendations of that committee will still be scrutinized and debated by the Congress as they arise.

Mr. Chairman, I support the Rehabilitation Act Amendments of 1983, and I urge my colleagues to fulfill the promises we held out to the American people this spring by passing H.R. 3520.

Thank you.●

● Ms. OAKAR. Mr. Chairman, today the House is considering H.R. 3520, a piece of legislation which is essential if we are to attack seriously and not just rhetorically the education crisis in our Nation. The viability of vital vocational rehabilitation programs for disabled Americans, as well as 10 crucial programs for the disadvantaged under title IV, rests on passage of H.R. 3520. All of the programs we are considering today were victims of the Gramm-Latta II cuts. If we do not pass this measure today, we would be denying these programs the increases endorsed by the Congress in the budget resolution.

The programs in which we will be investing more money are those which have proven to be highly successful. At a time when our economy is in need of revitalization because of severe unemployment, many of these programs would provide a saving grace for many States and localities hard-hit by layoffs and cutbacks. In Ohio, where unemployment for the month of June was 12.8 percent and in my district where unemployment for the same month was 11.3 percent, an increase in support for vocational education is crucial; vocational training and training programs at the secondary, postsecondary, and adult levels are essential to putting Clevelanders and Ohioans back to work and revitalizing our crumbling economy. Approximately 600,000 students have been turned away from vocational training and as many as 7,000 instructors have been laid-off across the country as a result of budget cuts.

Another area which directly affects my district is the low-income assistance program, which was originally created to respond to the energy needs of low-income households and our elderly affected by high energy costs. This program has provided much-needed assistance to Ohio State residents in meeting home heating and cooling costs as well as energy-related crisis intervention.

The WIC program is another area affected by this legislation. WIC is a supplemental food program for low-income women, their infants and children serving approximately 2.35 million families a year. Additionally, WIC provides nutrition education and health care to pregnant women, nursing mothers, and children under 5. While funding for this program has been maintained at a relatively even level for the past several years, it is estimated that 7 million additional families are eligible to receive the benefits of WIC but are not being served because funding is not kept up to a pace with inflation. If current funding levels are maintained for fiscal year 1984, approximately 115,000 additional families will not be able to receive the benefits from WIC. The positive results of the WIC program are well documented. A study conducted at the Harvard School of Public Health found that WIC caused a marked reduction in the incidence of low birthweight infants. Low birth weight is the eighth leading cause of death among children and necessitates extended and expensive neonatal hospital care. The study concluded that every $1 spent for WIC actually averts $3 in hospital costs.

We cannot overlook the importance of chapter 1 when considering this measure. Earlier this Congress, we were all shocked when the administration cut back this program after stating that it has been an extremely successful one. The number of children being served by this program is far below the actual number in need.

For some time now, we have concerned ourselves with the need for improving our educational machine. In order to even begin to improve our educational system, we must insure the minimal funding levels for the programs under H.R. 3520.●

● Mr. SIMON. Mr. Chairman, I rise today in support of the reauthorization of the programs under the Rehabilitation Act of 1973. Since 1917, the Federal Government has recognized that it is important to support those programs which help to train or retrain handicapped individuals. The bill that is before us now, H.R. 3520, continues that long history of support and amends the current legislation to

make rehabilitation programs more effective.

Some of the new provisions in H.R. 3520 include:

Improves the targeting of training grants and contracts to areas in which there are documented shortages of qualified rehabilitation personnel;

Clarifying the eligibility of State rehabilitation agencies to compete for Projects with Industry grants;

Establishing a separate authority for the Helen Keller National Center for Deaf-Blind Youths and Adults;

Removing the National Council on the Handicapped from the Department of Education and established it as an independent body;

Allowing Rehabilitation Research and Training Center grants to be awarded to comprehensive multiple disabilities facilities; removing the automatic funding termination requirement at the end of project periods; making training of rehabilitation personnel within the centers a priority; and allowing faculty support for teaching within the centers;

Creating the National Commission of Federal Assistance to Disabled Americans to review the coordinating aspects of Federal programs affecting the disabled and to make recommendations to eliminate overlapping, contradictory, and restrictive requirements in current legislation where they exist.

H.R. 3520 also increases spending levels for rehabilitation programs by 9.95 percent over a 4-year period. Since 1979, there has been a significant drop in the rehabilitation of handicapped individuals. This bill restores funding for the Rehabilitation Act to the fiscal year 1979 equivalent. In 1982, the number of rehabilitations were the lowest in 12 years. Between 1974 and 1982, there was a 37.2-percent drop in total rehabilitations, and overall, from 1979 to 1982, there has been a 31-percent decrease in purchasing power in the funding levels for rehabilitation programs.

In my own State of Illinois, $31,167,794 in Federal moneys was spent in fiscal year 1982, compared to $29,802,591 in fiscal year 1979. For those dollars, 7,080 people were rehabilitated and 46,983 were served in fiscal year 1982. By comparison, 9,642 rehabilitations were recorded in 1979. With the increases allowed in H.R. 3250, the State of Illinois will receive approximately $3 million more than it did in 1982 and the State rehabilitation services program will be able to assist over 4,000 additional individuals.

The cost-effectiveness of rehabilitation programs has been proven time and time again. It is currently estimated that for every $1 spent to rehabilitate a handicapped person, over $10 is eventually returned to the Government in the form of taxes or reduced welfare dollars. Alice Rivlin, Director of the Congressional Budget Office, stated in a May 8, 1981, letter:

Since expenditures for vocational rehabilitation are associated with offsetting savings in other government programs, a reduction in funding for rehabilitation * * * would generate increases in other parts of the Federal and State budgets.

Frankly, rehabilitation makes sense. It makes sense in terms of what it means for handicapped people to be given the opportunity to be productive citizens and it makes sense in terms of what it means to the country. It is a cost-effective Federal program that gets the job done.

As most of my colleagues know, title IV of the bill also increases the authorizations for several education and other programs under the jurisdiction of the Committee on Education and Labor. These increases are absolutely essential to meet the Congress commitment to education expressed in the fiscal year 1984 budget resolution. The authorization increases will permit the Appropriations Committees and the Congress to decide how much funding should be made available to each program or activity. Without taking this first step, however, the committees and this House will be unable to work its will.

Some of my colleagues, on the other side of the aisle, have characterized this bill as an attempt to circumvent the rules or as a partisan attempt to manipulate the House rules. Others have said that the rehabilitation reauthorization has become an "omnibus" bill addressing unrelated issues. H.R. 3520 is none of these—it is simply the most important education bill in the 98th Congress.

VOCATIONAL EDUCATION

Federal funding for vocational education in Illinois has dropped substantially in the last 3 years.

Vocational education funding dropped 13 percent from fiscal year 1981 to fiscal year 1982. The next year, funding dropped an additional 2.8 percent. Enrollment for this fiscal year is expected to increase by 12 percent. Yet there is a 3.8-percent overall loss in students served in Illinois from fiscal year 1981 to fiscal year 1982.

There are waiting lists of students who want to attend area vocational schools. Comprehensive high schools send students to area vocational schools, for which the high schools must pay tuition. Eight to ten thousand more students could be served by area vocational schools if the comprehensive schools could afford the tuition. But they cannot. Many Illinois parents have asked that they be able to send their children to the area vocational schools and pay the tuition out of their pockets. State law forbids it.

In fiscal year 1979, the Federal share of vocational education training in Illinois was 3.8 percent. By fiscal year 1982, that percentage had dropped to 3.1.

Despite the lower unemployment rates of vocational education graduates and the need for a more highly trained work force, Illinois was forced to deny more than 36,000 students vocational training in fiscal year 1981 and fiscal year 1982; enrollments dropped from 842,000 students to 804,878.

Because of lowered funding for vocational education, Illinois also had to eliminate specific offerings in the vocational education curriculum. Last year, more than 40 programs were eliminated. Without increased funding, high technology programs, which are more expensive to set up and run, will not be introduced.

CHAPTER I (TITLE I, AID TO DISADVANTAGED CHILDREN)

Title I is the most important Federal education program. It attempts to correct the educational and cultural inequities that poverty and race impose on children.

Based on the 1980 census, there are 344,928 children in Illinois who are eligible for chapter aid to disadvantaged children. The reductions in appropriations since fiscal year 1980 for chapter I has meant that fewer children are being served in Illinois. In fiscal year 1981, 165,218 children were served by chapter I funds; in fiscal year 1982, the number fell to 142,768, a 13.8 percent loss which eliminated 22,450 children from the program.

If additional funding is not allowed in the fiscal year 1984 appropriation, there is a possibility that an additional 24,000 students will be eliminated from the program.

WOMEN, INFANTS, AND CHILDREN (WIC)

There are 2.8 million low-income women, infants, and children participating in this program and receiving food supplements each month. If the authorization ceiling remains as is and only $1.126 billion is appropriated for WIC in fiscal year 1984, the 500,000 poor, pregnant women, infants, and children who have been determined by a medical professional to be at nutritional risk would have to be dropped from the program.

In Illinois, the WIC program serves 103,530 women and children. This year, Illinois is receiving $45,234,257 from the Federal Government to support this needy group. However, WIC is reaching only 21 to 22 percent of eligible women and children in Illinois, which is 3 to 4 percent lower than the national average.

There are 347,153 women and children in Illinois who fit current eligibility requirements—185 percent of the poverty level.

The caseload in Illinois is rising at the rate of about 6 percent a year. At that rate, the cost to maintain the program in fiscal year 1984 would be

$50,142,638. The cost to maintain the caseload at current levels will rise more than $620,000: $45,853,440.

If the authorization level for the WIC program is not raised, 20,000 to 21,000 participants will have to be dropped from the Illinois program.

I urge my colleagues to join me in supporting this bill and in supporting education.●

● Mr. DERRICK. Mr. Chairman, today my colleagues will be considering amendments to H.R. 3520, Rehabilitation Act Amendments of 1983. This is one of the most important education bills this body will be considering this year, for it addresses our need to educate and rehabilitate disabled and nondisabled individuals and provides essential assistance for basic human service programs. I would like to take this opportunity to urge this body to support this bill as it was presented by the Committee on Education and Labor.

Title I of this measure provides for a 10-percent increase in funding for vocational rehabilitation programs for the next 4 fiscal years and an increase equal to inflation for fiscal year 1988. Although these increases violate section 303(a)(4) of the Budget Act, which forbids increases in entitlement programs—except for increases due to inflation or other uncontrollable factors—for years a budget resolution has not been adopted, House rules provide a waiver for this section. As you may recall, the House overwhelmingly adopted the rule on August 4 which waived section 303(a)(4) of this bill by a vote of 251 to 137.

Vocational rehabilitation is one of the most successful Federal programs. In my home State of South Carolina, the rehabilitation rate was 265 persons rehabilitated per 1,000 persons taken into the program, the highest in the Nation in 1982. However, since 1979, there has been a 31-percent reduction in the purchasing power of vocational rehabilitation agencies as a result of funding cuts imposed by the Federal Government. To return to the fiscal year 1979 spending level and to allow States to plan in advance for vocational rehabilitation programs, specific budget levels for the "out years" are necessary.

The return on investment in the past year has been at least a 10-percent return on every dollar spent for State rehabilitation programs due to increased taxes paid and decreased dependence on Government assistance. It is in the best interest of the Federal, State, and local government, and the business community as well as the individual taxpayer, for State rehabilitation programs to be provided with the level of funding in H.R. 3520.

Additionally, I challenge my colleagues to support the authorization increases for adult, vocational, and special aid programs incorporated in this measure. Over the last several months, both the public and private sectors have been emphasizing the need to focus function and a local responsibility, the Federal Government also has a role and an interest in the development of human resources. The Republican-controlled Senate and this body both demonstrated their support for education earlier this year by approving a budget resolution which increased education funding by $1 billion next year. Now is the opportunity for us to follow through on that commitment.

I urge each of you not to allow any procedural objections to this legislation to distract you from the real issue involved here: whether we are going to provide an adequate level of funding for these crucial and effective programs.●

● Mr. LEHMAN of Florida. Mr. Chairman, I am pleased to rise in support of H.R. 3520 and its provision to maintain vital nutritional and health care services to low-income pregnant women, infants, and children under the special supplemental food program for women, infants, and children (WIC) of the Child Nutrition Act.

As chairman of the Prevention Strategies Task Force of the Select Committee on Children, Youth, and Families, I have heard consistent evidence on the benefits and cost effectiveness of WIC. It has helped to reduce infant mortality rates and the incidence of low-birthweight babies among program participants. It yields substantial savings in the short and long run by providing pregnant women, their babies, and young children a healthier start.

If we fail to pass H.R. 3520, hundreds of thousands of poor pregnant women, infants, and children would have to be dropped from this valuable and cost saving program. I urge you not to let that happen.

In my own district, I have seen the benefits of quality preventive services many times. Service and research programs at the Mailman Center for Child Development in Miami, for example, have helped many children and families prevent or cope more successfully with disabilities and lead more productive lives.

WIC is indeed one of our most effective preventive strategies and deserves the strong support of us all.●

● Mr. RICHARDSON. Mr. Chairman, I rise in strong support of H.R. 3520 to reauthorize programs under the Rehabilitation Act of 1973 and to increase the fiscal year 1984 authorization for 10 important education and assistance programs. I want to commend Chairman PERKINS and Chairman MURPHY for their leadership and hard work in bringing this much needed legislation to the floor.

First, this legislation reauthorized the State grant program for vocational rehabilitation through fiscal year 1988 increasing from $1.04 billion in 1984 to $1.38 billion in 1987 with the 1988 increase to be determined by the increase in the Consumer Price Index. The State grant program is by far the largest program under the Vocational Rehabilitation Act. The Federal Government provides 80 percent of the funds under this program and the State government provides 20 percent. This Federal-State partnership in the vocational rehabilitation program began with legislation enacted by the Congress in 1920, and has proven to be successful in providing employment opportunities to the disabled population of this country for the past 63 years. Furthermore, Federal contributions to this program is money well spent. According to the Rehabilitation Services Administration, for every dollar spent on rehabilitation there is a return of $10.40 as the disabled become independent and productive taxpaying citizens.

Mr. Chairman, the increased authorizations through fiscal year 1987 for the State grant program are necessary to restore the program's purchasing power to the fiscal year 1979 level and to insure the program's continued cost effectiveness and ability to enable the Nation's largest minority, the disabled, to decrease their dependence on social welfare services and income maintenance programs and to increase their feelings of self-reliance and self-worth.

Second, title IV of this legislation increases the authorization ceilings for 10 programs under the jurisdiction of the education and labor committee. These funding increases are necessary to bring the funding for these programs up to the levels assumed in the first concurrent budget resolution for fiscal year 1984.

The current ceilings are a result of the Gramm-Latta Budget Reconciliation Act of 1981. A recent report by the nonpartisan Congressional Budget Office (CBO) stated that the budget cuts endorsed by President Reagan had fallen harshly and disproportionately on low-income Americans. The CBO report documents that the recent increase in hunger and poverty in America are a direct result of the Reagan administration's economic policies.

One program that title IV would increase funding for is the chapter 1, Federal education program for disadvantaged students. The Secretary of Education has stated that the chapter 1 program is a very successful federally funded program. This program has proven to be effective in improving the achievement levels of poor and minority children. Title IV of H.R. 3520 would also increase the authorization for the special supplementary feeding program for women, infants, and children (WIC). The low-income energy

assistance program and other programs to assist the poor and elderly.

Mr. Chairman, this authorization increase is necessary to allow the Appropriations Committee to adequately fund these important programs and to insure that the Nation's less fortunate do not continue to bear the brunt of the President's budget cuts.

I urge my colleagues to vote for this much needed legislation.●

● Mr. ALEXANDER. Mr. Chairman, we are approaching one of the most important votes of the 98th Congress. Many have described this as the single most important vote on education this year. Through this legislation we will have an opportunity to support vocational rehabilitation in this country.

We will have an opportunity to support a program which, as Chairman PERKINS so correctly suggested, is one of the most noble and helpful programs for the disabled people of the Nation.

We will have an opportunity, with title IV of the bill before us, to support important education programs ranging from general vocational education to impact aid to adult education, among others.

Mr. Chairman, as the President's own Commission on Excellence in Education found, education is important and vital to our Nation's future.

Our political system needs educated citizens to fulfill democratic responsibilities.

American business needs over a million skilled workers to fill jobs that are open today.

Our elementary, secondary, vocational-technical schools, and universities need the educators to teach the young. Our economy needs the engineers and scientists to research the new products that will enable American business to meet foreign competition.

In fact, Ph. D.'s in the science are down from the levels of the 1970's. In physics, chemistry, computer science, and other fields they are down between 25 and 40 percent.

Not long ago, the Winthrop Rockefeller Foundation suggested once again that education will be one of the most important factors to the economic development of my home State of Arkansas.

It has been said that when you give a person a fish, you feed that person for a day, but when you teach people how to fish, they can feed themselves for a lifetime.

Chairman PERKINS and his colleagues from the committee have traced the history of the vocational rehabilitation program:

The number of persons rehabilitated each year has grown from 58,000 in 1949 to over 226,000 in fiscal 1982.

Fifty-one percent of these people were severely handicapped.

And the program is cost effective: It has been estimated that every dollar spent for rehabilitation has brought back $10 when those people became employed, paying taxes and ending or reducing their need for public assistance.

We also have an opportunity to support title IV of the bill before us, which would authorize spending, as provided for in this year's budget resolution, for a number of education programs.

For example, vocational education has been reduced by 16 percent from 1980 to 1982, eliminating 7,000 teachers and turning away 600,000 students.

In fact, in the President's proposed budget for fiscal year 1984, Arkansas alone would lose $3.2 million in vocational and adult education assistance, a 35-percent cut that would deny more than 12,500 Arkansans vocational, technical, and adult education training.

By undermining Arkansas efforts to improve vocational and technical education programs, these budget proposals will erode Arkansas opportunities to compete for jobs in the rapidly growing high technology fields.

Today, by supporting title IV, we can renew our commitment to programs such as vocational and adult education. infants and children; and the chapter 1 program, which Secretary Bell has described as a major success, which has helped elementary and secondary school students raise their reading achievement scores.

For Arkansas alone, enactment of title IV would mean at least an additional $13,420,000 for the programs included in the title.

Mr. Chairman, the stakes are high for the American economy.

Education is an investment, not a luxury.

It is an investment in our children, our economy, our security, and our future.

We are facing intense foreign economic competition.

Our military increasingly uses sophisticated weaponry and needs more educated personnel.

We must not neglect the investment of education in a world of foreign competition, fast-paced change, and technological advance.

The Japanese Ministry of International Trade and Industry released a document describing Japanese plans for the 1980's. The document stated:

It is extremely important for Japan to make the most of her brain resources, to develop creative technologies of her own, to maintain and develop her industries international superiority.

Mr. Chairman, education and training have been a major part of the Japanese success story. They should be a greater part of ours.

Most of us have made speeches about the need for education. The President has made it a major theme. The voters are watching. I urge my colleagues to support the bill before us, to continue our commitment to excellence in education, and to renew our support for full access to education for all Americans through the programs included in title IV.●

● Mr. BONKER. Mr. Chairman, I would like to take this opportunity to voice my strongest support for H.R. 3520, legislation to extend and improve the Rehabilitation Act of 1973.

The goal of all handicapped individuals is to lead independent productive lives, and the vocational rehabilitation program has played a vital role in this process. Thirty years ago, the funding for vocational rehabilitation was $19 million; today it is over $1 billion. These funds have helped to fully rehabilitate over 226,000 individuals annually. Without these funds, millions would have been denied services which have aided them in developing into vital, contributing citizens.

As reported by the committee, the bill reauthorizes the major rehabilitation programs serving this Nation's physically and mentally handicapped at a level of over $1 billion annually through fiscal year 1987. The bill also provides for operation of the Helen Keller National Center for Deaf-Blind Youths and Adults and establishes a National Commission on Federal Assistance to Disabled Americans.

Few Federal efforts have resulted in the outstanding record of success achieved by our rehabilitation programs. Thousands of men and women have used these programs, and the vocational rehabilitation program in particular, to help them become respected, productive members of our society. For every Government dollar spent on rehabilitation, $10 has been returned to the Government in the form of tax revenues and reduced dependence upon public assistance programs.

All of us considering H.R. 3520 today realize that title IV of the bill has become extremely controversial in that it extends the fiscal year 1984 authorization of 10 programs unrelated to rehabilitation. Many of my colleagues are arguing that these unrelated reauthorizations are inappropriate in H.R. 3520. I do not agree. Without this bill, many important programs will be tied to authorization levels set by the Budget Reconciliation Act of 1981, rather than those assumed in the first budget resolution for fiscal year 1984. For many of our Nation's citizens served by these programs, the result could be disastrous.

As chairman of the Aging Committee's Subcommittee on Housing and Consumer Interests, I am particularly interested in assuring that the low income energy assistance program is authorized and funded at the level rec-

ommended by the Committee on Education and Labor.

The Department of Health and Human Services has informally estimated that at least 40 percent of low-income energy assistance recipients are over the age of 65. Since the elderly are especially susceptible to both hypothermia and hyperthemia, these energy assistance payments are often life sustaining.

There is no reason to believe that the growing need for energy assistance is dwindling. In fact, all the evidence points to a growing demand. We know that older Americans pay a much higher proportion of their incomes on low-income energy than other Americans, as much as 35 percent in the coldest parts of the country. This situation can only worsen for the elderly poor as their incomes continue to lag behind the pace of inflation.

The increased authorization recommended by the committee is $175 million above the fiscal year 1983 appropriated level of $2.075 billion. The increase is barely sufficient to fund individuals already in need of program benefits let alone those whose needs have not been met. Compliance with the 1981 Reconciliation Act's authorization level of $1.85 billion would place an undue hardship on too many older Americans. I hope all of my colleagues in the House will keep this fact in mind as consideration of H.R. 3520 continues today.●

● Mr. WEISS. Mr. Speaker, today the House has an opportunity to reaffirm its commitment to reviving the economy while assisting this Nation's handicapped, poor, and disadvantaged. Without the passage of H.R. 3520, the Vocational Rehabilitation Act Amendments of 1983, our efforts to reverse some of economically and socially debilitating effects of the "drop dead" Reagan budget and Gramm-Latta II will be for naught. The Congress has endorsed funding increases for education and social service programs in the first concurrent budget resolution for fiscal year 1984. However, if we do not increase authorization levels for the programs included in H.R. 3520, the budget resolution will become a symbol of false hope to the potential beneficiaries of these rehabilitation, social service, and education programs.

The effects of cutbacks in human service programs during Ronald Reagan's first 2 years in office are increasingly evident. Unemployment is at 9.3 percent and amount youths, it is 22.8 percent; poverty and malnutrition are on the rise; our public schools are in a state of crisis. H.R. 3520 can begin, slowly, to address some of these problems.

The Vocational Rehabilitation Act has successfully trained handicapped people so they can work. Furthermore, within 4 years of completing the program, the average trainee/worker has paid for the program through his or her income taxes. Vocational rehabilitation, along with adult and vocational education, whose authorization levels are raised in this legislation, contributes to rejuvenating the lives of handicapped Americans as well as our economy, and reducing the rate of unemployment.

One of the most successful programs to address the effects of proverty is the WIC—Women, Infants and Children—nutrtion program. Studies document WIC's central relationship to reduced infant mortality and its role in diminishing the number of infants who need hospitalization and their attendant costs. If the WIC authorization level is not increased, 500,000 pregnant mothers, infants, and young children at risk will be cut from the program in fiscal year 1984.

Finally, at a time when this country is concerned about the quality of its education system, we have an opportunity to increase our commitment to two exceptional education programs: Chapter I and the education of all handicapped children. Both of these programs provide essential assistance for children who have traditionally been overlooked by the education system. The education of disadvantaged and handicapped children is a high-return investment in this country's future.

Reaganomics and Gramm-Latta II have not produced the promised economic recovery. Instead we are faced with the largest Federal budget deficit in U.S. history. Borrowing against our children's future is the same as borrowing against the future of this country. We must provide the foundation for a stronger economy that can support all our people, not just the wealthy few. H.R. 3520 tests the House's will to begin to lay this foundation and to right the errors of the Reagan administration. I urge my colleagues to vote for H.R. 3520.●

The CHAIRMAN. Are there further amendments to the bill? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3520) to extend and improve the Rehabilitation Act of 1973, to provide for the operation of the Helen Keller National Center for Deaf-Blind Youths and Adults, to create a select commission on Federal assistance to disabled Americans, and to increase certain authorizations of appropriations for programs within the jurisdiction of the Committee on Education and Labor, pursuant to House Resolution 283, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

□ 1800

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. ERLENBORN

Mr. ERLENBORN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. ERLENBORN. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ERLENBORN moves to recommit the bill, H.R. 3520, to the Committee on Education and Labor with instructions to report the same back forthwith with the following amendment: On page 25, after line 25, insert the following new subsection:

"(d) No education funds authorized pursuant to this Title shall be expended in any school district or other political subdivision responsible for education unless such school district or political subdivision has a procedure for determining functional literacy as a condition for graduation from secondary public schools."

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ERLENBORN) is recognized for 5 minutes in support of his motion to recommit.

Mr. ERLENBORN. Mr. Speaker, the amendment included in the motion to recommit is identical with the Gregg amendment that was offered earlier in the Committee of the Whole House on the State of the Union, on which there was not a vote ordered. It is my intention to ask for the yeas and nays on the motion to recommit that would include these instructions to adopt the Gregg amendment.

Mr. Speaker, I do not think that we need to debate that amendment again. This is a simple provision that says that the funds expended under the authority of title IV, as far as they apply to education funds, may not be expended in any school district unless they have in place a system for determining functional literacy as a condition for graduation from secondary public schools.

I think the debate earlier in the day made it clear that there are some of us who think that we should get some results for the Federal funds that have been and will be expended in the future for education. We have had the

national debate on education, and I think that one of the minor—I should not say "minor"; it is a very important—but the very simplest of those goals for educational systems ought to be to produce functional literates from our high schools, and this amendment would establish that as a Federal goal.

Mr. BARTLETT. Mr. Speaker, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Speaker, as I understand, the purpose of the gentleman's motion is simply to provide this House with an opportunity to vote on the earlier amendment to require a literacy requirement offered by the gentleman from New Hampshire (Mr. GREGG) and to provide this House with an opportunity to have a recorded vote on that amendment.

Mr. ERLENBORN. The gentleman is correct.

Mr. PERKINS. Mr. Speaker, I rise in opposition to the motion to recommit with instructions to include the Gregg amendment.

Mr. Speaker, in the history of education legislation Congress has prohibited Federal officials from control over local school policy. The Gregg amendment would impose Federal control on the States and local school districts by barring any of these funds unless school districts have functional literacy tests.

This will just cause an unrest throughout the whole country and it will destroy our Federal programs throughout the country because State legislatures in many States will not have time to comply. The States certainly will never accept an amendment of this type involving this heavy-handed Federal control. It will work differently in different parts of the country.

I would ask all the Members to vote against Federal control, which this amendment imposes. We have never done it in the history of Federal aid legislation. These gentlemen in my judgment themselves do not believe in this amendment. They just want to stop the flow of Federal funds, in my judgment, and this is just what this amendment will do. I urge everybody to vote against it.

Mr. WILLIAMS of Montana. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. I thank my chairman for yielding.

Mr. Speaker, I rise in opposition to this amendment to recommit this important legislation.

During the early growth of this Nation, the institutions that aided this growth, such as education, were highly valued by the people of this land. Life was simpler then and so too was the world of work and the Nation's economy. Job skills could be easily acquired in the workplace through apprenticeship since our technological sophistication was then also relatively simple.

Advances in our technological sophistication led not only to the enjoyment of a high standard of living but also to increasing compartmentalization of work. Job skills became more and more fragmented, resulting in the need for more formalized job skills training. Vocational education was this Nation's response to that need and for many years we have trained much of America's work force in vocational education classrooms across this great land. And this training has contributed significantly to our developing status as a world leader.

Rapid change in technology, in manufacturing, in trade strategies—in fact, in all aspects of economic life—has become the benchmark of modern times. But this change has not proceeded evenly on all fronts. For example, over the past several years, some Americans have begun to take their educational system for granted, displaying less and less willingness to support and fund the kinds of innovative changes that are needed to keep this system up to date and capable of adequately supporting the high standard of living we currently enjoy.

As a consequence of that lack of universal support, America's educational system has suffered—so much so that some say the Nation is at risk. While not all the votes are in on just how much at risk we are, it is clear that if we are to continue to prosper, if we are to continue to lead the world, if we are to maintain our defensive capabilities, education, and vocational education, must be advanced to top priority status at all levels of government.

Vocational education is a critical component of our overall education effort. At a time when high unemployment rates are becoming common, when industrial and technological skills are undergoing rapid transitions and when survival depends on quality education, it would be disastrous to be pennywise and pound foolish. I urge my colleagues to support this bill (H.R. 3520) so that vocational education and other key educational initiatives will begin to receive the funds needed to provide Americans with quality education.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. ERLENBORN. Mr. Speaker, I object to the vote on the ground that quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present. Pursuant to the provisions of clause 5, rule XV, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the question of the passage of the bill.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 128, nays 275, not voting 30, as follows:

[Roll No. 332]

□ 1820

The Clerk announced the following pairs:

On this vote:

Mr. Corcoran for, with Ms. Mikulski against.

Mr. Madigan for, with Mr. Derrick against.

Mr. Schulze for, with Mr. Roe against.

Mr. Pashayan for, with Mr. Howard against.

Mrs. Martin of Illinois for, with Mr. Craig against.

Mr. TAUZIN changed his vote from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. PERKINS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. The Chair will announce that this will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 324, nays 79, not voting 30, as follows:

□ 1830

The Clerk announced the following pairs:

On this vote:

Mr. Dellums for, with Mr. Corcoran against.

Ms. Mikulski for, with Mr. Craig against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1340) to revise and extend the Rehabilitation Act of 1973 and to extend the Developmental Disability Assistance and Bill of Rights Act, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mr. TORRES). Is there objection to the request of the gentleman from Kentucky?

Mr. BARTLETT. Mr. Speaker, reserving the right to object, I would inquire of the chairman, because we could not hear on this side of the aisle, as to what the request was.

Mr. PERKINS. Mr. Speaker, if the gentleman will yield, all I am trying to do is to go to conference, I will inform the gentleman from Texas.

Mr. BARTLETT. The purpose of the gentleman from Kentucky is to send this bill on to conference as quickly as possible?

Mr. PERKINS. That is correct.

Mr. BARTLETT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1340

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Rehabilitation Amendments of 1983".

TITLE I—REHABILITATION PROGRAM

DEFINITIONS

SEC. 101. (a) Section 7(7) of the Rehabilitation Act of 1973 (hereafter in this title referred to as "the Act") is amended by adding at the end thereof the following new paragraph:

"(C) The term 'individual' with respect to a handicapped individual means, for the purposes of title I, any individual who has attained sixteen years of age.".

(b) Section 7(12) of the Act is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Education".

REPORTS

SEC. 102. (a) Section 13 of the Act is amended by adding after the first sentence the following: "The Commissioner shall annually collect information on each client whose case is closed out in the preceding fiscal year and include the information in the report required by this section. The information shall set forth a complete count of such cases in a manner permitting the greatest possible cross-classification of data. The data elements shall include, but not be limited to, age, sex, race, ethnicity, education, type of disability, severity of disability, key rehabilitation process dates, earnings at time of entry into program and at closure, work status, occupation, cost of case services, type of services provided, types of facilities or agencies which furnished services and whether each such facility or agency is public or private, and reasons for closure. The Commissioner shall take whatever action is necessary to assure that the identity of each client for which information is supplied under this subsection is confidential.".

(b) The last sentence of section 13 is amended by inserting "also" after "shall".

EVALUATION

SEC. 103. (a) Section 14(a) of the Act is amended by adding after the first sentence the following new sentence: "The Secretary shall establish and use standards for the evaluation required by this subsection. The standards shall, to the extent feasible, for all appropriate programs include standards relating to the increases in employment and earnings taking into account economic factors in the area to be served by the program and the characteristics of the handicapped individuals to be served.".

(b) Section 14 of the Act is amended by redesignating subsection (f) as subsection (g) and by inserting after subsection (e) the following new subsection:

"(f) Not later than September 30, 1984, the Secretary shall evaluate, in accordance with the standards required under section 621(a)(3) and section 711(e) of this Act—

"(1) the effectiveness of the projects with industry program authorized under section 621 of this Act; and

"(2) the effectiveness of, and alternative means of financing for, Independent Living Services and Centers authorized by section 711 of this Act.

The Secretary shall prepare and submit to the Congress interim reports every ninety days and a final report of the evaluations required by this subsection not later than December 31, 1984.".

ADMINISTRATIVE AMENDMENTS

SEC. 104. (a)(1) Section 15(b) of the Act is amended by striking out "Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Education".

(2) Section 101(a)(11) of the Act is amended by striking out "Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Health and Human Services".

(3) Section 102(d)(2) of the Act is amended by striking out "Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Education".

(4) Section 202(i)(2) of the Act is amended by striking out "Bureau of Education for the Handicapped" and inserting in lieu thereof "Office of Special Education and Rehabilitative Services".

(5) Section 204(b)(7) of the Act is amended by striking out "Office of Education" and inserting in lieu thereof "Department of Education".

(b)(1) Section 202(q) of the Act is amended by striking out "Commissioner of Education" and inserting in lieu thereof "Secretary of Education".

(2) Section 203(a)(1) of the Act is amended by striking out "Commissioner of Education" and inserting in lieu thereof "Secretary of Education".

(3)(A) The first sentence of section 501(a) of the Act is amended by striking out "the Chairman of the Civil Service Commission" and inserting in lieu thereof "the Chairman of the Office of Personnel Management" and by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Education and Health and Human Services".

(B) The second sentence of such Act is amended by striking out "Secretary of Health, Education, and Welfare and the Chairman of the Civil Service Commission" and inserting in lieu thereof "Secretary of Education and the Chairman of the Office of Personnel Management".

(C) Section 501 of the Act is amended by striking out "Civil Service Commission" each place it appears and inserting in lieu thereof "Office of Personnel Management".

(D) Section 501 of the Act is further amended by striking out "Commission" each place it appears and inserting in lieu thereof "Office".

(E) Section 501(d) of the Act is amended by striking out "Civil Service Commission's activities" and inserting in lieu thereof "the activities of the Office of Personnel Management".

(F) Section 501(f)(1) of the Act is amended by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Education".

(4) Section 507 of the Act is amended by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Education, the Secretary of Health and Human Services," and by striking out "Chairman of the United States Civil Service Commission" and inserting in lieu thereof "Chairman of the Office of Personnel Management".

(5) Section 614 of the Act is amended by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Health and Human Services".

(c)(1) Section 401(a) of the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 is amended by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Education".

(2) Section 402 of such Act is amended by striking out "Commissioner of Education" and inserting in lieu thereof "Assistant Secretary of Education for the Office of Special Education and Rehabilitation Services".

PART A—VOCATIONAL REHABILITATION SERVICES

AUTHORIZATION OF APPROPRIATIONS

SEC. 111. (a) Section 100(b)(1) of the Act is amended to read as follows:

"(b)(1) For the purpose of making grants to States under part B of this title to assist them in meeting the costs of vocational rehabilitation services provided in accordance with State plans under section 101, there is authorized to be appropriated $993,900,000 for the fiscal year 1984, $1,047,600,000 for the fiscal year 1985, and $1,103,000,000 for the fiscal year 1986.".

(b) The first sentence of section 100(b)(2) of the Act is amended to read as follows:

"(2) For the purpose of allotments under section 120(a)(1), there are authorized to be appropriated such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

(c) Section 100(b)(3) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for each of the three fiscal years thereafter" and inserting in lieu thereof "each of the fiscal years 1984, 1985, and 1986".

ADDITIONAL PAYMENTS REPEALED

SEC. 112. (a)(1) Section 110(b) of the Act is repealed.

(2) Section 110 of the Act is amended by redesignating subsection (c) as subsection (b).

(b) Section 111(a) of the Act is amended—

(1) by striking out "(including any additional payment to it under section 110(b))";

(2) by striking out "(and its additional payment under subsection (b), if any)"; and

(3) by striking out ", and except that the amount otherwise payable to such State for such year under this section shall be reduced by the amount (if any) by which expenditures from non-Federal sources during such year under this title are less than expenditures under the State plan for the fiscal year ending June 30, 1972, under the Vocational Rehabilitation Act".

(c) The repeals and amendments made by this section shall take effect October 1, 1986.

CLIENT ASSISTANCE

SEC. 113. (a) Section 112 of the Act is amended to read as follows:

"CLIENT ASSISTANCE PROGRAM

"SEC. 112. (a) From funds appropriated under subsection (g), the Secretary shall, in accordance with this section, make grants to States to establish and carry out client assistance programs to provide assistance in informing and advising all clients and client applicants of all available benefits under this Act, and, upon request of such clients or client applicants, to assist such clients or applicants in their relationships with projects, programs, and facilities providing services to them under this Act, including assistance in pursuing legal, administrative, or other appropriate remedies to ensure the protection of the rights of such individuals under this Act.

"(b) No State may receive payments from its allotment under this Act in any fiscal year unless the State has in effect not later than September 30, 1985, a client assistance program, which—

"(1) has the authority to pursue legal, administrative, and other appropriate remedies to ensure the protection of rights of handicapped individuals who are receiving treatments, services, or rehabilitation under this Act within the State;

"(2) is not administered by the State Vocational Rehabilitation Agency; and

"(3) is independent of any agency which provides treatment, services, or rehabilitation to handicapped individuals under this Act.

"(c) The Governor shall designate a public or private agency to conduct the client assistance program required by this section and be accountable for the proper use of funds appropriated for its use.

"(d)(1)(A) The Secretary shall allot the sums appropriated for each fiscal year under this section among the States on the basis of relative population of each State, except that no State shall receive less than $50,000.

"(B) The Secretary shall allot $30,000 each to American Samoa, Guam, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

"(C) For the purpose of this paragraph, the term 'State' does not include American Samoa, Guam, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

"(2) The amount of an allotment to a State for a fiscal year which the Secretary determines will not be required by the State during the period for which it is available for the purpose for which allotted shall be available for reallotment by the Secretary from time to time on such dates he may fix to other States with respect to which such a determination has not been made, in proportion to the original allotments of such States for such fiscal year, but with such proportionate amount for any of such other States being reduced to the extent it exceeds the sum the Secretary estimates such State needs and will be able to use during such period; and the total of such reduction shall be similarly reallotted among the States whose proportionate amounts were not so reduced. Any such amount so reallotted to a State for a fiscal year shall be deemed to be a part of its allotment for such fiscal year.

"(3)(A) The Secretary shall pay to the Governor from the allotment of the State the amount specified in the application approved under subsection (e).

"(B) For the purpose of this paragraph and subsection (c), the term 'Governor' means the chief executive of the State.

"(e) No grant may be made under this section unless the State submits an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary deems necessary to meet the requirements of this section.

"(f) The Secretary shall prescribe regulations applicable to the client assistance program which shall include the following requirements:

"(1) No employees of such programs shall, while so employed, serve as staff or consultants of, or receive benefits of any kind directly or indirectly from, any rehabilitation project, program, or facility receiving assistance under this Act in the State.

"(2) Each program shall be afforded reasonable access to policymaking and administrative personnel in the State and local rehabilitation programs, projects, or facilities.

"(3) Each program shall contain provisions designed to assure that to the maximum extent possible mediation procedures are used prior to resorting to administrative or legal remedies.

"(4) The program shall submit an annual report to the Secretary on the operation of the program during the previous year, including a summary of the work done and the uniform statistical tabulation of all cases handled by such program. A copy of each such report shall be submitted to the appropriate committees of the Congress by the Secretary, together with a summary of such reports and his evaluation of the program, including appropriate recommendations.

"(g) There are authorized to be appropriated $6,000,000 for the fiscal year 1984, $6,300,000 for the fiscal year 1985, and $6,700,000 for the fiscal year 1986.".

(b) The table of contents of the Act is amended by striking out the item relating to "Sec. 112" and inserting in lieu thereof the following:

"Sec. 112. Client assistance program.".

INNOVATION AND EXPANSION

SEC. 114. The first sentence of section 121(a) of the Act is amended by striking out all that follows "rehabilitation services," and inserting in lieu thereof the following: "including—

"(1) programs to initiate or expand such services to individuals with the most severe handicaps;

"(2) special programs under such State plan to initiate or expand services to classes of handicapped individuals who have unusual or difficult problems in connection with their rehabilitation; and

"(3) programs to maximize the use of technological innovations in meeting the employment training needs of handicapped youth and adults.".

PART B—RESEARCH

AUTHORIZATION OF APPROPRIATIONS

SEC. 121. Section 201(a) of the Act is amended to read as follows: "There are authorized to be appropriated $36,000,000 for the fiscal year 1984, $38,000,000 for the fiscal year 1985, and $40,000,000 for the fiscal year 1986 to carry out the provisions of this title.".

NATIONAL INSTITUTE OF HANDICAPPED RESEARCH

SEC. 122. (a) Section 202(a) of the Act is amended by striking out "health, education, and welfare" both times it appears and inserting in lieu thereof "education" each such time.

(b) Section 202(c) of the Act is amended by adding after the first sentence the following new sentence: "The Director shall be an individual with substantial experience in rehabilitation and in research administration.".

(c) Section 202 of the Act is amended by adding at the end thereof the following new subsection:

"(j)(1) The Director shall make a grant to an institution of higher education for the establishment of a program of pediatric rehabilitation research at an institution of higher education.

"(2) The Director shall establish, either directly or by way of grant or contract, a Research and Training Center in the Pacific Basin.".

RESEARCH

SEC. 123. (a) Section 204(b)(1) of the Act is amended by adding at the end thereof the following: "Rehabilitation Research and Training Centers shall include both comprehensive centers dealing with multiple disabilities and centers focused on particular disabilities. Grants to Centers need not be automatically terminated at the end of a project period and may be renewed on the basis of a thorough evaluation and peer review including site visits. Training of students preparing to be rehabilitation personnel through centers shall be an important priority. Grants may include faculty support for teaching of rehabilitation-related courses of study for credit and other courses offered by the institutions of higher education affiliated with the Center.".

(b) Section 204(b)(3) of the Act is amended by striking out "pursuant to section 303(b)" and inserting in lieu thereof "pursuant to sections 310 and 311(b)".

(c) Section 204(b) of the Act is amended by inserting after paragraph (12) the following new paragraph:

"(13) Conduct of a rehabilitation research program under which financial assistance is provided in order to (A) test new concepts and innovative ideas, (B) demonstrate research results of high potential benefits, (C) purchase prototype aids and devices for evaluation, (D) develop unique rehabilitation training curricula, and (E) be responsive to special initiatives of the Director. No single payment under this paragraph may exceed $50,000 in any fiscal year and all payments made under this paragraph in any fiscal year may not exceed five per centum of the amount available under section 204 to the National Institute of Handicapped Research in any fiscal year. Regulations and administrative procedures with respect to financial assistance under this paragraph shall, to the maximum extent possible, be expedited.".

PART C—SUPPLEMENTARY SERVICES AND FACILITIES

GRANTS FOR CONSTRUCTION

SEC. 131. Section 301(a) of the Act is amended by striking out "October 1, 1982" in the first sentence and inserting in lieu thereof the following: "October 1, 1986"; and by striking out "October 1, 1983" and inserting in lieu thereof "October 1, 1987".

VOCATIONAL TRAINING

SEC. 132. (a) Section 302(a) of the Act is amended by striking out "October 1, 1982" and inserting in lieu thereof "October 1, 1986".

(b) Section 302(b) of the Act is amended by adding at the end thereof the following new paragraph:

"(4) No grant under this subsection shall be continued for more than two years unless the project meets standards relating to employment and earnings prescribed by the Commissioner or unless the Commissioner determines that acceptable remedial measures have been taken by the grantee.".

TRAINING

SEC. 133. (a)(1) Section 304(a) of the Act is amended—

(A) by inserting "(A)" after "including" the second time it appears;

(B) by inserting after "placement services" a comma and the following: "(B) personnel specifically trained to deliver services to individuals who may benefit from receiving comprehensive services for independent living, personnel specifically trained to deliver services in client assistance programs,"; and

(C) by inserting "(C)" after "and" the last time it appears in such section.

(2) Section 304(a) of the Act is further amended by adding at the end thereof the following new sentence: "In carrying out the provisions of this subsection, the Commissioner shall, in addition to furnishing training in the services provided under this Act to rehabilitation counselors, furnish training to such counselors in the applicability of the provisions of section 504.

(b) Section 304(a) of the Act is further amended by inserting "qualified" before "personnel" each time it appears in such section.

(c) Section 304(b) of the Act is amended by striking out "will be utilized to provide a balanced program of assistance to meet the medical, vocational, and other personnel training needs of both public and private rehabilitation programs and institutions, to include" and inserting in lieu thereof "shall be targeted to areas of personnel shortage which may include".

(d) Section 304(c) of the Act is amended by adding at the end thereof the following new sentences: "The Commissioner shall prepare and submit to the Congress, simultaneously with the budget submission for the succeeding fiscal year for the Rehabilitation Services Administration, a report setting forth and justifying in detail how the training funds for the fiscal year prior to such submission are allocated by professional discipline and other program areas. The report shall also contain findings on personnel shortages, how funds proposed for the succeeding fiscal year will be allocated under the President's budget proposal, and how the findings of personnel shortages justify the allocations.".

(e)(1) Section 304 is amended by striking out "(d)" the second time it appears and inserting in lieu thereof "(e)".

(2) The first sentence of section 304(e) of the Act (as redesignated by paragraph (1)) is amended to read as follows: "There are authorized to be appropriated to carry out this section, $22,000,000 for the fiscal year 1984, $26,800,000 for the fiscal year 1985, and $28,300,000 for the fiscal year 1986.".

AUTHORIZATION OF APPROPRIATIONS FOR COMPREHENSIVE REHABILITATION CENTERS

SEC. 134. Section 305(g) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for the three succeeding fiscal years", and inserting in lieu thereof "for each of the fiscal years 1984, 1985, and 1986".

AUTHORIZATION OF APPROPRIATIONS FOR SPECIAL PROJECTS

SEC. 135. Section 310(a) of the Act is amended—

(1) by inserting after "313" the following: "and section 316"; and

(2) by striking out "such sums as may be necessary for each fiscal year ending prior to October 1, 1982" and inserting in lieu thereof "$12,900,000 for fiscal year 1984, $13,600,000 for fiscal year 1985, and $14,300,000 for fiscal year 1986.".

SPECIAL DEMONSTRATION PROGRAMS

SEC. 136. (a)(1) Section 311(a)(1) of the Act is amended by striking out "individuals with spinal cord injuries and".

(2) Section 311(a) of the Act is amended by adding at the end thereof the following new sentence: "The Director of the National Institute of Handicapped Research may make grants to States and to public or nonprofit agencies and organizations to pay part or all of the costs of special projects and demonstrations for spinal cord injuries.".

(b) Section 311(b) of the Act is amended by adding at the end thereof the following new sentence: "The Director of the National Institute of Handicapped Research shall coordinate each grant made under this subsection with the Commissioner.".

(c) Section 311 of the Act is amended by adding at the end thereof the following new subsections:

"(c)(1) The Commissioner may make grants to public and nonprofit agencies and organizations to pay part or all of the costs of special projects and demonstrations including research and evaluation for applying new types or patterns of services for individuals with mental retardation to enter into the labor force.

"(2) Services under this subsection may include—

"(A) jobs-search assistance;

"(B) on-the-job training;

"(C) job development including worksite modification and use of advance-learning technology for skills training;

"(D) dissemination of information on program activities to business and industry; and

"(E) followup services for individuals placed in employment.

"(d)(1) The Commissioner may make grants to public and nonprofit agencies and organizations to pay part or all of the costs of special projects and demonstrations including research and evaluation for handicapped youths to provide job training and prepare them for entry into the labor force. Such projects shall be designed to demonstrate cooperative efforts between local educational agencies, business and industry, vocational rehabilitation programs, and organizations representing labor and organizations responsible for promoting or assisting in local economic development.

"(2) Services under this subsection may include—

"(A) jobs search assistance;

"(B) on-the-job training;

"(C) job development including worksite modification and use of advance-learning technology for skills training;

"(D) dissemination of information on program activities to business and industry; and

"(E) followup services for individuals placed in employment.

"(3) The Commissioner shall assure that projects shall be coordinated with other projects assisted under section 626 of the Education of the Handicapped Act.".

HELEN KELLER NATIONAL CENTER AUTHORIZATION OF APPROPRIATIONS

SEC. 137. (a) Section 313(e) of the Act is amended by striking out "such sums as may be necessary for each fiscal year before October 1, 1982" and inserting in lieu thereof "$3,700,000 for fiscal year 1984, $3,900,000 for fiscal year 1985, and $4,100,000 for fiscal year 1986".

SPECIAL RECREATIONAL PROGRAMS AUTHORIZATION OF APPROPRIATIONS

SEC. 138. Section 316 of the Act is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b) There are authorized to be appropriated to carry out this section $2,000,000 for the fiscal year 1984, $2,100,000 for the fiscal year 1985, and $2,200,000 for the fiscal year 1986.".

PART D—NATIONAL COUNCIL

ADMINISTRATIVE AMENDMENT

SEC. 141. Section 400 of the Act is amended by striking out "with the Department of Health, Education, and Welfare" and inserting in lieu thereof "within the executive branch of the Federal Government".

DUTIES

SEC. 142. Section 401 of the Act is amended—

(1) by striking out "Commissioner, the appropriate Assistant Secretary of the Department of Health, Education, and Welfare" in clause (3) and inserting in lieu thereof "President and the Congress";

(2) by striking out "the Secretary, the Commissioner" in clause (5) and inserting in lieu thereof "President and the Congress";

(3) by striking out "and" at the end of clause (5);

(4) by striking out "the Secretary," in clause (6);

(5) by striking out the period at the end of clause (6) and inserting in lieu thereof a semicolon and the word "and"; and

(6) by adding at the end thereof the following:

"(7) provide to the Congress on a continuing basis advice, recommendations, and any additional information which the Council or the Congress deems appropriate.".

STAFF

SEC. 143. (a) Section 403(a) of the Act is amended by striking out "up to seven technical and professional employees" and inserting in lieu thereof "an Executive Director".

(b) Section 403(a) of the Act is further amended by adding at the end thereof the following new sentence: "The Executive Director shall be appointed from among individuals who are experienced in the planning or operation of programs for handicapped individuals.".

(c) Section 403(a) of the Act is further amended by inserting "(1)" after the section designation and by adding at the end thereof the following new subsection:

"(2) The Executive Director is authorized to hire not to exceed seven technical and professional employees to assist the National Council to carry out its duties.".

PART E—ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

AUTHORIZATION OF APPROPRIATIONS

SEC. 151. Section 502(i) of the Act is amended by striking out "October 1, 1982" and inserting in lieu thereof "October 1, 1984".

PART F—EMPLOYMENT OPPORTUNITIES

AUTHORIZATION OF APPROPRIATIONS FOR COMMUNITY SERVICE EMPLOYMENT PILOT PROGRAMS

SEC. 161. Section 617 of the Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 617. There are authorized to be appropriated to carry out the provisions of this part such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

PROJECTS WITH INDUSTRY

SEC. 162. (a) The matter preceding clause (A) of section 621(a)(1) of the Act is amended by inserting after "employers" a comma and the following: "designated State units".

(b) Section 621(a) of the Act is amended by adding at the end thereof the following new paragraphs:

"(3) The Commissioner shall develop and publish standards to assure satisfactory performance under agreements entered into under this subsection not later than July 1, 1984. No standards may be established under this paragraph unless the standards are approved by the National Council on the Handicapped.

"(4)(A) The Commissioner shall continue to provide financial assistance under each agreement of this section if—

"(i) the parties to that agreement include provisions for agreement which are at least as stringent as the standards established under paragraph (3); and

"(ii) the Commissioner determines that the parties to that agreement have substantially met the performance standards set forth in the agreement.

"(B) The parties to each agreement receiving assistance under this section in the fiscal year in which this paragraph is enacted shall continue to receive assistance until October 1, 1984, unless the Commissioner determines that there is a substantial failure to comply with the agreement.".

EQUITABLE DISTRIBUTION

SEC. 163. Section 621 of the Act is amended by redesignating subsection (c) as subsection (d) and inserting after subsection (b) the following new subsection:

"(c) The Commissioner shall to the extent practicable assure an equitable distribution of payments made under this section among the States.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 164. Section 623 of the Act is amended by striking out "of this part for each fiscal year beginning before October 1, 1982" and inserting in lieu thereof "for section 621 $13,000,000 for fiscal year 1984, $14,400,000 for fiscal year 1985, and $15,200,000 for fiscal year 1986; and for section 622, such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986".

PART G—SERVICES FOR INDEPENDENT LIVING

EVALUATION

SEC. 171. Section 711 of the Act is amended by adding at the end thereof the following new paragraphs:

"(e)(1) The Commissioner shall, not later than July 1, 1984, develop and publish standards to review and evaluate the operation of independent living centers receiving assistance under this title and make recommendations for the improvement and continuation of each such center and for the support of new independent living centers. No standards may be established under this paragraph unless the standards are approved by the National Council on the Handicapped.

"(2) In the development of the standards required by this subsection the Commissioner shall obtain the recommendations of independent living centers and professionals and associations serving handicapped individuals, particularly associations engaged in rehabilitation research.

"(f) Each independent living center receiving assistance under this title in the fiscal year in which this subsection is enacted shall continue to receive assistance until such time as the final evaluation report required by section 14 has been submitted to the appropriate committees of the House of Representatives and Senate, unless the Commissioner determines that there is a substantial failure to comply with the provisions of the approved application.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 172. (a)(1) Section 731 of the Act the second time it appears is redesignated as section 741.

(2) The table of contents of the Act is amended by striking out "SEC. 731" after part E and inserting in lieu thereof "SEC. 741".

(b)(1) Section 741(a) of the Act (as so redesignated) is amended to read as follows:

"(a) There are authorized to be appropriated to carry out part A of this title such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

(2) Section 741(b) of the Act (as so redesignated) is amended to read as follows:

"(b) There are authorized to be appropriated to carry out part B of this title $21,000,000 for each of the fiscal years 1984, 1985, and 1986.".

(3) Section 741(c)(1) of the Act (as so redesignated) is amended to read as follows:

"(c)(1) There are authorized to be appropriated to carry out part C of this title such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

TITLE II—DEVELOPMENTAL DISABILITIES

ADMINISTRATIVE AMENDMENT

SEC. 201. Section 102(11) of the Developmental Disability Assistance and Bill of Rights Act (hereafter in this title referred to as the "Act") is amended by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Health and Human Services".

PROTECTION AND ADVOCACY OF INDIVIDUAL RIGHTS

SEC. 202. The first sentence of section 113(b)(2) of the Act is amended to read as follows: "There is authorized to be appropriated for allotments under paragraph (1) $8,400,000 for fiscal year 1984.".

UNIVERSITY AFFILIATED FACILITIES

SEC. 203. (a) Section 123 of the Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 123. There is authorized to be appropriated to carry out this part $7,800,000 for fiscal year 1984.".

GRANTS FOR PLANNING AND THE PROVISION OF SERVICES

SEC. 204. Section 131 of the Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 131. There is authorized to be appropriated to carry out the provisions of this part $45,400,000 for fiscal year 1984.".

SPECIAL PROJECTS

SEC. 205. Section 145(f) of the Act is amended to read as follows:

"(f) For the purpose of making grants under subsection (a), there is authorized to be appropriated $2,600,000 for fiscal year 1984.".

MOTION OFFERED BY MR. PERKINS

Mr. PERKINS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. PERKINS moves to strike all after the enacting clause of the Senate bill, S. 1340, and to insert in lieu thereof the provisions of the bill H.R. 3520, as passed, as follows:

TITLE I—AMENDMENTS TO THE REHABILITATION ACT OF 1973

SHORT TITLE

SECTION 101. This title may be cited as the "Rehabilitation Act Amendments of 1983".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR VOCATIONAL REHABILITATION SERVICES

SEC. 102. (a)(1) Section 100(b)(1) of the Rehabilitation Act of 1973 (hereinafter in this title referred to as "the Act") is amended by inserting "(A)" after "(b)(1)" and by inserting at the end thereof the following: "There is further authorized to be appropriated for such purpose $1,037,800,000 for fiscal year 1984, and the amount determined under subsection (c) for each of the four succeeding fiscal years.

"(B) In addition, there are authorized to be appropriated for such purpose such additional sums as may be necessary for each of the fiscal years 1985, 1986, 1987, and 1988. Any amount appropriated pursuant to this subparagraph shall be allocated in accordance with section 110(a)(4).".

(2) Section 100(b)(2) of the Act is amended—

(A) in the first sentence by striking out "and" immediately before "$60,000,000" and by inserting immediately before the period at the end of such sentence ", and such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986"; and

(B) by striking out all of the second sentence.

(3) Section 100(b)(3) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for each of the three" and inserting in lieu thereof "fiscal year 1984, and each of the two".

(b) Section 102(c)(2) of the Act is amended by striking out "beyond any reasonable doubt".

(c) Section 110(a) of the Act is amended—

(1) by striking out "section 100(b)(1)" each place it appears in paragraphs (2) and (3) and inserting in lieu thereof "section 100(b)(1)(A)"; and

(2) by inserting after paragraph (3) the following new paragraph:

"(4) For each fiscal year beginning on or after October 1, 1984, for which any amount is appropriated pursuant to section

100(b)(1)(B), each State shall receive an allocation (from such appropriated amount) in addition to the allotment to which such State is entitled under paragraphs (2) and (3) of this subsection. Such additional allocation shall be an amount which bears the same ratio to the amount so appropriated as that State's allotment under paragraphs (2) and (3) of this subsection bears to the sum of such allotments of all the States.".

(d) Section 112(a) of the Act is amended by inserting "and no less than $3,500,000 for fiscal year 1984 and each of the two succeeding fiscal years," after "fiscal years,".

(e) Section 121(b) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR AND REVISIONS IN RESEARCH AND TRAINING

SEC. 103. (a) Section 201(a)(1) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for each of the three succeeding fiscal years" and inserting in lieu thereof "fiscal year 1984, and for each of the two succeeding fiscal years".

(b) Section 201(a)(2) of the Act is amended by striking out "$50,000,000" and all that follows through the end of such paragraph and inserting in lieu thereof "such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

(c) Section 204(b)(1) of the Act is amended by inserting at the end thereof the following:

"Rehabilitation Research and Training Centers shall include both comprehensive centers dealing with multiple disabilities and centers focused on particular disabilities. Centers need not be automatically terminated at the end of a project period and may be renewed on the basis of a thorough evaluation and peer review including site visits. Training of students preparing to be rehabilitation personnel through centers shall be an important priority and grants shall not be prohibited from including faculty support for teaching of credit and other courses offered by the institutions of higher education affiliated with the center.".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR AND REVISIONS IN SUPPLEMENTARY SERVICES AND FACILITIES

SEC. 104. (a) Section 301(a) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986" and by striking "1983" and inserting in lieu thereof "1987".

(b) Section 302(a) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

(c)(1) Sections 304(a) and 304(c) of the Act are amended by inserting "qualified" immediately before "personnel" where it first appears in each such subsection.

(2) Section 304(b) of the Act is amended by striking out "will be" and all that follows through "institutions, to" and inserting in lieu thereof "shall be targeted on areas of personnel shortage which may".

(3) Section 304(c) of the Act is amended by inserting at the end thereof the following: "The Commissioner shall submit annually (together with the budget submission for the forthcoming year for the Rehabilitation Services Administration) a report indicating and justifying in detail how the current year's training funds are allocated by professional discipline and other program areas. The report shall also identify specifically the Commissioner's shortage findings, how funds proposed for the succeeding year would be allocated under the President's budget proposal, and what findings of shortage of personnel justify such allocations.".

(4) Section 304 of the Act is amended by redesignating the second subsection (d) as subsection (e).

(5) Section 304(e) of the Act (as so redesignated) is amended—

(A) by striking out in the first sentence "$34,000,000" and all that follows through the end of such sentence, and inserting in lieu thereof "such sums as may be necessary for fiscal years 1984, 1985, and 1986."; and

(B) by striking out the second sentence.

(d) Section 305(g) of the Act is amended by striking out "the fiscal year ending September 30, 1979, and for the three succeeding fiscal years" and inserting in lieu thereof "fiscal year 1984, and for the two succeeding fiscal years".

(e) Section 310(a) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

NATIONAL COUNCIL ON THE HANDICAPPED

SEC. 105. (a)(1) Section 400(a) of the Act is amended by striking out "with the Department of Health, Education, and Welfare" and inserting in lieu thereof "within the Federal Government".

(2)(A) On the effective date of the Rehabilitation Act Amendments of 1983, the National Council on the Handicapped shall be an independent agency within the executive branch and shall not be an agency within the Department of Education or any other department or agency of the United States.

(B) There are transferred to the Chairman of the National Council on the Handicapped all functions relating to the Council which were vested in the Secretary of Education on the day before the date of enactment of this Act. The Chairman of the National Council on the Handicapped shall continue to exercise all the functions under the Rehabilitation Act of 1973 or any other law or authority which the Chairman was performing before the date of the enactment of this Act.

(C) References in any statute, reorganization plan, Executive order, regulation, or other official document or proceeding to the Department of Education or the Secretary of Education with respect to functions or activities relating to the National Council on the Handicapped shall be deemed to refer to the National Council on the Handicapped or the Chairman of the National Council on the Handicapped, respectively.

(b) Section 401 of the Act is amended by—

(1) striking out "and" at the end of paragraph (5);

(2) striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and"; and

(3) inserting after paragraph (6) the following new paragraph:

"(7) provide to the Congress, on a continuing basis, such advice, recommendations, and additional information as are considered appropriate by the Council or the Congress.".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

SEC. 106. Section 502(i) of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR EMPLOYMENT OPPORTUNITIES FOR HANDICAPPED INDIVIDUALS

SEC. 107. (a) Section 617 of the Act is amended by striking out "$35,000,000" and all that follows through the end of such section and inserting in lieu thereof "such sums as may be necessary for each of the fiscal years 1984, 1985, and 1986.".

(b) Section 621(a)(1) of the Act is amended by inserting ", designated State units," after "individual employers".

(c) Section 623 of the Act is amended by striking out "1982" and inserting in lieu thereof "1986".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS FOR COMPREHENSIVE SERVICES FOR INDEPENDENT LIVING

SEC. 108. Section 731 of part E of the Act is amended—

(1) in subsection (a) by striking out "$80,000,000" and all that follows through the end of such subsection, and inserting in lieu thereof "such sums as may be necessary for fiscal years 1984, 1985, and 1986"; and

(2) in subsection (c)(1) by striking out "the fiscal year ending September 30, 1979," and all that follows through the end of paragraph (1), and inserting in lieu thereof "fiscal years 1984, 1985, and 1986.".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 109. (a) Section 612(b) of the Act is amended by striking out "Comprehensive Employment and Training Act of 1973" and inserting in lieu thereof "Job Training Partnership Act".

(b) Section 204(b)(3) of the Act is amended by striking out "303(b)" and inserting in lieu thereof "311".

(c) Section 731 of part E of the Act is amended by redesignating such section as section 741.

EFFECTIVE DATE

SEC. 110. This title shall take effect October 1, 1983.

TITLE II—REAUTHORIZATION OF THE HELEN KELLER NATIONAL CENTER FOR DEAF-BLIND YOUTHS AND ADULTS

SHORT TITLE

SEC. 201. This title may be cited as the "Helen Keller National Center Act".

CONGRESSIONAL FINDINGS

SEC. 202. The Congress finds that—

(1) deaf-blindness is among the most severe of all forms of disabilities, and there is a great and continuing need for services and training to help deaf-blind individuals attain the highest possible level of development;

(2) due to the rubella epidemic of the 1960's and recent advances in medical technology that have sustained the lives of many severely disabled individuals, including deaf-blind individuals, who might not otherwise have survived, the need for services for deaf-blind individuals is even more pressing now than in the past;

(3) helping deaf-blind individuals to become self-sufficient, independent, and employable by providing the services and training necessary to accomplish that end will benefit the Nation, both economically and socially;

(4) the Helen Keller National Center for Deaf-Blind Youths and Adults is a vital national resource for meeting the needs of deaf-blind individuals and no State currently has the facilities or personnel to meet such needs;

(5) the Federal Government has invested approximately $10,000,000 in capital, equipment, and operating funds for such Center since it was established; and

(6) it is in the national interest to continue to provide support for the Center, and it is a proper function of the Federal Govern-

ment to be the primary source of such support.

AUTHORIZATION FOR THE CONTINUED OPERATION OF THE HELEN KELLER NATIONAL CENTER FOR DEAF-BLIND YOUTHS AND ADULTS; REPEAL OF PRIOR AUTHORIZATION

SEC. 203. (a) Section 313 of the Rehabilitation Act of 1973 (29 U.S.C. 777c) is repealed.

(b) The Secretary of Education shall continue to administer and support the Helen Keller National Center for Deaf-Blind Youths and Adults in the same manner as such Center was administered pursuant to section 313 of the Rehabilitation Act of 1973, to the extent such manner of administration is not inconsistent with any purpose described in subsection (c) or any other requirement of this title.

(c) The purposes of the Center are as follows:

(1) To provide specialized intensive services, or any other services, at the Center or anywhere else in the United States, which are necessary to encourage the maximum personal development of any deaf-blind individual.

(2) To train professionals and allied personnel at the Center or anywhere else in the United States to provide services to deaf-blind individuals.

(3) To conduct applied research, development programs, and demonstrations with respect to communication techniques, teaching methods, aids and devices, and delivery of services.

AUDIT; MONITORING AND EVALUATION

SEC. 204. (a) The books and accounts of the Center shall be audited annually by an independent auditor in the manner prescribed by the Secretary and a report on each such audit shall be submitted by the auditor to the Secretary at such time as the Secretary shall prescribe.

(b)(1) The Secretary shall establish procedures for monitoring, on a regular basis, the services performed and the training conducted by the Center.

(2) The Secretary shall, in addition to the regular monitoring required under paragraph (1), conduct an evaluation of the operation of the Center at the end of each fiscal year. A written report of such evaluation shall be submitted to the President, the Clerk of the House of Representatives, and the Secretary of the Senate within one hundred and eighty days after the end of the fiscal year for which such evaluation was conducted. The first such report shall be submitted for fiscal year 1983.

AUTHORIZATION OF APPROPRIATIONS

SEC. 205. (a) There are authorized to be appropriated such sums as may be necessary to carry out the purpose of this title for fiscal year 1984 and each of the four subsequent fiscal years. Such sums shall remain available until expended.

(b) Any appropriation Act containing any appropriation authorized by subsection (a) shall contain a statement of the specific amount being made available to the Center.

DEFINITIONS

SEC. 206. For purposes of this title—

(1) the terms "Helen Keller National Center for Deaf-Blind Youths and Adults" and "Center" mean the Helen Keller National Center for Deaf-Blind Youths and Adults, and its affiliated network, operated pursuant to section 313 of the Rehabilitation Act of 1973 and continued under this title;

(2) the term "deaf-blind individual" means an individual—

(A) who has a central visual acuity of 20/200 or less in the better eye with corrective lenses, or central acuity of 20/200 if there is a field defect such that the peripheral diameter of visual field subtends an angular distance no greater than 20 degrees,

(B) who has a chronic hearing impairment so severe that most speech cannot be understood with optimum amplification, and

(C) for whom the combination of the impairments described in subparagraphs (A) and (B) causes extreme difficulty in attaining independence in daily life activities, achieving psychosocial adjustment, or obtaining a vocation,

and such term includes any other meaning the Secretary may prescribe by regulation; and

(3) the term "Secretary" means the Secretary of Education.

CONSTRUCTION OF ACT; EFFECT ON AGREEMENTS

SEC. 207. This title shall not be construed as modifying or affecting any agreement between the Department of Education or any other department or agency of the United States and the Industrial Home for the Blind, Incorporated, or any successor to or assignee of such corporation, with respect to the Center.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 208. (a) The table of contents of the Rehabilitation Act of 1973 is amended by striking out "Sec. 313. Helen Keller National Center.".

(b) Section 310(a) of the Rehabilitation Act of 1973 is amended by striking out "(other than section 313),".

TITLE III—NATIONAL COMMISSION ON FEDERAL ASSISTANCE TO DISABLED AMERICANS

SHORT TITLE

SEC. 301. This title may be cited as the "National Commission on Federal Assistance to Disabled Americans Act".

FINDINGS

SEC. 302. The Congress finds that—

(1) an extensive Federal investment is made in disabled Americans through entitlement and discretionary programs;

(2) given the increased emphasis on community-based services, on fuller integration in schools and the workplace, and on greater independence and the reaffirmation of the right to dignity of disabled Americans, Federal programs which assist disabled Americans must be targeted in an appropriate and coordinated manner to complement this emphasis;

(3) Federal programs that assist the disabled have overlapping, contradictory, unique, and sometimes restrictive requirements that prevent coordination of, limit access to, and constrain the potential of such programs;

(4) before the Congress can consider statutory options which, to the extent appropriate, redirect the emphasis of programs and remove barriers to the individual and collective effectiveness of programs, a careful and comprehensive review of the issues must be made; and

(5) a national commission is needed to review and debate the issues and then make recommendations to the President and Congress regarding necessary statutory revisions in existing Federal legislation which assists disabled Americans.

PURPOSE

SEC. 303. It is the purpose of this title to establish a select commission—

(1) to examine Federal legislation which helps disabled Americans through education, income support, rehabilitation, training, medical assistance, housing, transportation, and food acquisition programs;

(2) to focus national attention on the need to identify and remove unwarranted barriers to the effectiveness of such programs given the national emphasis on community based services for and the integration and independence of disabled Americans; and

(3) to provide Congress and the President with specific statutory recommendations for improving current legislation.

ESTABLISHMENT

SEC. 304. There is established a select commission to be known as the National Commission on Federal Assistance to Disabled Americans (hereinafter in this title referred to as the "Commission").

DUTIES

SEC. 305. The Commission shall—

(1) review all statutes pertaining to Federal programs which assist disabled Americans;

(2) make a priority listing of such programs based on the number of disabled Americans they assist and the Federal costs on such programs;

(3) assess the extent to which such programs provide incentives or disincentives to the establishment of community-based services for disabled Americans, promote the full integration of such individuals in the community, in schools, and in the workplace, and contribute to the independence and dignity of such individuals; and

(4) recommend to the President and the Congress legislative mechanisms for increasing incentives and eliminating disincentives in Federal programs assisting disabled Americans.

REPORTING

SEC. 306. The Commission shall—

(1) submit to the Congress and the President an interim report of its recommendations within twelve months of its first meeting; and

(2) submit to the Congress and the President a final report of its recommendations not later than eighteen months after its first meeting.

MEMBERSHIP

SEC. 307. (a) The Commission shall be composed of sixteen members as follows:

(1) one member appointed by the Secretary of Education;

(2) one member appointed by the Secretary of Health and Human Services;

(3) one member appointed by the Secretary of Labor;

(4) one member appointed by the Secretary of Transportation;

(5) one member appointed by the Attorney General;

(6) one member appointed by the Secretary of Agriculture;

(7) one member appointed by the Secretary of Housing and Urban Development;

(8) one member appointed by the chairman of the Committee on Finance of the Senate;

(9) one member appointed by the ranking minority member of the Committee on Finance of the Senate;

(10) one member appointed by the chairman of the Committee on Labor and Human Resources of the Senate;

(11) one member appointed by the ranking minority member of the Committee on Labor and Human Resources of the Senate;

(12) one member appointed by the chairman of the Committee on Education and Labor of the House of Representatives;

(13) one member appointed by the ranking minority member of the Committee on Education and Labor of the House of Representatives;

(14) one member appointed by the chairman of the Committee on Ways and Means of the House of Representatives;

(15) one member appointed by the ranking minority member of the Committee on Ways and Means of the House of Representatives; and

(16) the Chairman of the National Council on the Handicapped (or a delegate).

(b) Members shall be selected for appointment based on their knowledge of or direct experience with Federal programs which assist disabled Americans.

(c) Members of the Commission shall be appointed for the life of the Commission.

(d) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(e)(1) Except as provided in paragraph (2), members of the Commission shall each be paid at a rate equal to the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including traveltime) during which they are engaged in the actual performance of duties of the Commission.

(2) Members of the Commission who are officers or employees of the United States or Members of Congress shall receive no additional pay, allowances, or benefits by reason of their service on the Commission.

(f) The Chairman of the National Council on the Handicapped shall act as chairman until the first meeting of the Commission when the Commission shall elect a chairman from among the members.

(g) Members shall be appointed within ninety days after the date of enactment of this title.

(h) The first meeting of the Commission shall be held not later than one hundred and twenty days after the date of enactment of this title. The Commission shall meet as often as is necessary to carry out its duties under this title. The date and time of all meetings of the Commission shall be at the call of the chairman or a majority of its members.

EXECUTIVE DIRECTOR AND STAFF

SEC. 308. (a) The Commission shall have an executive director who shall be appointed by the chairman of the Commission and who shall be paid at a rate not to exceed the maximum rate of basic pay payable for grade GS-18 of the General Schedule.

(b) Subject to such rules as may be prescribed by the Commission, the chairman of the Commission may appoint and fix the pay, at a rate not to exceed the maximum rate of basic pay payable for grade GS-18 of the General Schedule, of such additional personnel as the chairman considers appropriate.

(c) The executive director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay payable for grade GS-18 of the General Schedule.

(d) Subject to such rules as may be prescribed by the Commission, the chairman of the Commission may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay payable for grade GS-18 of the General Schedule.

(e) Upon request of the Commission, the head of any department or agency of the United States is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out this title.

POWERS

SEC. 309. (a) The Commission may, for the purpose of carrying out this title, hold such hearings and conferences, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(b) Any member or agency of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this title. Upon request of the chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(d) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

TERMINATION

SEC. 310. The Commission shall cease to exist ninety days after its final report is transmitted to the President and Congress.

AUTHORIZATION OF APPROPRIATIONS

SEC. 311. There is authorized to be appropriated such sums as may be necessary to carry out this title. Any sums appropriated under the authorization contained in this section shall remain available until expended.

EFFECTIVE DATE

SEC. 312. This title shall take effect October 1, 1983.

TITLE IV—OTHER AUTHORIZATIONS

MODIFICATION OF CERTAIN RECONCILIATION ACT LIMITS

SEC. 401. (a) Subject to subsections (b) and (c), there are authorized to be appropriated for fiscal year 1984 for programs under the jurisdiction of the Committee on Education and Labor such funding levels as are assumed under the first budget resolution (H. Con. Res. 91, as it passed the House on March 23, 1983) for fiscal year 1984.

(b) The authorizations of appropriation established under subsection (a) of this section supersede, and are not in addition to, the authorizations of appropriations (or the limitations thereon) established under the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35), but the authorizations of appropriations established under subsection (a) do not supersede (and are not in addition to) any authorization of appropriations enacted after the date of enactment of the Omnibus Budget Reconciliation Act of 1981.

(c) For the purposes of subsection (a), the programs under the jurisdiction of the Committee on Education and Labor for which funding levels are assumed, and the levels which are so assumed, in the first budget resolution for fiscal year 1984, shall be deemed to be the following:

(1) The compensatory education program under chapter 1 of the Education Consolidation and Improvement Act of 1981, $3,830,000,000.

(2) The impact aid program under the Act of September 23, 1950 (Public Law 815, 81st Congress), and the Act of September 30, 1950 (Public Law 874, 81st Congress), $505,000,000.

(3) The vocational education program under the Vocational Education Act of 1963, $825,000,000.

(4) The adult education program under the Adult Education Act, $112,000,000.

(5) The arts and humanities programs under the National Foundation on the Arts and Humanities Act of 1965, $273, 900,000.

(6) The museum services programs under the Museum Services Act, $10,800,000.

(7) The community services program under the Community Services Block Grant Act, $398,000,000.

(8) (A) The low-income energy assistance program under the Low-Income Home Energy Assistance Act of 1981, $2,250,000, except that for the fiscal year 1984, 25 percent of a State's allotment percentage shall be the percentage of the total amount authorized to be appropriated under such Act which a State is eligible to receive for such year based on the low-income home energy costs in such State during the fiscal year 1983.

(B) For purposes of this paragraph—

(i) the term "low-income home energy costs" means the total amount of expenditures for home energy by low-income households, and

(ii) the term "low-income households" means households with incomes which do not exceed an amount equal to 125 percent of the official poverty line which is applicable to the State in which such household is located.

(C) The Secretary (after consultation with the Secretary of Energy) shall compile information as necessary to compute allotment percentages under subparagraph (A) and shall compute such percentages.

(9) The special supplemental food program for women, infants, and children under section 17 of the Child Nutrition Act of 1966, $1,360,000,000.

EDUCATION OF THE HANDICAPPED ACT

SEC. 402. Notwithstanding any other provision of law, there are authorized to be appropriated $1,500,000,000 to carry out the education of the handicapped programs under the Education of the Handicapped Act.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF ACT

SEC. 403. Notwithstanding any other provision of law, there are authorized to be appropriated $28,000,000 for fiscal year 1984 to carry out the National Technical Institute for the Deaf Act.

TITLE V—SPECIAL IMPACT AID FOR IMMIGRANT CHILDREN EDUCATION

SHORT TITLE

SEC. 501. This title may be cited as the "Emergency Immigrant Education Act of 1983".

DEFINITIONS

SEC. 502. As used in this title—

(1) The term "immigrant children" means children who were not born in a State and who have been attending schools in any one

or more States for less than three complete academic years.

(2) The terms "elementary school", "local educational agency", "secondary school", "State", and "State educational agency" have the meanings given such terms under section 198(a) of the Elementary and Secondary Education Act of 1965.

(3) The term "elementary or secondary nonpublic schools" means schools which comply with the applicable compulsory attendance laws of the State and which are exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954.

(4) The term "Secretary" means the Secretary of Education.

AUTHORIZATIONS AND ALLOCATION OF APPROPRIATIONS

SEC. 503. (a) There are authorized to be appropriated for each of the fiscal years 1984, 1985, and 1986, such sums as may be necessary to make payments to which State educational agencies are entitled under this title and payments for administration under section 504.

(b)(1) If the sums appropriated for any fiscal year to make payments to States under this title are not sufficient to pay in full the sum of the amounts which State educational agencies are entitled to receive under this title for such year, the allocations to State educational agencies shall be ratably reduced to the extent necessary to bring the aggregate of such allocations within the limits of the amounts so appropriated.

(2) In the event that funds become available for making payments under this title for any period after allocations have been made under paragraph (1) of this subsection for such period, the amounts reduced under such paragraph shall be increased on the same basis as they were reduced.

STATE ADMINISTRATIVE COSTS

SEC. 504. The Secretary is authorized to pay to each State educational agency amounts equal to the amounts expended by it for the proper and efficient administration of its functions under this title, except that the total of such payments for any period shall not exceed 1.5 per centum of the amounts which that State educational agency is entitled to receive for that period under this title.

WITHHOLDING

SEC. 505. Whenever the Secretary, after reasonable notice and opportunity for a hearing to any State educational agency, finds that there is failure to meet the requirements of any provision of this title, the Secretary shall notify that agency that further payments will not be made to the agency under such title, or in the discretion of the Secretary, that the State educational agency shall not make further payments under such title to specified local educational agencies whose actions cause or are involved in such failure until the Secretary is satisfied that there is no longer any such failure to comply. Until the Secretary is so satisfied, no further payments shall be made to the State educational agency under such title, or payments by the State educational agency under such title shall be limited to local educational agencies whose actions did not cause or were not involved in the failure, as the case may be.

STATE ENTITLEMENTS

SEC. 506. (a) The Secretary shall, in accordance with the provisions of this section, make payments to State educational agencies for each of the fiscal years 1984, 1985, and 1986 for the purpose set forth in section 507.

(b)(1) Except as provided in paragraph (3) and in subsections (c) and (d) of this section, the amount of the grant to which a State educational agency is entitled under this title shall be equal to the product of (A) the number of immigrant children enrolled during such fiscal year in elementary and secondary public schools under the jurisdiction of each local educational agency described under paragraph (2) within that State, and in any elementary or secondary nonpublic school within the district served by each such local educational agency, multiplied by (B) $500.

(2) The local educational agencies referred to in paragraph (1) are those local educational agencies in which the sum of the number of immigrant children who are enrolled in elementary or secondary public schools under the jurisdiction of such agencies, and in elementary or secondary nonpublic schools within the districts served by such agencies, during the fiscal year for which the payments are to be made under this title, is equal to—

(A) at least 500; or

(B) at least 5 per centum of the total number of students enrolled in such public or nonpublic schools during such fiscal year;

whichever number is less.

(3)(A) The amount of the grant of any State educational agency for any fiscal year as determined under paragraph (1) shall be reduced by the amounts made available for such fiscal year under any other Federal law for expenditure within the State for the same purpose as those for which funds are available under this title, but such reduction shall be made only to the extent that (i) such amounts are made available for such purposes specifically because of the refugee, parollee, asylee, or other immigrant status of the individuals served by such funds, and (ii) such amounts are made available to provide assistance to individuals eligible for services under this title.

(B) No reduction of a grant under this title shall be made under subparagraph (A) for any fiscal year if a reduction is made, pursuant to a comparable provision in any such other Federal law, in the amount made available for expenditure in the State for such fiscal year under such other Federal law, based on the amount assumed to be available under this title.

(c)(1) Determinations by the Secretary under this section for any period with respect to the number of immigrant children shall be made on the basis of data or estimates provided to the Secretary by each State educational agency, unless the Secretary determines, after notice anbd opportunity for a hearing to the affected State-educational agency, that such data or estimates are clearly erroneous.

(2) No such determination with respect to the number of immigrant children shall operate because of an underestimate or overestimate to deprive any State educational agency of its entitlement to any payment (or the amount thereof) under this section to which such agency would be entitled had such determination been made on the basis of accurate data.

(d) Whenever the Secretary determines that any amount of a payment made to a State under this title for a fiscal year will not be used by such State for carrying out the purpose for which the payment was made, the Secretary shall make such amount available for carrying out such purpose to one or more other States to the extent the Secretary determines that such other States will be able to use such additional amount for carrying out such purpose. Any amount made available to a State from an appropriation for a fiscal year in accordance with the preceding sentence shall, for purposes of this title, be regarded as part of such State's payment (as determined under subsection (b)) for such year, but shall remain available until the end of the succeeding fiscal year.

USES OF FUNDS

SEC. 507. (a) Payments made under this title to any State may be used in accordance with applications approved under section 508 for supplementary educational services and costs, as described under subsection (b) of this section, for immigrant children enrolled in the elementary and secondary public schools under the jurisdiction of the local educational agencies of the State described in section 506(b)(2) and in elementary and secondary nonpublic schools of that State within the districts served by such agencies.

(b) Financial assistance provided under this title shall be available to meet the costs of providing immigrant children supplementary educational services, including but not limited to—

(1) supplementary educational services necessary to enable those children to achieve a satisfactory level of performance, including—

(A) English language instruction;

(B) other bilingual educational services; and

(C) special materials and supplies;

(2) additional basic instructional services which are directly attributable to the presence in the school district of immigrant children, including the costs of providing additional classroom supplies, overhead costs, costs of construction, acquisition or rental of space, costs of transportation, or such other costs as are directly attributable to such additional basic instructional services, and

(3) essential inservice training for personnel who will be providing instruction described in either paragraph (1) or (2) of this subsection.

APPLICATIONS

SEC. 508. (a) No State educational agency shall be entitled to any payment under this title for any period unless that agency submits an application to the Secretary at such time, in such manner, and containing or accompanied by such information, as the Secretary may reasonably require. Each such application shall—

(1) provide that the educational programs, services, and activities for which payments under this title are made will be administered by or under the supervision of the agency;

(2) provide assurances that payments under this title will be used for purposes set forth in section 507;

(3) provide assurances that such payments will be distributed among local educational agencies within that State on the basis of the number of children counted with respect to such local educational agency under section 506(b)(1), adjusted to reflect any reductions imposed pursuant to section 506(b)(3) which are attributable such local educational agency;

(4) provide assurances that the State educational agency will not finally disapprove in whole or in part any application for funds received under this title without first af-

fording the local educational agency submitting an application for such funds reasonable notice and opportunity for a hearing;

(5) provide for making such reports as the Secretary may reasonably require to perform his functions under this title; and

(6) provide assurances—

(A) that to the extent consistent with the number of immigrant children enrolled in the elementary or secondary nonpublic schools within the district served by a local educational agency, such agency, after consultation with appropriate officials of such schools, shall provide for the benefit of these children secular, neutral, and nonideological services, materials, and equipment necessary for the education of such children;

(B) that the control of funds provided under this title and the title to any materials, equipment, and property repaired, remodeled, or constructed with those funds shall be in a public agency for the uses and purposes provided in this title, and a public agency shall administer such funds and property; and

(C) that the provision of services pursuant to this paragraph shall be provided by employees of a public agency or through contract by such public agency with a person, association, agency, or corporation who or which, in the provision of such services, is independent of such elementary or secondary nonpublic school and of any religious organization; and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this paragraph shall not be commingled with State or local funds.

(b) The Secretary shall approve an application which meets the requirements of subsection (a). The Secretary shall not finally disapprove an application of a State educational agency except after reasonable notice and opportunity for a hearing on the record to such agency.

PAYMENTS

SEC. 509. (a) Except as provided in section 503(b), the Secretary shall pay to each State educational agency having an application approved under section 508 the amount which that State is entitled to receive under this title.

(b) If by reason of any provision of law a local educational agency is prohibited from providing educational services for children enrolled in elementary and secondary nonpublic schools, as required by section 508(a)(6), or if the Secretary determines that a local educational agency has substantially failed or is unwilling to provide for the participation on an equitable basis of children enrolled in such schools, the Secretary may waive such requirement and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of the title. Such waivers shall be subject to consultation, withholding, notice, and judicial review requirements in accordance with section 557(b) (3) and (4) of the Education Consolidation and Improvement Act of 1981.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "An act to extend and improve the Rehabilitation Act of 1973, to provide for the operation of the Helen Keller National Center for Deaf-Blind Youths and Adults, to create a select commission on Federal assistance to disabled Americans, and to increase certain authorizations of appropriations for programs within the jurisdiction of the Committee on Education and Labor."

A motion to reconsider was laid on the table. A similar House bill (H.R. 3520) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 1340

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the House insist upon its amendments to the Senate bill S. 1340 and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. BARTLETT. Mr. Speaker, reserving the right to object, the amendment that the House would be insisting on would be which amendment?

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. BARTLETT. I yield to the chairman.

Mr. PERKINS. The bill that we just passed today.

Mr. BARTLETT. Is that including that the House conferees will be required to insist upon all of the bill that we just passed?

Mr. PERKINS. Yes, that is correct.

Mr. BARTLETT. Would that include title IV?

Mr. PERKINS. The usual conference.

Mr. BARTLETT. Further reserving the right to object, Mr. Speaker, would it not be in order for us to go to conference and to begin the elaborate conference that that bill is going to require and then come back to this House with the report at some future time?

Mr. PERKINS. Let me say that when we go to conference, any conferee can vote his convictions. We are not tying the hands of any of the conferees here today. We are just going to conference on the bill that we just passed here this afternoon.

Mr. BARTLETT. Further reserving the right to object, is the gentleman's request, then, to instruct or tie the hands of the conferees?

Mr. PERKINS. No instruction, no indeed.

Mr. BARTLETT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky? The Chair hears none and, without objection, appoints the following conferees: Messrs. PERKINS, FORD of Michigan, BIAGGI, ANDREWS of North Carolina, SIMON, MILLER of California, MURPHY, CORRADA, WILLIAMS of Montana, KOGOVSEK, ERLENBORN, BARTLETT, GOODLING, GUNDERSON, and COLEMAN of Missouri.

There was no objection.

PERSONAL EXPLANATION

Mr. GILMAN. Mr. Speaker, I was unable to respond to the motion on approving the Journal earlier today. Had I been present, I would have voted "yea" on rollcall No. 328.

PERMISSION FOR SUBCOMMITTEE ON MERCHANT MARINE OF COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT ON WEDNESDAY, SEPTEMBER 14, 1983

Mr. BIAGGI. Mr. Speaker, I ask unanimous consent that the Subcommittee on Merchant Marine of the Committee on Merchant Marine and Fisheries be permitted to sit at 10 a.m. on Wednesday, September 14, 1983, for the purpose of marking up two bills:

H.R. 2353—A bill to amend the Deepwater Port Act of 1974 and for other purposes; and

H.R. 2883—A bill to admit certain passenger vessels to the coastwise trade (Cunard Princess and Cunard Countess).

The ranking minority member of the committee, the gentleman from New Jersey (Mr. FORSYTHE) and the ranking minority member of the subcommittee, the gentleman from Kentucky (Mr. SNYDER) have been apprised of the markup date and time and are in accord with this request.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Committee on Public Works and Tranpsortation; which was read, and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington, D.C., August 5, 1983.

Hon. THOMAS P. O'NEILL,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee On Public Works and Transportation approved a project for the Department of Commerce, National Oceanic and Atmospheric Administration, on August 3, 1983.

The original and one copy of the authorizing resolution is enclosed

Every best wish.

Sincerely,

JAMES J. HOWARD, *Chairman.*

GENERAL LEAVE

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, I did not hear the request.

The SPEAKER pro tempore. The gentleman from Kentucky will repeat his request.

Mr. PERKINS. I ask unanimous consent that all Members who may desire to do so may have 5 legislative days in which to extend and revise their remarks on the bill just passed, H.R. 3520.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

□ 1840

NATIONAL HISPANIC HERITAGE WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Mexico (Mr. RICHARDSON) is recognized for 60 minutes.

Mr. RICHARDSON. Mr. Speaker, for the past 15 years we have celebrated the third week in September as National Hispanic Heritage Week. In recognition of the importance of this date and in honor of the celebration of National Hispanic Heritage Week, I have called for today's special order on the floor of the House to give all Members of Congress an opportunity to reflect on the important contributions the Hispanic community has made to the history, culture, and development of this country.

I yield to the distinguished gentleman from Texas (Mr. KAZEN.)

Mr. KAZEN. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, it is an honor and a pleasure for me to participate on this important occasion of honoring our Nation's Hispanic community and underscoring the inportance of the many contributions Hispanics have made to our country.

I commend my colleagues of the Congressional Hispanic Caucus for their leadership during National Hispanic Heritage Week. In particular, I appreciate their tireless work in cooperation with the Census and Population Subcommittee during hearings this week which will bring a great number of important issues clearly into focus.

I would urge all of my colleagues to take a long, hard look at these issues involving Hispanics, because I assure you they can no longer be ignored. Hispanics have always been a vital part of our Nation, and they are now recognized as a powerful force in determining its future direction.

Working within the system as patriotic Americans, Hispanics have achieved excellence and influence in all areas of endeavor. They continue a tradition of doing whatever is necessary at the call of this Nation, and they ask for nothing more than an even break. Unfortunately, all too often they are not getting that even break.

When I asked for assistance in fighting unemployment in the area of highest unemployment in the Nation, I was speaking primarily of Hispanic unemployment on the Texas-Mexican border.

When I have asked for emergency help in responding to the effects of the peso devaluation on our border, I have been speaking in large measure of help to Hispanics and Hispanic small business people, who have for a year now seen their ranks dwindle as economic conditions close door after door forever.

The people of Laredo and Eagle Pass and San Antonio and Uvalde consider their jobs and their businesses just as important as those in New York and Detroit, but they look at the response from the Federal Government and begin to wonder if their Government agrees.

Hispanics across the Nation appear to be disproportionately affected by economic problems, and this situation will remain a troubling issue until it is dealt with openly and honestly.

So, I appreciate the opportunity given by the National Hispanic Heritage Week to emphasize that these problems still exist, and that it is time to address them.

I am also pleased to have the opportunity to salute the Hispanic Heritage and all that it means to our country. We are talking of hard-working, family-oriented Americans.

I come from a congressional district made up of over 50 percent Mexican-Americans. They are in the mainstream of American life—business, education, culture, politics, and across the entire spectrum of the life of the community. The vast majority of my mayors, councilmen, school board members, judges, sheriffs and other officeholders are able and efficient persons of Mexican-American descent.

I was born in the barrio, and Spanish was my first language. I feel that I know these proud people as well as anyone here, and I can tell you that they will never ask for anything more than an opportunity to contribute on an equal basis with everyone else.

Throughout my career as a legislator on the State and Federal level, I have worked to achieve better educational opportunities and improved vocational training in order that these fine people will not forever be disadvantaged in competing in a complex society.

In time of war, they have conducted themselves as patriotic Americans, and many are on the rolls of those who went far beyond the call of duty in our defense. Men like Cleto Rodriguez, Lucian Adams, Marcario Garcia, Alfredo Gonzalez, and Roy Benavidez are authentic American heroes as recipients of the Congressional Medal of Honor.

Many of our south Texas military personnel did not return from battle, and they are honored through our memories. Others who sacrificed and survived their ordeal should be given the opportunity not only to help themselves, but to help this Nation.

Those who were willing to die—but who through the grace of God were spared—should have the right and the opportunity to live as first-class Americans for in this country there should be no second-class citizens. That is all we are talking about—an opportunity that is their birthright.

Mexican Americans are assuming important roles of leadership in politics, business, science, and the arts, and they along with the rest of the country are beginning to recognize the vast potential of Hispanics in a free country.

All of us have profited from this heritage that we salute this week and there is no question in my mind that much greater achievements and even more valuable contributions are on the horizon.

□ 1850

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman from Texas (Mr. DE LA GARZA), the distinguished chairman of the Committee on Agriculture, who for many years has been a leader on Hispanic issues in this country.

Mr. DE LA GARZA. Mr. Speaker, I appreciate my colleague yielding, and I would like to join my colleagues who have spoken and those who will speak for the purpose of making just a very few remarks concerning Hispanic Heritage Week.

Mr. Speaker, in this great country of ours, a nation of immigrants, every individual who came made an imprint, from whichever corner of the world he or she came. Collectively, specific groups have impacted upon our noble history. One of these groups is the one called Hispanic.

In the beginning, when the New World was discovered, it was the Spaniard who came across the vast oceans to explore, to settle, and to bring the faith in the name of the Kingdom of Spain. As they then settled through-

out this hemisphere and in other parts of the world, the mixture of the Spaniard and the indigenous population has now evolved into what we call the Hispanic.

In 1493, just a year after Columbus discovered this vast New World, the Queen of Spain sent the first seeds of wheat, rice, vines, citrus fruits, as well as cattle, sheep, goats, horses, and fowl to the New World. I have for many years, and now that I have the privilege of being the chairman of the Committee on Agriculture, reminded our group and all of us that we have this vast agricultural productivity in this country, and it is well that we know that it was the original Spaniards who first began the process in this country of ours.

So from then until now our Nation has profited from our contributions, and it is well that periodically we should stop and take a look at these contributions. This is the purpose of Hispanic Heritage Week. I will leave it to other of my colleagues to more fully discuss our contributions, but as for this intervention of mine, I would only like to say that I am proud to belong to a group which, along with many other groups, has contributed to bringing us to the stage where we are now, the greatest Nation in the world, composed of immigrants, ours being one group, if not the first, to reach the shores of this now great Nation of ours.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. RICHARDSON. I yield to the distinguished gentleman from Texas (Mr. PATMAN).

Mr. PATMAN. I thank the gentleman for yielding.

Mr. Speaker, it is a particular pleasure for me to join in the special order honoring the Hispanic community's contributions to our Nation during National Hispanic Heritage Week, because I represent a congressional district which includes some of the earliest and most historic monuments to this heritage.

Just as this nation was coming into being, in fact, Spanish settlers were moving into such areas of south central Texas as Mission Bay, where the mission Our Lady of Refuge was founded in 1793, and to Refugio, where it was reestablished 2 years later. And 50 years before the Declaration of Independence was written, the mission La Bahia del Espiritu Santo was bringing European culture and language to the Indians in the Matagorda Bay area. The importance of these missions in the history of Texas is tremendous. These pioneering efforts in gaining a foothold in the new world are comparable to those of the Pilgrims in New England.

Later, such Mexican impresarios as Martin de Leon settled families on the Guadalupe River; and soon the town of Guadalupe-Victoria was founded—later to become Victoria, the largest city in my district.

Other Hispanics were among the first settlers of the gulf coast of Texas, and they are remembered today in any map of the area. From San Felipe to Brazoria, from Seguin to Palacios, Texas cities and towns reflect the Hispanic origin of these early settlements. They serve as constant reminders of the central role which Hispanics have played in the pioneering, the progress and the prosperity of Texas—a role which continues to enrich our State and our Nation today, and which is certain to grow in influence in the 21st century as it did in the 18th.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. RICHARDSON. I yield to the distinguished chairman of the Congressional Hispanic Caucus, a man who has been a dynamic leader for the caucus in the Congress of the United States, who has given the Hispanic Caucus a sense of commitment, a legislative agenda, visibility, a new face that for many years had been lacking, the gentleman from New York (Mr. GARCIA).

Mr. GARCIA. I thank my colleague from New Mexico, also a member of the Caucus, who has given a great deal of new life to the Congressional Hispanic Caucus in this year 1983.

What I would like to do, with the permission of the gentleman from New Mexico, is to spend a few minutes in describing what the Hispanic community in America is really all about. It is magnificent and wonderful that we this week celebrate the Hispanic Heritage Week, with the annual congressional dinner to be held on Thursday of this week at the Washington Hilton, with the many luncheons for women and other Hispanic groups which will be held here on Capitol Hill tomorrow. The bottom line is that it is all well and good that 1 week a year we celebrate Hispanic heritage; but to those of us who are of Hispanic background, all I can say is that there are another 51 weeks in this year, and I would hope that those same people would understand that the needs of our community are vast and great.

I would like to start with some demographics. In 1970 the population of the Hispanic community in America, according to the Bureau of Census, was 9.1 million; in 1980 it was 14.6 million; and in 1983 the population stands at 15.9 million, which is a substantial increase of close to 7 million people during the course of those 13 years.

The population growth of the various Hispanic ethnic groups is as follows: In the total Hispanic community, our growth has increased by 61 percent from the year 1970 to the year 1980. For those of Mexican-American background, the population has increased by 93 percent; for those of Puerto Rican background, 41 percent; for those of Cuban background, 47 percent; and 19 percent for all those others who fall within the Hispanic category. Coupled with that, there was a decrease in the population other than of Hispanic origin.

Now, where is the Hispanic community today? The State of Texas has approximately 20 percent of the Hispanic population in America; the State of California, 31 percent; Arizona, Colorado, and New Mexico combined, 9 percent; the State of Illinois, 4 percent; the State of Florida, 6 percent; the State of New York, 11 percent; and the remainder of the United States has 18 percent.

The percentage of total population of Hispanics by specific areas: In the year 1970, 4 percent of the United States, according to the census—and every figure I am giving you now is a figure that was provided by the Bureau of the Census—was of Hispanic background. In 1980 it was 6 percent.

□ 1900

In New Mexico, the percentage of Hispanic population in 1970 was 30 percent, and in 1980, 37 percent.

The Hispanic population of Texas was 16 percent in 1970. In 1980, it was 21 percent.

The State of California in 1970 had a Hispanic population of 12 percent. In 1980, a population of 19 percent.

In the State of Arizona, 15 percent of that population was Hispanic in 1970, and 16 percent in 1980.

In the State of Colorado, 10 percent of that population in 1970 was Hispanic, and 12 percent of that population in 1980 was Hispanic.

In Florida in 1970 the Hispanic population was 6 percent, and now, in 1980, 9 percent.

In the State of New York, 7 percent Hispanic in 1970, 9 percent Hispanic in 1980.

The State of Illinois had 4 percent in 1970. It has 6 percent of that State in 1980.

There was an increase of 1 percent throughout the country.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

Mr. Speaker, I appreciate my colleagues pointing out the contribution and importance of Hispanic Heritage Week. Unfortunately, I did not hear the earlier part of your discussions here.

I got into this whole area of the problems and the potential of the Hispanic population back some years ago when I was representing a rural area in southern Illinois in the State legislature and accidentally found myself

as a spokesperson for migrant laborers and started digging in. The next thing I knew, I was involved in taking a look at where we were and where we were going.

There is no question that Hispanics are numerically growing. They are contributing more and more. There is at the same time no question that we are not doing what we can to utilize that potential as a Nation. I mean utilize not in the bad sense of using people, but developing and giving people opportunity.

When we look at the dropout statistic in schools, particularly for the Puerto Rican portion of the Hispanic population, when we look at the numbers that are going on to higher education, the numbers are improving but we have a long way to go, and the sooner all of us work together, Anglos and Hispanics, in moving on these problems, recognizing the potential, the better off we are all going to be and the better off we are going to be as a Nation.

I simply want to join in commending all of you for your leadership here. Any way I can help, I want to help.

Mr. GARCIA. I thank my colleague from Illinois, and I would like to say to my colleague that there has been no finer gentleman and no person on this floor who has fought more for the rights of Hispanics in America than he has, and I am particularly delighted that he took time out of his busy schedule to be with us today because this is a very important week for Hispanics. I want the gentleman to know, on behalf of the Congressional Hispanic Caucus, how much we appreciate all his work over all these years on our behalf.

Mr. SIMON. I thank my colleague.

Mr. GARCIA. Mr. Speaker, I would like now to talk about some statistics as it relates to our age. There is no question that we are the youngest community in America.

From age zero to age 29, 64 percent of all Hispanics fall into that category, and I say that to my colleague from New Mexico so that he would appreciate and understand, as well as those persons who may be with us this evening, that ours is the youngest community in America, which means that over the next several decades, there is no question of a wider and broader participation by Hispanics as it pertains to this country.

I would like to proceed, if I may, with some other statistics.

Families in America which are maintained by women, a very important statistic, 23 percent of Hispanic families in America are maintained by women, as opposed to 15 percent of those families in America who do not fall into the Hispanic category.

The educational attainment of Hispanics, that is, those persons aged 25 to 34, 40 percent of those persons graduated or had 4 years of college or more in the year 1970. In the year 1983, that has increased to 48 percent.

Voter registration among Hispanics: In 1972, those who were registered, and I would say to all my colleagues that this is the job that many of us have to do over the next several years, in 1972 44 percent of the Hispanics in America who were eligible to vote were registered to vote. In the year 1980, that dropped off to 36 percent. I say that because while we are giving the statistics as it relates to our community, there is no question that that is the vital statistic as well.

The labor force participation, that is, the rate of the labor force by Hispanic women, in 1973, 41 percent of Hispanic women were part of the labor force. In 1982, it is 49 percent. But the interesting statistic there, to my colleague from New Mexico is, that in 1982 the participation in our labor force of women non-Hispanic jumped up to 53 percent.

We have heard a great deal about all that is happening on behalf of Hispanics. Everybody is saying how much they are doing. Very specifically, from the administration they appointed yesterday a woman as Treasurer of the United States, and I think that is wonderful and we commend her and we wish her well, but let us call it the way it is, and here is the way it is.

In 1979, the unemployment rate of Hispanics averaged a little above 6 percent. In 1982, that has climbed up almost double to 11 percent.

In 1980, the median family income of Hispanics by various categories, for those persons of non-Hispanic background, the median income in 1982 was approximately $23,907. For the Hispanic community, it averaged out about $14,000 to $15,000, which is a discrepancy of almost $10,000 per household.

I say that because it is important that we understand that in the year 1979 the median income, and I think I may be repeating myself but I will say it again, was $18,842 for the Spanish-origin families. That has dropped off. In the year 1982 it was $16,227.

But before you get excited, just let me say what the non-Hispanic family income was. In 1979, it was $26,553, and in 1982 that dropped to a little below $24,000.

□ 1910

Mr. Speaker, I am glad that my colleague, the gentleman from New Mexico (Mr. RICHARDSON), has taken this time because we must place on the record the facts, not as the gentleman and I conceive them, but the facts as given to us by the Bureau of the Census and all the statistics gathered through the power of that Bureau.

The rate of poverty in 1972 of those persons of Hispanic origin was 22.8 percent. In 1979 it dropped to 21.8 percent, a full percentage point. But now we are in 1983, and that has escalated to 30 percent of the Hispanic community which is today living or considered to be living under poverty conditions.

Now, the poverty rates for households: For the Hispanic-origin households, it is 21 percent, and I think that that is very, very important in view of what people are saying about how much they have done for Hispanics, especially the administration.

Now, where do Hispanics live? The statistics are very clear that the overwhelming majority of Hispanics today live in America's inner cities. Fifty percent of the Hispanic community in America lives in the inner city; 27 percent of our community lives in what we call the standard metropolitan area, which is an SMSA area, surrounding a metropolitan area, with a small percentage of our community living in rural areas.

Now, the per capita income is very interesting, and I believe I gave that statistic already.

Let me just say to my colleague, the getleman from New Mexico, that this is a very important week for us. I do not know how many Members are in their offices watching this dialog betwen us as Hispanics, but I would say to my colleagues that when things are done properly, we are not afraid to give credit where credit is due. But I really feel as a Hispanic that the last 2 years or the last 2½ years have been an absolute disaster. And that is not something I am saying from a political point of view. It is something that is based on facts not provided by this caucus, the Congressional Hispanic Caucus, but provided by the Bureau of the Census. If there is an argument anyone has from anything that was said by us today, then let them argue with the Bureau of the Census, not with us, because what I provided here has been directly from what the Bureau of the Census reported to us today.

Mr. Speaker, I would hope that my colleagues who will read these remarks in the CONGRESSIONAL RECORD tomorrow understand that the Hispanic community is not looking to walk taller. We are not looking to walk in front of anybody; all we are doing is trying to walk alongside. I think that is no different than any other group that has come into the United States.

I believe it is important to understand that we are not looking for a handout, but we are really looking for a handup. We are not looking for anything in terms of charity. All we are trying to put together is to have them at least give us some parity in this society. It is extremely important.

Again, Mr. Speaker, I congratulate my colleague, the gentleman from

New Mexico (Mr. RICHARDSON). I am sorry if I took too much of the time of my colleague, but I believe that this hour is an hour well spent because it will be a part of this CONGRESSIONAL RECORD for the many, many years to come in the future.

Mr. RICHARDSON. Mr. Speaker, again I wish to commend the gentleman from New York (Mr. GARCIA), because if any Member of this body has done anything to promote the cause of Hispanics in this country in the last 2 years since he assumed the chairmanship of the Hispanic Congressional Caucus, it has been the distinguished gentleman from New York.

Mr. Speaker, I yield to the gentleman from California (Mr. TORRES), a man who also for many years has been a leader in the Hispanic community, who, under the last administration, the Democratic administration, was a top policymaker in the Hispanic community and Special Assistant to the President for Hispanic Affairs, who also served in the very distinguished capacity as our ambassador to UNESCO, and who has been a leader in the labor movement for many years and is now a member of the Congressional Hispanic Caucus and a distinguished Member of this body.

I yield to the gentleman from California.

Mr. TORRES. Mr. Speaker, I want to commend my colleague, the gentleman from New Mexico (Mr. RICHARDSON), for calling this special order today.

Mr. Speaker, on September 16, 1870, Mexico declared independence from Spain. In recognition of this important date and in celebration of Hispanic Heritage Week, I am proud to pay tribute to the Hispanic community and to the many contributions they have made to the development and enrichment of this great Nation.

Hispanics are receiving considerable attention these days. The media has hailed the eighties as the decade of the Hispanics. Demographers have called Hispanics the fastest growing segment of American society. Corporations have developed advertising campaigns to capture the Hispanic consumer market. And, political leaders and officeholders are courting the Hispanic vote and expressing interest in Hispanic problems and needs.

But, while this recent attention is flattering, it belies the fact that Hispanics have played an integral role in this Nation's illustrious history. Many Hispanics have ancestors that began settling this country half a century before the Pilgrims landed on Plymouth Rock. There are many parts of the Southwestern United States that have enjoyed over 200 years of Hispanic culture and history. Hispanics bravely fought against the British during the American Revolution. Hispanics were among the defenders of the Alamo. And, Hispanics were the most decorated ethnic group of World War II, including the highest decoration our country can bestow—the Congressional Medal of Honor.

Today, Hispanics are providing a new spirit and force in America which will help shape the future course of this Nation. Hispanic activism and political activity has already left its mark on the political landscape. Hispanics provided the margins of victory for Gov. Tony Anaya in New Mexico, for Gov. Mark White in Texas, and for Mayor Harold Washington in Chicago. Hispanic mayors have also been elected in San Antonio, Miami, Denver, and Santa Fe. And, with Hispanic registration and voting rates increasing, Hispanics could make the difference in the 1984 Presidential election as well as several key congressional and statewide races.

Americans are proud of the cultural and political diversity that has made this country great. Hispanic culture, Hispanic entrepreneurs, and Hispanic leaders have greatly contributed to this diversity. Hispanic Heritage Week provides a unique opportunity for all of us to not only reflect on these contributions, but to learn more about and become more responsive to the important issues facing Hispanic Americans.

I invite my collegues to join the Hispanic community in celebration of our proud heritage, and in recognition of the contributions Hispanics have made and will continue to make in shaping the future of this Nation.

Mr. RICHARDSON. Mr. Speaker, I thank the gentleman from California (Mr. TORRES).

I now yield to another leader in this body, a Member who for many years has given service to the Hispanic Congressional Caucus and been involved in Hispanic issues throughout this country, the distinguished gentleman from Puerto Rico, (Mr. CORRADA).

Mr. CORRADA. Mr. Speaker, I thank the gentleman for yielding, and I commend him for taking the time for this special order.

Mr. Speaker, I am pleased to join my colleague BILL RICHARDSON in this special order honoring the many contributions Hispanic Americans have made to our great Nation.

Let me begin by saying how proud I am to be a Puerto Rican and an American and one of the Hispanic members of the U.S. Congress. To me it is quite an honor to be able to represent the interests of the Hispanic community and to speak to the many accomplishents of our people which have enriched the quality of life for all of us in the United States.

The impact of the Hispanic community is growing from year to year, as seen by Census Bureau figures which show that 15 States have Hispanic populations of 100,000 or more. While three-fifths of the U.S. mainlanders 14.6 million Hispanics reside in California, Texas, and New York, Hispanics are becoming a significant political influence in many congressional districts, and a factor to be reckoned with in the upcoming Presidential elections.

As we celebrate Hispanic Heritage Week, it is fitting that we take these moments to reflect on the participation of our people in our society, our communities, and our culture.

I am proud to note that the Hispanic community has produced many outstanding citizens whose lives have been dedicated to excellence and whose energies have extended to the search for equality and fairness for all. Some are quite well known, and need little or no introduction to you—José Ferrer, for example, the Oscar-winning actor who also serves as a member of the board of directors of the Museum of Graphic Arts of New York, or Roberto Clemente, baseball star of the Pittsburgh Pirates, who died in a plane crash enroute to a mercy mission to the earthquake victims of Nicaragua, or Luis Ferré, former Governor of Puerto Rico, founder of the Ponce Art Museum, industrialist and philanthropist. These individuals span all disciplines of achievement, and all strata of society, yet they all have a common bond in that they have returned to our country full measure for the fame they have received.

Media figures such as Geraldo Rivera, who was named broadcaster of the year for his exposé of an institution for the mentally retarded and José Feliciano, winner of two Grammy Awards for his music, are famous Hispanics whose achievements reflect their seriousness of purpose and their commitment to the community of Hispanics. While Rivera frequently uses his position as a television journalist to expose fraudulence and abuse of the poorer segments of our society, Feliciano frequently donates his talents to charity benefiting the handicapped and other worthy causes.

Although it is perhaps not so well known, Hispanics are well represented in the scientific arena—Pedro Barbosa, native of Puerto Rico, is a leading authority on the gypsy moth, and heads the University of Maryland's forest entomology efforts at abating the spread of this destructive insect, while Luis Alvarez, winner of the Nobel Prize in physics for his work on subatomic particles, the Einstein Medal, and the California Scientific of the Year Award, leads his colleagues as professor emeritus at the University of California, Berkeley.

These are but few of the outstanding Hispanics which have come to play a role in our life and whose contributions will long be remembered by the American Nation.

In a recent interview, Gen. Leo Márquez, highest ranking Hispanic in the U.S. Air Force, was asked to reflect on his heritage and its impact on career development. He replied that:

Our forefathers helped by giving shining examples and by passing on their values. It would be tragic indeed if we were unable or unwilling to be even better. We have the ability, the endurance and the numbers. The question now is, do we have the will to persevere, to persist, and to overcome a few obstacles? We must stop belaboring what has been and move forward now to what can be a very promising future.

This statement can perhaps give us some insight into the special contribution Hispanics are making to our country, by embueing their sons and daughters with a real sense of values which translate into practicabilities, along with a desire to move ahead through personal effort and sacrifice.

History has recorded that more than 270,000 Puerto Ricans have served gallantly and without reluctance in the U.S. armed services alongside their fellow Americans since 1917. Thousands of Puerto Ricans have died or have been wounded in wars involving the United States. During the Korean war, the death and casualty rate ranked us Puerto Ricans third among all States and territories in proportion to our population. The enlistment of volunteers in all branches of the U.S. armed services in Puerto Rico far exceeds the national average, just one indication of our willingness to accept the responsibilities our American citizenship brings.

To exemplify our deep commitment to the ideals of democracy and liberty, we must recognize the Puerto Ricans who went beyond the call of duty and in acts of heroism gave their lives to save others. Let no one forget the uncommon valor of Pfc. Fernando Luis García during the Korean conflict who was the first Puerto Rican to receive a Congressional Medal of Honor, the highest military award. Nor the deeds of Capt. Euripides Rubio, Pfc. Carlos Lozada, and Héctor Santiago Colón during the Vietnam war that earned them the Congressional Medal of Honor, all given posthumously.

More recently, Puerto Rico lost one of its sons to the military peacekeeping mission in Beirut, when Marine Corps Cpl. Pedro Valle Ramos was killed during an attack on American positions last week. I personally met with his parents in Puerto Rico, to express my sympathy on the loss of their son. I am pleased to say that his father's reaction was that of a true American, as he told me that while he was deeply saddened by the death of Pedrito he was proud to lose a son in the defense of his country. What more shining example could there be of the citizenship and patriotism of my fellow Hispanics?

Mr. Speaker, Hispanic-Americans have made solid, meaningful contributions to the principles of democracy and to the well-being of our country. They have brought a cultural richness to the fabric of American society, and an awareness of how different peoples can work in harmony to improve our Nation. I commend each and every Hispanic-American for his or her personal part in this endeavor and look forward to the aggressive development and strengthening of a partnership through the increase of Hispanic participation in decisionmaking processes in State and Federal Governments, in our legislatures, in our Armed Forces, in our judicial branch, in the private sector, and in every institution in our Nation dedicated to the fostering of our aspirations, ideals, and freedom.

□ 1920

Mr. RICHARDSON. Mr. Speaker, we have heard through these distinguished gentlemen of the U.S. Congress the success stories and the growth and the enthusiasm of the Hispanic community in this country, whether it be in the neighborhoods of New York, the Puerto Rican Americans, or the barrios in the Southwest or the areas in Florida where Cuban Americans are trying to find a way of life.

One senses in the Hispanic community in this country an air of excitement, an air of potential, potential because for many, many, many months we have heard that this is the decade of the Hispanic.

What does that decade of the Hispanic mean besides what the distinguished chairman of the Hispanic Caucus said in terms of numbers? The decade of the Hispanic means that for the first decade in history this country's Hispanics will have real political power. It means elections, successful elections of mayors, not only in Santa Fe and Denver and cities like San Antonio, but it means the increase in Hispanic elected officials at the lower levers of government.

It means that now, under the direction of the chairman of the Hispanic Caucus, instead of their being 7 congressional Hispanic Caucus members there are now 11.

It means the creation of a force of Hispanics called Hispanic Force 84 led by the Governor of New Mexico, Toney Anaya, whose objective is to register millions of Hispanic voters in time for the 1984 elections.

It means a tremendous amount of growth not only in population but in culture, in the arts, in business, and economic development, as the gentleman from Puerto Rico has stated.

□ 1930

Today, in the next few days are the initiation of Spanish Heritage Week and we will celebrate and proudly exhibit our culture. But our culture and the issues that affect us have to go simultaneously. And the fact is that Hispanics are among the poorest minorities in this country. This is not attempted to be a political speech, but nonetheless when the President of the United States travels to every city that has a large Hispanic population and says he is concerned about Hispanics and consumes the enchiladas and tacos and puts on the hats and tells Hispanics that they are important, but nonetheless when his administration's policies reflect that so-called importance, we see the record being nothing more than rhetoric.

Mr. President, I say to you: "Where are those jobs that you have promised Hispanics? What about those budget cuts that have affected Hispanics in this country, whether they be in health care, education, training, or for the ghettos of New York, or the rural areas of New Mexico? What about those vetos for many jobs programs that would have put many Americans, not just Hispanics, back to work?

"What about this Civil Rights Commission that you have appointed?" Not one Hispanic on this Commission. You want a Commission, Mr. President, that says, "I want that Commission to reflect my thinking and my thinking is that I do not believe in affirmative action and quotas. So, that is what I wanted to stack this Commission with, a Commission that is going to reverse significant civil rights progress in this country."

"We want to have adventurism in Central America instead of negotiating and using our Central American neighbors to negotiate a cease fire and peace and economic development." And looking at Central Americans as one country, what we do instead? We have a military policy of gunboat diplomacy which attempts to scare everybody into accepting our point of view.

Hispanics, like everyone else, do not want Marxism in Central America, we do not want militarism in Central America, we want our Hispanic brothers in Central America to develop on their own, based on their decisions. It is important to the Hispanic community because Hispanics and blacks and those in minorities are the most patriotic in this country, if you measure the statistics of casualties and those who go to fight these wars first.

So, we deeply care about using our culture to be a bridge to Central America. Hispanics in Latin America, why not more of that contact?

Mr. Speaker, and the many who are listening tonight, we as Hispanics do not want any special categories of privilege; we as Hispanics do not want to be treated differently; we as Hispanics do not want special privileges or special jobs; we want to be part of the mainstream in this country. And as part of the mainstream in this

country, what that means is jobs; it means equality, it means a chance to be policymakers in this country; it means a chance to eat and live a decent life, to have education. That is all we are asking for.

Yes, we have glory in our pride as Hispanics, but we want to be part of this great American mainstream. We want to have millionaires as Hispanics, we want to have more political leaders that are Hispanics, through elective processes, through the fair competition of ideas. But we very desperately want anybody that is going to be casting a vote, that is a Hispanic in the 1980's, that the most important thing is to register to vote, to participate in the process, because the future for our generations of children that are Hispanics are being made right today.

Luckily we have leaders like the chairman, ROBERT GARCIA of New York. Luckily we have many other leaders like Tony Anaya of New Mexico, and Henry Cisneros, in San Antonio, a man who has demonstrated that he can run a city, but also attract that American dream, business development, high technology, better than any other mayor in this country. We have a tremendous potential to show that we as Hispanics can be an integral part of this country. But this celebration is not just a cultural one; it has to be one that accentuates the jobs and needs of our community.

I join my colleagues today in celebrating National Hispanics Heritage Week and I ask all those who are listening tonight to look at the deeds of those politicians who go around saying that all it takes is Hispanic awareness and more Hispanics attending political events that is going to show who will do more for Hispanics. Hispanics should not take any political party for granted but they should look at the record of where those men and women who over the years have done the most for the Hispanic community have come from. John F. Kennedy, Lyndon Johnson, Jimmy Carter, ROBERT GARCIA, BALTASAR CORRADA, HENRY GONZALEZ in housing, KIKA DE LA GARZA, men and women who through anonymity may have labored for many years, but whose records are there to show.

Mr. Speaker, for the past 15 years, we have celebrated the third week in September as National Hispanic Heritage Week.

Mr. Speaker, on September 16, 1810, Mexico, our great neighbor to the South, declared independence from Spain. It was on that day that Father Miguel Hidalgo Costilla urged the citizens of the small town of Dolores to take up arms against the oppressive Spanish rule. Like the proclamation of our own Declaration of Independence, "el grito de Dolores" of 1810 inspired the revolt that brought freedom from European domination.

In recognition of the importance of this date and in honor of the celebration of National Hispanic Heritage Week, I have called for today's special order on the floor of the House of Representatives to give all Members of Congress an opportunity to reflect on the important contributions the Hispanic community has made to the history, culture, and development of this country.

Mr. Speaker, it is projected by the year 1990, Hispanics will become the largest minority in the United States. It has been said time and time again that the 1980's are the "Decade of the Hispanics." Such projections and statements have caused a positive chain reaction among a people who share a common language and heritage. It is a special time of year for Hispanics to examine the many contributions they have made to the American way of life, from the Cuban success stories of Florida, to the progress of Puerto Ricans in the Northeast, in the Mexican-American neighborhoods in the Southwest and from the many urban centers where Central and South Americans have congregated.

One senses an air of excitement in these Hispanic communities across the country. By our actions, we are charting a course which can only help to build a better America. There is a sense of unity among Hispanics which characterizes, "La Familia." We are a people demanding to have our full rights, recognized for better educational and employment opportunities, for improved health care services and for insuring that our housing needs are met.

Hispanics have always believed in the American dream and the better way of life that this country has to offer. We as a people have kept our families together through love, our strong belief in hard work, and through our heritage. All of these characteristics have helped to strengthen the American way of life. Many Americans are still unaware of dedicated Hispanic participation in the Revolutionay War and in the defense of the Alamo.

Because of the enormous growth of Hispanics in the past decade, there is growing interest in the rich and colorful history of the Hispanic community in America. Mr. Speaker, I represent the Third Congressional District of New Mexico. My district has an almost 50 percent Hispanic population. It is an area steeped in tradition and filled with the cultural influences brought to the area by early Hispanic settlers. Sante Fe, a city in my district, has the distinction of being the oldest capital city in the United States—founded in 1610—10 years before the Pilgrims landed at Plymouth Rock.

To this day the Hispanic influence in Santa Fe, is substantial, having an almost 60 percent Hispanic population. On January 17, 1983, the City Council of Santa Fe, Granada, Spain, passed a resolution declaring sisterhood with my city of Santa Fe, N. Mex. That resolution reaffirms the ancient ties between the old and new worlds. Santa Fe today retains and promotes with pride its deep Spanish roots which have made the city an internationally known place of unparalled art, architecture, history, and culture.

Hispanic leaders in my State serve as Governor, in our Congress, as speaker of the State House of Representatives, and on many State and Federal courts.

Today, we as Hispanics are making our political presence felt throughout the Nation. Prior to 1982 there were only 7 Hispanics serving in the House of Representatives—today there are 11. Three of the largest cities in the Nation are led by Hispanic mayors. Additionally, Hispanics are making gains in statewide elections all across the country.

It is increasingly clear that the Hispanic vote is crucial to the contenders for the Presidency in 1984. There are roughly 3½ million registered Hispanic voters today. In my State of New Mexico, 31 percent of the voting age population is Hispanic which is the largest statewide percentage of eligible Hispanic voters in the Nation.

The Southwest voter registration project is currently seeking to greatly increase the number of registered Hispanics for the 1984 election. Their efforts are sure to inspire other groups across the United States. Hispanics could well make the difference in the 1984 Presidential race as well as deciding key congressional contests across the country.

Politicians of both parties are keenly aware of this growing political influence and are actively courting the Hispanic vote. Politicans will find a far more sophisticated Hispanic voter this time around. Those aspiring to public office will find they will have to demonstrate by word and deed that they are dedicated to reversing a national pattern of neglect, exclusion, and indifference. Hispanics today are rightfully expecting action and they are keeping close watch on the track record of politicans. Advances have been painfully slow, but those keeping track of the record during the past 2 years of the Reagan administration can only be dismayed.

Although President Reagan has suddenly expressed support for bilingual education programs—his record says otherwise. Since he took office he has repeatedly attempted to cut the bilingual education program and to change the program's directives and diminish its effectiveness. While the President hails the economic recovery, unemployment stands at 12.3 percent among Hispanics—roughly 3 percent

higher than before Reagan took office. The President continues to rely on military solutions to the political problems in Central America, raising many Hispanic parents' concerns that their sons will someday be fighting other Hispanics.

Additionally, Hispanic small businesses are being crushed by this administration's economic program. Over 90 percent of Hispanic businesses are classified as small businesses and small business closings in 1982 totaled approximately 25,700—roughly four times higher than the 1979 total.

The President's economic policy of tax cuts for the rich and budget cuts for the programs that serve the poor and elderly has had a severe negative impact on Hispanics. Due to high unemployment, discrimination, and reduced Federal assistance, roughly 30 percent of Hispanics live at or below the poverty level. For these less fortunate Americans, the President's cuts in food, housing, and medical assistance programs are threatening their ability to properly feed and care for their children. We can no longer tolerate these skewed national priorities that divert billions of dollars from human assistance programs to a wasteful and bloated Defense Department.

Hispanics know that their efforts to improve their standard of living and the quality of their lives have made precious little progress under this administration. I expect Hispanics to link arms and make a significant difference in 1984. Hispanics have historically banded together to fight for their rights. So it will be in 1984—but with new force, new vigor, and with a new sense or urgency.

Those of us fortunate enough to be Hispanic, and fortunate enough to be in public life, will continue to call for substance over shadow. It is imperative to talk plainly of the concerns which many have, but most are reluctant to speak. We will continue to increase the pressure for economic expansion and full employment. We dare not lessen our efforts for this administration, like others, will partly be the product of the pressures upon it.

Those of us who are advocates of change must not and will not be content with labels, symbols, and small consolations. We simply will not be a cheering section for tinkling symbols signifying nothing. We will not agree to substitute rhetoric for compassionate values. Further, we seek to call our country to a higher standard.

Hispanic Force 1984 will carefully examine the Presidential candidates and issues. The Congressional Hispanic Caucus will continue to look out for the best interests of America's Hispanics. The more than 80 organizations dealing with all aspects of Hispanic life from politics to economics, from social issues to educational programs will intensify their efforts to improve the quality of life for all citizens of Hispanic heritage.

Mr. Speaker, I would appreciate it if Members could continue to insert their remarks in the RECORD for a period of 10 days; 5 legislative days in which to revise and extend their remarks.

● Mr. DAUB. Mr. Speaker, I am pleased to have this opportunity to join my colleagues, during National Hispanic Heritage Week, to commemorate the valuable contributions of the Hispanic community to our Nation's heritage, and the Hispanic community in my district is a shining example of these contributions.

Approximately 12,000 individuals of Hispanic heritage make their homes in the Omaha, Nebr., metroplitan area. A number of Hispanic community service organizations in Omaha, such as the Omaha Chapter of the American GI Forum, the Chicano Awareness Center, the League of Urban Latin American Citizens, and churches such as Primera Iglesia Bautista, Our Lady of Guadalope, and Salem Lutheran Church, have made major contributions to the quality of life for all residents in the Omaha community.

For example, the Omaha Chapter of the American GI Forum take their motto—"Education is our freedom; freedom is our business"—very seriously. Each year, they provide college scholarships to high school graduates, they host an annual senior citizen dinner and party, they provide assistance to needy elderly individuals, and they have donated flags for such occasions as the dedication of the Omaha Civic Center. In service for over 15 years, the Omaha chapter has built its membership to 500 strong, and on August 13, 1983, they were named "Outstanding Chapter of the Year" at the National American GI Forum Convention.

Omaha can also point proudly to individual achievements in our Hispanic community. Joseph K. Juarez, of Omaha served two terms as national chairman of the American GI Forum and served, as well, on the staff of former Congressman John Y. McCollister of the district which I am now privileged to serve.

In addition, Omaha has been the home of two Hispanic Congressional Medal of Honor recipients, Edward "Babe" Gomez, and Miguel Keith. Both were remembered by the Omaha American GI Forum's dedication of a bronze plaque in their honor at the dedication of the Omaha Civic Center.

Another member of the Hispanic community in Omaha, James Carmona, has been named as one of the youngest adjutant generals ever to serve.

Once again, I was pleased for this opportunity to point to a few of the many achievements of the Hispanic community in Omaha, Nebr.—which truly serves as an example for our Nation—and should stand out as we celebrate National Hispanic Heritage Week.●

● Mr. GUARINI. Mr. Speaker, it is with great pleasure that I take part in this special order commemorating National Hispanic Heritage Week. This week represents a golden opportunity for highlighting the contributions, past and present, of Hispanic Americans.

Mr. Speaker, in this regard, I would like to bring to your attention the work of the Liceo Cubano José Martí, an organization established in 1959 in Union City, N.J., to serve the Cuban-American community. For 24 years, this group has served its people extremely well. It has attracted a solid core of successful and dedicated members of the community.

One distinguished member of the Liceo Cubano José Martí has been signled out by his own membership for specific recognition. This member, Manny Perez-Hernandez, has been an adviser to the board of directors of the Liceo Cubano José Martí for the past 14 years.

Recently, the remarkable achievements of Mr. Perez-Hernandez in the business arena has gernered him well-deserved attention. The business success of Manny Perez-Hernandez, who left Cuba in 1960 at the age of 13, has been so striking that the two publications, New Jersey Monthly and Entrepreneur magazine, featured the West New York, N.J., businessman in their September editions. Entrepreneur magazine, a publication of the American Entrepreneur Association, named him "Entrepreneur of the Month" in September.

Mr. Speaker, with your permission, I would like to reprint in the RECORD the article that appeared in the September 1983 edition of New Jersey Monthly on Manny Perez-Hernandez. It is a story that reflects the fact that vision and perseverance are still rewarded in our society for those who are willing to make the needed sacrifices and decisions.

[From New Jersey Monthly, September 1983]

THE CORNER OF MADISON AND BERGENLINE AVENUES: BY WAY OF CUBA AND WALT DISNEY STUDIOS, AN ARTIST SETS UP HIS OWN AD AGENCY—IN UNION CITY

(By Mike Geczi)

Bergenline Avenue in West New York never has been confused with Manhattan's Madison Avenue area, the home of all those successful—and powerful—national advertising agencies.

Just east of Bergenline, however, on 67th Street, is West New York's unlikely contribution to the world of slogans, touting, and puffery. It's a seven-year-old advertising agency—The Graphic Arts Production Studio (GAPS)—which clearly is flourishing despite its lack of a prestigious address. It's flourishing because of Manny Perez-Hernandez, a creative and business talent of un-

canny and unquestioned abilities. Business is expected to top $1 million a year by the end of 1983.

"When we started up the agency in 1976, we had a good idea of what we wanted to do—walk before we ran," says Hernandez, who runs the agency with the help of his wife, Sally, as well as regional sales associates and freelance artists. "We didn't want to take big steps that might cause us to fall.

"We had a programmed future."

That Hernandez was as careful and as cautious as he was is a reflection of his background, unique for the ad business. Born in Cuba, the young Hernandez has been a gifted artist from the first time he attempted to put an image down on paper. By the time he was eleven, in fact, three of his paintings were hanging in the Fine Arts Wing of Havana's National Museum.

Like many Cubans less than overjoyed with Fidel Castro's rule of the island, his family fled to the U.S. in 1960. At the age of thirteen Hernandez found himself living in West New York and attending grammer school. But his love for art survived the move and Hernandez' yearbook from Memorial High School—which he keeps to this day in GAPS' office—exhibits several of the young artist's works.

In any case, during this period Hernandez also began to exhibit other talents. An ambitious 12th grade science project—"The Behavior of a Mouse in Flight Under Zero Gravity," not exactly a common endeavor among high school students—won him first place in the Hudson County contest. A resulting trip to Dallas for an international competition brought him fourth-in-the-world honors.

These honors enabled Hernandez to receive some scholarship money, which he quickly decided to put to use at the Academy of Aeronautics at La Guardia Airport. "At the same time that I was spending so much time on art, I also liked aviation," says Hernandez, who favors three-piece suits even on the hottest days. "So I thought I would be able to combine both by studying airplane design."

A fine plan, but little did Hernandez realize that the strict mathematical regime of the engineering/aerospace courses would be more than he bargained for. "The math got to me," he says now, laughing at the remembrance. "My brain is built for creativity and art, not for math."

Saying "thanks, but no thanks," he left the academy, and set out on another pursuit—as a newspaper reporter for the Hudson Dispatch. It was at the paper, where he stayed for five years, that Hernandez began to realize the potential he had in the advertising business.

"I could see the possibilities, so I decided to learn more about it," he says. To do that, Hernandez gave up West New York and moved to Florida, where he enrolled in the University of Miami. Nothing in Hernandez' career happens in a straight line, however, and his experiences in Florida weren't run-of-the-mill either.

That's because, while at Miami, Hernandez hooked up with Hansen Publications, a little local unit that was involved with Walt Disney Productions. Hernandez' special talents quickly were recognized, and soon he was illustrating books for Disney's music publishing subsidiary.

Hernandez stayed with Disney for four and a half years, during which he illustrated more than three dozen publications, which today still carry his name in their copyright notices. (Any person who keeps his high school yearbook in his office also keeps some of his early credits: Hernandez' office walls carry covers from such memorable titles as "Minnie's Magic Melody" and "Goofy's Romping Rhythm.")

Besides getting Minnie and Goofy down on paper, Hernandez also spent a lot of time on airplanes, especially jetting between Orlando and Los Angeles, Disney's two main locations. Those hours on the plane gave him a great deal of time to think, especially about his wife and two young children (there's a third now.)

"The Disney experience was great, it opened a lot of doors," he says. "For a single person, the life would be great, but it wasn't so great to be living your life on airplanes when your family was at home."

In 1976, then, Hernandez and his wife decided to return to New Jersey and set up GAPS. They bought a brick home on 67th Street and had half of it remodeled into a plush office that would do any Madison Avenue ad agency proud. They set up housekeeping in the other half.

Putting all his experiences together, Hernandez decided that it would be best to concentrate solely on industrial advertising. Soon after opening his doors, he had his first client, a small metal-working concern that went by the name of Milo Manufacturing. It since has been acquired by Sweden's SECO Tools AB, which now is a client.

"We had prospects, of course, when we first started, but we didn't have any clients," Hernandez recalls. "But we began to pick them up. When I would walk in and show my portfolios, they immediately would know that I was on the level.

Within a year, GAPS was profitable. But even now, with his prospects glowing, Hernandez has deliberately kept GAPS small. The agency handles just twelve accounts, primarily in the metropolitan areas, although he does do business with English, Spanish, Swedish, Japanese and Canadian clients. He also has moved GAPS into other lines of business, chiefly the design and manufacture of booth exhibit and displays for trade shows and conventions. These activities, which comprise about 20 percent of GAPS' business, involve setting up at about a dozen shows a year.

While Hernandez clearly has been successful with GAPS, he is in no hurry to build the company into a huge organization. On the contrary, he would rather it stay just as small as it is now.

"It's not a good policy to be adding people and growing too fast," he says. "This is a very cyclical business and all you end up doing is laying off people later on. There's also no point in having your hard-earned profits dissipate in salaries and overhead during slack periods."

In addition, Hernandez maintains that his clients also would lose out if GAPS were to become more than it is now. "When you get too big, the principal of the agency can't keep control," he says. "I want us to stay the size where I still can have a personal rapport with my clients.

"They know that if they call me on the phone, I'll be there to talk."

It's not that way on Madison Avenue. But, then again, Bergenline Avenue and Madison Avenue never have been confused for one another. As far as Hernandez and his clients are concerned, that's just fine.

RAKING THE GARDEN

Because Jim O'Higgins knows a good beer when he drinks one, and Ed Williams knows a good business opportunity when he sees one, the New Jersey market has been graced by a new brew, Duvel.

Technically, it's an ale, and Duvel (which is brewed in Belgium) also is Europe's most expensively brewed ale. The cost, apparently, is worth it: beer authority Michael Jackson, in "The Pocket Guide to Beer," calls Duvel "one of the world's great beers" and gives it his highest (five stars) rating.

Now, as for O'Higgins and Williams. It seems the former, a Rahway native who attended college just outside Belgium, developed a taste for Duvel when he was abroad. He later decided to look into the possibility of importing it into the states.

At the time, O'Higgins was working in a Manhattan commodities house, and Williams was his supervisor. One morning after O'Higgins showed up late for work, Williams got mad and inquired as to why the tardiness had occurred.

Hearing the tale of Duvel, Williams immediately became intrigued. That's because he was a bit of an entrepreneur himself, and had experience in marketing packaged goods. The two of them got a distributor, B.N. Distributors of Newark, and were on their way.

"We want to fill the void for a quality brewed ale for residents in New Jersey, Pennsylvania, Maryland and upstate New York," says beer baron O'Higgins. "I think this venture is, in many ways, even more exciting than placing large investments in commodities because you can see, feel and taste the product.

"And the taste is superb."●

● Mr. BROWN of California. Mr. Speaker, I would like to take this opportunity to salute Americans of Hispanic descent. Their many cultural contributions, particularly in the Southwest, have added to the rich diversity of this Nation. This has been especially noticeable in southern California, where probably a majority of our place names, including those of our streets, our rivers, and our cities reflect the Spanish heritage in their names; the city of San Bernardino and the Santa Ana River, in my own district, among them. It is hard to imagine California without the Spanish missions and the Mexican restaurants that make southern California so distinctive. The way we dress, act, and perceive things would change drastically were it not for this influence.

From the bravery of the Mexican-Americans during the American Revolutionary War, to their participation in defending the Alamo, their heritage has been linked to this country. As our Founding Fathers represented American independence, so did Miguel Hidalgo, parish priest of Dolores, personify Mexican independence by leading the revolt against Spanish oppression. National Hispanic Week marks a time for us to reflect not only on this noble heritage, but on continued Hispanic participation and leadership in our Government. Looking to the future, we can only perceive, and welcome, the growing strength of the Hispanic influence in our society, and the enrichment of our pluralistic culture which this represents.●

● Mr. LIPINSKI. Mr. Speaker, I am proud to join my esteemed colleague from the State of New Mexico, BILL RICHARDSON, in this special order celebrating Mexican independence and honoring the important contributions of the Hispanic community in this country.

Throughout America, the Hispanic community is making its presence felt. The Hispanic constituency in my congressional district is one of the largest in the State of Illinois, and its positive affect on my district is quite evident. The 26th Street Businessmen's Association, one of the many active Hispanic organizations in my district, has worked to foster community pride and improve the local business climate. Last Sunday, September 11, the 26th Street Businessmen's Association sponsored the annual gala parade in recognition and celebration of Mexican Independence Day. They sponsor fairs and various events that promote community solidarity and pride.

There are organizations such as this all over the country. They are evidence of the pride and joy with which Hispanics view their country. They are proof that Hispanics are involved, concerned citizens, always ready to work for the common good.

Hispanic participation in America dates back to our country's beginning. Like the immigrants from Eastern Europe and other parts of the world, Hispanics are hardworking, loyal, and dedicated. Their culture, initiative, and leaders have been important in making America great.

The Congressional Hispanic Caucus, of which I am proudly a member, is an effective voice for Hispanic Americans. This week, the caucus held a series of issue forums addressing the concerns of Hispanic Americans.

I am happy to join with BILL RICHARDSON and my other colleagues in celebrating the contributions of the Hispanic community to the betterment of the America. We should all look upon the contributions of the Hispanic community with pride and gratitude, and look forward to their future contributions with anticipation.

Thank you.●

● Mr. McNULTY. I rise in recognition of "el dieciseis de septiembre"—the 16th of September, which commemorates Miguel Hidalgo y Costilla's 'Grito de Independencia.' This cry of rebellion, given over 170 years ago in a small peasants' village in Guanajuato, Mexico, was a cry for justice by Mexico's oppressed, indigenous peoples seeking liberation from the Spanish regime. Some say the struggle continues to this very day for all Hispanic people in this hemisphere, a struggle for full participation in political and social systems, to obtain a fair share of the wealth and responsibilities which are the trademarks of a free society. This struggle also continues for the 16.5 million Hispanic citizens of this country who seek to establish as a practical reality the full participation of Hispanic citizens in the economic and social arenas of our great Nation.

National Hispanic Heritage Week celebrates the contributions made by the various Hispanic cultures in this country, allows us to assess the opportunities allowed Hispanics, to examine and articulate, once again, the social and political concerns of the Hispanic community.

I am encouraged by the gains made by Hispanics in achieving political and social parity in our society. The awakening of the sleeping giant is evidenced by the election of an Hispanic Governor in New Mexico, of Hispanic mayors in San Antonio, Sante Fe, and Denver, and in increasing Hispanic representation in local and State governments.

Yes, gains have been made, and yet many still remain to be realized. We, the citizens of this country, the Members of this House, and this administration, can ill afford to ignore the noted changing demographics and increased politicization of this, the fastest growing minority in our Nation. The concerns of this community—educational achievement, employment opportunities, healthcare, equitable representation in business, academic, and political communities—are concerns for each and every one of us. It is my hope that the awareness recently witnessed in the media and in the rising crescendo of rhetoric heard in political "'84 is around the corner" speeches will lead to substantive legislative redress of the concerns the Hispanic community has been articulating for the past 20 years.

I salute the cry for independence of Miguel Hidalgo, I salute the continued efforts of the Hispanic community toward greater achievements in this, the decade of the Hispanic.

Viva la Virgen de Guadalupe! Viva Mexico! Viva la Independencia!●

● Mr. ROYBAL. Mr. Speaker, although Hispanic Heritage Week has been celebrated for a number of years, not until recently has it gained widespread attention. This country has been very slow to recognize just how much those of Hispanic heritage have contributed to this country.

Mexican and Spanish immigrants began settling this country long before the Pilgrims landed at Plymouth Rock, establishing such cities as St. Augustine, El Paso, and Santa Fe. Many areas in the Southwest United States can point to over 200 years of Hispanic culture and history. Historians, however, have not given proper credit to this aspect of American history. Few people realize that Hispanics played an active role in the American Revolution, fighting against the British in the South. Few people realize that Hispanics were present among the defenders of the Alamo or that Hispanic and Anglo troops fought side by side during the Texas revolution against Mexico. And hardly anyone is aware that an estimated 75,000 black Americans escaped slavery by fleeing to Mexico, where they were easily assimilated into the Mexican culture.

In spite of all this, Hispanics, soon to become this Nation's largest ethnic minority, have not received full recognition for their political, cultural, and economic force. All that is changing, due in no small part to the efforts of such organizations as the Congressional Hispanic Caucus, which have insisted that Hispanic contributions be realized and appreciated. We have pointed to the inroads made by Hispanic workers in all levels of the government and private sector, often reaching these positions only after surmounting tremendous educational and cultural barriers. We have pointed with pride to the fact that 35 Hispanics hold the Congressional Medal of Honor, more than any single ethnic group in the United States.

And, perhaps most importantly, we have cited the growing political participation of the Hispanic community at all levels of government. We have Hispanic mayors, Hispanic Governors, Hispanic Congressmen, countless Hispanic councilmen and State representatives. We have an effective network of Hispanic advocacy organizations, fighting for those issues which touch closely upon the Hispanic community—civil and voting rights, bilingual education, immigration, social programs. And we have had many successes.

Clearly, the political establishment is beginning to listen to the Hispanic voice and to court the Hispanic vote. With good reason—it has been estimated that our vote could swing the 1984 election results in key States. We have come a long way.

It is in celebration and recognition of these accomplishments, often achieved against overwhelming odds, that we observe Hispanic Heritage Week. We can look with pride on our heritage, while eagerly anticipating an illustrious future. I invite you all to join in this celebration and self-discovery.●

● Mr. LELAND. Mr. Speaker, it is an honor for me to join with my colleagues today in commemorating the invaluable contributions Hispanics have made to the life of our Nation and in the enrichment of our national heritage, by recognizing the third week in September as National Hispanic Heritage Week.

It should be no surprise that the Hispanic community has achieved national prominence during the past decade, expanding rapidly not only in traditional Hispanic communities, but also in growing new communities

across this country, giving the United States the seventh largest Hispanic population in the world. It is with pride that I note that the population of Texas is 21 percent Hispanic and shares a history and heritage greatly enriched by the Hispanic culture.

As a result of a very diverse, growing population, we see an increasing involvement of Hispanics in America's political life, with registration and voting participation growing from 36 percent to 54 percent and from 30 percent to 44 percent, respectively. This increase in participation coincides with the expanded emphasis on education in the Hispanic community.

The expanding role of Hispanic Americans is evidenced by the prominence of, and the quality of leadership provided by, the growing number of Hispanic public officials. We need only to look at the distinguished Governor of New Mexico and the mayors of San Antonio, Miami, Denver, Santa Fe, and many other cities, and the substantial contributions made by our Hispanic colleagues in the House to see the growing influence of the Hispanic community and its importance to our society.

I commend my distinguished colleague, the gentleman from New Mexico, for his effort in making possible this opportunity to celebrate, and express our gratitude for, the great contributions of our Hispanic brothers and sisters. I appreciate the opportunity to participate in recognizing these great Americans.●

● Mr. RANGEL. Mr. Speaker, I rise to express my full support for National Hispanic Heritage Week. This tribute to our Nation's fastest-growing minority is long overdue, and I am confident that this Heritage Week is the beginning of an ongoing recognition of Hispanic achievement.

I want to point out today, Mr. Speaker, that the 15 to 18 million citizens of Hispanic descent have in many ways become a forgotten community. They have been left out of the political and cultural mainstream of American society, and we see very few government initiatives that focus on issues that most affect Hispanics. For example, little has been done to encourage bilingual education or to curb instances of language-based employment discrimination. This is despite the fact that the language barrier is probably the most significant hindrance to equal access for Hispanics.

Much attention has been given to the recent heightening of political awareness among black voters, and rightly so. However, only 60 percent of eligible Hispanic voters are registered to vote. This figure is below the national average, and indicates that the political clout of Hispanics has yet to be tapped. I would not like to see this trend continue, because it has been the recent experience of black Americans that minorities can have a significant impact on election day—but only if we get out and flex our political muscles at the polls. As the minority population increases, it is incumbent upon public officials to be responsive to minority issues.

Much needs to be done, Mr. Speaker, because the Hispanic heritage is now an integral part of the American heritage.●

● Mr. EVANS of Illinois. Mr. Speaker, I thank the gentleman from New Mexico for yielding and extending to us the opportunity to speak on National Hispanic Heritage Week.

The history of Hispanics in this country is one of proud achievement and courageous struggle against injustice. Like the earlier waves of newcomers to America's shores, Hispanics have often fled poverty and oppression in their native lands.

With them, they brought a rich cultural heritages of art, music, cuisine, and craft as well as a strong devotion to family life, a pride in community and church, and a respect for their older community members.

In the 1960's and 1970's, the burgeoning Hispanic population made great strides of progress through successful direct actions and boycotts, through hard work and determination to succeed in many fields. Hispanic leaders were at the forefront of the ongoing quest for economic justice for farmworkers. They also waged a proud struggle for quality bilingual education.

In the 1980's, we are seeing the emergence of strong voter turnout in the Hispanic community as the best way to express their collective will and aspirations in America. Several major American cities are presently being headed by Hispanic mayors, including San Antonio, Denver and Miami.

Organizations such as the League of United Latin American Citizens (LULAC) and the Mexican America Legal Defense and Education Fund (MALDEF) are playing important roles during our deliberations on important issues of the day such as immigration reform and policies in Central America. They are also fighting to reaffirm the civil rights of all our citizens and the responsibilities of our government to its citizens.

The United States is a land of great cultural diversity—a diversity that has made this country stronger and enriched our way of life. Hispanic culture has greatly contributed to this diversity. This is in the great tradition of the assimilation of so many groups into American life, while consciously maintaining their distinct cultural identity. This is a great source of pride to us all. National Hispanic Heritage Week is a recognition of these contributions.

Mr. Speaker, again I want to express my appreciation to the gentleman from New Mexico for this opportunity to speak.●

● Mr. FAUNTROY. Mr. Speaker, I wish to congratulate my colleague, Congressman BILL RICHARDSON, for providing the opportunity to participate in this special order reflecting on the important contributions of the Hispanic and Latino communities to our Nation on the occasion of National Hispanic Heritage Week which will be officially celebrated next week.

In the District of Columbia, we are especially fortunate to benefit from the contributions of a pluralistic Hispanic and Latino community, one which reflects the full diversity of the peoples of the Caribbean, and Central and South America.

While many of the 50,000-plus Hispanic and Latino residents of the District are relative newcomers to our Nation's Capital, they have already contributed richly to the economic, social, and political life of the District of Columbia and our Nation.

The Office of Latino Affairs, under the able direction of its Director Mr. William Vazquez, is presently involved in easing the transition of our newer community residents to life in the District of Columbia and our Nation.

The contributions of Latino and Hispanic entrepreneurs and organizations, such as the Iberian Chamber of Commerce, are especially noteworthy. These businessmen provide a full range of business services and unique opportunities for our city's residents and visitors to enjoy diverse cultures and experiences. At the same time, they produce jobs and revenue for our city and our Nation.

I am especially grateful for the contributions of the Hispanic and Latino communities to the 20th anniversary Mobilization of the March on Washington 1983 and look forward to the contributions they will be making to the New Coalition of Conscience as we seek to advance the specific legislation agenda on which we are united in pursuit of jobs, peace, and freedom.●

● Mr. SUNIA. Mr. Speaker, while my district does not have a large number of Hispanics currently noted by the last census, their role has been considerable and could be even greater in the future of American Samoa.

I want to commend my colleague Congressman BILL RICHARDSON from New Mexico for thinking of and sponsoring this special order saluting the contributions of the Hispanic population in our respective districts.

In reality there have been few Hispanics involved with American Samoa unless you consider one of the first discoverers of the islands, the Spanish navigator Quiros, to have been instrumental in bringing the existence of our islands to the outside or Western World. We must firmly state that we did in fact exist, for more than 2,000

years, some historians say, before the palagi (Caucasian) discoverers came our way. In any case, these Hispanic sailors and seamen were instrumental in opening up our world to the new ideas and cultural exposure of the West which has culminated in my presence before this House now in the ever-unfolding saga of our political evolution. In this regard the Hispanic influence has been most considerable.

But in a larger measure, we Samoans, hope to emulate the paths of our Hispanic brothers in our involvement in and participation within the United States fabric of government. We know that we, at this time, perhaps are considered next to come along after the Hispanics in the melting pot that is the United States of America but their achievements and successes are really ours yet to be realized and we can only salute their successes and accomplishments and give them a hearty Malo (well done).

I wish to thank BILL RICHARDSON for allowing me to submit these remarks and fully support his efforts in this special order honoring the Hispanic population of all our districts. Thank you, Mr. Speaker.●

Mr. RICHARDSON. Mr. Speaker, I would yield to the distinguished chairman of the Hispanic Caucus to conclude this special order.

Mr. GARCIA. I thank my colleague.

I think what had to be said was said. I believe it is very important. I know that we are laboring late into the evening but we must establish a record, we must put forth those areas that concern us as Hispanics. With that, I would like to say again to my colleague from New Mexico I think this has been a most important special order.

GENERAL LEAVE

Mr. RICHARDSON. I thank the gentleman.

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

CONDEMNATION RESOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WALKER) is recognized for 5 minutes.

● Mr. WALKER. Mr. Speaker, earlier today I mistakenly identified the nation of Nicaragua as the country which yesterday voted with the Soviet Union on the question of condemnation for the shooting down of Korean Air Lines flight 007. In fact, Nicaragua aided the Soviet Union only by abstaining in the face of world condemnation of that barbarism and did not cast its vote.

The other vote against the resolution, not surprisingly, came from Poland, further demonstrating that government's aversion to basic human rights. But Nicaragua did not vote against the resolution. The Sandanista government decided not to vote at all. Abstinence in the face of evil is no better than committing the evil, but the record with reference to my remarks should stand corrected.●

CONGRESSIONAL GOLD MEDAL IN HONOR OF LARRY McDONALD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. PHILIP M. CRANE) is recognized for 5 minutes.

● Mr. PHILIP M. CRANE. Mr. Speaker, among the 61 Americans on board Korean Air Lines flight 007 was our colleague Larry McDonald of Georgia. I first met Congressman McDonald in Ann Arbor, Mich., over 20 years ago. I was impressed with his dedication and his integrity on that occasion and over the years I was continually impressed by these characeristics. Frankly, I was surprised that Larry would forgo his successful career in medicine for the frustrations and burdens of a political career, but I later realized that he had merely turned his talents from saving lives to a larger task—that of saving the Republic. And as we all know, for nearly a decade Larry McDonald dedicated his life, his talents, and his intelligence to that end. He fought with all his strength the sickness and inhumanity of world communism, and ironically, it was because of the barbarism and terrorism of world communism that his life ended so suddenly. Larry became one more casualty in the struggle for human freedom.

Superficial media personalities have tried to compartmentalize Larry McDonald as simply anti-Communist. But such shallow stereotyping fails to recognize his profound commitment to the preservation of the highest ideals of Western civilization: Individual liberty, the dignity of man, limited constitutional government, a free economy, and preservation of our Nation's strength as the last, best hope of mankind.

Today, I am introducing legislation to award the McDonald family with a Congressional Gold Medal, to honor Larry.

I urge my colleagues to join in honoring a truly great American, Lawrence P. McDonald.●

THE OUTER CONTINENTAL SHELF LANDS ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WEAVER) is recognized for 30 minutes.

● Mr. WEAVER. Mr. Speaker, yesterday I introduced a bill to amend the Outer Continental Shelf Lands Act of 1978.

In July of 1982 Secretary of Interior James Watt established his 5-year management program for the Outer Continental Shelf. The program calls for expedited leasing of over 1 billion acres of OCS lands. This amounts to 25 times the average acreage made available to the oil and gas industry in the entire history of the off-shore leasing program.

By so doing, Secretary Watt has shown himself to be single-mindedly dedicated to offering virtually the entire OCS for lease to the industry and at break-neck pace. At the same time he has revealed his nearly complete insensitivity to the fisheries, biological, scenic, and other enduring values of the most precious and fragile portions of our Nation's coastal zone.

Secretary Watt is proud of having streamlined the OCS leasing process. However, according to the record presented before the Subcommittee on Mining, Forest Management, and Bonneville Power Administration in a San Francisco hearing last month, this streamling is little more than a euphemism for systematically reducing knowledge of and effective participation in the leasing process by States and local officials and by the public at large.

Take, for example, the case of "Lease Sale 73," which covers most of central and northern California OCS. Interior Department's distortion of the procedures for scoping, for public comment period, for public hearings, and for the environmental impact statement for Lease Sale 73 all indicate a profound disrespect for open, lawful decisionmaking.

No preliminary meetings were upheld, despite dozens of requests from members of the public and State and local officials. Preliminary meetings are specifically encouraged by regulations of the Council of Environmental Quality which guide the preparation of environmental impact statement (EIS's) of all Federal agencies.

The mandated 60-day public comment period for the draft EIS, far from being extended as logic would have dictated considering the complexity of the issues being considered, was actually cut short. Protests over this cavalier treatment were ignored by the Department. To make matters worse, three public hearings were held simultaneously at one location, an inland town removed from the environmental effects of the leasing program.

Interior Department's draft EIS also failed to identify the tracts being offered for lease sale, thereby handicap-

ping any attempts at careful review by citizens. In addition, the draft EIS failed to consider reasonable resource-protective alternatives to the lease sale, failed to discuss a worst-case scenario, and failed to consider the cumulative impacts of proposed oil and gas development in conjunction with existing development and in relation to other coastal activities.

Perhaps even more dismaying was the failure to identify key mitigation measures—to be applied as stipulations in the lease sale—until the final notice of sale. Vague references to mitigation contained in the draft EIS hardly provided adequate opportunity for thorough public scrutiny and comment.

Such flaws in the public participation process are all too symptomatic of Secretary Watt's environmental analysis of OCS lease offerings. They have resulted in a flood of court suits against his 5-year program. According to a report issued by the Subcommittee on Oversight and Investigations of the House Interior and Insular Affairs Committee, five coastal States: Alaska, California, Washington, Oregon, and Florida; three local governments: two in Alaska, one in California; and seven environmental organizations have filed lawsuits challenging the Watt program. A sixth State, Massachusetts, filed an amicus brief in support of the suits. The OCS areas affected by the litigation include the North Atlantic, northern and central California, North Aleutian Basin, St. George, Norton Sound, Barrow Arch, and Daipir Field.

In the consolidated case before the U.S. Court of Appeals for the District of Columbia, in addition to the coastal States already mentioned, petitioners included the city of Los Angeles, the North Slope Borough, the Yukon-Kuskokwim Coastal Resources Service Area Board, the Natural Resources Defense Council, the Sierra Club, Friends of the Earth, the National Wildlife Foundation, the National Audubon Society, the Conservation Law Foundation of New England, and Trustees for Alaska. This case was decided July 5, in an opinion that did little to clarify the issues.

Other legal challenges to specific lease sales have occurred against two off-shore California sales—since decided, and against sale No. 57 in Norton Sound, No. 52 in Georges Bank, and No. 70 in the St. George Basin. Serious delays have resulted from these suits, particularly in the case of the ninth circuit court requiring Secretary Watt to prepare consistency determinations in compliance with the Coastal Zone Management Act.

In brief, Secretary Watt's 5-year program poses a quadruple threat. First, the helter-skelter approach to leasing abdicates his responsibility to give serious consideration to the objections raised by the States, local governments, concerned organizations, and individuals. Second, he jeopardizes the oil and gas industry's need for an orderly, predictable progression of events. Third, he depletes revenue from bonus payments by dumping huge numbers of lease offerings on a sluggish market. Fourth, he places at risk a national treasure of irreplaceable resources located in environmentally sensitive areas of the OCS.

The magnificent sweep of the California coast, reaching all the way from my home district on the Oregon border south to the Mexican border holds incomparable values—economic, environmental and scenic. The full extent of the spectacular Big Sur coast, the last major California coastal area free of the industrial boom-bust syndrome, is perhaps its best known feature, together with the Channel Islands Marine Sanctuary, Santa Barbara, Santa Monica Bay, and the coastal area from Laguna Beach south to the Mexican border.

These tremendously popular areas of California's shore are now fully exposed to the hazards of oil and gas development under Secretary Watt's 5-year management program. The California Coastal Commission and State of California have identified areas where off-shore petroleum leasing and development should not take place, consistent with the California Coastal Act, as follows:

Santa Monica Bay (sales 35, 48, 68); the Coast Guard designated vessel precautionary area off-shore of the Ports of Los Angeles and Long Beach (sales 48, 68); the ecological preserve seaward of the city of Santa Barbara (sale 68); areas within 6 nautical miles of the Santa Barbara Channel Islands, now the presidentially-designated Channel Islands Marine Sanctuary; areas off-shore the rural, scenic and undeveloped coastal areas of Mendocino, Sonoma, Marin, San Mateo, and Santa Cruz Counties (sale 53); areas within 6 miles of 22 significant marine mammal and seabird resources areas, and within 20 miles of 7 special scenic areas along the central and northern California coasts (sale 53); areas in Federal marine sanctuaries for the Point Reyes Farallon Islands area, and proposed Monterey Bay sanctuary; and areas within 12 miles of the range of the threatened sea otter (sale 53).

These waters provide the habitat for 27 known species of great and small whales, including the endangered populations of white whales and gray whales. They also shelter six species of other marine mammals and many species of seabirds. The sea otter population, of all this adverse creation perhaps the most vulnerable to oil pollution, could easily be wiped out by one large oil spill.

Our ignorance of how oil and gas drilling and production affect this enormously rich and extensive community of beings is positively awesome, especially when one realizes there are eleven species which were completely unknown until recently. One authority, Thomas E. Radford, in a critique of the Mineral Management Service's drive to lease oil and gas tracts, has stated that the environmental studies conducted by MMS are insufficient to be useful in predicting the level of harm to the environment of such development.

In economic terms, the risk to California's fishing industry, valued at approximately $1 billion per year, and to the State's tourism, said to be worth upwards of $15 billion annually, must be weighed in the balance against the benefits of exploiting the oil and gas potential of California's OCS.

If it is true that the average life of an oil field is 30 to 40 years, the usual estimate, then any long-term calculation must consider the indefinite longevity of the co-existing fishery, when protected from harm. It is doubtful that Secretary Watt has seriously attempted to make such a comparison.

In granting injunctive relief in March 1983 to citizens of Massachusetts who sued to stop sale 53 on the Georges Bank, Judge Mazzone stated the problem rather succinctly when he ruled as follows:

> The amount of oil to be found on Georges Bank * * * represents an insignificant contribution to overall United States consumption * * *. By contrast, the fishery located on the Georges Bank region is of known value and great significance, both to the region and the nation, as a source of food and a mainstay of local industry. Weighing the interest of the public in the development and preservation of these two important resources, I must conclude that proceeding hastily with oil exploration in this region presents an unnecessary risk of harm of potentially indefinite duration, for an unacceptably small benefit.

Section 18(a)(3) of the Outer Continental Shelf Lands Amendments Act requires the Secretary to "select the timing and location of leasing, to the maximum extent practicable, so as to obtain a proper balance between the potential for environmental damage, the potential for the discovery of oil and gas and the potential for adverse impact on the coastal zone." In his race to lease virtually the entire remaining OCS, Secretary Watt has failed to secure this balance.

The Watt OCS management program will effectively transfer most of the Nation's $1.3 trillion off-shore petroleum resource to the private sector under procedures which minimize competition, favor large companies and reduce the amount of information through which Interior Department evaluates bids. Ironically, the program may actually delay OCS development further by requiring a substantial shift of industry capital to massive

land acquisition (through leasing bonuses) and away from development and production activities.

In the long run Secretary Watt's OCS policies squander our Nation's natural wealth, both renewable and nonrenewable, in the interest of short-term gain. Mr. Speaker, this policy is both foolhardy and insane.

In a hearing in San Diego held September 12 by the subcommittee, testimony indicated that Admiral Foley, commander in chief, Pacific, felt the OCS development in the San Diego area was detrimental to naval operations.

Nothing in the Outer Continental Shelf Lands Amendments Act requires or allows the Secretary to sell off OCS resources as rapidly as possible to help balance the Federal budget, or for any other reason. I believe that Americans for generations to come will pay dearly for Secretary Watt's myopic vision of the future.

My bill aims to restrict the Secretary's discretionary authority by amending section 18 of the Outer Continental Shelf Amendments Act of 1976 so as to:

Require the designation of specific geologic basins and petroleum entrapment areas in planning for lease sales;

Restore the former procedure for nomination of tracts and restrict the leasing of tracts having a negative State recommendation;

Mandate consideration of the effect which proposed oil and gas development will have on adjacent or affected OCS areas;

Require consideration of cumulative onshore and offshore effects of OCS development;

Require that the timing, extent, and location of lease sales minimize the risk of environmental damage or adverse effect on coastal zones;

Require acceptance of a coastal State Governor's recommendation when it provides a balance between the national interest and the well-being of the State's citizens;

Substitute a substantial evidence test for the arbitrary and capricious test on appeal;

Postpone lease sales in frontier areas; and

Encourage studies of the effect of seismic activity on OCS development.

In addition, my bill would declare a moratorium on the leasing of oil and gas tracts in certain environmentally sensitive areas on the California and Massachusetts OCS.●

THE 18TH ANNUAL VON STEUBEN PARADE IN CHICAGO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, September 17 is the 253d anniversary of the birth of Gen. Friedrich Wilhelm von Steuben, professional soldier, military expert, Inspector General of the Continental Army, and American patriot. A native German, von Steuben was second only to General Washington in his contribution to the cause of American independence and in converting the Continental Army into a disciplined fighting force.

On Saturday, September 17, it will be my genuine pleasure to join with the United German-American Societies of Greater Chicago in their 18th Annual General von Steuben Parade to commemorate the birth of this great Revolutionary War hero. The colorful pageantry of the grand parade will step off at noon from Wacker Drive and Dearborn Street, and then proceed to the reviewing stand located at the Richard J. Daley Center in downtown Chicago. Not only will the event be a tribute to this great soldier, but also it will be an occasion to promote the many contributions of German-Americans throughout the entire history of our country.

The Honorable Eugene Schulter, alderman of the 47th ward, will serve as the honorary grand marshal of the parade. This year, the capable and energetic Karl C. Laschet again is serving as general chairman and grand marshal. Norbert Holzinger is serving as vice chairman and parade marshal, and Erich Himmel is serving as vice chairman.

Born into a military family, von Steuben led a solider's life from age 16. He served in the Prussian Army with distinction, and in high tribute to his professional standing King Frederick the Great appointed him to general staff duty at the royal headquarters.

General von Steuben, taken by the cause of American independence arrived in this country late in 1777, after having been recruited in Paris by Benjamin Franklin. He was received with high honors by the Continental Congress at York, Pa., in January 1778. Reporting to Gen. George Washington at Valley Forge the next month, von Steuben sustained the courage and spirit of his men during a time of great disappointment and hardship for the Continental Army, since it seemed that the frigid winter could have delayed indefinitely America's hope for independence. Through the fortitude and discipline of General von Steuben, the Continental Army was able to emerge from this winter as an outstanding fighting force. For his efforts, Washington obtained for von Steuben the appointment of Inspector General with the rank of major general.

During the winter of 1778–79, von Steuben wrote an all-important manual on the basics of drill and field service regulations for the American citizen-solider which was entitled, "Regulations for the Order and Discipline of the Troops of the United States." This publication, known as the blue book, served as the official Army manual until 1812. In appreciation for his services, the State of New York awarded General von Steuben a 16,000-acre estate, and Congress granted him a pension of $2,500 for the rest of his life.

The members and officers af all the German American Societies of Greater Chicago are outstanding and dedicated citizens, who have been vital in their leadership roles in their individual communities, and I congratulate them on their efforts and their achievements. I also extend my warmest congratulations to Karl C. Laschet, general chairman and grand marshal of the parade, and to all the members of the 18th annual General. von Steuben parade committee, who have been working so diligently to insure that this year's parade and salute to German-Americans is an overwhelming success. The names of the parade's leadership and committee membership follows:

Norbert Holzinger, first vice chairman and parade marshal; Erich Himmel, second vice chairman.

Committee: Josef Anetzberger, Otto Alden, Felix Bachmeier, Melvin Brandt, Stefan Dama, Rudi Dick, Ludwig Erdbeer, Willi Follmer, Kari Geier, Josef Gies, Oleg Geschwendt, Richard Guenter, John Hebling, John Kraus, Elisabeth Kraus, Fred Marunde, Josef Matzer, Siegfried Reinke, Julius Roth, Theo Schulte, Horst Seyferth, Willi Scharpenberg, Nick Schneider, and Horst Tietz.

Trustees: Helmut Schmidt, Ron Rothmund, Helen Meiszner, parade treasurer; Paula Zottmann, cornflower chairlady; Clara Winkler, recording secretary; Betty Center, corresponding secretary; and Edward Kmiec, coordinator.

Directors, Joseph Frelburger, Karl Kurz, Elisabeth Kraus, Willi Follmer, Josef Anetzberger, John Katrein, Joseph Zottmann, Helen Meiszner, Alfonse Schneemann, and Michael Bruckner.

Finance Committee: Henrietta Baltis, George Bohling, Inge Himmel, Albert Opitz, and Paula Zottmann.

This year's celebration is especially significant since it also marks the 300th anniversary of the first known German settlement in America. On October 6, 1683, a small group of Mennonite families from the city of Krefeld founded Germantown, Pa., which is today a suburb of Philadelphia. From this small community grew a population of more than 60 million Americans of German descent presently living in this country, who have made substantial contributions to the growth and success of our Nation.

President Ronald Reagan has issued a Presidential proclamation to commemorate the tricentennial anniversary year of this German settlement in America, and a copy of that proclamation follows:

TRICENTENNIAL ANNIVERSARY YEAR OF GERMAN SETTLEMENT IN AMERICA

(A Proclamation by the President of the United States of America)

On October 6, 1683, a group of thirteen Mennonite families, coming from the city of Krefeld, now in the Federal Republic of Germany, founded Germantown, Pennsylvania, today a suburb of Philadelphia. Since then, more than seven million German immigrants have entered the United States and made extraordinary human, economic, political, social, and cultural contributions to the growth and success of our great country.

Today there are more than sixty million Americans of German descent, a number about equal to the total population of the Federal Republic of Germany. More Americans claim German ancestry than any other nationality.

During my address to the Bundestag in Bonn in June of last year, I spoke of the importance with the United States attaches to the Tricentennial year of 1983 commemorating German settlement in America. Despite the legacy of two world wars which found us on opposing sides, West Germany and the United States have forged an exceptionally close relationship during the past three decades. The success of the Marshall Plan, the Berlin Airlift, and the ensuing NATO partnership have led to a recognition of our common democratic ideals and joint interest in Western economic and political strength.

Throughout 1983 there will be numerous activities and observances to celebrate the Tricentennial. President Karl Carstens has accepted my invitation to attend the culminating event in Philadelphia next October.

The Congress, by Senate Joint Resolution 260, has designated 1983 as the "Tricentennial Anniversary Year of German Settlement in America" and has authorized and requested the President to issue a Proclamation in observance of that year. By the same Resolution, the Congress established the Presidential Commission for the German-American Tricentennial to plan, encourage, develop and coordinate the commemoration of this historic event.

Now, therefore, I, Ronald Reagan, President of the United States of America, do hereby proclaim the year commencing on January 1, 1983, as the Tricentennial Anniversary Year of German Settlement in America, and urge all Americans to observe the year with appropriate ceremonies and activities.

In witness whereof, I have hereundo set my hand this 20th day of Jan., in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan.

Mr. Speaker, on this occasion of commemorating the courage and heroism of Gen. Friedrich von Steuben, I send my greetings and best wishes to all German-Americans who reside in the 11th Congressional District of Illinois which I am honored to represent, and to German-Americans all over the Nation, who are paying tribute to this great American, and who are celebrating the many lasting contributions of men and women of German ancestry which have added to America's greatness, since the first German settlement in this country almost 300 years ago.●

LEGISLATION TO AMEND THE PERISHABLE AGRICULTURAL COMMODITIES ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. DE LA GARZA) is recognized for 5 minutes.

● Mr. DE LA GARZA. Mr. Speaker, I have introduced a bill today that would amend the Perishable Agricultural Commodities Act by imposing a trust on the commodities and sales proceeds of perishable agricultural commodities for the benefit of unpaid sellers.

The Perishable Agricultural Commodities Act was enacted in 1930 to encourage fair trading practices in the marketing of perishable commodities by prohibiting unfair and fraudulent business practices and providing for collecting damages from any buyer or seller who fails to live up to his contract obligations.

The act has generally worked well in making the marketing of perishable agricultural commodities more orderly and efficient. However, in recent years there has been a substantial increase in instances where commission merchants, dealers, or brokers have failed to pay for perishable agricultural commodities received by them or have been slow in making payment therefor.

Sellers of perishable agricultural commodities are often located thousands of miles from their customers. Sales transactions must be made quickly or they are not made at all. Many sales are consummated while the commodities are en route to a particular destination. Under such conditions, credit checks, conditional sales agreements, and other traditional safeguards are not possible. Under present law, sellers of fresh fruits and vegetables are unsecured creditors and receive little protection in any suit for recovery of damages where a buyer has failed to make payment as required by the contract.

The bill as introduced would remedy this situation by impressing a trust in behalf of the unpaid seller on the inventories, commodities, or proceeds of sale of such commodities in the hands of the commission merchant, dealer, or broker in the same manner as has been provided by amendments to the Packers and Stockyards Act adopted in 1976.

I have provided below a brief analysis of the amendment.

SECTION-BY-SECTION ANALYSIS

Section 1 of the bill would amend section 5 of the Perishable Agricultural Commodities Act as follows:

(1) It declares as a finding by Congress that a burden on commerce is caused by financing arrangements under which commission merchants, dealers, or brokers who have not made payment for perishable agricultural commodities purchased or handled by them in behalf of another person, encumber, or give lenders a security interest in such commodities, and that such arrangements, are contrary to the public interest.

(2) It provides that perishable agricultural commodities received by a commission merchant, dealer, or broker in all transactions, and all inventories, receivables, or proceeds from such perishable agricultural commodities, shall be held by such handlers in trust for the benefit of all unpaid sellers or suppliers of such commodities until full payment is made. It further provides that payment shall not be considered to have been made if the supplier, seller, or agent receives a payment instrument which is dishonored. Transactions between an agricultural cooperative association and its members are exempted from these special provisions.

(3) It provides that the unpaid seller will lose the benefits of such trust unless such person (or agent) gives written notice of intent to preserve the benefits of the trust to the commission merchant, dealer, or broker and has filed such notice with the Secretary within 30 business days: (i) after expiration of the time by which payment must be made as prescribed in regulations issued by the Secretary, (ii) after expiration of such other time as the parties have expressly agreed to in writing before entering into the transaction, or (iii) after the time the supplier, seller, or agent has received notice that the payment instrument presented for payment has been dishonored.

(4) It vests the United States district courts with jurisdiction on (a) actions by trust beneficiaries to enforce payment, and (b) actions by the Secretary to prevent and restrain dissipation of the trust.

Section 2 of the bill amends section 2(4) of the Act by defining as unfair conduct and an unlawful act, the failure of any commission merchant, dealer, or broker to maintain the trust for the benefit of the seller as required under section 5(c). A violation of section 4 would subject the person failing to maintain the trust to a reparations order for damages by the Secretary or to suspension or revocation of his license in accordance with the administrative procedures set forth in the Act.●

LEGISLATION TO AVOID OCTOBER PAY CUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 10 minutes.

● Mr. FORD of Michigan. Mr. Speaker, I introduced today, legislation which will delay the effective date of section 310(b) of the Omnibus Budget Reconciliation Act of 1982 until the effective date of the next Federal employee pay increase. This bill is supported by a majority of the members of the Committee on Post Office and Civil Service, and I hope the House will consider it next week. Unless this bill is enacted prior to October 1, hundreds of thousands of Federal employees will suffer an unintended and unexpected pay cut this October.

Section 310(b) was one of several provisions reluctantly accepted by the

House conferees on the 1982 budget reconciliation bill. These provisions, which adversely affected Federal employees and retirees, were necessary to achieve the spending cuts required by the administration's economic program. Section 310(b), for example, was estimated to save $120 million in fiscal year 1984. I should point out that although the House finally approved the conference report—it was rejected the first time it was considered—I and a majority of the members of the Committee on Post Office and Civil Service voted against it.

Section 310(b) requires a bookkeeping change in the way pay is computed for general schedule, white-collar, and most other annual rate Federal employees. In order to compute paychecks for these employees their annual salaries must be converted into hourly rates. Currently, this is done by dividing the annual salary by 2,080 hours—number of hours in 52 weeks of 40 hours each. In fact, however, each year there is a fraction of a week more than 52 weeks which means employees are being paid a little more than their stated annual rate in most calendar years. To save money, the Reconciliation Act requires that for fiscal years 1984 and 1985 the more mathematically accurate divisor of 2,087 hours should be used to compute hourly rates.

According to the Office of Personnel Management, use of the new divisor will mean pay cuts of $3.20 to $8.80 per pay period for affected employees. To minimize the impact on employees, the Reconciliation Act provides the new computation method will take effect with the pay periods beginning on or after October 1. This coincides with the traditional effective date for the annual Federal pay comparability adjustments. Thus, although the new divisor means a slight pay reduction, the comparability adjustment which was expected to take effect at the same time would more than compensate for it, and employees take home pay would still increase.

The President has now formally proposed delaying the pay adjustment until next January and capping it at 3.5 percent. Congress may or may not go along with the President's plan. It earlier endorsed a 4-percent increase. But in the meantime affected employees will suffer a pay cut in 2 weeks as a result of the President's plan to delay the annual pay adjustment.

The bill I introduced will avoid an October pay cut. Specifically, it provides the new computation method will not take effect until the pay comparability adjustment also takes effect. Thus the reduction required by the new computation method will be more than offset by the pay comparability adjustment.●

RESOLUTION CALLING ON TREASURY SECRETARY TO MAKE U.S. CURRENCY USABLE BY THE BLIND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I am today introducing a resolution which would express the sense of the Congress that the Secretary of the Treasury should develop a method for printing our national currency that makes the denomination of the currency identifiable to blind persons.

As my colleagues know, our paper currency is not understandable by the blind. All denominations are made in the same size and only the visible printing on the currency distinguishes one denomination from another. This is unlike many currencies around the world, which are printed in different sizes.

It should be clear that this situation puts blind people at a distinct disadvantage in everyday life on top of the obvious disadvantages they already face. In practically every exchange in a store, in a bank, or anywhere else that money is involved, they must rely on the honesty and accuracy of other individuals. In addition, the number of jobs that blind persons can hold is even further reduced by this problem, as they generally cannot perform any function which requires the counting of paper money.

As long as we can, without undue cost, alter our currency to enable the blind to identify the various denominations I believe it amounts to unfair discrimination not to make the necessary changes. The blind face more than enough discrimination. This is a case where the Federal Government can eliminate one form of discrimination and help to make blind persons more independent and self-sufficient.

It is for these reasons that I am introducing my resolution today. I believe the Treasury Department has the capability to make the changes in our currency that can make individual bills identifiable to blind persons merely by touch. Various proposals have been suggested for changing our currency in this manner. These include cutting corners of bill, using special embossing, and assigning different sizes to the various denominations. It is not my intention to force the Treasury Department to adopt any particular idea; rather, I believe we should encourage the Department to study this issue and to come up with the most cost-effective approach, after consultation with appropriate individuals, businesses, and organizations and after appropriate experimentation.

Mr. Speaker, most of us take for granted our ability to take money out of our wallets, pay for an item, and receive and count our change. The blind in our society, who face so many handicaps, also must contend with the handicap of not being able to carry out these everyday functions without extreme difficulty. We can eliminate this handicap and I believe we should do it. I hope my colleagues feel the same way and will join me in sponsoring this resolution.

At this point in the RECORD, I would like to insert the text of my resolution:

H. CON. RES. 163

Concurrent resolution expressing the sense of the Congress that the Secretary of the Treasury should develop a method for printing currency in a manner which will make the denomination of such currency readily identifiable to an individual who is blind

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the Secretary of the Treasury should develop a method for printing currency in a manner which will make the denomination of such currency readily identifiable to an individual who is blind.●

THE STRATEGIC PETROLEUM RESERVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. SHARP) is recognized for 5 minutes.

● Mr. SHARP. Mr. Speaker, today I am introducing a bill to improve the reliability and effectiveness of the strategic petroleum reserve. The bill is an amendment to the Energy Policy and Conservation Act and requires a test drawdown, distribution, and sale of a portion of the strategic petroleum reserve crude oil.

The strategic petroleum reserve was created to store substantial quantities of petroleum in order to diminish U.S. vulnerability to the effects of a severe energy supply interruption, or to carry out obligations of the United States under the international energy program. The strategic petroleum reserve, with 353 million barrels of crude oil in storage, now represents a substantial deterrance against politically inspired disruptions of U.S. energy import. Yet the full advantage of this significant strategic reserve is unrealized.

On December 1, 1982, the Department of Energy submitted a report to Congress on their plan for the drawdown and distribution of the strategic petroleum reserve. Speaking for myself and a number of my colleagues, we are disappointed that this report did not sufficiently detail how this strategic resource would be utilized under a severe disruption of U.S. energy supplies. However, the problem is larger than the general inadequacy of the report.

Historically, concerns about SPR crude oil quality and drawdown capability have undermined the effectiveness of the SPR as a stabilizing factor

on the oil market. Indeed, the public confidence that the strategic petroleum reserve was, in part, designed to provide has suffered from those same concerns. A required test drawdown, distribution, and sale of a small amount of the strategic petroleum reserve crude oil will serve to quiet these concerns.

Department of Energy officials have stated the need to test the Government procurement system for the sale of crude oil. Though the Government procures oil for the SPR, it has no experience selling oil, nor have the paperwork and procedures been tested and subjected to legal scrutiny in market conditions. The SPR with over 350 million barrels of oil is now the largest U.S. stockpile and potentially the largest source of crude oil sales during an emergency. A drawdown such as I am proposing would give the Department this experience and better prepare the Government and industry in the event of an actual major oil supply interruption. Finally, a SPR drawdown would test both system logistic capabilities and market value for the diverse crude oil types stored in the SPR salt domes.

In hearings before the Subcommittee on Fossil and Synthetic Fuels, the Secretary of Energy indicated a test sale of SPR crude oil would be an effective way to help prepare the SPR for its ultimate use in offsetting a serious oil supply interruption. At that time the Secretary expressed some concerns about the administrative costs and the almost certain prospect of having to repurchase displaced supplies at higher costs. Staff estimates the cost of such a test to be between $5 and $10 million. While not insignificant, this is a modest price to pay to test the multibillion-dollar reserve and provide public assurance of its viability in a time of national crisis.

During these same hearings the Department of Energy argued that current SPR legislation does not allow any sale of oil unless an emergency is declared. While I disagree with this interpretation, this bill would remove all ambiguity.

Although the bill provides wide flexibility to the Department of Energy in carrying out a test drawdown, I hope it would be conducted sooner than the end of fiscal year 1985 as required by this bill. The quantity of oil to be sold, also unspecified, should be at least 2 million barrels if it is to provide meaningful results.

Subsequent to the first test, the Secretary of Energy would have wide latitude in conducting additional tests. I personally believe this test and subsequent exercises should be an integral part of a larger drawdown readiness policy. This larger framework should include, as a minimum, a yearly drawdown report premised on current market conditions and the current size of the SPR.

I believe this bill will be a major step toward answering many questions surrounding the reliability and the effectiveness of the SPR in times of crisis.

I also hope this proposal will receive the same wide bipartisan support that the filling of the SPR has historically enjoyed.●

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 10 minutes.

● Mr. NEAL. Mr. Speaker, the U.S. Export-Import Bank has announced its plan to provide guarantees and insurance of up to $1.5 billion for the Government of Brazil and up to $500 million for the Government of Mexico to enable these countries to buy U.S. goods and services.

The Eximbank's stated purpose is to alleviate the trade financing shortfall facing these two hard-pressed countries so that they may continue to buy U.S. exports.

It is unusual and probably unprecedented, however, for the Eximbank to set up special facilities of this size for specific countries. Normally, the Bank provides financing, guarantees, or insurance in support of individual export transactions. But in this instance, the Bank proposes to set aside $2 billion of guarantees and insurance for Brazil and Mexico to enable these countries to make unspecified purchases in the United States. Each separate transaction under these facilities would have to undergo normal Eximbank approval procedures.

The use of these new facilities would be conditioned on Brazil's and Mexico's compliance with International Monetary Fund stabilizaion programs, on their ability to attract additional financing from commercial banks, and on their receiving similar trade financing commitments from other creditor nations.

Because the establishment of these facilities would be a departure from normal Eximbank practices, the Banking Committee's International Trade Subcommittee, which I chair, is holding hearings on September 13, 1983, to take a closer look at the Eximbank proposals. The Eximbank's formal notifications on the Brazil and Mexico packages left many questions unanswered as to how these facilities would be used and what the Bank's risks would be.

I would like to insert in the RECORD at this time the Eximbank notifications, which were referred to me as chairman of the Subcommittee on International Trade, Investment and Monetary Policy. Under section 2(b)(3) of the Export-Import Bank Act of 1945, as amended, the Eximbank must notify Congress of proposed loans, guarantees or insurance, or combinations thereof, of $100 million or more. Unless the Congress determines otherwise, the Eximbank may give final approval to the proposed transactions—in this case, the Brazil and Mexico programs—after 25 days of continuous session of the Congress following notification.

I am submitting for the RECORD copies of the Eximbank notifications on Brazil and Mexico. I would welcome any comments or questions my colleagues might have about these proposals.

The Eximbank material follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 17, 1983.

Hon. STEPHEN L. NEAL,
Chairman, Subcommittee on International Trade, Investment and Monetary Policy, Committee on Banking, Finance and Urban Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely,

MARIANNE CROTTY,
Special Assistant to the Chairman for Congressional Relations.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 17, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker of the House of Representatives, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction involving U.S. exports to Brazil.

A. DESCRIPTION OF TRANSACTION

Eximbank is prepared to authorize guarantees and insurance (Facility), up to $1,500,000,000, to assist the Government of Brazil in the purchase in the United States and export to Brazil of goods and services of U.S. manufacture or origin.

The obligor under the Facility will be the Government of Brazil, or a government agency on behalf of or with the guarantee of the Government. Repayment terms will be appropriate to the export transactions under the Facility. The availability date of the Facility will be September 30, 1984. Prior to the utilization of the Facility, the following conditions shall be met to the satisfaction of Eximbank: (1) Brazil shall be in compliance with an International Monetary Fund Extended Fund Facility; (2) commercial banks shall have established an additional financing program for Brazil; and (3) other creditor nations shall have made commitments to provide comparable financial support.

B. EXPLANATION OF EXIMBANK FINANCING

1. The Brazilian Debt Problem

Brazil faces a severe financing gap during the balance of 1983 and in 1984 that threatens to cause a precipitious contraction in trade. Recent data indicate that commitments are still lacking for $9 to $10 billion in additional support to meet Brazil's needs through 1984.

Brazil and its public and private creditors are now in the process of developing a new program to provide the $9 to $10 billion in additional financing needed to close this gap. The Facility described above will be an integral part of this program, to be provided in conjunction with the efforts of export credit agencies of other creditor countries, multilateral institutions, as well as commercial banks. The Facility will assist Brazil in sustaining a level of exports from the U.S. which are essential to Brazil's economic health and, at the same time, are important sources of employment in the U.S.

2. Impact on U.S. employment

Brazil is a major market for U.S. exports, involving a broad cross-section of the U.S. economy, including food, chemicals, manufactured goods, machinery, transportation equipment, and coal. In 1981, U.S. exports to Brazil amounted to $3.7 billion. Using the Department of Commerce calculation that $1 billion in exports equates to 25,000 jobs, these exports to Brazil provided employment for over 90,000 Americans. In 1982, because of growing Brazilian economic problems, U.S. exports dropped to $3.4 billion, equating to a loss of 7,500 jobs. Projections for 1983 suggest that U.S. exports to Brazil could decline even further, to less than $2.8 billion, thereby jeopardizing an additional 15,000 jobs.

The Facility described above will have a favorable impact on employment for substantial numbers of United States workers, as well as on the United States balance of trade. In addition, the Facility will assist Brazil in closing its financial gap as part of a comprehensive package of financial assistance involving the International Monetary Fund, commercial banks and other creditor countries.

Attached is certain additional information on Eximbank activity in and econimic data on the country involved in this transaction.

Sincerely,

WILLIAM H. DRAPER III.

Attachment.

AUGUST 15, 1983.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 17, 1983.

Hon. STEPHEN L. NEAL,
Chairman, Subcommittee on International Trade, Investment and Monetary Policy, Committee on Banking, Finance and Urban Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely,

MARIANNE CROTTY,
Special Assistant to the Chairman for Congressional Relations.

EXPORT-IMPORT BANK OF THE
UNITED STATES,
Washington, D.C. Aug. 17, 1983.

The Speaker of the House of Representatives,
The Speaker's Room H-209, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction involving U.S. exports to Mexico.

A. DESCRIPTION OF TRANSACTION

Eximbank is prepared to authorize guarantees and insurance (Facility), up to $500,000,000, to assist the Government of Mexico in the purchase in the United States and export to Mexico of goods and services of U.S. manufacture or origin.

The obligor under the Facility will be the Government of Mexico, or a government agency on behalf of or with the guarantee of the Government. Repayment terms will be appropriate to the export transactions under the Facility. The availability date of the Facility will be September 30, 1984. Prior to the utilization of the Facility will be September 30, 1984. Prior to utilization of the Facility, the following conditions shall be met to the satisfaction of Eximbank: (1) Mexico shall be in compliance with its International Monetary Fund Extended Fund Facility; (2) commercial banks shall have established an additional financing program for Mexico; (3) other creditor nations shall have made commitments to provide comparable financial support; and (4) the bilateral and implementing agreements between the United States and Mexico pursuant to the multilateral debt rescheduling of June 22, 1983 shall have been signed.

B. EXPLANATION OF EXIMBANK FINANCING

1. The Mexican Economic Problem

Mexico's 1982 economic crisis forced the adoption of a severe domestic austerity program and an adjustment of the economy to conform to fiscal and balance of payments constraints. This domestic program was supported by a comprehensive financing program involving new credits provided by the International Monetary Fund and commercial banks, along with a rescheduling of public and private sector debt. For Mexico, these measures have meant falling output, rising unemployment, declining standards of living and plummeting imports.

Now, one year after the 1982 crisis, the benefits of these programs are beginning to emerge, and Mexico appears to be on the threshold of an upswing. The Facility will strengthen the Mexican recovery effort by acting both as a catalyst for continuing support by the international financial community and as a secure source of financing for U.S. exports.

2. Impact on U.S. Employment

Mexico, as one of the largest nations in the world economy in terms of population, industrial output, and oil production and reserves, is a major market for U.S. exports. These exports involve a broad cross-section of the U.S. economy, including food, chemicals, manufactured goods, machinery, and transportation equipment. In 1981, Mexico's purchases abroad totalled some $24 billion of which $17.4 billion came from the U.S.

As a result of Mexico's retrenchment program, U.S. exports to Mexico declined by 37% in 1982, a loss to the U.S. economy of over $6 billion. Using the Department of Commerce calculation that $1 billion in exports equates to 25,000 jobs, this decline involves a loss of some 160,000 jobs. Although the 1982 decline in exports covers a wide range of items, about 53% of the down-turn was concentrated in machinery and transport equipment. Data for the first five months of 1983 indicate that U.S. exports to Mexico will be even lower this year, thereby further jeopardizing employment in the U.S.

The Facility described above will have a favorable impact on employment for substantial numbers of United States workers, as well as on the United States balance of trade. In addition, the Facility will strengthen the Mexican economic recovery as part of a comprehensive package of financial assistance from the International Monetary Fund, commercial banks and other creditor countries.

Attached is certain additional information on Eximbank activity in and economic data on the country involved in this transaction.

Sincerely,

WILLIAM H. DRAPER III.

Attachment.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Ms. MIKULSKI (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. TAUKE (at the request of Mr. MICHEL), for today, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BILIRAKIS) to revise and extend their remarks and include extraneous material:)

Mr. DANNEMEYER, for 30 minutes, today.

Mr. WALKER, for 5 minutes, today.

Mr. PHILIP M. CRANE, for 5 minutes, today.

(The following Members (at the request of Mr. MILLER of California) to revise and extend their remarks and include extraneous material:)

Mr. WEAVER, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. DE LA GARZA, for 5 minutes, today.

Mr. FORD of Michigan, for 10 minutes, today.

Ms. OAKAR, for 10 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. SHARP, for 5 minutes, today.

Mr. LEVITAS, for 60 minutes, September 19.

Mr. BORSKI, for 60 minutes, October 4.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. CONTE, prior to the vote on the Moorhead amendment to H.R. 3520 in the Committee of the Whole today.

Mr. CONYERS, to revise and extend his remarks on the bill, H.R. 3520.

Mr. HAYES, to revise and extend his remarks on the bill, H.R. 3520.

(The following Members (at the request of Mr. BILIRAKIS) and to include extraneous matter:)

Mr. SHUSTER.

Mr. GILMAN in two instances.

Mr. BEREUTER.

Mr. RINALDO.

Mr. CONABLE.

Mr. SOLOMON.

Mr. GEKAS in three instances.

Mr. WOLF.

Mr. STUMP in two instances.

Mr. MCKERNAN.

Mr. ROTH.

Mr. RUDD in two instances.

Mr. MILLER of Ohio in three instances.

Ms. FIEDLER.

Mr. HILLIS.

Mr. SHUMWAY.

Mr. DAUB.

Mr. LAGOMARSINO in three instances.

Mr. LEWIS of Florida.

Mr. MICHEL.

Mr. PORTER.

Mrs. JOHNSON.

Mr. MOORHEAD in two instances.

(The following Members (at the request of Mr. MILLER of California and to include extraneous matter:)

Mr. MINETA.

Mr. LIPINSKI.

Mr. LEVINE of California.

Mr. SKELTON.

Mr. FRANK.

Mr. STARK in three instances.

Mrs. SCHROEDER.

Mrs. LLOYD.

ADJOURNMENT

Mr. GARCIA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 40 minutes p.m.) the House adjourned until tomorrow, Wednesday, September 14, 1983, at 10 o'clock a.m.

OATH OF OFFICE, MEMBERS, RESIDENT COMMISSIONER, AND DELEGATES

The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 13, 1884 (23 Stat. 22), to be administered to Members, Resident Commissioner, and Delegates of the House of Representatives, the text of which is carried in 5 U.S.C. 3331:

> "I, A B, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God."

has been subscribed to in person and filed in duplicate with the Clerk of the House of Representatives by the following Member of the 98th Congress, pursuant to the provisions of 2 U.S.C. 25:

CHARLES A. HAYES, First District, Illinois.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1818. A letter from the Director, Office of Pesticide Programs, Environmental Protection Agency, transmitting a proposal final rule providing an exemption from FIFRA requirements for certain products containing pheromone attractants, pursuant to section 24(a)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act of 1954, as amended; to the Committee on Agriculture.

1819. A letter from the Principal Deputy Assistant Secretary of the Air Force (Manpower, Reserve Affairs and Installations), transmitting a draft of proposed legislation to amend section 1037 of title 10, United States Code, to authorize the Secretary concerned to employ counsel and to pay costs and fees incident to representation before foreign judicial tribunals and administrative agencies of civilians employed by or accompanying the Armed Forces outside the United States, its territories, possessions, the Northern Mariana Islands, and Puerto Rico; to the Committee on Armed Services.

1820. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense articles to Egypt (Transmittal No. 83-53), pursuant to 10 U.S.C. 133b; to the Committee on Armed Services.

1821. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Forces' proposed sale of certain defense articles to Korea (Transmittal No. 83-55), pursuant to 10 U.S.C. 133b; to the Committee on Armed Services.

1822. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving U.S. exports to Italy, exceeding $100,000,000 or more, pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

1823. A letter from the Chairman and Chief Executive Officer, Communications Satellite Corporation, transmitting the 20th annual report of the Corporation, pursuant to section 404(b) of the Communications Satellite Act of 1962, as amended; to the Committee on Energy and Commerce.

1824. A letter from the Comptroller, Department of State, transmitting the quarterly report on international narcotics control

program and obligation of funds as of June 30, 1983, pursuant to section 481(b)(1) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

1825. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a proposed supplement to a memorandum of understanding between the United States and the Federal Republic of Germany, France, and the United Kingdom to establish a joint program to development and ultimately produce a terminal guidance warhead for the multiple launch rocket system (Transmittal No. 01-83), pursuant to section 27(c) of the Arms Export Control Act, as amended; to the Committee on Foreign Affairs.

1826. A letter from the Acting Assistant Secretary of State, Legislative and Intergovernmental Affairs, transmitting notice of the proposed issuance of a license to export certain major defense equipment sold commercially to Malaysia (Transmittal No. MC-17-83), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1827. A letter from the Acting Assistant Secretary of State, Legislative and Intergovernmental Affairs, transmitting notice of the proposed issuance of a license to export certain major defense equipment sold commercially to Egypt (Transmittal No. MC-18-83), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1828. A letter from the Acting Director, Defense Security Agency, transmitting notice of the Army's intention of offer to sell certain defense articles and services to Egypt (Transmittal No. 83-53), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1829. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense articles to Korea (Transmittal No. 83-55), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1830. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Navy's proposed lease of defense articles to NATO (SHAPE) (Transmittal No. 20-83), pursuant to section 62(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1831. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Army's proposed lease of defense articles to Thailand (Transmittal No. 19-83), pursuant to section 62(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1832. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Navy's offer to sell certain defense articles and services to Egypt (Transmittal No. 83-56), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1833. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles and services to Pakistan (Transmittal No. 83-52), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1834. A letter from the Assistant Secretary of the Interior (Indian Affairs), transmitting a draft of proposed legislation to provide for the statutory designation of the position of Assistant Secretary of the Interior for Indian Affairs, eliminate the position of Commissioner of Indian Affairs, make conforming amendments, repeal unnecessary provisions of law referring to the Commissioner of Indian Affairs, and for other purposes; to the Committee on Interior and Insular Affairs.

1835. A letter from the Comptroller General of the United States, transmitting a draft of proposed legislation to amend sections 3345, 3356, and 3348 to include the independent establishments in the executive branch within the purview of the Vacancies Act; to the Committee on Post Office and Civil Service.

1836. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to terminate the authorization for the Lake Brownwood Modification project, Pecan Bayou, Tex.; to the Committee on Public Works and Transportation.

1837. A letter from the Acting Assistant Secretary of State, Legislative and Intergovernmental Affairs, transmitting notice of the allocation of funds appropriated by the Supplemental Appropriations Act of 1983, Public Law 98-63, pursuant to section 653(a) of the Foreign Assistance Act of 1963, as amended; jointly, to the Committees on Foreign Affairs and Appropriations.

1838. A letter from the Acting Director, Office of Legislative Affairs, Agency for International Development, transmitting notice of the allocation of funds appropriated by the Supplemental Appropriations Act of 1983, Public Law 98-63, pursuant to section 653(a) of the Foreign Assistance Act of 1961, as amended; jointly, to the Committees on Foreign Affairs and Appropriations.

1839. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Colorado River Basin Salinity Control Act to authorize the Secretary of Agriculture to develop and implement a coordinated agricultural program in the Colorado River Basin; jointly, to the Committees on Interior and Insular Affairs and Agriculture.

1840. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to establish a 1-year limitation on the filing of claims for unpaid accounts formerly maintained in the postal savings system; jointly, to the Committees on the Judiciary and Post Office and Civil Service.

1841. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to amend certain provisions applicable to compensation for the overtime inspectional service of employees of the U.S. Customs Service and the Immigration and Naturalization Service, and for other purposes; jointly, to the Committees on Ways and Means, the Judiciary, and Post Office and Civil Service.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL:

H.R. 3865. A bill to amend the Internal Revenue Code of 1954 with respect to the deduction for certain gifts to employees; to the Committee on Ways and Means.

By Mr. PHILIP M. CRANE (for himself, Mr. BREAUX, Mr. CARNEY, Mr. CHAPPELL, Mr. COURTER, Mr. DANIEL B. CRANE, Mr. DAUB, Mr. DICKINSON, Mr. DUNCAN, Mr. HAMMERSCHMIDT, Mr. HANSEN of Idaho, Mr. KASICH, Mr. KEMP, Mr. KINDNESS, Mr. LOEFFLER, Mr. MCCAIN, Mr. MCCANDLESS, Mr. MCCOLLUM, Mr. MONTGOMERY, Mrs. SCHNEIDER, Mr. SILJANDER, Mr. SMITH of New Jersey, Mr. STUMP, Mr. TAUZIN, Mr. LOWERY of California, Mr. YATRON, Mr. EMERSON, and Mr. LIVINGSTON):

H.R. 3866. A bill to honor Congressman Lawrence P. McDonald and to award a special congressional gold medal to the family of the late Honorable Lawrence P. McDonald; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DE LA GARZA (for himself, Mr. MADIGAN, Mr. PANETTA, and Mr. EMERSON):

H.R. 3867. A bill to amend the Perishable Agricultural Commodities Act, 1930, by impressing a trust on the commodities and sales proceeds of perishable agricultural commodities for the benefit of the unpaid seller, and for other purposes; to the Committee on Agriculture.

By Mr. FAUNTROY:

H.R. 3868. A bill to amend the Federal Reserve Act to provide for a new class of directors for Federal Reserve banks; to the Committee on Banking, Finance and Urban Affairs.

H.R. 3869. A bill to retire Federal Reserve bank stock; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FLORIO:

H.R. 3870. A bill to restrict the sales of alcoholic beverages in interstate commerce; to the Committee on Energy and Commerce.

By Mr. FORD of Michigan (for himself, Mr. UDALL, Mr. CLAY, Mrs. SCHROEDER, Mr. GARCIA, Mr. LELAND, Mr. ALBOSTA, Ms. OAKAR, Mrs. HALL of Indiana, Mr. SIKORSKI, Mr. DASCHLE, Mr. DE LUGO, Mr. SCHUMER, Mr. TAYLOR, Mr. GILMAN, Mr. CORCORAN, Mr. COURTER, Mr. WOLF, Mr. FAZIO, Mr. HOYER, Mr. BARNES, Mr. HEFTEL of Hawaii, Mr. DYMALLY, Mr. WON PAT, Mr. STARK, Mr. LANTOS, Mr. DICKS, Mr. FAUNTROY, Mr. ROE, Mr. SWIFT, Mr. FRANK, Mr. HOWARD, Mr. DWYER of New Jersey, Mrs. BOXER, Mrs. COLLINS, Mr. FOGLIETTA, Mr. LEHMAN of California, Mr. AKAKA, Mr. DYSON, Mr. WEISS, Mr. COELHO, and Mr. BORSKI):

H.R. 3871. A bill to amend the Omnibus Budget Reconciliation Act of 1982 to provide that the figure used in determining hourly rates of pay for Federal employees not be changed before the comparability adjustment in the rates of pay for such employees has been made for fiscal year 1984; to the Committee on Post Office and Civil Service.

By Mr. FOWLER:

H.R. 3872. A bill to amend the National Security Act of 1947, and for other purposes; to the Permanent Select Committee on Intelligence.

By Mr. FRANK:

H.R. 3873. A bill to require the Department of the Air Force to request the Federal Bureau of Investigation to investigate the death of William Joseph Cavanaugh, Jr.; to the Committee on Armed Services.

By Mr. GONZALEZ:

H.R. 3874. A bill to improve the physical security features of the motor vehicle and its parts, increase the criminal penalties of persons trafficking in stolen motor vehicles and parts, and to curtail the exportation of stolen motor vehicles, and for other pur-

poses; jointly, to the Committees on Energy and Commerce, the Judiciary, and Ways and Means.

By Mr. HUCKABY:

H.R. 3875. A bill to prohibit foreign assistance to any member country of the United Nations that fails to vote in favor of the resolution deploring the Soviet attack on Korean Air Lines flight 007; jointly, to the Committees on Foreign Affairs and Banking, Finance and Urban Affairs.

By Mr. MICA (for himself and Mr. EDGAR):

H.R. 3876. A bill to amend title 38, United States Code, to authorize the VA to furnish each veteran with a compensable service-connected disability, such drugs and medicines as may be prescribed by any licensed physician for treatment of the service-connected disability; to the Committee on Veterans' Affairs.

By Mr. MINETA (for himself and Mr. PANETTA):

H.R. 3877. A bill to repeal the provisions of the Social Security Amendments of 1983 removing the operations of the social security trust funds from the unified budget beginning in 1992; to the Committee on Ways and Means.

By Mr. MOORHEAD:

H.R. 3878. A bill to promote research and development, encourage innovation, stimulate trade, and make necessary and appropriate amendments to the antitrust, patent, and copyright laws; to the Committee on the Judiciary.

By Ms. OAKAR:

H.R. 3879. A bill to amend title 31, United States Code, to eliminate the fee imposed on financial organizations which receive payroll deductions from Federal employees, and for other purposes; jointly, to the Committees on Post Office and Civil Service and Banking, Finance and Urban Affairs.

By Mr. SHARP:

H.R. 3880. A bill to amend the Energy Policy and Conservation Act with respect to the Strategic petroleum reserve by requiring testing of drawdown and distribution of the reserve; to the Committee on Energy and Commerce.

By Mr. ZABLOCKI (for himself, Mr. BROOMFIELD, Mr. WRIGHT, Mr. FOLEY, Mr. MICHEL, Mr. LOTT, Mr. FASCELL, Mr. HAMILTON, Mr. YATRON, Mr. SOLARZ, Mr. BONKER, Mr. STUDDS, Mr. IRELAND, Mr. MICA, Mr. BARNES, Mr. WOLPE, Mr. GEJDENSON, Mr. DYMALLY, Mr. LANTOS, Mr. KOSTMAYER, Mr. TORRICELLI, Mr. SMITH of Florida, Mr. BERMAN, Mr. REID, Mr. LEVINE of California, Mr. FEIGHAN, Mr. GARCIA, Mr. WINN, Mr. GILMAN, Mr. LAGOMARSINO, Mr. PRITCHARD, Mr. LEACH of Iowa, Mr. ROTH, Ms. SNOWE, Mr. SOLOMON, Mr. BEREUTER, Mr. SILJANDER, Mr. ZSCHAU, Mr. BONER of Tennessee, Mr. CRAIG, Mr. GEKAS, Mr. MINISH, Mr. PATMAN, Mr. RODINO, Mrs. SCHNEIDER, Mr. HOWARD, Mr. TALLON, Mr. WYLIE, Mr. ST GERMAIN, Mr. WHITEHURST, Mr. FAZIO, Mr. CHANDLER, Mr. VANDERGRIFF, Mr. YOUNG of Florida, Mrs. BOGGS, Mr. DYSON, Mr. RATCHFORD, Mr. LELAND, Mr. WYLIE, Mr. BENNETT, Mr. HORTON, Mr. FOWLER, Mr. WHEAT, Mr. COLEMAN of Texas, Mrs. VUCANOVICH, Mr. UDALL, Ms. FERRARO, Mr. SEIBERLING, Mr. BOLAND, Mr. OXLEY, Mr. DORGAN, Mr. VOLKMER, Mr. SUNIA, Mr. BADHAM, Mr. O'BRIEN, Mr. ACKERMAN, Mr. ANNUNZIO, Mr. BATEMAN, Mr. BEILENSON, Mr. BOEHLERT, Mr. BONIOR of Michigan, Mr. BOUCHER, Mr. BROOKS, Mr. BROYHILL, Mr. CLARKE, Mr. COOPER, Mr. LOWERY of California, Mr. YOUNG of Missouri, Mr. CRAIG, Mr. GRADISON, Mr. JACOBS, Mr. KINDNESS, Mr. JONES of Oklahoma, Mr. KRAMER, Mr. LENT, Mr. LIPINSKI, Mr. LONG of Maryland, Mr. LUKEN, Mr. MCCANDLESS, Mrs. MARTIN of Illinois, Mr. NOWAK, Mr. PRICE, Mr. QUILLEN, Mr. ROSTENKOWSKI, Mr. SENSENBRENNER, Mr. DENNY SMITH, Mr. STAGGERS, Mr. SWIFT, Mr. TAUZIN, Mr. WALGREN, Mr. WISE, Mr. WORTLEY, Mr. DWYER of New Jersey, Mr. FORSYTHE, Mr. VANDER JAGT, Mr. ERLENBORN, Mr. TAUKE, Mr. LUNGREN, Mr. MCDADE, Mr. ANDERSON, Mr. HARRISON, Mr. HEFNER, Mr. OLIN, Mr. MCCURDY, Mr. DREIER of California, Mr. FISH, Mrs. SCHROEDER, Mr. FRANK, Mr. WON PAT, Mr. HATCHER, Mr. STANGELAND, Mr. HANCE, Mr. GUNDERSON, Mr. MRAZEK, Mr. DURBIN, Mr. DOWNEY of New York, Mr. EDWARDS of Alabama, Mr. CLINGER, Mr. MOODY, Mr. KASICH, Mr. BRITT, and Mr. HANSEN of Idaho):

H.J. Res. 353. Joint resolution condemning the Soviet criminal destruction of the Korean civilian airliner; to the Committee on Foreign Affairs.

By Mr. GARCIA:

H.J. Res. 354. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "Carrier Alert Week"; to the Committee on Post Office and Civil Service.

By Mr. LANTOS:

H.J. Res. 355. Joint resolution limiting the number of diplomatic and consular personnel representing the Soviet Union in the United States; to the Committee on Foreign Affairs.

By Mrs. LLOYD (for herself and Mr. COATS):

H.J. Res. 356. Joint resolution designating the week beginning February 12, 1984, as a time to recognize those volunteers who give of their time to become big brothers and big sisters to single parent youths; to the Committee on Post Office and Civil Service.

By Mr. CARR:

H. Con. Res. 161. Concurrent resolution entitled: "The International Airspace Safety Resolution"; to the Committee on Foreign Affairs.

By Mr. FLORIO:

H. Con. Res. 162. Concurrent resolution urging the President to prohibit grain shipments to the Soviet Union unless certain actions are taken by the Soviet Government; to the Committee on Foreign Affairs.

By Mr. PANETTA:

H. Con. Res. 163. Concurrent resolution expressing the sense of the Congress that the Secretary of the Treasury should develop a method for printing currency in a manner which will make the denomination of such currency readily identifiable to an individual who is blind; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MCEWEN:

H. Res. 308. Resolution expressing the sense of the House of Representatives that the President should urge the governments of all countries to immediately prohibit Soviet air traffic from using the airports in their countries, with that prohibition to remain in effect until the Soviet Government provides an official explanation and apology regarding the downing of Korean Air Lines flight 007 in the vicinity of Sakhalin Island on September 1, 1983; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII,

257. The SPEAKER presented a memorial of the General Assembly of the State of Illinois, relative to a solution which will repair existing environmental damage, conserve abandoned mine reclamation funds, and create additional jobs and revenue; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BONIOR of Michigan:

H.R. 3881. A bill for the relief of Elvis J. Stahr, Jr.; to the Committee on the Judiciary.

By Mr. JACOBS:

H.R. 3882. A bill for the relief of Elvis J. Stahr, Jr.; to the Committee on the Judiciary.

By Mr. NATCHER:

H.R. 3883. A bill for the relief of Elvis J. Stahr, Jr.; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 31: Mr. SILJANDER, Mr. TAUKE, Mr. COUGHLIN, Mr. CHAPPIE, Mr. HOYER, Mr. SMITH of New Jersey, Mr. LOWRY of Washington, Mr. DYSON, Mr. FOGLIETTA, Mr. SWIFT, Mr. LONG of Louisiana, Mr. SISISKY, Mr. KILDEE, Mr. ALBOSTA, Mr. BREAUX, Mr. DANIEL B. CRANE, Mr. DANIEL, Mr. STARK, Mr. SCHUMER, Mrs. BOXER, and Mr. LUJAN.

H.R. 325: Mr. BATEMAN.

H.R. 408: Mr. MARLENEE, Mr. SCHAEFER, Mr. HOWARD, Mr. UDALL, and Mr. MITCHELL.

H.R. 481: Mr. NELSON and Mr. WATKINS.

H.R. 507: Mr. CONTE, Mr. LANTOS, Mr. EMERSON, Mr. HARRISON, Mr. YOUNG of Missouri, Mr. FEIGHAN, Mr. LEWIS of Florida, Mr. MCNULTY, Mr. BONER of Tennessee, Mr. MAZZOLI, Mr. GONZALEZ, Mr. BENNETT, Ms. KAPTUR, Mr. WHEAT, Mr. DEWINE, Mr. BONIOR of Michigan, Mr. WILSON, Mr. HYDE, Mr. CLAY, Mr. COELHO, Mr. SMITH of New Jersey, and Mr. FRANK.

H.R. 559: Mr. MARKEY, Mr. SWIFT, Mr. LELAND, Mr. BRYANT, Mr. BATES, Mr. WAXMAN, Mr. RINALDO, Mr. BROYHILL, Mr. MOORHEAD, Mr. OXLEY, Mr. TAUZIN, and Mr. SIKORSKI.

H.R. 951: Mrs. JOHNSON.

H.R. 953: Mr. CONYERS, Mr. WISE, and Mr. SHAW.

H.R. 954: Mr. DOWNEY of New York.

H.R. 983: Mr. WON PAT, Mr. MCNULTY, Mr. ROE, and Mr. CONYERS.

H.R. 1016: Mr. MAVROULES and Mr. SKELTON.

H.R. 1020: Mr. LEVINE of California, Mr. MARKEY, Mr. LUNDINE, and Mr. LEVIN of Michigan.

H.R. 1039: Mr. MINETA and Mr. QUILLEN.

H.R. 1087: Mr. GEKAS.

H.R. 1092: Mr. ROBINSON and Mr. QUILLEN.

H.R. 1147: Mr. WIRTH.

H.R. 1249: Ms. MIKULSKI and Mr. COYNE.
H.R. 1254: Mr. CLAY.
H.R. 1405: Mr. VOLKMER, Mr. BILIRAKIS, and Mr. HARRISON.
H.R. 1540: Mr. FORD of Tennessee, Mrs. KENNELLY, Mrs. BOXER, and Mr. FAZIO.
H.R. 1621: Mr. MCCLOSKEY.
H.R. 1676: Mr. DELLUMS.
H.R. 1693: Mrs. BOXER, Mr. HAWKINS, Mr. PEASE, and Mr. MRAZEK.
H.R. 1881: Mr. BONER of Tennessee, Mrs. LLOYD, Mr. GINGRICH, Mr. GORE, Mr. GRADISON, Mr. HARRISON, Mr. HUBBARD, Mr. LEVIN of Michigan, Mr. LOWRY of Washington, Mr. MAVROULES, Mr. REID, Mr. ROBERT F. SMITH of Oregon, Mr. STRATTON, and Mr. WEBER.

H. Res. 303: Mr. OTTINGER, Mr. GILMAN, and Mr. GREEN.

AMENDMENTS

Under clause 6 of rule XXII, proposed amendments were submitted as follows:

H.R. 5

By Mr. FIELDS:

—Page 11, line 20, strike out all after the comma following the word "Sound" down through and including the comma in line 21.

—Page 13, line 25, strike out "$300,000,000" and insert in lieu thereof "$275,000,000".

—Page 14, line 23, insert "with outer Continental Shelf-related energy or mineral leasing, exploration, development or production within 250 miles of such State's territorial waters" immediately after "each Coastal State".

—Page 15, line 23, strike out all down through and including line 4 on page 17, and insert in lieu thereof the following:

"(1) The amount of actual leasing with respect to oil and gas and other energy resources which is carried out under the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) during the previous fiscal year which occurs within 250 miles of a state's coastline.

"(2) The volume of oil and gas produced from outer Continental Shelf acreage leased by the Federal Government which is first landed in such coastal States during the previous fiscal year.

"(3) For each coastal State, any proposed oil and gas lease sales which are specified by the outer Continental Shelf leasing program prepared pursuant to section 18(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1344(a)) and which are scheduled to occur within the outer Continental Shelf planning area to which such coastal State is adjacent.

"(4) The coastal related energy facilities located within each coastal State during the previous fiscal year.

"(5) The shoreline mileage of each coastal State.

"(6) The coastal population of each coastal State.".

Strike all of subsections "(d) and "(e) and insert in lieu thereof the following new subsection "(d)":

"(d) If a tract located on the outer Continental Shelf, for the purposes of paragraph (1) of this subsection, is located within 200 miles of more than one state, equal consideration shall be given to each such state when calculating the amount of block grant as if said tract was located within the planning area the affected State is located.".

—Page 18, line 6, strike the words "authorized by", and insert in lieu thereof "outlined".

Page 18, line 9, strike out the words "pursuant to", and insert in lieu thereof, "outlined".

Page 18, line 21, strike the words "authorized by", and insert in lieu thereof "outlined".

—Page 19, strike the colon in line 10, and all that follows down through and including the period in line 18, and insert in lieu thereof a period.

—Page 20, line 16, strike "35" and insert in lieu thereof, "50".

H.R. 1010

By Mr. BEREUTER:

(Amendments to the amendment in the nature of a substitute (text of H.R. 3857).)

—Page 4, in line 9, and page 6, in line 4, after "Act" insert "(other than section 3A)".

Page 6, after line 6, insert the following:

USE OF CERTAIN WATER PROHIBITED

SEC. 3A. In the case of a coal pipeline which is used to transport coal through more than one State and for which a certificate was issued under section 10, no groundwater may be used by that pipeline unless the Secretary of the Interior determines that—

(1) the only source of any groundwater used by such pipeline will be an aquifer which is located under a single State, or

(2) the source of groundwater used by such pipeline will be an aquifer which underlies more than one State and there is in effect between or among those States which overlie such aquifer, and which are adversely affected, an interstate compact which governs the use of that groundwater by the pipeline.

—Page 4, in line 9, and page 6, in line 4, after "Act" insert "(other than section 3A)".

Page 6, after line 6, insert the following:

USE OF CERTAIN WATER PROHIBITED

SEC. 3A. (a) In the case of a coal pipeline which is used to transport coal, through more than one State and for which a certificate was issued under section 10, no groundwater may be used by that pipeline unless the Secretary of the Interior determines that—

(1) the only source of any groundwater used by such pipeline will be an aquifer which is located under a single State, or

(2) the source of groundwater used by such pipeline will be an aquifer which underlies more than one State and there is in effect between or among those States which overlie such aquifer, and which are adversely affected, an interstate compact which governs the use of that groundwater by the pipeline.

(b) In the case of a coal pipeline which is used to transport coal through more than one State and for which a certificate was issued under section 10, no surface water may be used by that pipeline unless the Secretary of the Interior determines that—

(1) the only source of any surface water used by such pipeline will be an intrastate river, stream, or other body of surface water,

(2) the source of any surface water used by such pipeline will be an interstate river or stream, and there is in effect an interstate compact, which governs the use of that surface water by the pipeline, between or among the divesting State and each State located downstream of such diversion and prior to the confluence with a stream or river of which it is a tributary.

(3) the source of any surface water used by such pipeline will be an interstate lake or other standing body of water and there is in effect between or among the withdrawing State and each other State in which the lake or other water body is located or by which it is bounded an interstate compact which governs the use of that surface water by the pipeline.

And make the necessary conforming changes in the table of contents.

By Mr. DURBIN:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).)

—On page 21, starting at line 7, amend H.R. 3857 by adding a new subsection under section 10(d)(3) and renumbering existing subsection 10(d)(3) and succeeding sections accordingly:

(3). Prior to the issuance of any determination of national interest, the Secretary shall notify the Secretary of Agriculture of his consideration of the application for such a determination. The Secretary and the pipeline applicant shall provide such information as the Secretary of Agriculture shall require to conduct a review of the effect of the diversion of water by the pipeline project on agriculture, including irrigation needs, and of the effect of the pipeline route on agricultural lands. The Secretary of Agriculture shall have one hundred and twenty (120) days from the date of receipt of such notification to conduct such review and to advise the Secretary of his findings. The Secretary shall not issue any certificate

pursuant to Section 10 unless he has received a report and accompanying findings from the Secretary of Agriculture advising that (1) such action would not divert water in any detrimental way from agricultural needs, including existing and future agricultural irrigation needs, in the region affected by the diversion, and (2) the proposed pipeline route was devised to minimize crossings of prime agricultural lands and of agricultural water sources.

By Mr. HAMMERSCHMIDT:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).)

—In section 3 of the amendment in the nature of a substitute—

(1) strike out "and" at the end of paragraph (6);

(2) strike out the period at the end of paragraph (7) and insert in lieu thereof "; and"; and

(3) insert after paragraph (7) the following:

"(8) no State shall sell or otherwise transfer or permit the sale or transfer, for use in a coal pipeline for which a certificate is issued under section 10 of this Act outside of such State, water which is taken from any river or other body of surface water which is located in or which passes through more than one State or from any aquifer or other body of ground water which underlies more than one State unless—

"(A) there is in effect an interstate compact (i) among the States in the drainage basin of such river or other body of surface water, or (ii) among the States under which such acquifer or other body of ground water lies, which governs such sale or transfer, and

"(B) all the States which are parties to such compact consent to such sale or transfer.".

By Mr. SHUSTER:

(Amendments to the amendment in the nature of a substitute (text of H.R. 3857).)

—Page 35, line 6, strike out "and".

Page 35, line 7, strike out the period and insert in lieu thereof the following: ", and (D) establishing a maximum allowable cost for the construction of the coal pipeline or extension. For purposes of the preceding sentence, maximum allowable cost shall be exclusive of any cost increase that results from subsequent inflation or an unanticipated grave, natural disaster or other natural phenomenon of an exceptional, inevitable, and unavoidable character. The Commission shall establish the maximum allowable cost for each pipeline by considering, at a minimum, the reasonableness of the design of the pipeline and of the construction cost projections for the pipeline.".

Page 57, after line 7, insert the following:

"(g) The Commission shall not approve under this section any contract for the transportation of coal by pipeline with respect to which a certificate is issued under section 10952 of this subchapter if such contract will allow recovery of any portion of the cost of the construction of such pipeline in excess of (1) the maximum allowable cost established for such construction under subsection (b)(3)(D) of such section, plus (2)(A) any cost increase that results from subsequent inflation, and (B) any cost increase that results from an unanticipated grave, natural disaster, or other natural phenomenon of an exceptional, inevitable, and unavoidable character.".

Redesignate the subsequent subsections accordingly.

Page 63, after line 21, insert the following:

"§ 10960. Maximum allowable cost

"Notwithstanding any provision of chapter 107 of this title, no rate for the transportation of coal by a coal pipeline or extension thereof for which a certificate is issued under section 10952 of this subchapter shall provide for recovery of any portion of the cost of the construction of such coal pipeline or extension thereof in excess of (1) the maximum allowable cost established for such construction under subsection (b)(3)(D) of such section, plus (2)(A) any cost increase that results from subsequent inflation, and (B) any cost increase that results from an unanticipated grave, natural disaster, or other natural phenomenon of an exceptional, inevitable, and unavoidable character.".

Page 63, line 22, strike out "10960" and insert in lieu thereof "10961".

Page 66, after line 14, strike out

"10960. Definitions.".

and insert in lieu thereof

"10960. Maximum allowable cost.

"10961. Definitions.".

—In paragraph (4) of section 9(a) of the amendment in the nature of a substitute, strike out ", except that" and all that follows through the period at the end of such paragraph and insert in lieu thereof a period.

—In the first sentence of section 9(a)(1) of the amendment in the nature of a substitute, strike out "private lands" and insert in lieu thereof "those lands owned by any common carrier engaged in the interstate transportation of coal which are".

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(l) No certificate may be issued to or held by any person under this section who controls, is controlled by, or is under common control with, any person who—

(1) uses or will use coal transported by the coal pipeline constructed or proposed to be constructed pursuant to such certificate, or

(2) supplies or will supply coal to such pipeline.

—In addition to the meaning given the term "control" by section 10102(7) of this subtitle, any person who owns 5 percent of the voting stock of another person shall be deemed to control such other person for purposes of this subsection.

—At the end of section 10 of the amendment in the nature of a substitute, insert the following new subsection:

(l) Any certificate issued by the Commission shall establish a maximum allowable cost for the construction of the coal pipeline or extension. For purposes of the preceding sentence, maximum allowable cost shall be exclusive of any cost increase that results from subsequent inflation or an unanticipated grave, natural disaster or other natural phenomenon of an exceptional, inevitable, and unavoidable character. The Commission, in cooperation with the Federal Energy Regulatory Commission, shall establish the maximum allowable cost for each pipeline by considering, at a minimum, the reasonableness of the design of the pipeline and of the construction cost projections for the pipeline.

In the matter proposed to be inserted as section 10954(d) of title 49, United States Code, by section 14(a) of the amendment in the nature of substitute—

(1) strike out "or" at the end of paragraph (3),

(2) strike out the period at the end of paragraph (4) and insert in lieu thereof "; or", and

(3) insert after paragraph (4) the following new paragraph:

"(5) in the case of a pipeline with respect to which a certificate is issued under such section, if the contract will allow recovery of any portion of the cost of the construction of such pipeline in excess of (A) the maximum allowable cost established for such construction under subsection (1) of such section, plus (B)(i) any cost increase that results from subsequent inflation, and (ii) any cost increase that results from an unanticipated grave, natural disaster, or other natural phenomenon of an exceptional, inevitable, and unavoidable character.".

In the matter proposed to be inserted as subchapter III of title 49, United States Code, by section 14(a) of the amendment in the nature of a substitute, insert after section 10955 the following:

"§ 10956. Maximum allowable cost

"Notwithstanding any provision of chapter 107 of this title, no rate for the transportation of coal by a coal pipeline or extension thereof for which a certificate is issued under section 10 of the Coal Pipeline Act of 1983 shall provide for recovery of any portion of the cost of the construction of such coal pipeline or extension thereof in excess of (1) the maximum allowable cost established for such construction under subsection (1) of such section, plus (2)(A) any cost increase that results from subsequent inflation, and (B) any cost increase that results from an unanticipated grave, natural disaster, or other natural phenomenon of an exceptional, inevitable, and unavoidable character.".

In the matter proposed to be inserted as subchapter III of title 49, United States Code, by section 14(a) of the amendment in the nature of a substitute, strike out "§ 10956" and insert in lieu thereof "§ 10957".

In the matter proposed to be inserted in the analysis to chapter 109 of title 49, United States Code, by section 14(b) of the amendment in the nature of a substitute, strike out

"10956. Definitions.".

and insert in lieu thereof

"10956. Maximum allowable cost.

"10957. Definitions.".

—In section 10(d)(2) of the amendment in the nature of a substitute—

(1) after "point of destination" in subparagraph (D), insert", at the point of origin,"; and

(2) after subparagraph (D), insert the following new sentence: "The Secretary shall consult with the United States Geological Survey in making findings under subparagraph (D).".

—In section 10(f)(1)(B) of the amendment in the nature of a substitute—

(1) strike out "and" at the end of clause (iii);

(2) redesignate clause (iv) as clause (v); and

(3) insert after clause (iii) the following:

"(iv) a list of the names of persons who have a financial interest in such pipeline or extension and a certification of whether or not any coal to be transported in such pipeline or extension is owned by any such person or any person affiliated with any person who has such a financial interest, and".

—At the end of the matter proposed to be inserted as section 10954 of title 49, United States Code, by section 14(a) of the amendment in the nature of a substitute, insert the following:

"(i) If a coal pipeline carrier is providing transportation of coal under a contract approved under this section in competition with a common carrier providing transportation subject to the jurisdiction of the Commission under subchapter I of chapter 105 of this title, such common carrier, for purposes of chapter 107 of this title, shall be irrebuttably presumed not to have market dominance over any transportation of coal in competition with the transportation of coal provided by the coal pipeline carrier.".

—At the end of the matter proposed to be inserted as section 10954 of title 49, United States Code, by section 14(a) of the amendment in the nature of a substitute, insert the following:

"(i) Not later than 10 days after the date of filing of a contract under this section, the Commission shall notify the Attorney General of its consideration of such contract. The Commission shall provide such information as the Attorney General shall require to conduct an antitrust review to determine the likely effects upon competition associated with the approval of such contract. No contract shall be approved under this section unless the Attorney General shall have advised the Commission in writing that, on the basis of such review, approval of the contract will not be inconsistent with the antitrust laws and will not restrain competition.".

—In the second sentence of section 15(a)(1) of the amendment in the nature of a substitute—

(1) strike out "or under construction"; and

(2) strike out "with" and all that follows through the period at the end of such sentence and insert in lieu thereof the following: "facilities of a coal pipeline or extension thereof construction of which are substantially completed on such date.".

—At the end of the amendment in the nature of a substitute, add the following new section:

LIMITATION ON OWNERSHIP OF COAL PIPELINES

SEC. 19. No coal pipeline for which a certificate has been issued under section 10 of this Act may transport coal owned by any person who has a financial interest in such coal pipeline or who controls, is controlled by, or is under common control with, any person who has such a financial interest. For purposes of this section, the term "control" has the meaning such term has under section 10102 of title 49, United States Code.

—At the end of the amendment in the nature of a substitute, add the following new section:

NONSEVERABILITY

SEC. 19. If any provision of this Act or the applicability thereof to any person or circumstance is held invalid, the remainder of this Act and the application of such provision to other persons or circumstances shall be invalid.

—At the end of the amendment in the nature of a substitute, add the following new section:

NONAPPLICABILITY

SEC. 19. Notwithstanding any other provision of this Act (including any amendment made by this Act), nothing in this Act (including any such amendment) shall apply to any carrier of coal by pipeline with respect to which a certificate is not issued under section 10 of this Act.

By Mr. SNYDER:

(Amendments to the amendment in the nature of a substitute (text of H.R. 3857).)

—In section 2(a)(6) of the amendment in the nature of a substitute, strike out "or" and insert in lieu thereof "and".

—In section 2(b) of the amendment in the nature of a substitute, strike out "or" the first place it appears and insert in lieu thereof "and".

—In section 6(a) of the amendment in the nature of a substitute, strike out "(other than paragraph (iv) of subsection (a) thereof)".

—In section 9(d) of the amendment in the nature of a substitute—

(1) insert "(1)" after "such person"; and

(2) insert before the period at the end thereof the following: ", or (2) is unable under State law to acquire the right-of-way by exercise of the power of eminent domain".

—At the end of subsection (e) of section 10 of the amendment in the nature of a substitute, insert the following:

"(4) Nothing in this Act or any amendment made by this Act shall be construed to bar the Attorney General or the Federal Trade Commission from challenging any anticompetitive situation involved in the operation of a coal pipeline.".

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

"(l) No certificate may be issued under this section unless the Commission finds that there is a substantial likelihood that the rates to be charged by the applicant for the transportation of coal will be less than those which would otherwise be actually charged by other common carriers for the transportation of such coal.".

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

"(l) No certificate issued under this Act may be sold, exchanged, assigned, or otherwise transferred except upon approval of the Commission following consultation with the Attorney General.".

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(l) Each certificate issued under this section shall contain such terms and conditions as the Commission and Secretary deems necessary to—

(1) control or prevent damage to scenic and aesthetic values and fish and wildlife habitat and otherwise protect the environment from adverse effects associated with construction, operation, or maintenance of such coal pipeline or extension thereof;

(2) require compliance with applicable air and water quality standards established by or pursuant to applicable Federal or State law;

(3) require compliance with regulations issued by the Secretary of Transportation under section 15 of this Act for the safe construction, operation, and maintenance of coal pipelines;

(4) provide for the revegetation, restoration, and curtailment of erosion of any land which is disturbed by the coal pipeline or extension thereof;

(5) protect the public health and safety;

(6) protect property;

(7) protect the interest of individuals who live in the general area traversed by the coal pipeline or extension thereof and rely on the resources of the area;

(8) require the location of the coal pipeline or extension thereof along a route that will take in account the least damage to the environment, economic, and technical feasibility and other relevant factors; and

(9) otherwise protect the public interest.

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(l) No certificate shall be issued to an applicant under this section for the transportation of coal by coal pipeline until—

(1) the applicant submits or discloses to the Commission and the Secretary any plan, contract, agreement, or other information which the Commission and the Secretary determine is reasonably related to the use, or intended use, of the coal pipeline or extension thereof, including its effect on competition, and which the Commission and the Secretary deem necessary to determine whether such certificate should be issued or to determine the terms and conditions which should be included in the certificate to protect the public interest; and

(2) in any case in which the applicant is a partnership, corporation, association, or other business entity, the applicant discloses to the Commission and the Secretary the identity of the participants in the entity and such other information as the Commission and the Secretary deem necessary to determine whether such certificate should be issued and to determine the terms and conditions which should be included in such certificate to protect the public interest.

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(l) No certificate may be issued to, or held by, any person under this section who controls, is controlled by, or is under common control with, any person who—

(1) uses or will use coal transported by the coal pipeline constructed or proposed to be constructed pursuant to such certificate, or

(2) supplies or will supply coal to such pipeline.

For purposes of this subsection, the term "control" has the meaning such term has under section 10102 of title 49, United States Code; except that any person who owns 5 percent or more of the voting stock of another person shall be deemed to control, to be controlled by, or to be under common control with, such other person unless such person demonstrates to the Commission by clear and convincing evidence, in a hearing on the record, that such person does not control, is not controlled by, or is not under common control with, such other person.

—In the last sentence of paragraph (2) of section 10(h) of the amendment in the nature of a substitute, strike out "the Secretary and the Commission shall notify the President" and all that follows through the period at the end of such sentence and insert in lieu thereof "the Commission shall not issue the certificate.".

—The amendment in the nature of a substitute is amended by striking out section 14 and inserting in lieu thereof the following:

COMMON CARRIER OBLIGATION

SEC. 14. Transportation of coal by coal pipeline for which a certificate is issued under section 10 of this Act shall be subject to the jurisdiction of the Commission under subchapter I of chapter 105 of subtitle IV of title 49, United States Code, as a pipeline carrier and the coal pipeline shall be constructed, operated, maintained, and extended as a common carrier, in fact, fully

subject to rate and charge regulation by the Commission under such subtitle.

In the table of contents in section 1 of the amendment in the nature of a substitute, strike out

"Sec. 14. Amendment to Interstate Commerce Act."

and insert in lieu thereof

"Sec. 14. Common carrier obligation.".

In section 10 of the amendment in the nature of a substitute—

(1) in subsection (c), strike out paragraph (5) and redesignate paragraph (6) as paragraph (5);

(2) in the last sentence of subsection (g), strike out "and indicate" and all that follows through the period at the end of such sentence and insert in lieu thereof a period; and

(3) strike out subsections (j) and (k).

—At the end of the matter proposed to be inserted as section 10954 of title 49, United States Code, by section 14(a) of the amendment in the nature of a substitute, insert the following:

"(i) The Commission shall not approve under this section any contract for the transportation of coal by pipeline if the contract is to be effective for any period longer than five years.".

—At the end of the matter proposed to be inserted as section 10954 of title 49, United States Code, by section 14(a) of the amendment in the nature of a substitute, insert the following:

"(i)(1) The Commission shall not approve under this section any contract for the transportation of coal by pipeline if the contract contains a take-or-pay clause which requires payment, in whole or in part, for any level of transportation services in excess of 50 percent of the maximum level of transportation services contracted for under the contract or for any quantity of coal in excess of 50 percent of the maximum quantity of coal contracted for under the contract.

"(2) The Commission shall not approve under this section any contract for the transportation of coal by pipeline if any contract relating to the purchase of such coal contains any take-or-pay clause which requires payment, in whole or in part, for any level of transportation services in excess of 50 percent of the maximum level of transportation services contracted for under the contract or for any quantity of coal in excess of 50 percent of the maximum quantity of coal contracted for under the contract.

"(3) The Commission shall revoke the approval under this section of any contract for the transportation of coal by pipeline if, after such approval, the Commission determines that any contract relating to the purchase of such coal contains any take-or-pay clause which requires payment, in whole or in part, for any level of transportation services in excess of 50 percent of the maximum level of transportation services contracted for under the contract or for any quantity of coal in excess of 50 percent of the maximum quantity of coal contracted for under the contract.

"(4) In this subsection, 'take-or-pay clause' means—

"(A) any contract provision which requires payment, in whole or in part, for any minimum level of transportation services contracted for under the contract in the event that the transportation services are not utilized; and

"(B) any contract provision which requires payment, in whole or in part, for any minimum quantity of coal contracted for under the contract in the event that delivery of the coal is not taken.

Such term also includes any other contract clause which the Commission determines has the same effect.".

—At the end of the matter proposed to be inserted as section 10954 of title 49, United States Code, by section 14(a) of the amendment in the nature of a substitute, insert the following:

"(i)(1) The Commission shall not approve under this section any contract for the transportation of coal by pipeline if such contract contains a take-or-pay clause respecting such coal.

"(2) The Commission shall not approve under this section any contract for the transportation of coal by pipeline if any contract relating to the purchase of such coal contains any take-or-pay clause respecting such coal.

"(3) The Commission shall revoke the approval under this section of any contract for the transportation of coal by pipeline if, after such contract, the Commission determines that any contract relating to the purchase of such coal contains any take-or-pay clause respecting such coal.

"(4) In this subsection, 'take-or-pay clause' means—

"(A) any contract provision which requires payment, in whole or in part, for a minimum level of transportation service contracted for under the contract in the event that the transportation service is not utilized;

"(B) any contract provision which requires payment, in whole or in part, for a minimum quantity of coal contracted for under the contract in the event that delivery of the coal is not taken; and

"(C) any contract provision which otherwise prevents the shipper of coal from responding to the demands of consumers or other market forces by requiring the shipper of coal to pay, in whole or in part, for minimum services contracted for under the contract in the event that such services are not provided.

Such term also includes any other contract clauses which the Commission determines has the same effect.".

—In section 16 of the amendment in the nature of a substitute—

(1) strike out "may" and insert in lieu thereof "shall"; and

(2) strike out "commencement of operation of" and insert in lieu thereof "receipt of coal delivered through".

—After section 17 of the amendment in the nature of a substitute, insert the following new section:

ABANDONMENT PROVISIONS

SEC. 18. (a) A person holding a certificate issued under section 10 of this Act may—

(1) abandon any part of its coal pipeline; or

(2) discontinue the operation of all coal pipeline transportation over any part of its coal pipeline;

only if the Commission finds (A) that the present or future public convenience and necessity require or permit the abandonment or discontinuance, or (B) that water used for transporting the coal has been reduced by circumstances beyond the control of such person to an amount insufficient to continue the transportation of coal, or (C) that the available supply of coal is depleted to the extent that continued service is unwarranted.

(b)(1) A proceeding to permit abandonment or discontinuance under subsection (a) of this section begins on application filed with the Commission. If the Commission—

(A) finds public convenience and necessity requires or permits abandonment or discontinuance, it shall—

(i) approve the application as filed; or

(ii) approve the application with modifications and require compliance with conditions that the Commission finds are required by public convenience and necessity; or

(B) fails to find public convenience and necessity requires or permits abandonment or discontinuance, it shall deny the application.

(2) On approval, the Commission shall issue to the person holding a certificate issued under section 10 of this Act a certificate describing the abandonment or discontinuance approved by the Commission.

(c) The abandonment or discontinuance approved by the Commission shall take effect on the 60th day after the date of issuance of the certificate under this section.

Redesignate section 18 of the amendment in the nature of a substitute as section 19.

In the table of contents in section 1 of the amendment in the nature of a substitute—

(1) insert after

"Sec. 17. Buy American."

the following:

"Sec. 18. Abandonment provisions."; and

(2) redesignate the item relating to section 18 as section 19.

EXTENSIONS OF REMARKS

PROF. PHILLIP A. GRANT, JR., PRESENTS PAPER ON CONGRESSIONAL BLACK CAUCUS AND NUCLEAR FREEZE RESOLUTION

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MITCHELL. Mr. Speaker, I am happy to share a copy of the paper entitled, "The Congressional Black Caucus and the Nuclear Freeze Resolution." This paper was presented by Phillip A. Grant, Jr., associate professor of History at Pace University of New York, at the June 4 conference on the Arms Race versus Human Needs in Nashville, TN. The complete text follows:

"THE CONGRESSIONAL BLACK CAUCUS AND THE NUCLEAR FREEZE RESOLUTION"

(By Phillip A. Grant, Jr.)

On June 23, 1982 the Committee on Foreign Affairs of the House of Representatives voted 26-11 in favor of a joint resolution calling for a nuclear freeze. The nuclear freeze resolution had been introduced earlier on the same day by the committee's chairman, Representative Clement J. Zablocki of Wisconsin. The avowed object of the resolution was to express profound concern over the threat posed to the peace and safety of the world by the nuclear arms race.[1]

Voting for the nuclear freeze resolution were nineteen Democrats and seven Republicans, while opposing the measure were two Democrats and nine Republicans. The dissenting Democrats were Lawrence H. Fountain of North Carolina and Andy Ireland of Florida. Fountain, completing his fifteenth term in the House, had announced his decision to retire on March 27, and Ireland, seeking re-election to his fourth term in 1982, was the spokesman for an affluent constituency on Florida's Gulf Coast. Extremely conservative southerners, Fountain and Ireland had compiled virtually unblemished records of support for the domestic and foreign policy legislation advocated by Republican President Ronald Reagan.[2]

Among the twenty-six congressmen voting affirmatively on the nuclear freeze question were two members of the Congressional Black Caucus, Representatives George W. Crockett, Jr. of Michigan and Mervyn M. Dymally of California. Crockett, a former municipal judge in Detroit, served a district which had been occupied by a Black since 1955. Dymally, who previously had been Lieutenant-Governor of California, had recently been renominated to a second term.[3]

Zablocki, in behalf of the committee, issued the formal report on the nuclear freeze resolution on July 19. It was anticipated that the resolution would be brought to the House floor for consideration in early August. In what was destined to be the most exciting foreign policy debate since the height of the Vietnam War the four hundred and thirty-five members of the House would be afforded the opportunity to voice their convictions on the role which the United States government should play in facilitating a reversal of nuclear armament.[4]

On August 4, 1982 the House scheduled nine hours of debate on the nuclear freeze resolution. The proponents insisted that adoption of the resolution would convey the message that the House genuinely desired a halt to the nuclear arms race. The adversaries argued that passage of the resolution would weaken the Reagan Administration's leverage in negotiating a satisfactory arms agreement with the Soviet Union. The Reagan Administration was adamant in its opposition to the resolution and worked diligently to assure that the vast majority of House Republicans and Southern Democrats would cast negative votes.

Voicing unqualified support for the nuclear freeze resolution were five members of the Congressional Black Caucus, William H. Gray III of Pennsylvania, Louis Stokes of Ohio, Cardiss Collins of Illinois, William Clay of Missouri, and Ronald V. Dellums of California. Denouncing a nuclear war as an "equal opportunity destroyer," Gray asserted that the resolution emphasized that the "world's leaders must recognize this ultimate threat to humanity." Stokes, hailing the resolution as an "idea whose time has come," was encouraged that the American people in ever increasing numbers were demanding an end to the "madness" of producing large quantities of nuclear arms. According to Collins, passage of the resolution "will not only move America a step closer to a safer and brighter future, but will bring the whole world a step closer to that future." Branding the threat of nuclear war the "gravest danger to humanity ever known in the history of the world," Clay urged his colleagues to acknowledge that it was "time to stand up in the name of the human race." Dellums, convinced that the world was "in imminent danger from the potential of nuclear holocaust," implored the House to have the "boldness to challenge these weapons systems that are threatening our lives and challenging the future of the American people."[5]

The tone of the debate in the House chamber suggested that the membership was almost evenly divided on the nuclear freeze issue. Instead of attempting to effect the outright defeat of the resolution, most of its House critics wished to dilute its impact. Accordingly, they rallied around a substitute resolution authored by Republican Representative William S. Broomfield of Michigan. The Broomfield Substitute was in effect a vague endorsement of the Administration's nuclear policy. In an extraordinarily close roll call the substitute prevailed by a 204-202 margin. If a single vote had changed, the tabulation would have been 203-203 and the substitute would have been defeated. Rejection of the Broomfield measure would have guaranteed a fateful House vote strictly for or against the original Zablocki Resolution.[6]

As expected, the Broomfield Substitute attracted broad support within the ranks of Republicans and Southern Democrats. Republicans approved the substitute 151-27 (85.3 percent) and Democrats from the South were aligned 42-26 (61.8 percent) in favor of its passage. By contrast Northern Democrats opposed the substitute by a resounding 149-11 majority (93.1 percent). Interestingly, five of these eleven Northern Democrats were serving the final months of their congressional careers.[7]

The members of the Congressional Black Caucus ballotted 16-0 against the Broomfield Substitute, thus providing the largest bloc of negative votes in the House. These Black congressmen, representing urban districts from Brooklyn, New York in the Northeast to Los Angeles in the Southwest, were deeply upset over the Reagan Administration's obsession with an unprecedented defense buildup and its determination to secure massive cuts in social programs.[8]

In the aftermath of the elections of 1982 there were several indicators which proved quite encouraging to the future prospects of a nuclear freeze resolution. On November 2, 1982 the Democrats gained an impressive total of twenty-six seats in the House. Among those defeated were twenty-one Republican incumbents who had cast votes for the Broomfield Substitute. Also, eight Republicans and four Democrats who had supported the substitute opted to retire from public life at the expiration of their congressional terms. Finally, ten other congressmen who had contributed to passage of the substitute were either defeated in party primaries or relinquished their House seats to engage in contests for governorships or the United States Senate. When the newly elected Congress assembled in January 1983, forty-three of the individuals who had favored the Broomfield Substitute were no longer members of the House of Representatives.[9]

Among the liberal Democrats elected to the House on November 2 were three new members of the Congressional Black Caucus. They were Edolphus Towns of New York, Katie Hall of Indiana, and Alan Wheat of Missouri. Towns, Deputy Borough President of Brooklyn, was elected from a district created after New York lost five congressional seats in the Census of 1980. A veteran of both Houses of the Indiana Legislature, Hall succeeded a highly respected white Democrat who had died in the late summer. Wheat, a member of the Missouri House of Representatives, was chosen as the congressman from a constituency embracing Kansas City. Towns, Hall, and Wheat had campaigned for Congress as harsh critics of the policies espoused by the Reagan Administration.[10]

On the opening day of the Ninety-Eighth Congress Chairman Zablocki reintroduced his nuclear freeze resolution. After nine weeks, the Foreign Affairs Committee voted 27-9 in favor of the Zablocki Resolution. Twenty-three Democrats were joined by four Republicans in support of the resolution, while one Democrat and eight Republicans were recorded against the resolution. Consistent with their previous stands, the

[1] Footnotes at end of article.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

resolution was endorsed by Black Caucus members Crockett and Dymally.[11]

Pledging their enthusiastic support of the 1983 nuclear freeze resolution were Representatives Collins, Parren J. Mitchell of Maryland, and Harold E. Ford of Tennessee and Delegate Walter B. Fauntroy of the District of Columbia. Collins, satisfied that the Congress was "responding to the loud clamor of the American people," identified the nuclear freeze resolution as "one of the most important issues this Congress, or indeed any Congress, has to deal with." Declaring that the genius of mankind should be used to "protect and preserve life," Mitchell complained that, because of nuclear weapons, "life on this earth, as we know it, stands in grave jeopardy". Ford warned that without the passage of the nuclear freeze resolution "we will continue to waste billions of dollars on weapons that can only assure our eventual destruction." Foreseeing that the continuing arms race increased the possibility of a nuclear conflict, Fauntroy perceived a "moral link between the vast spending on arms and the disgracefully low spending on measures to remove hunger and ill-health in the Third World." [12]

Unlike 1982, the House debated the Zablocki Resolution for forty-two hours over a period of eight weeks. Hoping to delay a final vote on the resolution's merits, the Republicans resorted to obstructionist tactics by offering dozens of substantive amendments. Amendments proposed by Representatives Mark D. Siljander of Michigan and James G. Martin of North Carolina, both of which would have emasculated the text of the resolution, were defeated by tallies of 215–209 and 211–204 respectively. Siljander, an apologist for the "Moral Majority", had succeeded Budget Director David Stockman in the House, while Martin was serving his sixth term from a district which in the nineteen seventies had been the scene of the nation's most acrimonious school desegregation dispute. Republicans supported the Siljander Amendment 152–11 (93.7 percent) and Southern Democrats voted 49–37 (56.9 percent) for its passage. The comparative figures for the Martin Amendment were 142–21 (87.4 percent) and 52–33 (61.2 percent). The members of the Congressional Black Caucus balloted 19–0 against the Siljander Amendment and 17–0 against the Martin Amendment, thus furnishing the margins of victory on the two pivotal roll calls.[13]

Shortly before the vote on the ultimate disposition of the Zablocki Resolution, the House on a 221–203 roll call attached an amendment by Elliott H. Levitas of Georgia, a conservative Democrat from suburban Atlanta. The Levitas Amendment decreed that a nuclear freeze must be followed by a nuclear arms reduction, thereby prescribing a condition to the Zablocki Resolution. The amendment was supported 155–11 (93.7 percent) by Republicans and 54–34 by Southern Democrats. The Black Caucus, recognizing that the Levitas Amendment would needlessly complicate a basically simple issue, voted 17–0 against its adoption. After the Speaker's gavel fell, the House was recorded 278–149 in favor of the modified Zablocki Resolution. Notwithstanding the inclusion of the Levitas Amendment, Republicans opposed the resolution's passage 106–60 (63.8 percent). Southern Democrats divided 50–39 (56.2 percent) in the affirmative. The Congressional Black Caucus voted 18–0 for the Zablocki Resolution, thus maintaining a pattern of unanimity which had been evident since the early stages of the House debate on the nuclear freeze in the summer of 1982.[14]

Between June 1982 and May 1983 the nuclear freeze resolution was subjected to an extraordinary amount of sustained publicity. The nuclear freeze issue proved to be a major, if not overriding, consideration in the congressional elections of November 1982. According to all the respected public opinion polls, a overwhelming majority of the American people favor a firm commitment to a nuclear freeze. The twenty-one members of the Black Caucus, like their several hundred colleagues in the House of Representatives, were addressing themselves to a question of paramount concern to the welfare of our nation. By unanimously supporting a nuclear freeze resolution they were contributing positively to the betterment of our democratic system as well as to the future of humanity. The Congressional Black Caucus, which for more than a decade has been in the forefront of the social justice movement, in 1982 and 1983 mobilized its efforts in behalf of a resolution of unprecedented magnitude.

SUPPORT GROWS FOR BAN ON "COP KILLER BULLETS"

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. BIAGGI. Mr. Speaker, as a 23-year veteran of the New York City Police Department, I am pleased to report that support for my bill, H.R. 953, to outlaw "Cop Killer Bullets"—armor-piercing handgun ammunition that can penetrate the bulletproof vests worn by police—is growing.

Police departments and organizations across the country have endorsed my bill, without dissent. Endorsements have come from such leading police groups as the International Association of Chiefs of Police, the Fraternal Order of Police, the International Union of Police Associations, the International Brotherhood of Police Officers, the National Association of Police Organizations, and the Federal Law Enforcement Officers Association.

Eleven States have already enacted laws against armor-piercing handgun bullets. They include Alabama, California, Florida, Illinois, Indiana, Kansas, Minnesota, Oklahoma, Rhode Island, Texas, and Virginia.

H.R. 953 has the bipartisan support of over 170 House cosponsors, and an identical bill, S. 555, has been introduced in the Senate by Senator MOYNIHAN.

The U.S. Justice Department has also expressed their support for a ban on armor-piercing handgun bullets. In a letter to me earlier this year they wrote:

The Department of Justice fully shares your commitment to protecting law enforcement officials from the threat posed by armor-piercing ammunition * * * our clear objective is to prevent criminals from

having access to handgun bullets designed to penetrate armor * * * any further delay is a tragic mistake.

Specifically, my bill would ban the future manufacture, importation and sale of armor-piercing handgun ammunition, except when needed for law enforcement or military use. It would also provide a mandatory 1-to-10 year prison sentence for any person using these bullets in a crime.

The ban would only apply to armor-piercing handgun bullets. H.R. 953 is not designed to affect rifle ammunition in any way.

There are approximately eight different handgun bullets that H.R. 953 seeks to ban. These bullets are not used for legitimate purposes, but they have been used by criminals to shoot and kill police officers.

Ironically, armor-piercing handgun ammunition was originally designed for police use. However, police departments do not use these bullets because they are far too dangerous; not only because of their awesome penetration capacity, but also because they pose greater ricochet hazards than the more conventional ammunition.

Mr. Speaker, other convincing arguments for a Federal ban on "Cop Killer Bullets" were recently presented in a New York Times' editorial, and in an article on the subject by nationally syndicated columnist Mike Royko. At this time I wish to insert those endorsements in the RECORD:

[From the New York Times, Aug. 29, 1983]

KILL THE "COP-KILLER" BULLETS

"Apple greens" are bullets so hard that without their coating of light green Teflon they would tear up the inside of a gun's barrel when fired. That hardness permits them to penetrate the Kevlar vests credited with saving the lives of more than 400 police officers. Such penetrating bullets offer little advantage to the sportsman. Their only purpose is to kill human beings—whether policemen, presidents or popes—who wear Kevlar vests.

Yet such "cop-killer" ammunition remains available for sale to potential criminals and terrorists. Bills in Congress would ban it, but the Administration has yet to take a position, apparently for fear of offending its friends at the National Rifle Association. This bow to politics is not only misguided, it's dangerous.

Bills introduced by Representative Mario Biaggi and Senator Daniel Moynihan of New York would give Washington authority to ban handgun ammunition that can penetrate the most common police vest. The bills have 170 co-sponsors in the House and 15 in the Senate.

Police records don't always reveal the kind of ammunition criminals use to shoot officers, so the magnitude of the threat is hard to assess. Mr. Biaggi cites two cases of law enforcement officers shot with the bullets. Armor-piercing bullets are thought to be popular in the Florida drug and gunrunning community, where criminals wear vests and want the penetration power for their own wars.

More than half the nation's police now wear the vests, and police groups support the bill with unusual unanimity, from unions to the conservative International Association of Chiefs of Police. Its president says flatly that the bullets have "no legitimate use . . . either in or out of law enforcement."

Such talk prompts anxiety at the N.R.A. The gun lobby values its friendly relations with police, to whom it offers firearms training. It favors voluntary restrictions by manufacturers but gags on the idea of any new regulation, even to protect police lives. So the N.R.A. raises technical issues. The bill is unacceptable, it argues, because it would also ban some hunting rifle ammuniton, which, if fired from certain handguns, might penetrate a Kevlar vest.

Those kind of handguns aren't practical for street crime, and it's unlikely the Feds would ban hunting ammunition because of them. The effect of voluntary controls is dubious. But once the N.R.A., with its conservative following, spoke up, an issue that seemed as appealing as apple pie began to feel more like a hot potato. The Administration referred it to the National Institute of Justice and National Bureau of Standards, in hopes they can produce a definition that will please the N.R.A. The agencies promise a report soon.

There's no reason for Congress even to wait for the agencies' findings. In 1982, a less formal F.B.I. report identified eight kinds of imported and domestically made ammunition that seemed to fit the "cop-killer" category. The Treasury Secretary could be given the power to ban them but forbidden to restrict popular sporting ammunition. The ban might then be extended as further study demonstrated a clear need.

Only the most fanatical gun-lobby ideologues could find fault with that.

[From the Sunday Sun-Times, Sept. 4, 1983]

GUN LOBBY HAZARDOUS TO POLICEMEN'S LIVES

(By Mike Royko)

It appears that the National Rifle Association is in favor of policemen being shot.

The NRA will be furious at the thought that they want policemen shot—or at least are indifferent to the possible carnage—but I can't see how any other conclusion can be drawn from their position on the superhard bullet.

This bullet, as you may have read, is the one that's so hard it easily pierces the Kevlar vests that many policemen are now wearing.

These vests have been credited with saving the lives of at least 400 cops who were hit with ordinary bullets. Had these cops been hit with the Teflon-coated, superhard slug, there would have been 400 funerals.

For a long time, some congressmen who don't fear the mighty pro-gun lobby have been trying to get these bullets banned.

But the National Rifle Association is against this bill and has been putting its potent pressure on less courageous congressmen.

The NRA likes to portray itself as a sensible organization. It spreads ads for itself all over magazines—especially those directed at teenagers. It talks about how it is in favor of responsible gun ownership and responsible behavior.

At the same time, it fights with teeth bared against a law that would ban a bullet that has no other purpose than to blow away a human being.

These bullets aren't used in hunting, target-shooting or any other sporting activity—unless you consider zapping a cop to be jolly good sport.

Why, you ask, would an allegedly responsible, sensible organization take such a daffy position?

The answer is simple enough: The NRA's responsible posture is a phony. The NRA is against any kind of laws that provide any kind of restrictions on the ownership, sale and manufacturing of guns and ammunition.

If the NRA had its way, you would be able to buy guns and ammo in your corner liquor store. And you wouldn't have to register them or even leave your name with the clerk.

It's against any and all gun laws and it does all it can to intimidate congressmen, state legislators, local councilmen and any other politicians who don't share its views.

So it shouldn't be a surprise to anyone that the NRA is fighting against banning the superhard bullet.

It's no surprise to Rep. Mario Biaggi (D-N.Y.), an ex-cop who sponsored the bill in the House.

"There's no real, rational reason why the NRA is opposing this bill," Biaggi told us. "They're just paranoiac. They go crazy if they think someone is trying to encroach on their preserve of munitions or guns.

"They're tried real hard to defuse the issue with false statements. For example, they say the bill will affect hunters and sportsmen. That's nonsense. We're talking about handguns with barrels no longer then five inches. It should be clear we're trying to protect the law enforcement people—many of whom believe they'll be protected by wearing bulletproof vests.

"Then they say the bullets are only sold to police. That's clearly untrue. Time and time again it's been proven that just about anyone can go into a gun shop and buy these bullets right off the counter.

"They also say that the thieves and felons are using these bullets because we've publicized them.

"Now, that argument would be all right if you were talking to a naive high school kid. But I was on the police force for 23 years and I can tell you this; the felons know what's out there before the members of the police department do.

"All of the NRA arguments are just silly.

"The irony of this whole thing is that, while we wait for this legislation, the criminals are getting smarter. They're wearing bulletproof vests. Police use their traditional bullets and the felons are protected with these vests. But cops aren't protected against the felons using the killer bullets."

This is the fourth time that Biaggi has introduced a bill to ban the vest-piercers. Each time, the NRA has its loyal, gun-loving members put heat on their congressmen. And each time the bill died in committee.

But this time Biaggi thinks he can get the bill passed, once some studies are made that define what an armor-piercing bullet is.

You see, the NRA says that there is absolutely no way such a definition can be made. It argues that if you ban this bullet, all other bullets might be banned.

That's about as bright as saying that if you ban opium, which is a mood-altering, habit-forming substance, you will inevitably wind up also banning bottles of Lafitte Rothschild, 1959, because it, too, can be a mood-altering, habit-forming substance.

So I'm sure the agencies making these tests and drawing up guidelines will be able

to come up with a satisfactory definition that can be written into the law:

No handgun ammunition can be sold if it can pierce anything as hard and thick as a police vest—or the thick skull of a National Rifle Association official.●

FAST FOR LIFE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. STARK. Mr. Speaker, four dedicated and concerned individuals are trying to save our lives. They are doing it by fasting. It is their way of praying for mankind, and crying for the poor.

These four fasters—Dorothy Granada, 52, Charles Gray, 58, Mitsuyoshi Kohijima, 34, and Andre Leriviere, 34—began their journey, in Oakland, Calif., on August 6, the anniversary of the Hiroshima nuclear holocaust. They were joined by several other fasters in Europe to draw attention to the dangers of militarism and nuclear weapons, and focus the world's attention on those people who are starving to death around the world when so many of our global resources are use to make war.

In recent days, we witnessed a tragic example of what the fasters are protesting—the destruction of a civilian aircraft. The climate of fear and paranoia that permeates our world erupted in a flash of light that extinguished the lives of 269 men, women, and children. The extermination of the Korean airliner and its occupants was a sample of what mankind can expect for itself unless we begin thinking less in terms of mutual annihilation, and more of mutual accommodation.

The Oakland fasters want us to think about what is happening to the world.

"We are asking people to look into their own hearts and to ask themselves what their responsibility is to what is going on," Dorothy Granada told a newspaper reporter. "We are not asking people to be like us. We are asking them to look at the mess we are in, at the holocaust that is coming very fast if we don't do something about it, and at our brothers and sisters starving."

This kind of self-examination is long overdue.

I have attached a newspaper article that recently appeared in the Oakland Tribune regarding the fasters and their commitment to world peace. Their story should be an inspiration to us all. I urge my colleagues to read about this extraordinary dedication.

FASTING IS WAY TO "CRY FOR THE POOR"—11 DEMAND AN END TO MILITARISM

(By Raul Ramires)

For Dorothy Granada, whose body is slowly wasting away in Oakland in a "Fast for Life" aimed at fostering a turnabout in the nuclear arms race, joining the risky action was a logical expression of commitment.

For more than a decade, Granada, a former nurse, has revealed her sense of responsibility to humanity in unorthodox, mettlesome ways.

Granada, 52, has ingested nothing but distilled water for four weeks, adhering to a vow to not eat again unless a "significant" step is taken toward reversing the nuclear arms race.

She is among 11 people who launched the fast a month ago, along with her 58-year-old husband, Charles Gray, a former sociology professor and carpenter. They have been joined in Oakland by Mitsuyoshi Kohilma, 34, a former Buddhist monk from Tokyo, and Andre Leriyiere, 34, a Quebec forester and musician.

Six fasters in Europe also began the action on Aug. 6, the anniversary of the Hiroshima nuclear holocaust. Thousands others have held brief support fasts.

Granada discussed her life and the fast the other day at the Holy Redeemer Center's House on Golf Links Road in Oakland, where she has spent most of her time since the action began.

The fast, in her view, is a prayer aimed at dramatizing the dangers of nuclear posturing and the immense human toll that can be linked to militarism. By itself, an end to the nuclear arms race would be only a step toward resolving these larger conflicts she says.

"A very small percentage of the U.S. military budget is spent on nuclear weapons," she notes, frustrated at being unable to recall the specific figure as she could a week earlier.

"The rest is spent on so-called conventional weapons. You are not going to feed the poor only with that percentage that goes to nuclear weapons now.

"Any step away from militarism is in the right direction," she says. "Until we put away violence and the threat of violence, people will not be fed."

Granada, who was born in East Los Angeles of Filipino and Chicano parents, says she has witnessed firsthand the toll of militarism on America's minority and poor communities, whose young men often turn to the military as a way out of poverty.

"I remember World War II," she says, "My uncle, 18 years old, jumped at the opportunity to join the army. You get three squares and a salary. It's one way to get out."

For Granada's uncle, the way out led to the Corregidor Death March in the Philippines, in which he died, she says.

For Granada, the way out was through marriage and education—a path to comfort and, in 1970, to spiritual crisis.

"I got out of the barrio and I split," she says. "I said, 'No way am I going to hang around here. These people are failures. I'm going to where people are making it, where they've got cars, clothes, good education. These Mexicans have shabby houses; they've got old cars.'

"So I got out, went to college, nursing school, married this Harvard physician—the whole bit."

By the late 1960s, Granada recalls, she settled into prosperity with her husband and son, Christopher, now 20. She became director of medical nursing at the University of Chicago Hospital.

"For 11 years, I had the American dream—the doctor husband, the car, the house, the fancy vacation in Europe," she says. "But over my shoulder I could still hear those people I left behind—my people . . ."

Maybe what triggered it was her marriage falling apart, she says. Or maybe the divorce was a consequence of a new, subtle awareness. Either way, by 1970, Dorothy Granada's life had shifted abruptly.

"I saw this middle class, wasteful lifestyle," she says. "We had not only our share—we had 50 times our share.

"I learned more about the dynamics of why people are poor, particularly Latino people in this country. I began to realize that I was in the wrong place, that I did not belong in the white middle class. I gave it up and went to work in the barrio in Chicago."

Her work in that city's first heroin treatment program for Hispanics paid $11,000 yearly—a far cry from her university salary of $25,000.

"Suddenly, I was downwardly mobile—by choice," she says.

In Puerto Rico, she worked as a missionary nurse. In Oregon, where she and Gray lived before moving to Oakland, she helped organize clinics for Southeast Asian refugees.

For years, she and Gray, a longtime peace activist, have worked in anti-militarist causes. Both prepared for the fast by abstaining from food for periods of up to two weeks and researching similar actions throughout history.

Granada's downward economic journey has accelerated since it began 13 years ago. Now, she and her husband exist on what they call their "world equity budget."

"Me, I just want to be poor," she says. "Charles—he used to teach statistics—he has worked out this formula . . ."

The formula—a ratio of the gross national product of the world's nations to its human population, adjusted to offset excessive consumption in industrialized nations—means that Gray and Granada each lives on a $100 monthly budget.

They have done it for more than five years by sharing homes with friends, growing vegetables, bartering and picking through grocery store dumpsters.

"In Eugene (Oregon) we would only 'garbage' at natural food stores dumpsters," she says. "They have so many there. We grew sprouts and then we would barter for bread and eggs. We ate pure food. We eat rice and beans. Sometimes for variation we eat beans and rice. And I make tortillas."

Granada grows serious.

"Don't get me wrong," she adds. "We are not saints. I love being middle class. I love going to little cafes and having capuccino . . . But not at the expense of taking food out of somebody else's mouth.

"You see, we are still very rich. There are people in the world who live on $100 a year," she adds.

And the fast?

"The fast is the most intense way we know to pray," Granada says. "It is also the strongest way we know to cry for the poor. When I do without food and I think, 'Oh, man, am I getting tired of this. I want a cup of broth,' I tell myself that there are babies dying in Latin America and nobody is giving them a cup of broth.

"We are crying for them. We are giving them voices," she says.

The fasters' goal?

"We are asking (people) to look in their own hearts and to ask themselves what their responsibility is to what is going on.

"We are not asking people to be like us," she adds. "We are asking them to look at the mess we are in, at the holocaust that is coming very fast if we don't do something about it, and at our brothers and sisters starving.

"You see, if the bomb drops we are going to incinerate together. We all are going to be the same color—gray. We all are going to be poor.

"We believe that as soon as people start asking questions they will come down to their own conclusions and do what is best for them. Maybe for some of them the way to act will be to write a letter to Congress, or to go to the nuclear freeze office and get some information . . .

In recent days, both Granada and Gray appear to be weakening faster than anticipated. By Friday, Granada, who has lost 28 pounds—from 150 to 122—was taken to an area hospital for out-patient "balancing of her fluids," according to supporters.

The fasters have agreed that each will decide on his or her own whether to continue.

"If I come to coma facing me, and if I feel called to give my life, I will," she says, "I don't know if I will be called. I don't know if I will have the courage. As a Christian, I have to be God's servant."

She expresses concern about Gray—the oldest faster—and about several fasters who have young spouses and children, but says she has no personal fear.

"I got scared before the fast," she says. "Not any more."

One concern persists, however.

"I do worry about how we are going to end the fast and how we are going to keep it open and loving and non-violent. I can see a lot of pressures, a lot of things happening when we are very weak.

"People may want to make decisions then because they want to save our lives. I worry about getting kind of a mess. I just don't know how it's going to be toward the end."●

HERSHEY MEDICAL CENTER RESEARCH: "CANCER RESISTANCE AND OBESITY"

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. GEKAS. Mr. Speaker, in recent years, cancer has become the most feared disease for the men and women of the United States. As the possibility of contracting cancer increases, so does the medical world's drive to find causes and cures for this devastating disease. Each study conducted brings us one step closer to finding the answers to many of the baffling questions that surround cancer.

The 17th District of Pennsylvania is very fortunate to have the well-known Hershey Medical Center within its borders. One of the most recent research studies from the medical center links cancer resistance and obesity. The recent article in the Federation of American Societies for Environmental Biology's Feature Service, "Cancer Resistance and Obesity," tells of the fine work of Carl Thompson, John Kreider, Paul Black, Thomas Schmidt, and David Margules in this area. I submit the article for the review of my colleagues.

CANCER RESISTANCE AND OBESITY

Obesity seems to confer cancer resistance, a curiosity some Pennsylvania scientists are trying to explain with the help of genetically obese mice.

The scientists, who conduct their research at the Hershey Medical Center of the Pennsylvania State University and at Temple University in Philadelphia, have found that obese mice injected with skin cancer cells at 10 to 11 months of age, develop primary tumors more slowly than lean littermates. Obese animals also develop far fewer secondary tumors in their lungs. One reason for the difference, the investigators suggested, could be an enhanced immune response in the obese animals.

Carl I. Thompson, John W. Kreider, Paul L. Black, Thomas J. Schmidt, and David L. Margules published the results of their cancer and obesity study in the June 10, 1983 issue of Science. Dr. Kreider is a member of the American Association of Pathologists and the American Association of Immunologists, both member societies of the Federation of American Societies for Experimental Biology. The research was supported in part by a grant from the National Science Foundation to Dr. Margules.

Obesity has been linked to all sorts of health problems, including diabetes, atherosclerosis, heart disease, and stroke. But oddly enough, obesity seems to work in one's favor when the discussion turns to cancer. Obese people often appear to be highly resistant to cancer. Malignancies occur less often in morbidly obese men than in the general population. Data from the now-famous Framingham study (the long-term, ongoing study of heart disease) indicate that death rates due to cancer decrease steadily with increases in body build for men aged 40 to 69 years. While it's true that obese women show an increased incidence of breast cancer after menopause, the reverse is true for younger women. In both men and women, follow-ups of individuals who are initially free of disease indicate that those designed to develop malignancy weigh less at original screening than similar people who will not develop cancer.

Why should obesity confer cancer resistance? To help answer that question, the Pennsylvania scientists compared cancer growth in genetically obese mice and lean littermates born without the necessary "obesity" genes. Both groups were injected with melanoma cells—a form of skin cancer that readily spreads (metastasizes) from its primary site to other parts of the body, particularly the lungs.

Two experiments were performed. In the first, animals were given melanoma cell injections at 10 to 11 months of age. In the second, mice were injected at age 4 to 7 months. The investigators also sampled lymphocytes from the spleens of the mice and tested the responsiveness of these immunologically important cells to chemicals that stimulate cell growth and division. The idea is that the more responsive these cells are to the chemicals (called mitogens) in the test tube, the more active they are in the animal.

Starting from 12 days after cancer cell injection, the researchers measured tumor size at 2-day intervals until the animals died. After death, the mice were autopsied and their major organs examined for tumors.

The investigators found that primary tumors appeared at about the same time (at around 16 days in Experiment 1 and 14 days in Experiment 2) in obese and lean animals, but obese mice survived longer than lean animals. In the first experiment, the primary tumor growth was slower after its initial appearance in obese than in lean mice.

Autopsies revealed that all secondary tumors (metastases) were confined to the lungs. In both experiments, obese mice had far fewer of these metastases than did lean animals.

Tests of immune cell responsiveness revealed that splenic lymphocytes from obese mice were at least three times more responsive to the mitogen concanavalin A than those from lean littermates.

So is the immune system of an obese person better able than that of a thin person to fight off cancer? Perhaps. Immune responsiveness could partly explain the observed cancer resistance. But other factors, such as hormonal differences, are probably also involved. More research is needed to define these factors and clarify how interactions between the hormonal and immunological systems enable the obese to resist cancer.

The work of these and the other researchers at Hershey Medical Center should be praised for they are bringing us one step closer toward a cancer-free society.●

KNOW THINE ENEMY

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. SOLOMON. Mr. Speaker, "Know Thine Enemy" is wise counsel for free nations determined to preserve their freedom from international Communist totalitarianism. In the wake of the Korean Air Line massacre, a deliberate act of barbarism by the Soviet Union, the attention of the free world is now focused on what this incident reveals about the true nature of Soviet-brand communism. All the world knows now what President Reagan, myself, and many of my colleagues, including the late Representative Larry McDonald have long warned—Soviet-brand communism is an atheistic philosophy of raw, brute totalitarian force without regard for human rights, or, indeed, for human life itself.

Columnist William Randolph Hearst, Jr. also knows our common enemy. His column of Sunday, September 11 is well worth contemplating.

The article follows:

KNOW THINE ENEMY

NEW YORK—It took the Soviet Union nearly a week after shooting down an unarmed civilian South Korean jetliner to back into an admission that they committed the ghastly act.

But the Soviets stubbornly refuse to apologize for wantonly killing all 269 people aboard, among them more than 60 Americans, including a congressman. They keep

blaming us instead for having had a reconnaissance aircraft in the area.

Our "recon" plane had been back home in Alaska for two hours while Soviet fighters still stalked the ill-fated South Korean jumbo jet.

The latest big name in the Soviet pantheon to assail the U.S. for launching "a wave of slander" is Soviet Foreign Minister Andrei Gromyko. He spoke to a 35-nation assembly in Madrid primarily concerned with human rights.

The Gromyko tirade came after Western nations angrily denounced Moscow for shooting down South Korean Flight 007. Secretary of State George Shultz said of Gromyko's speech: "This shows the Soviet Union places no weight on human values."

In a head-to-head session later lasting more than an hour, Secretary Shultz angrily rejected Gromyko's personal explanation to him as "totally unacceptable." The angered secretary added: "Foreign Minister Gromyko's response was even worse than the one he gave a day earlier."

President Reagan was described in Washington as "mad as hell" by a highly placed administration official following the Gromyko effort to deceive a 35-nation conference. It wasn't the first time Gromyko told a whopper.

Many of us remember the photo printed in most papers across the country of Gromyko talking to the late President John F. Kennedy in the latter's Oval Office in 1962.

He insisted the Soviets were not installing missiles in Cuba but had to rescind his lie when the president showed him our aerial photos of the missiles on board the deck of a Soviet freighter.

In a measured TV address to the nation, President Reagan said the Soviet cover-up was a tissue of lies. He handled himself in a statesmanlike manner while the Soviet hierarchy—No. 1 Yuri Andropov still hasn't been heard from—stumbled and fumbled from deceit to outright lying. They have since settled on trying to pin the blame on us, mind you, for their totally uncivilized atrocity.

The President has been hearing many points of view: From those who are fighting mad and want to go to the mat with the Russkies, to counselors urging step-by-step coordination with our friends and allies that will make the Soviets think twice before killing innocent folks.

They should, among other things, be placed beyond the pale: Soviets assigned abroad should be excluded from all receptions as "Ni kulturny," or not cultured, a terrible insult. Make them pariahs while justice and indemnification are sought from the World Court of International Justice.

President Reagan has taken a sound step in that direction in conjunction with old friends and allies as well as outraged Communist nations like the People's Republic of China and Yugoslavia.

International pilots' associations, thoroughly alarmed over the grisly South Korean commercial aircraft incident, have already initiated measures in West Germany and France barring Aeroflot landing and refueling rights. That should put a crimp into Soviet tourism and the accompanying inflow of Western hard currencies.

I like the effort of the pilots' organizations to boycott Soviet and all other flights headed to and from the U.S.S.R. until the Red regime makes a proper apology and offers compensation to families of the 269 victims.

A hushed and packed U.N. Security Council heard tapes in full (which President Reagan used briefly during his TV talk) of the Soviet pilots stalking the South Korean plane. Then came the dreaded cutoff word from a pilot who finished the job: "Destroyed."

The tape, apparently recorded by Japanese monitors, took 11 minutes. The Soviets in the U.S.S.R. delegation didn't challenge the authenticity of the voices. Chief U.S. U.N. delegate Jeane Kirkpatrick targeted the Soviet delegation with a blistering attack for its inhumanity.

Soviet U.N. Ambassador Oleg Troyanovsky, who graduated from Swarthmore College when his father was a pre-World War II diplomat in the U.S., pretended total indifference while the tapes were played. But his urbanity vanished when he heard that the Soviet Union in Moscow conceded that its plane shot down the Korean jumbo jet. When asked to comment, he replied that he would have to study TASS reports.

Some of them are pretty well known to Troyanovsky by heart. For instance, the U.S.S.R. claims the airliner was flying in Soviet airspace without navigational lights. Yet even the pilots chasing the aircraft say on tape that they saw the 747's lights on.

Next, the Soviets contend the South Korean airliner was flying in bad visibility. President Reagan asserted that it "was a clear night with a half moon."

The U.S.S.R. insists that the South Korean crew ignored efforts to establish radio contact. President Reagan asserted that Soviet military are not equipped with the radio channel used internationally for distress signals. Why? It would make it easier for Soviet pilots to defect. Quite a few have, flying blind.

What needs doing by the U.N., I believe, is a forceful presentation before the world court for compensation of a million dollars per passenger and the cost of the jet to Korea.

Granted that the South Korean airliner veered somehow off course into Soviet airspace, it's still extraordinary that an Su-15 approached within 2 kilometers of the jumbo jet for a good visual look. A jumbo jet has a vastly different silhouette from any of our "recon" aircraft that fly high-altitude missions. The Soviets shot the South Korean plane down and Gromyko said they'd do it again if any other aircraft "violated" U.S.S.R. airspace.

From the very beginning of this macabre episode, I favored a Soviet apology attributing shooting down of the plane to a trigger-happy pilot and for the U.S.S.R. to offer an apology to the world as well as compensation to those who lost their lives. The U.N. should now adopt such a resolution even if the Soviets veto a majority demand. The world will then know, if they really want to.

Their charge that the United States is to blame for the incident is the biggest lie of all and won't be believed by anyone other than dyed-in-the-wool Communists because they damn well have to.

Nowadays we have high-flying spy planes and satellites that can pinpoint all kinds of buildups on the ground. The age of post-World War II espionage aircraft went out with the dark ages years ago.

The big lie, the big smear technique is part of the Soviet counter-espionage system of blaming others for their own atrocities. It boomeranged badly as the Soviets dig themselves deeper holes every time top mouthpieces blame others for their own savagery. They won't get away with it.●

TRIBUTE TO FOUR AMERICAN MARINE HEROES KILLED IN LEBANON

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. BIAGGI. Mr. Speaker, this Nation was saddened over the deaths of four American marines killed while serving as part of the peacekeeping force in Lebanon. These soldiers died as so many before them—as patriots having made the supreme sacrifice in service to their Nation.

Our sympathies are also extended to the almost 20 other soldiers who were injured in the two separate incidents affecting our marines.

The renewed fighting which produced these American casualties and which prompted the President to dispatch another 2,000 Marines to positions off the coast of Lebanon has escalated this conflict in the world community. It may produce a resolution in the House and Senate to invoke the War Powers Act. While this matter is still pending, I consider it more appropriate for us to pay tribute to those brave soldiers who have given up their lives in the cafe of peace and freedom. A safe and secure Middle East is as vital a national security issue as we have. Peace cannot come to Lebanon until such time as all foreign forces are removed from her borders and the Lebanese Army become able to gain the upper hand. U.S. Marines together with other nations are in Lebanon to keep the peace while the Lebanese Army gains control. It has produced bloodshed—and in these past weeks this has included American blood.

The death of an American fighting man is both a profound personal and national tragedy. For the families of the four marines killed—their loss is even more intense. Yet as a nation we should also take time to pay our respects to these brave Americans and remember what they represented and work to support all of our efforts for peace in the world.●

LOOPHOLE OF THE MONTH

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. STARK. Mr. Speaker, one of the most interesting monthly publications is People & Taxes, and its regular feature article, "The Loophole of the Month."

In August, the newsletter described the latest wrinkles in Caribbean tax havens.

I am pleased to announce that one of the issues discussed in the article may soon be dealt with. My Subcommittee on Select Revenue Measures will hold hearings on September 21 on H.R. 3096, to eliminate the type of E. F. Hutton tax straddle gimmicks which use various Caribbean tax holiday and bank secrecy countries.

But clearly, a great deal more needs to be done. The Treasury is due to report to the Congress before November 3 on the tax abuse situation in these tax haven countries, and their impact on U.S. tax compliance and revenues. This report should help the Congress prepare for a comprehensive, overall solution to the types of problem described in the People & Taxes article.

The article follows:

[From People & Taxes, August 1983]

LOOPHOLE OF THE MONTH: IT IS BETTER IN THE BAHAMAS

Well-heeled investors seeking lessons on "how to reduce, defer or eliminate personal, corporate income taxes" recently joined former Senator Eugene McCarthy for a long weekend in the Cayman Islands. There they attended seminars covering the use of foreign corporations, wheeling and dealing in commodities, and tax "audit strategy." Most important, they got to meet Cayman Island officials, who reassured them of the tiny nation's undying devotion to the privacy of investment records—a practice that has helped make the Caymans a notorious tax haven.

Long a favorite hiding place for the ill-gotten gains of gangsters and dope peddlers, the Cayman Islands are one of a number of Caribbean countries that provide lucrative opportunities for moneyed Americans to avoid or evade the harsh extractions of the federal tax collector.

A deal currently being promoted by the folks at E. F. Hutton & Co.—which bills itself as the country's largest purveyor of tax shelters—offers a classic roadmap to how tax haven manipulations work, including a geographic tour of some of the leading Caribbean tax havens.

Hutton's American clients want to trade in the U.S. commodities markets. If they do so directly, however, they will have to pay tax on their profits, at a 32 percent rate set by reforms enacted in 1981. Hutton's "Commodity Reserve Fund Limited" is designed to dodge those reforms and cut the tax rate to 20 percent, with even that deferred as long as the investors desire.

According to the staff of the congressional Joint Committee on Taxation, the Hutton shelter package "involves exploitation or circumvention of the following: the corporate income tax, the rules taxing corporate shareholders, the accumulated earnings tax rules, the rules requiring gains in commodity futures to be marked to market, and the capital gains rules."

The scheme begins with two companies, one a subsidiary of the other, incorporated in the British Virgin Islands, a genteel place where business taxes are considered quite incorrect. These two corporations have their offices in the Bahamas, another idyllic no-tax zone, and for investment advice they will look to experts from the Netherlands Antilles, a nation best known for facilitating deals between multinational corporate borrowers and European and American tax evaders.

The double layer of foreign corporations is supposed to pesuade the IRS that a bona fide foreign business is engaged in the commodities trading and to insulate the American investors from a number of anti-tax-avoidance rules. In addition, by requiring the investors to sell their shares in the corporations to take out cash profits, Hutton argues that the income should be treated as a capital gains—60 percent of which are exempted from tax.

These machinations are not only complex, they're controversial. As the Joint Committee on Taxation staff notes, to some degree "Hutton is avoiding tax by taking advantage of uncertainty in tax laws." But despite the technical doubts, the deal probably works. Even if the IRS could successfully challenge some of the manipulations, it will have trouble getting its hands on the necessary information to do so, due to the investor secrecy laws of the various tax havens involved. In fact, many of Hutton's clients may find it easy and convenient not to report their profits at all.

Unfortunately for Hutton, one of its prospectuses for the Commodity Reserve Fund came to the attention of Rep. Fortney H. (Pete) Stark of California, Chairman of the House Ways and Means Select Revenue Measures Subcommittee. Properly outraged by what he read, Stark has introduced legislation to outlaw the Hutton deal. The Treasury Department supports Stark's bill, so it seems likely to pass.

Unfortunately for the rest of us, however, Stark's bill deals only with the tip of a massive iceberg of tax haven abuses. The scope and depth of the problem was intricately detailed in a 235-page, single-spaced report undertaken by the IRS and the Justice Department in 1980. That study found $23 billion in tax haven investments by Americans in 1978 and the amount is undoubtedly much higher today. But Congress has taken no comprehensive action to follow up on the study.

Hence, while Hutton's deal may be nixed, there's still plenty of tax avoidance and evasion potential from investing in Caribbean tax havens. According to Senator McCarthy, you can even take a tax write-off for flying down to check out the possibilities. But don't go overboard. Your suntan lotion is not deductible.

Footnote: Millions of Americans who went clean for Gene back in 1968 may be surprised at Senator McCarthy's involvement in the apparently sleazy undertaking of promoting Caribbean tax havens. But the Senator's latest line of work will come as no shock to Washington oldtimers. They remember him as a consummate loophole-monger in his days as a member of the Senate Finance Committee in the 1960s.

Insiders are also aware that the former Minnesota Senator currently sits on the board of directors of a Washington, D.C.-based trade association called the "American Council for Capital Formation." This group of Fortune 500 firms and their hangers-on is unabashedly devoted to "reduction in the corporate tax rate, reduction in taxes on capital gains, and improved investment tax credit, more effective capital recovery allowances, reduction in estate and gift taxes, and elimination of the . . . taxation of corporate dividends."

Senator McCarthy, you see, believes in doing something for the "productive members of society," in hopes of spurring them to more "capital formation."

But, you may plausibly ask, what do Caribbean tax havens like the Cayman Islands have to do with capital formation? Don't they attract funds away from productive investments? Well, maybe, but serious taxaphobes like Senator McCarthy and his conferees have a simpler theory: Captial formation and tax relief for the prosperous are synonymous.

At a recent hearing before the House Ways and Means Committee, a former employee of McCarthy's Council, now chief economist for the U.S. Chamber of Commerce, came out in favor of tax loopholes for speculating in gold and collectibles. His rationale, one supposes, was that at least the tax breaks go mainly to the rich. No one asked him for his views on adding extra writeoffs for champagne and caviar, but one can presume he'd look on that favorably too.

If you buy this approach, you'll see lots of capital formation going on in the Caribbean. Otherwise, you'll probably have some serious questions, not just about Senator McCarthy, but about the entire lobbying agenda of America's corporate community.●

H.R. 1510

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MAZZOLI. Mr. Speaker, the House of Representatives will soon consider H.R. 1510, the Immigration Reform and Control Act of 1983, which passed the House Judiciary Committee by a vote of 20 to 10, on May 5. It is now pending before the House Rules Committee.

The bill has delicate checks and balances which build on recommendations of four successive administrations, including President Reagan's, the Select Commission on Immigration and Refugee Policy, headed by my good friend and the president of my alma mater, Notre Dame, Father Theodore M. Hesburgh, numerous academic studies, the incredibly detailed hearings by my Subcommitee on Immigration, Refugees, and International Law, and the work done over the past 13 years by the dedicated chairman of the House Judiciary Committee, the Honorable PETER W. RODINO, Jr.

One of the most controversial aspects of the bill is the legalization program. My feelings regarding the legalization proposal when I first heard it were, frankly, negative.

However, after studying this issue at length during the 3 years I have chaired the Subcommittee on Immigration, Refugees, and International Law, I have come to the conclusion that a carefully controlled, but at the same time, generous legalization program is an essential element of any immigration reform.

Recently, two of our very distinguished colleagues circulated a "Dear Colleague" letter making an extremely

strong case for a legalization program such as that contained in H.R. 1510. These two gentlemen, Congressmen BARNEY FRANK and JOHN ERLENBORN, in a persuasive and thoughtful manner have developed the importance of legalization as a component of a comprehensive reform of the Nation's immigration laws.

For the benefit of those who have not had the chance to see the argument put forth by my colleagues, I am including a copy of their letter at the conclusion of my remarks. The letter is well worth a careful reading.

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 2, 1983.

Congressman ROMANO L. MAZZOLI,
Rayburn House Office Building,
Washington, D.C.

DEAR RON: The House Judiciary Committee recently completed action on H.R. 1510, the modified version of the comprehensive immigration reform bill which we debated last December. Among the changes agreed to in subcommittee and full committee was a restructuring of the legalization program. In the package now before the House, the legalization program has been consolidated into one, rather than two tiers, and the eligibility cut-off date has been advanced to January 1, 1982.

We support these changes. A one-time-only, case-by-case legalization program is an integral component of any meaningful immigration reform.

After years of debate, working closely with the Reagan Administration, organized labor, civil rights groups, and the Select Commission on Immigration and Refugee Policy, the concept of legalization emerged. It serves as both the necessary political counterbalance to employer sanctions, as well as the only realistic and humane way of dealing with the problem of a large and unaccountable illegal population in America. Moreover, as most people now acknowledge, bringing the illegal shadow population forward is a necessary precondition to any future enforcement activities.

The alternatives are not attractive. Mass deportations have been ruled out as both costly and ineffective. Expecting voluntary departures is also impractical, as it will merely encourage people to remain in their present jobs, thereby outside of the scope of the new laws. And a perpetuation of the status quo, with millions of people beyond the reach and protection of the law and vulnerable to exploitation constitutes an unprecedented challenge to the basic rights of all workers in America.

Let us be clear on one point: either we legalize as many qualified illegal immigrants as possible now, or they will continue to remain in illegal status, undermining and straining all future enforcement activities.

The rationale for a legalization program is best explained by the House report to H.R. 1510:

"The U.S. has a large undocumented alien population living and working within its borders. Many of these people have been here for a number of years and may have become part of their communities. Many have strong family ties which include U.S. citizens and lawful residents. They have built social networks in this country. They have contributed to the U.S. in myriad ways, including providing their labor and tax dollars. However, because of their undocumented status, these people live in fear, afraid to seek help when their rights are violated or they become ill. Moreover, their presence, in violation of our immigration law, bears witness to our past failure to maintain the integrity of our borders."

Against this backdrop, the Judiciary Committee has crafted a one-tiered legalization program in which all illegal aliens who have continuously resided in the U.S. since January 1, 1982 are eligible to apply. It is explicit that it be a one-time-only opportunity. Determinations would be made by the Attorney General on a case-by-case basis, would depend on the alien's ability to meet certain eligibility standards, and could result in the granting of permanent resident status.

The House program is purposefully straightforward and administratively efficient. It is designed not to unduly strain an already overburdened Immigration and Naturalization Service (INS). Instead, it will permit the INS to concentrate their resources where they are needed—to the task of preventing future illegal immigration. It is further meant to offer a strong incentive for illegal aliens to take advantage of it. In no way, however, can it be construed as a granting of blanket amnesty, as some critics argue. A closer look at both the criteria used to evaluate applications for legalization and the subsequent restrictions imposed on those who qualify challenges this claim.

Under the terms of the House bill, applicants for legalization would have to prove that they have resided continuously in the United States since 1982, are not likely to become a public charge, that they satisfy certain health requirements, that they have not been convicted of a felony or more than two misdemeanors, and that they meet the existing tests for admission or immigration under the law.

Once legalized, they would receive permanent resident status, subject to a five-year probation period and all the existing naturalization requirements before they could apply for citizenship. During that period, they would be ineligible for any Federal financial assistance, Medicaid, or food stamps, with limited exceptions related to the interests of public health or because of serious injury or illness. These restrictions were designed to insure that legalized aliens remain productive and self-sufficient.

It is often argued that any legalization program would be too expensive. Who, on the other hand, can accurately guage the costs to society of uncontrolled immigration? The logic of a successful legalization program is that both society and the illegal alien will be better served if an underground work force is brought into the mainstream and given the protections of all other workers. That necessarily means more revenues for the government, with fewer opportunities for exploitation. In the absence of legalization, the illegal population will continue to be preyed upon, and their tax contributions will continue to be voluntary rather than mandatory.

In the debate ahead, it is important to consider the consequences of either eliminating legalization or of imposing further restrictions. In the former case, the comprehensive reform package before us would die. Legalization and employer sanctions are inextricably linked and the removal of either would be fatal to both. In the latter case, the success of the program to encourage people to come forward would be seriously jeopardized.

Reasonable people will disagree on the various specific proposals contained in H.R. 1510. It is a bill that often looks awkward on close inspection, but has considerable merit when faced with the alternatives. Once the illegal sub-class in America comes out of the shadows and enters the work force through the front door, we can begin the long-overdue task of controlling our borders and cracking down against employers who lure and sustain the illegal population in this country.

BARNEY FRANK.
JOHN ERLENBORN●

WILL THEY SELL CITY HALL NEXT?

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. PICKLE. Mr. Speaker, I wish to share with my colleagues an article published in Newsday on August 22. This article describes very clearly the problems with the proliferation of sale-leaseback deals between cities and private developers. It is a problem that has been addressed by such other prominent publications as the Washington Post, the Wall Street Journal, Fortune magazine, Barron's, the National Journal, Business Week and many more. As you may know, I have introduced H.R. 3110 to curtail this kind of financing scheme, which constitutes a major drain on the Federal Treasury. I reprint this article in the CONGRESSIONAL RECORD so that my colleagues may see the name and nature of this threat.

[From Newsday, Long Island, N.Y., Monday, Aug. 22, 1983]

WILL THEY SELL CITY HALL NEXT?

(By Tyler Bridges)

Municipalities are selling their buildings to investors, then leasing them back. The Southwest Sewer District and the City's Convention Center are eyeing such plans. But federal taxpayers pay.

Pssst—wanna buy City Hall? How about a Navy cargo ship? Does the Orange Bowl catch your fancy? Surely the Brooklyn Bridge . . .

A crazy idea? Apparently not. Buying local jails, city fire stations and even university basketball pavilions has become the latest craze. It goes by the technical name of "sale-leaseback" financing.

Hit by the twin blows of the recession and federal budget cuts, everyone from city managers to college presidents is hailing this new financing gimmick as a salvation. Tax lawyers and investments banks who expect to earn big money in arranging the deals view it as the tax shelter of the 1980's for private investors.

But others are seeing red—as in red ink in the federal budget. "This thing is so big, it could amount to the biggest atom bomb in public finance in this century," said Rep. J. J. Pickle (D-Texas), who has introduced legislation to curtail sale-leaseback deals.

Traditionally, no one ever questioned whether a city owned its police station or whether the Air Force owned its planes. But sale-leaseback financing promises to change this situation.

Most of these deals work basically the same way. A nontaxable agency or organization, the City of Miami, for example, arranges to have a private group buy or build some big-ticket item, such as the Orange Bowl. The new owners, being taxpayers, claim a number of tax benefits available to investors, including accelerated depreciation, interest deductions and the investment tax credit.

Then Miami rents, or leases, the Orange Bowl back from the owners at a favorable price, since the owners' tax benefits enable them to be generous. The owners are happy because their tax bills have been reduced at virtually no risk.

Miami officials congratulate themselves because even after paying the rental, the city still comes out ahead from the sale. But federal taxpayers will end up footing the bill—and paying much more than if Uncle Sam had simply written a check to Miami.

You don't have to understand the complex arithmetic to realize that leasing costs the federal government much more than handing out subsidies directly. Somehow or other, the government must pay more, if only because of the middlemen involved—who will presumably want to be paid for their services.

Moreover, this tax hocus-pocus sometimes rewards inefficiency. The Southwest Sewer District in Suffolk County is negotiating to sell to and lease back from private investors its recently completed wastewater treatment plant. The revenue from the deal will cover the enormous cost overruns the project had incurred. Normally, the county would have to raise property taxes to cover the operating deficit. Instead, if the deal goes through, the county will make federal taxpayers pick up the tab.

Similarly, New York City is trying to peddle and lease back its soon-to-be completed convention center to cover cost overruns of $75 million. So instead of having to ask the State Legislature for the money in additional bond funding—and having to justify the cost overruns in the process—the city will simply have taxpayers across the country bailing out the project.

As these two deals demonstrate, under sale-leaseback financing, there is virtually no check on the irresponsibility of builders and local officials.

The most celebrated sale-leaseback to date has the Navy renting—instead of purchasing—13 TAKX cargo ships worth $2.3 billion for the Rapid Deployment Force; the transaction involves General Dynamics and other companies. The Navy says it will save $750 million.

But the Navy's accounting ignores the various tax breaks the deal will create. The staff of Congress' Joint Committee on taxation estimates the cost to the government of leasing the ships to be 12 per cent more than an outright purchase.

But the Navy doesn't care about the higher overall cost to the federal government. Leasing is cheaper for it—and allows it to shift 30 per cent of the cost of its ships from its budget to the treasury's "tax-expenditure" budget. With Congress beginning to take a closer look at defense spending, this is a useful trick.

"If this kind of thing continues, we're going to see E. F. Hutton own the Air Force and Merrill Lynch rule the waves," says Pickle. "Can you imagine the average taxpayer's response? It's no wonder that citizens are losing confidence in the tax system."

Exactly how many sale-leaseback deals have been carried out and how much this has cost federal taxpayers thus far is unknown. Among the completed deals, Oakland has sold and leased back its convention center; Alexandria, Va., has peddled its Torpedo Factory Art Museum; Tacoma, Wash., has vended its Pantages Centre for the Performing Arts, and Bennington College in Vermont has sold its campus buildings.

The Clinch River breeder reactor, the Philadelphia public schools, the Atlanta City Hall and the Kleinhans Music Hall in Buffalo are among the dozens of items on the auction block. (All deals are in limbo until Congress decides whether to curtail further transactions).

The Congressional Budget Office recently estimated that governments and tax-exempt organizations own more than $1 trillion in property that could be transferred to private investors and then leased back. "The only real limit on the potential extent of this activity is the capacity of private investors to absorb the tax deductions and credits that sale-leasebacks make available," CBO reported. In other words, the only limitation on the potential revenue loss of billions of dollars is that private investors will have bought so many tax breaks they won't owe any more taxes.

Pickle is seeking to prevent any additional revenue loss. His bill would sharply restrict the use of the tax breaks available to investors in this Alice in Wonderland type of financing. The agencies would still be able to enter into leases, but could do so only if the deals do not cost the Treasury money in forgone tax revenue.

Virtually every group has said piously that while it supports the general thrust of the legislation, its particular activities should be exempted. Gore everyone's tax except our own, they are saying. Bennington College President Michael Hooker, for example, says he finds tax shelters "appalling," but asks that small liberal-arts colleges be excluded from the bill's coverage because they face increasing financial difficulties.

Certainly, cities and colleges need help. But Hooker's argument ignores that while selling and leasing back its campus may benefit Bennington in the short run, Bennington—and everyone—loses from soaring budget deficits over the long term. If Congress believes that Bennington, Philadelphia, or any other tax-exempt organization or local government needs aid, then it should give the group money openly and aboveboard, rather than create a paper shuffle that feathers the nests of lawyers and investment bankers at the expense of ordinary taxpayers.

"What we have here is an open invitation for groups to back their trucks up to the federal Treasury and load up, no questions asked," says a congressional aide. "It's a backdoor method of public finance."

The tax-writing House Ways and Means Committee recently approved Pickle's bill. Sen. Robert Dole (R-Kansas) has introduced similar legislation in the Senate. Both bills are backed by the Reagan administration and have bipartisan congressional support.

But E. F. Hutton, Boeing, the National Housing Rehabilitation Association and many other groups are mounting a full-scale attack on the legislation. As Ways and Means member Rep. Byron Dorgan (D-N.D.) has said, if these special interests succeed, then sale-leaseback financing "could become the Grand Canyon of tax loopholes."●

SKELTON CALLS FOR DISASTER RELIEF

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. SKELTON. Mr. Speaker, during the August recess, I toured all 21 counties in my congressional district, and I found the drought situation to be the worst since 1936. In my area of the county, economic recovery is heavily dependent upon the health of the agricultural economy. With this severe drought preceded by several years of economic crisis in agriculture, the agricultural sector of our economy is anything but healthy. Therefore, today I am sending a letter to Secretary of Agriculture John Block urging him to act swiftly to put into effect appropriate disaster relief programs for the State of Missouri, and similar drought-ravaged areas.

Mr. Speaker, I wish to insert the text of my letter to Secretary Block at this point in the RECORD:

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 13, 1983.

Hon. JOHN R. BLOCK,
Secretary, Department of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: Having just returned from a tour of all twenty-one counties in Missouri's Fourth Congressional District, I can report to you that the drought situation is the worst in almost fifty years. The months of July and August, 1983, were the worst two consecutive months for rain since 1936. As a result, the latest report of the Missouri Crop and Livestock Reporting Service shows 90 percent of the state's corn crop and 67 percent of the soybean crop in poor condition. Estimated yields are down at least 50 percent from last year. Faced with a shortage of pasture, many cattle producers have been forced to begin to feed hay, a practice not usually undertaken until December or January.

Recently, you visited Missouri and you say, as I did, the damaged croplands, and the severe hardship this drought has caused for Missouri farmers. In light of this disaster, I urge you to move expeditiously and approve the request of the State of Missouri for appropriate disaster relief. Under the law, you have broad authority to provide disaster assistance to farmers who have been struck by drought, including direct disaster assistance payments, payments to livestock producers for the purchase of feed, and low interest disaster loans. Given the seriousness of this drought, and the economic crisis faced by agriculture in the past few years, I believe that full disaster assistance to Missouri farmers, and farmers from throughout the nation who have been similarly affected by drought, is clearly warranted.

In closing, let me again urge you to take swift action. Disaster relief is important not only to farmers, but also to those many businesses and workers who depend on a healthy farm economy. In my area of the

country, and in many others, agriculture is the key to economic recovery.

Best regards,
Yours truly,

IKE SKELTON,
Member of Congress.●

TRIBUTE TO THE LATE HON. HENRY M. "SCOOP" JACKSON

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. BIAGGI. Mr. Speaker, the people of the State of Washington and of this Nation were shocked and saddened over the death September 1 of the distinguished senior Senator from Washington, Henry M. "Scoop" Jackson. For those of us who had the dual honor of serving in Congress with "Scoop" and to have been friends, the news of his death was even more devastating.

Scoop Jackson epitomized what a dedicated public servant was supposed to be. For a total of 43 productive years, Henry Jackson graced the halls of Congress with his presence and lent the House and the Senate the benefit of his wisdom, compassion, and expertise. He served a total of 12 years in the House and 31 more in the Senate.

Scoop Jackson's influence in American legislative and foreign policy was immense and diversified. He was best known as a champion of a strong national defense and an especially ardent foe of the Soviet Union. History will record with appropriate respect that Henry Jackson's last public appearance and action was to conduct a press conference to condemn the Soviet Union for their barbarism in shooting down the Korean airliner killing its 269 passengers.

Yet Scoop Jackson did not feel constrained to limit his expertise or talents and he made his mark in other distinct areas as well. He was a staunch supporter of the State of Israel and was one of the few Members of Congress who served during the entire 35-year history of the modern State of Israel. His passing was especially mourned in the Jewish community, who viewed Senator Jackson as a true and loyal friend, not only for his support of Israel but also for his coauthorship of a landmark amendment linking preferential trade between the United States and the Soviet Union to the Soviets permitting more of their Jewish citizens to emigrate. This was viewed as precedent-setting legislation in that it put the United States squarely in the position of defending the basic human right of emigration for Soviet Jews.

Scoop Jackson was a man of vision. In his capacity as chairman of the Energy and Natural Resources Committee, he was one of the first people in Congress to urge that we develop a national energy policy based on domestic production and conservation. No man worked harder on this important cause than Scoop Jackson, and the extent to which this Nation has reduced its reliance on foreign energy through effective conservation is owed in large part to Henry Jackson.

As one reviews the legislative accomplishments of Henry Jackson is his more than four decades in Congress, one simply stands in awe. It would do him injustice to speak only of the quantity of these accomplishments. It would be far more appropriate to evaluate them according to how much they improved the quality of life for people in this Nation. All segments of our society from the farmer to the senior citizen, from the handicapped child to the U.S. serviceman abroad, from the members of minority groups to women and children, Scoop Jackson through his work improved the quality of life for all in this Nation and many in the world.

One recalls Senator Jackson's attempts in both 1972 and 1976 to capture the nomination of the Democratic Party to be President of the United States. I have special and fond memories for I was a Jackson delegate and helped lead what was a most successful campaign by Scoop Jackson in my home State of New York. I said then and I felt throughout his life that Scoop Jackson would have made a fine President and the American political process was greatly enhanced simply by his involving himself in two Presidential campaigns.

While Scoop Jackson may have had his dream of being President elude his grasp, his influence among the Presidents in his lifetime was enormous. Senator Jackson could be counted on to provided good solid counsel on important matters related to national security and knew when not to invoke partisanship. What better tribute could be paid to Senator Jackson than the words of the President both during his press conference as he left California for Washington on September 1 or during his nationally televised speech of September 6?

The Nation has been deprived of one of its true legends with the death of Henry Jackson. He was a man who wanted to be measured on his accomplishments, not his attempts. He was a man who demonstrated tremendous abilities and energies for those causes that he believed in. To have Scoop Jackson in your corner gave you a decided edge in any policy issue.

It seems almost an impossible challenge to pay tribute to a man who did as much and as well as Henry Jackson conducted his life. However, all who had the benefit of knowing and working with Scoop want to try. Perhaps the best tribute we can pay to Scoop is to try and advance those issues which he championed so that his work was not in vain. Perhaps the best tribute we can pay to Scoop Jackson is to try and maintain the highest standards of integrity and purpose in our work in the Congresss. In this way, we can show history of the good example which Scooop Jackson set for the 535 Members of the House and Senate.

The people of Everett, Wash., turned out in tremendous numbers to pay their last respects to their native son Henry Jackson, born there on May 31, 1912. They came to pay their respects to a man who had been a law student at the University of Washington, who was elected prosecuting attorney of Snohomish County, and of course served them so ably in the House and Senate.

To his widow, Helen, and his children, Anna Marie and Peter Hardin, I convey my profound condolences and hope they are able to find solace during this time of grief from all that Henry Jackson did for his fellow man and woman in the United States. History will treat him with the highest amount of respect and his legacy of service, commitment, and compassion will endure for years to come.●

UNEMPLOYMENT INSURANCE REFORM

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. STARK. Mr. Speaker, today, the Ways and Means Public Assistance and Unemployment Compensation Subcommittee is holding another round of hearings on the need to provide additional weeks of unemployment.

With unemployment stuck at 9.5 percent, we of course need to provide additional weeks of help.

But in a larger sense, continued extensions of unemployment insurance without addressing the underlying issues do a disservice to the recipients and to the taxpayers.

It is time that we undertake a major rewrite of the unemployment insurance laws.

I took one step in this direction yesterday by the introduction, along with Representatives PEASE and KAPTUR, of the House version of S. 1784, a bill which replaces the postregular unemployment insurance benefits schemes, with a single, rational, easily calculable system.

But it is equally important that we find a way to coordinate those who will need extra weeks of unemployment insurance—the so-called displaced worker—with a new and major program of retraining, education, and relocation assistance.

It just does not make sense to confine our discussions to the simple extension of unemployment insurance

benefits or the reworking of trigger mechanisms. We ought to be talking about getting people back to work.

We must realize that for millions of workers in today's rapidly changing economy, unemployment insurance benefits can disguise the fact that we have a problem. To that extent—these benefits can be a painkiller, but that is really no benefit at all in the long run.

In the past, it made sense to have a simple system of unemployment insurance benefits that aspired to little more than helping people get by until the next job. But for a year now, we have been saddled with the worst unemployment since the Great Depression, and people are just not being reabsorbed into the work force. Why? Because the technology of work is changing a lot faster than we people are—that is why.

The Congressional Budget Office has said, recently, that roughly 25 percent of today's jobless workers will not be able to find the same kind of work, because those jobs are fast disappearing.

Thus, today's unemployed need more than traditional unemployment insurance benefits and benefit extensions. They need retraining and help in relocating. Otherwise, the year of unemployment insurance benefits which we have been providing in many States is just prolonging the painful experience of unemployment.

There are jobs out there that people can be trained for, in spite of the record unemployment we are experiencing. The National Tool & Machining Association is projecting a shortage of about 250,000 machinists and toolmakers by 1985. In fact, there is such an extreme shortage of workers in these skilled trades that wages are reaching $60,000 a year for some experienced tradesmen. The Department of Labor projects annual shortages of 57,000 workers in industrial machinery repair, 28,000 computer operators, 21,300 machinists, and 5,000 tool and diemakers through the end of the decade. There is a projected cumulative shortage of 2.5 million workers in just 13 skilled occupations by 1990. There is even a lot of concern because we do not have the skilled factory help to gear up production for the administration's defense buildup.

But we are not helping people on long-term unemployment insurance be retrained. Senator SAM NUNN said, recently, that:

> . . . a very small proportion of those collecting unemployment benefits are actually enrolled in training programs. For example, according to the U.S. Department of Labor, of the 7 million unemployment insurance claimants nationwide registered with the Employment Service at any given time during fiscal year 1982, only 17,680 or one-quarter of 1 percent were enrolled in training programs while collecting benefits . . . and in California, only 1,140 of the average 546,140 insured unemployed were enrolled in training programs. So, it is clear that we as a Nation are failing miserably in doing anything significant to help the long-term unemployed develop new skills to improve their own chances of rejoining the active labor force.

This need for retraining is not a temporary one, either. It is hitting right at the heart of our traditional, heavy-industry infrastructure. Take the auto industry, for example. Researchers at Cornell University conducted a study of autoworkers who lost their jobs when Ford shut down its plant in Mahwah, N. J. Half of the workers were still unemployed 2 years later. It was discovered that one of the major problems for the autoworkers was that their skills could not be transferred to new jobs. It is the same story in steel and other industries. And, it is getting worse all the time. According to Harley Shaiken, an MIT researcher, installation of robots at General Motors will eliminate about 40,000 additional jobs by 1990—about the current domestic employment at Chrysler Corp. Researchers at Carnegie-Mellon University are predicting the loss of 1 million jobs in manufacturing, by 1990, due to the current generation of robots. They say that more advanced robots, machines that can "see" and "feel" may cause the loss of an additional 3 million jobs.

This rapid displacement of workers will continue as long as the rate of change in technology keeps accelerating. What that means is that the need for retraining and other adjustment assistance is going to be reaching a crisis in the next few years. So, for millions of workers, it just does not make sense to keep pretending that continual unemployment insurance benefit extensions are going to help.

I hope that in the coming weeks the Congress, the administration, and groups throughout the country will come up with ideas on ways to improve the unemployment insurance program, and to coordinate long-range unemployment insurance benefits for displaced workers with new job retraining and relocation programs.

I have suggested one approach to this problem in H.R. 3501 (see CONGRESSIONAL RECORD of June 30, p. H4878 for a detailed explanation of the bill). Basically, this bill seeks to improve the operation of the established unemployment insurance programs by providing to the unemployed during the period of regular unemployment insurance payments the option of retraining, education, and relocation assistance in lieu of additional unemployment compensation to which they are entitled.

Mr. Speaker, my proposal, H.R. 3501, may not be the answer to the displaced worker/structurally unemployed problem—but at least it recognizes a problem. I urge all concerned to help devise an answer to the problem. For the sake of the unemployed and for the taxpayer, we must improve the effectiveness of this program.●

SANCTIONS THAT BITE

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. CARR. Mr. Speaker, the Soviet Union has committed an aviation crime of the highest order. For this they deserve an aviation punishment.

President Reagan has taken a step in the right direction by cutting off all connection between Aeroflot and all U.S. airlines. But he does not go far enough. Since these connections were minimal in any case, wiping them out is little more than a slap on the wrist.

We need sanctions that bite. We need to tell the Soviets, and the entire world, that murder in the air is unacceptable.

We need an international convention in which the signatories agree to deny landing and overflight rights to the Soviet Union. And to give it teeth, the signatories must also agree to deny these rights to any nation granting them to the Soviet Union.

I have introduced a concurrent resolution calling on the President to take these steps. Let me know if you would like to cosponsor.

I realize that this agreement would cause considerable inconvenience, and some financial sacrifice for European airlines. I am proposing that we play with a very hard ball—or, as the saying goes, that we shoot with real bullets. But our bullets still will not be as real as the missiles that brought down flight 007.●

THE BATTLE OF VIENNA

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. NOWAK. Mr. Speaker, September 12, 1983, marked the 300th anniversary of the Battle of Vienna, an event which helped to shape the destiny of Europe. The anniversary commemorates a historic day and the courageous man, Jan Sobieski, King John III of Poland, who led the Christian forces to victory over the powerful Turkish Army.

In the early part of the 17th century, the power of the Ottoman Empire posed a major threat to Europe. It was evident in the spring of 1683 that Vienna, the center of the Holy Roman Empire, would be the next target of the Turks, and Pope Innocent XI called upon the famed military leader and great King of Poland, Jan So-

bieski, to save the city of Vienna from total collapse. Leading a combined army of 70,000 troops, King John III charged the Ottoman lines. The Turks were routed and their camps dispersed. King John's unquestionable valor and personal conviction saved not only Vienna but all of Europe as well.

Despite her great heritage, Poland again finds herself struggling against blatant social injustices and repression. We have witnessed this summer the noble political valor of another Polish emissary, Pope John Paul II, and his effort to ease the repression felt by his homeland. In remembering the significance of the Battle of Vienna, let us reinforce our commitment to bring about world peace, justice, and freedom.

Mr. Speaker, I would like to share with my colleagues an extensive account of the Battle of Vienna which appeared recently in the AM-POL Eagle, a weekly newspaper in my district, Buffalo, N.Y.

SOBIESKI'S VICTORY AT VIENNA SAVED CHRISTIAN EUROPE FROM TURKISH INVASION

In the first half of the 17th Century the Ottoman Empire experienced a period of peace and prosperity and extended the Sultan's rule over all of North Africa, Western Asia and most of Eastern Europe. The empire controlled the mouths of the rivers of Tigris, Euphrates, Nile, Dnieper, Danube and Bug with all the riches of the trade on these rivers. The manpower was almost inexhaustible. The consolidation of the empire and build-up of a large army made her a great danger to Christian Europe.

On August 17, 1629, a boy was born in the Castle of Olesko. His long life was to be dedicated to the war against the expanding Turkish Crescent, and he was the last of the heroic kings to personally lead the Christian Armies in defense of Faith and Western Civilization. John Sobieski was born in the Palatinate of Ruthenia in Southeastern Poland, which was in the path of Turkish and Tartar invasions. His father James, was Castellan of Cracow and four times marshal of the Diet. His mother was the granddaughter of the great Hetman Zolkiewski, who occupied Moscow in 1610, brought the Czar captive to Warsaw and placed a Polish prince on the throne of Moscow.

He died in battle on the Moldavian steppe in 1620 at the age of 73. The young Sobieski grew up with his brother among relics of old campaigns, and they were taken every day to pray at the marble tomb of Zolkiewski at the Castle of Zolkiew, near Lwow. After finishing the University of Cracow, they were sent for an educational tour of Western Europe. John Sobieski was soon recognized as a brilliant leader on the battlefield and in politics. In 1665, he became Grand Marshal of the Diet and in May, 1666 he was given the Baton of the Field Hetman of the Armies of the Crown.

In 1667, with only 9,000 regulars and 6,000 militia, he completely defeated the 50,000 men army of Khan of Crimea at Podhajce. The following year he became the Grand Hetman and was received as a hero in Warsaw. Several future campaigns established his name as a brilliant commander, and the victory at Chocim in November, 1673, where with a force of about 30,000 men he attacked and completely defeated a Turkish Army of 70,000 entrenched in a strongly fortified camp, spead his fame across all of Europe.

The victory at Chocim drove off the Turks temporarily, nevertheless it left a permanent moral effect. The campaign of 1673, increased the stature of Sobieski to such an extent that his name began to possess that power over the Turks and Tartars which alone held off the invaders in his old age.

In May, 1674, he was elected King of Poland and Grand Duke of Lithuania. Again and again he returned triumphantly from victorious campaigns but often was forced to see the advantages he gained over the invaders fritter away in domestic and international intrigues. In 1682, the Turks assembled an immense army, estimated at 300,000 men and moved northward across the Balkans.

By Spring of 1683, it became clear that the Turkish might would strike at Vienna—the heart of the Holy Roman Empire. Pope Innocent XI had placed himself at the head of the crusade to save the Faith and his emissaries were searching for help in the capitals of Europe. Poland was arming with the eyes of Europe upon her. On July 5th, Prince Charles V of Lorraine, Commander of the Austrian Army encountered the first Tartar hoards and was forced to retreat. On July 7th, Emperor Leopold and his court fled Vienna; thousands followed. Count Starhemberg was appointed to command the defenses of Vienna which were reached by the Turkish cavalry on July 13th and fully encircled by its army the next day. Pope Innocent XI was in constant communication with Sobieski and dispatched urgent messages. The Emperor did the same. In the meantime the enemy built tunnels and trenches, and crept closer to the walls of the city every day. On August 8th, both Hetmans, St. Jablonowski and M. Sienawski, reported that 27,000 men were assembled.

After reading the imploring letters from the Austrian court and receiving news that Vienna was in imminent danger of collapse, the King decided not to wait for the arrival of the remaining troops. He hurriedly marched south and met the Prince of Lorraine on August 31st. On September 3rd, he was joined by German Princes and at a War Council, King John III Sobieski was handed the Marshal's Baton of the Imperial Army as a symbol of the Commander in Chief.

On the morning of September 6th, the bridges on the Danube were finished and the Christian armies, approximately 70,000 strong crossed the river within two days. After a study of the surrounding terrain, it became apparent that the mountain slopes on this side of Vienna were covered by forests and vineyards with numerous deep ravines and stone walls and could be conquered only step by step.

The King called the War Council and established the "Ordre de la Bataille". The infantry had to attack in the front line with cavalry and artillery closely behind, until they would reach the plains at the foot of the mountains. Then the cavalry would move forward. The Imperial Austrian forces were on the left wing under the command of Prince of Lorraine, he had 2,800 Polish troops under Prince Lubomirski with him.

The German armies were in the center under Prince of Waldeck and the Polish forces were on the right wing. Great Hetman Jablonski was on the far right. General Katski with the infantry and artillery in the center of the Polish wing and Field Hetman Sieniawski on the left. The Polish forces had to cross the longest and most difficult mountain terrain before reaching their positions.

Kara Mustafa did not believe until the last day that John III himself would appear with the Polish Army. When the Austrian commanders observed from the top of Kahlenberg the enormous fields of the Turkish encampment and expressed doubt in the possibility of an attack with their relative small forces, the King stated: "The commander, who in spite of the approach of our army, did not gather his forces and did not fortify his encampment, is foredoomed to loss."

On September 12th, in the early morning the Austrian forces were closest to reach the enemy lines and Prince Charles of Lorrain started the attack on the left wing. The Turks were pushed out from the strategic position at Nussberg. The King was personally here and served at the Holy Mass celebrated by the Papal Envoy to give thanks for the first success. At about 1:00 p.m., General Katski's artillery reached the top of the hills and the King started the infantry assault and routed the enemy from the vineyards on the mountain slopes in hard-fought separate battles. The Tartars massed their forces and staged a lightning attack with thousands of calvary directed at the flank of the Polish right wing. Jablonski quickly regrouped and successfully repulsed the attack. At about 4:00 p.m. all passes to the plain of the Turkish camp were in the hands of the Allies. When the Grand Vizir saw the mass of Polish troops emerge from the forests on the mountain slopes, he realized the the main danger was approaching from this side and issued orders to move a great portion of his army to the south in order to form a strong front against the Polish wing.

The King came to the conclusion that the enemy should not be given time to regroup and ordered the Polish and German cavalry to assemble for the final assault. To find out how suitable the ground conditions were for a cavalry attack, he sent a squadron of hussars first. The squadron came back with heavy losses, but the King was certain that a cavalry attack was possible.

Masses of newly assembled Turkish cavalry rushed against the Christian forces. In the meantime, the King and his cavalry of close to 20,000 horsemen formed in his own special chessboard formation—hussar blocks in the front line with saber, and carbine-equipped armored cavalry stationed at intervals of a hundred paces behind; the heavy reiters of Sieniawski's left wing and the royal lead center were reinforced farther back by dragoons and flanked to the northeast by Sachsen-Lauenburg's regiments and to the southwest by Jablonowski's corps. In the lead, astride a handsome Podolian charger, was John III himself in luxurious garb, upon his head the cap with feathers held by a priceless jewel-clasp and boby armor covered by a dark blue robe. Close by were a herald and a hussar, bearing the crown escutcheon and the royal sign—a white falcon's wing mounted high on a lance. The first lines of hussars lowered their 16 foot lances as the wind uplifted the eagle's wings and the leopard and wolf pelts attached to their shoulders. The polished and gleaming armor plates, visible from afar caused the German infantry on the far left to pause briefly and a loud cheer echoed through the vineyards. The German cavalry attached to the right wing was making an attack in full gallop for the first time in riding shoulder to shoulder with the elite of the Polish gentry. Slowly they picked up

speed. The Turks staged repeated counter-attacks and the roar of the battle resounded time after time like rolling thunder. At about 6:00 p.m. Jablonowski's hussars reached the Grand Vizir's camp. Kara Mustafa made one last attempt to resist. All his staff and body-guards fell and he was able to save only his private treasure.

The victory was complete. The Turkish camp with all tents, artillery and uncounted riches were left by the fleeing enemy. Sobieski was enthusiastically greeted by the people of Vienna and declared "The Savior of Christendom" by the Pope. The victorious campaign brought new international pride to the Polish King and attracted the eyes of the whole world to the Republic.●

DENNIS BRUTUS

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. FRANK. Mr. Speaker, in August, I filed legislation which would allow Dennis Brutus to remain a resident of the United States. As Anthony Lewis says in his August 25 article in the New York Times, "Dennis Brutus is an African poet renowned as a campaigner against South African racism and a refugee from South African justice." In what the world can only interpret as a wholly unjustified gesture of solidarity with South African racism, this administration is intent on forcibly expelling Dennis Brutus from the United States. In his article, Anthony Lewis explains the circumstances which have given the Justice Department the pretext on which to pursue this callous action.

The case for welcoming Dennis Brutus to America is also made in an eloquent resolution adopted this summer by the Massachusetts State Senate.

During the district work period, a judge wisely decided against the Justice Department's effort to expel Dennis Brutus and ruled that his life would be endangered if he were forced to leave the United States. I hope that the administration will accept this sensible ruling and drop all further efforts to expel Dennis Brutus. As the accompanying material argues, he is a man whose presence here should make us proud, for his choice of America as a residence reaffirms our tradition as a place where people cherish and fight for freedom. I ask that the column by Anthony Lewis and Massachusetts State Senate resolution be printed here.

[From the New York Times, Aug. 25, 1983]

CASE FOR ASYLUM

(By Anthony Lewis)

BOSTON, Aug. 24.—Two cases, two human situations; consider what they say about official United States attitudes toward people seeking refuge from tyranny.

Andrei Berezhkov, the 16-year-old son of a Soviet diplomat in Washington, was the subject of intense U.S. concern when a letter with his name said he wanted to stay in this country. He was not a noted opponent of political tyranny. He had few ties to America; international law made any U.S. intervention difficult. But two Assistant Secretaries of State involved themselves in his case before finding, as they did, that he was leaving voluntarily.

Dennis Brutus is an African poet renowned as a campaigner against South African racism and a refugee from South African justice. He has lived in the United States for 12 years and is a tenured professor at Northwestern University. But the Reagan Administration is trying to expel him. Its lawyers have scoffed at fears for his safety if he is sent near South Africa. They have offered a judge secret evidence to support their argument that he does not deserve asylum.

Mr. Brutus has a distinction that makes him a hated symbol to the white rulers of South Africa, and a heroic one to the critics of their regime: He has actually succeeded in bringing about some change in one aspect of apartheid, the official system of racial discrimination.

Segregated sport was his target. He was a teacher in Port Elizabeth, South Africa, in the 1950's when he read the charter of the International Olympic Committee and discovered that it called for exclusion from the games of any country that discriminated on the grounds of race or religion. He began campaigning in international sports groups to bar South African teams.

The results have been startling—and extremely painful to sports-loving South Africa. Its teams have been kept out of the Olympics for years, and out of official international competitions in cricket and rugby and other games. And it all was inspired by the efforts of this one man.

In an attempt to meet the objections of sports federations and governments abroad, South Africa has taken steps to let blacks play along with whites—at least at the level of international competition. Observers differ about the extent of the change. Critics call it a facade, not affecting the discrimination that runs through education and all of life in South Africa. Others argue that the attempt to meet international standards has, at a minimum, exposed the cruelties and absurdities of the racial policy.

For Dennis Brutus, the result of his campaign was repression: first the official silencing called "banning," then imprisonment on Robben Island. He was shot in the back while trying to avoid arrest in Johannesburg. After his release from prison in 1965 he was put under house arrest, then given a one-way exit permit. He reached the United States in 1971.

His problem with American immigration law is of the kind usually called "technical." He was born in 1924 in what was actually then Rhodesia, though he was taken to neighboring South Africa as an infant and was treated by its courts as a subject. While Rhodesia was formally under British control, he traveled with a British passport. When it became independent Zimbabwe in 1980, he failed to get a Zimbabwe passport soon enough and U.S. authorities cried foul.

A former South African secret agent, Gordon Winter, has said that his Government rated Dennis Brutus "one of the 20 most dangerous South African political figures overseas." Mr. Brutus believes that, anywhere in Africa, he would be a likely target of South African assassins. Agents of Pretoria are widely regarded as responsible for recent political murders in Mozambique and Zimbabwe, and its soldiers have carried out operations in several nearby black-ruled countries.

On the facts, it is a compelling case for asylum. But in a hearing that began last month and is due to resume shortly, the Reagan Administration has opposed American refuge for Dennis Brutus. Why?

Chester Crocker, the Assistant Secretary of State for African Affairs, said recently on "Nightline," the ABC television program: "Mr. Brutus is being treated like anybody else. . . . We have laws, and they must be applied." But political considerations are not exactly unknown when American officials think about giving someone asylum—as the case of Andrei Berezhkov shows. If the United States does finally expel Dennis Brutus, a lot of people will believe that the reason was not a technical violation of immigration rule but his committed and successful opposition to apartheid. Is that the message we want to send?

THE COMMONWEALTH OF MASSACHUSETTS RESOLUTION REQUESTING POLITICAL ASYLUM FOR DENNIS BRUTUS OF SOUTH AFRICA

Whereas, Dennis Brutus, now a poet without a country, has graced the Commonwealth of Massachusetts as a teacher within one of our free and independent colleges; and

Whereas, Dennis Brutus, came to our land after an across-the-world journey from the apartheid state of South Africa, where from his youth he cried out for the freedom of his oppressed people in a country where one's life is at risk for independence of spirit; and

Whereas, Dennis Brutus is now a tenured, respected college professor in Illinois at one of our Nation's great universities, a free man in search of peace for his people of South Africa; and

Whereas, the Senate of the Commonwealth of Massachusetts, the oldest, continuous constitutional legislative assembly of free men and women in the world, with a heritage of independence of mind, and opportunity granted to millions of the oppressed of the world, responds to the cry of Dennis Brutus, which has gone unanswered since has asserted in Nairobi, Africa in nineteen hundred and sixty-seven.

"How much longer must we doggedly importune in the anterooms of governors of the world or huddle stubborn on the draughty frontiers of strange lands?

How long must we endure?

And how shall I express my gratitude and love?"; and

Whereas, Dennis Brutus is now requesting political asylum in the United States and is in imminent risk of deportation in proceedings before the United States Immigration and Naturalization Service; Now, therefore be it

Resolved, That the Massachusetts Senate asserts its support of the plea of Dennis Brutus and calls upon the United States Immigration and Naturalization Service, the United States State Department, the United States Congress and the President of the United States to grant political asylum to Dennis Brutus and that he be released from the status of pending deportation and be otherwise offered the privilege of residency in this our land; and be it further

Resolved, That a copy of these resolutions be transmitted forthwith by the Clerk of the Senate to the United States Immigration and Naturalization Service, the United

States State Department, the Massachusetts congressional Delegation, the President of the United States and to Dennis Brutus.●

TAXES—TROUBLING FACTS

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. BEREUTER. Mr. Speaker, the editor in the Omaha World Herald recently made some very thoughtful comments about the tax burden facing our Nation's citizens. The questions raised by the editorial and the directions it suggests for Federal tax policy merit the attention of all Members of Congress. I commend the following editorial to all my colleagues:

NEW LIGHT SHED ON TAXES

Some critics have said that upper-income Americans received unfairly large benefits from the round of tax-rate reductions approved by Congress and President Reagan in 1981.

A recent Census Bureau study is instructive. It compares amounts paid in federal income taxes by a cross section of the population in 1980, before the three-stage "supply-side" tax cuts took effect.

The findings suggest that, if upper-income taxpayers enjoyed more tax relief from the recent tax changes, it might have been the result of their carrying a much heavier tax burden in relation to their income.

Families with adjusted gross incomes between $10,000 and $12,000 paid federal income taxes representing 9 percent of their income.

Those with incomes between $25,000 and $30,000 paid 14.8 percent. The rate went up to 24.4 percent for households with incomes of $50,000 to $75,000. And those with over $75,000 paid 34.2 percent.

There may be those who take the position that 34.2 percent is still too low for people making $75,000 or more. But upper-income Americans, the bureau figures indicate, give up nearly four times the percentage of their income as those at the bottom of the scale.

That suggests a highly progressive tax system, a system that remains progressive even after the introduction of Reaganomics.

Another part of the study showed how the tax bite has been rising for everyone.

In 1980, the average household paid 23 percent of its income in federal and state income taxes, property taxes and Social Security payroll taxes. That was up from 19.9 percent just six years earlier.

The survey produced another troubling set of figures. In 1974, average pre-tax household income was $21,880. After-tax income was $17,527. By 1980, pre-tax income had slipped to $21,063, but after-tax income dropped all the way to $16,272.

The situation probably has not improved since 1980—despite the tax rate reductions approved by Congress and the Reagan administration in 1981. Higher Social Security payroll taxes, bracket creep and burgeoning state and local taxes have all but offset the federal income tax cuts, Census officials said.

How much of a nation's income should be consumed by taxes? The 23 percent of 1980? Thirty percent? We don't know, but the trend is disturbing.

There are two ways to reverse the trend. One is to increase productivity and, by doing so, boost income. The other is to reduce government spending.

An approach that incorporates both productivity and economy would be best.●

WILL KIBBY

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today in honor of one of my community's most valuable citizens. Mr. Will Kibby, president of the Santa Clara Valley YMCA, retired on August 30, after a 36-year career with the YMCA, and he has spent the last 14 serving citizens in the city of San Jose. Today, I want to thank Will Kibby for all that he has done.

Since coming to San Jose in 1969, Will has greatly increased the visibility and influence of the "Y" in our community. Much of Will's early work involved expanding and adding facilities. He used the proceeds of the 1968 Capital Campaign for, among other purposes, the construction of the South Valley Branch to help provide for a previously unserved community.

Will always understood that some of the most effective forms of altruism take money, and he was a master at raising funds for his community-oriented institution. For example, under Will's direction, the 1978 Capital Campaign raised $1.7 million.

Will Kibby has seen to it that the YMCA in San Jose has responded to the demands placed by new clientele and by ever-expanding needs for services. During Will's presidency, for example, the number of women and girls participating in YMCA activities has risen dramatically, and child care programs have been added to the YMCA's catalog of activities. Thus, as Will leaves the YMCA family, he passes on an organization committed to meeting the challenges of tomorrow.

Mr. Speaker, Will Kibby has left an admirable legacy, and I ask you and all the Members of this House to join me in honoring this dedicated, effective professional.●

MORRIE ROSEN

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. LEVINE of California. Mr. Speaker, last Wednesday the Los Angeles Times printed an article about one of the most remarkable men I know. This man, Morrie Rosen, is the director of the Israel Levin Senior Citizen Center in Venice, Calif.

Morrie is much more than just the director of the center, however. For hundreds of senior citizens who live in the Venice, Santa Monica, and west Los Angeles area Morrie is an outspoken and articulate advocate champion of their cause. He is also a sympathetic listener and counsellor for their everyday problems in living. For many Morrie fills a critical role in making their lives livable.

Morrie's community service extends well beyond serving the elderly of our community, however. He is a forceful advocate for preserving and protecting the first amendment rights of Americans, an outspoken opponent of the harsh and uncaring policies which many elected officials have found expedient in today's political climate, and a tireless worker on behalf of programs which aid the unemployed, the handicapped, the poor, blacks, Hispanics, and every other disadvantaged group of people in our society today.

Morrie is a precious resource to the people of the community which I represent. I am deeply saddened to read that he is considering retiring from his position as director of the center. It will be very difficult indeed for any successor to take Morrie's place at the center, in the lives of its members, and his role in our community.

Even when he leaves the center, however, I am confident that Morrie will remain outspoken in his advocacy of the rights and needs of the poor, the elderly, and the handicapped and will remain the conscience of our community.

I ask my colleagues to join with me in honoring a remarkable man, and ask that the attached article be printed in the CONGRESSIONAL RECORD:

SENIOR CITIZEN CENTER DIRECTOR KEEPS AN EYE ON CHANGES IN SOCIETY THROUGH HIS WINDOW ON THE BOARDWALK

(By Joel Engel)

Social worker, sociologist, philosopher, psychologist. Out of necessity, and sometimes self-defense, Morrie Rosen is all of these. As director of the Israel Levin Center, the senior citizen center on the Venice boardwalk, Rosen has had to call on an array of skills in order to survive the last 19 years.

Now, at 68, Rosen is planning to retire soon. Sitting in his small office, which is dominated by a large picture window overlooking the boardwalk and ocean, Rosen contemplated the changes he has seen passing by.

DISPLACED AND FORGOTTEN

From a haven for the elderly, most of whom were Eastern European Jewish refugees, the area has been transformed into a carnival celebrating youth. Sadly, he said, his eyes tracing the motion of a bikini-clad girl whizzing by on roller skates, the elderly have been most displaced and forgotten.

After World War II, as many as 10,000 of these refugees migrated to the Ocean Park-Venice community. There, in rickety wooden cottages purchased cheaply with their life savings, they re-created the bustling Jewish ghettos of their homelands. Al-

though the area was basically a slum these "incredible survivors," as Rosen calls them—who had survived czarist pogroms, the Depression, Hitler—and now were able to thrive.

BUILDING COST $70,000

But their peace was short-lived. In the early 1960s, the city of Santa Monica laid claim to their properties for a community redevelopment program. The great majority of the residents took their modest recompense and scattered to points unknown. A few held out, however, including the group that had been preparing to convert a vacant warehouse donated by a wealthy refugee from New York, Israel Levin, into a community center.

To avoid a court battle, the city agreed to double the price for the warehouse to $36,000. With that money, the group hoped to obtain a nearby site where the remaining 3,000 residents, who had moved into the area's shabby apartments, could gather. But the only suitable building, located on the boardwalk just north of Rose Avenue, cost $70,000. To the rescue came Israel Levin, and the center bearing his name was dedicated in August, 1964. The location was in Venice, part of the city of Los Angeles, and just south of the Ocean Park area of Santa Monica.

Membership was modest at the outset. The ones who had stayed encompassed many, often conflicting idealogies and philosophies. There were even reports of physical violence among members caught up in the fervor of their beliefs. It became, Rosen said, a veritable Tower of Babel, with six or seven of the most aggressive, single-minded members trying to run the center each in his or her own way.

Under the terms of the deed the center fell under the auspices of the Jewish Federation Council, which was responsible for funding operations and employing a center director. But, because of the combative atmosphere, the center went through three directors in its first six months. That's when the job was offered to Rosen.

"I never experienced anything as intense in my whole life," he said. "But I saw something that the others who'd worked here before me didn't see. That sort of violent emotional environment was in every way what I was accustomed to as a child. I was reliving my youth."

Born on the Lower East Side of New York in 1915, Rosen was the youngest of four children. Since he was the only son, his poor immigrant parents deemed it necessary to sacrifice so that he might go to college. His intentions, at Long Island University, where he majored in chemistry, were to teach and do research.

The Depression, however, forced him to quit school for a Work Projects Administration job in which he helped to build several New York City playgrounds. He later became a playground director.

Then came the war. Rosen immediately volunteered but was rejected because of two perforated eardrums. He was disappointed, particularly as he watched most of his friends depart for Europe. Fewer than half returned. "That war changed my whole relationship to the world," he said. "I never felt the same again."

Trying to escape a romantic heartbreak, Rosen recalled, he came to Los Angeles in 1946 for what he thought would be a three-week job at the community center in City Terrace near Boyle Heights. He had hoped to pocket most of the $50-a-week salary and return to school in New York.

Before his sojourn was up, the community center workers all received a raise to $75, and he decided to stay, calculating that if he worked hard for two years he would be able to save $5,000 toward his education.

Then, Rosen said, he fell in love and in 1948 married a woman with a son from a previous marriage. Now a husband and father, he was deeply committed.

DEGREE IN SOCIAL WORK

He attended UCLA in the mornings while working at the center until late at night. With the degree in social work he eventually earned, Rosen climbed in the hierarchy of the then-burgeoning Jewish Community Centers organization.

Transferred to the East Side Center in the early '50s, Rosen was instrumental in instituting cultural programs for the elderly. "People were just sitting on benches watching Fords go by," he said. "They had nothing to do. We got them into these large auditoriums where singers and actors would perform. It gave them joy."

It was while he was director of the B'nai Emet Center in Montebello from 1956 to '63, Rosen said, that he began to notice incredible changes in the traditional American family way of life. "Call it distintegration, the falling apart of the family. When I first started there it was a golden age. Parents and children were supportive of the programs. Everyone, young and old, enjoyed each other. Then, the last couple of years, the kids suddenly became rowdy, and the parents didn't seem to care."

The elderly still dominated the boardwalk, however, when Rosen accepted the job at Israel Levin Center. "They were so beautiful parading up and back in their distinctive clothing," he said, his voice a characteristic gentle rasp. "The women wore long, flowing dresses and tremendous oversize hats to shade their faces from the sun. It was a fashion show. Everyone looked serene and beautiful."

Inside the center, though, the seniors were contentious, he said. "The first two years I tried to contain the chaos. There were about 75 members, and if you didn't agree with them, they abused, taunted, vilified you. I survived by getting people to lower their voices to loud screams."

LESS TURBULENT MEETINGS

Actually, he survived by inaugurating compromise, rotating each rebellious group's favorite activity on a daily basis. Luncheons, entertainment, book reviews, medical and psychiatric lectures, and political programs were scheduled. Eventually, meetings became slightly less turbulent, and membership grew.

Meanwhile, outside on the boardwalk, "the first wave of youth," Rosen said, had begun to discover Venice. "The beatniks, flower children, hippies, drop-outs, cop-outs—all kinds of movements with brief life spans came here. One wave would overlap the next. The affluent society was turning off the affluent youth."

At first, Rosen said, the young people and elderly related well to each other. "The flower children loved to be with old people. They were so kind. They gave flowers to them and wore the clothing the old people wore." He noted, with irony, that the fashionable boutiques that were beginning to spring up all over town, soon to find their way even to Beverly Hills, sold the clothes that the seniors had always worn. "It was lovely to see the old and young together. It made a lot of the old people happy."

That happiness, too, was relatively short-lived for these "incredible survivors."

"The flower children were replaced by the hippies," Rosen said. "One hippie would rent an apartment, invite all his friends in, and everyone would sleep on pads on the floor. These young people didn't care how dirty the place was, or if it was maintained or not. They had contempt for material things."

At the time, the elderly were being charged about $60 a month for ther small apartments. But some landlords soon realized that they could multiply that sum by charging rent for each "hippie" in the apartment without having to maintain the premises, Rosen said, and many of the old people were forced out. "That's when things really started to change. I noticed less and less of the old people on the boardwalk. Then the kids stopped speaking to them. And they were smoking pot all over the boardwalk."

Soon the first of the "disillusioned Vietnam veterans" came to live in Venice, Rosen said. "A lot of them were . . . smashed, wounded, both physically and psychologically." Not surprisingly, he said, drugs like heroin, which they'd first used in Asia, became abundant. So did the junkies.

As the atmosphere degenerated and the rents climbed, the numbers of the elderly began to diminish at an accelerated pace. Yet membership in the center rose dramatically, with the panicked rushing there for protection. The roll swelled steadily toward the 500 mark, where it stands today, even though the elderly population had declined from 3,000 to 1,000. "This place is their haven, their security net," Rosen said.

CONTRAST TO USUAL RAGS

Conditions in the area continued to worsen. "Now you had these pathetic guys, the cop-outs," he said. "They'd just sit there all doped up."

Then something completely unexpected developed. Looking out his window, Rosen began to notice well-dressed young men—a contrast to the usual rags and tatters—carrying briefcases, walking along the boardwalk and side streets. They were the first wave of real estate speculators who bought and sold properties at an alarming rate, sometimes turning over a single building several times within a year. Besides driving up real estate prices, their speculation again resulted in rent increases, was planning to raise their rents by more than a third. After contacting Venice Legal Services, Rosen organized a rent strike that lasted bitterly for two months, producing a compromise agreement favorable to the existing tenants.

Rosen contends it was greed, in the actions of these speculators, that he saw growing rampant during the decade.

Such outspoken views have earned Rosen a reputation as a firebrand. When a drunken wino defiled the center and then pulled a knife on him, Rosen naturally called the police. Later, when a group of area merchants tried to enlist his aid to ban winos from sitting on boardwalk benches, he asserted angrily that winos have civil liberties like anyone else. And when this case attracted representatives from the Los Angeles City Council and state Senate, all of whom "pretended to be my friends," Rosen said, "I let them have it but good. Where were they before Anna Gerber was killed?"

Gerber was an 87-year-old woman who died in 1979 after being struck by a bicyclist as she attempted to cross the boardwalk. "The members were mad, agitated, scared," Rosen said. "I called a press conference to see if we could get some action. We wanted

the chief of police and the City Council to know they were just as responsible for Anna's death as that bicyclist."

Yet no ordinance banning bicyclists and skaters was enacted, as the center members wanted. So Rosen organized a protest march, carrying a symbolic empty coffin up and down the boardwalk, culminating in mock memorial services at the Bay Cities Synagogue several hundred yards to the south. Because of all the attendant press coverage, he said, a proclamation was soon issued that banned bicyclists and skaters from the area near the center. But too many police were needed to enforce the order, and the scene returned to normal chaos within a few days. Even now, he noted, the members are being hit. "The only difference is that none have been killed yet," he said.

Rosen traces the roots of Venice's crime problems to the period near the end of the decade when nude bathing was briefly legalized. "The newspapers and television stations really went to town," he said. "So then you suddenly got the middle-age men with their cameras trying to get a peek. You couldn't find a space anywhere, it was so crowded. Then the business people came around trying to capitalize on all this potential. So more people came, and the whole thing feeds off itself."

This began the decade of the 1970s, "the decade of decimation," he said. "The elderly and the poor were all but driven from Venice."

He related the story of how several center members, "looking like they'd just stepped out of 'The Grapes of Wrath,'" came down the boardwalk one day to tell him that a real estate investor had bought their ramshackle, rat- and roach-infested building at a court auction and * * *.●

DR. FRANK PELLEGRINI

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. LIPINSKI. Mr. Speaker, I would like to join with the people of All Saints-Saint Anthony Parish to celebrate on September 25, 1983, the 25th anniversary of the parish organist and choir director, Dr. Frank Pellegrini's service to the parish.

Dr. Pellegrini is a cornerstone of the southwest side Chicago community. He earned his doctorate in sociology from the University of Chicago and has taught at Loyola University of Quigley Preparatory Seminary South; he is presently employed at Chicago City Colleges.

Dr. Pellegrini has conducted the award winning boys' choir of Saint Anthony Parish, the Little Singers of Saint Anthony, for 18 years, and he was active in Pueri Cantores for almost 20 years.

Frank has shown the same spirit of dedication to his civic community as to his church community. He is one of the founders of the Greater Bridgeport Organization, and served as its president. He organized citizen community improvement efforts and cultural events to further improve our area.

Dr. Frank Pellegrini is a man of whom we can all be proud. As a teacher for the past 25 years, he enjoys a reputation as a concerned and caring instructor whose confidence one can seek and whose opinions one can respect.

It is reassuring to know that a man with his spirit of brotherhood and concern for all is active in our community. I congratulate Dr. Frank Pellegrini on 25 years of service to All Saints-Saint Anthony Parish, and wish him many years of success in the future.●

SHORT TIME COMPENSATION MODEL LEGISLATION—AID FOR THE STATES

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. STARK. Mr. Speaker, after most a year of foot-dragging, the Department of Labor released in late July model legislative language for the States to use in implementing short time compensation (STC) programs. The legislation is described in "Unemployment Insurance Program Letter No. 39-83," issued July 29 to all State employment security agencies.

The Department was instructed to provide this service in last year's tax bill (TEFRA), signed into law on September 3, 1982. While the delay was disappointing, the release of the model legislation may be very helpful to States in setting up STC programs nationwide.

STC is a novel kind of aid to moderate the impact of periods of unemployment, and three States—California, Arizona, and Oregon—have already developed successful programs of their own.

STC is a program that operates through State unemployment insurance programs to provide an alternative to regular, full-time layoffs. Instead of layoffs and separations, it gives employers who must cutback on production the option of reducing work hours for those employees who voluntarily participate. In return, workers receive partial UI benefits and most of their regular pay. Everyone keeps their jobs and skills, and everyone keeps their retirement and health benefits. Instead of separations, companies and employees are pulled together in a cooperative effort that can help improve morale and productivity.

I hope that other States will use this model legislation to add an important new option to their UI programs.●

CHILE: EVIDENCE OF TORTURE

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. McHUGH. Mr. Speaker, as the 10th anniversary of the coup in Chile approaches, concerns about human rights violations under the government of General Augusto Pinochet have intensified.

In May of this year, Amnesty International released a report documenting the widespread and systematic use of torture in Chile. The report documented the cases of 18 victims of torture who were examined extensively by an Amnesty International delegation that visited Chile. The victims of torture have included human rights workers, students, political opponents of the current Government, and manual laborers.

For the benefit of those of our colleagues who may not have read this report, I am inserting into the RECORD the cases of two of the victims of torture documented by Amnesty International, a social worker and a sales agent. I hope that this information will serve as a reminder that abuses of human rights continue to this day in Chile.

The following material was submitted for the RECORD:

CASE NO. 9

Anonymous.

PERSONAL DETAILS

He is 28. His father was an officer who resigned after the military coup. He studied history and geography at university, but has not been able to get work as a teacher since graduating in 1979. He therefore became a sales agent. Because of a knee operation, he has been off sick since early 1982. He is married. His wife was pregnant at the time of his arrest. Their child was born 11 days later.

STATE OF HEALTH BEFORE ARREST

His left knee was injured in mid-1973 and he was in hospital for almost a month. After he left hospital he continued to suffer pain in the knee, so his left medical meniscus was removed in early 1982.

Ever since 1973 he has had sporadic "nervous heart" attacks with precordial pain and difficulty in breathing. Apart from this he did not connect any symptoms with his arrest and detention in 1973.

PREVIOUS DETENTION AND ALLEGED TORTURE

He was arrested and held briefly in 1973 after attending a student meeting which was surrounded by the police. He was kicked and pistol-whipped all over. Afterwards, he was taken to a boat called the "Maipo", where he was not actually ill-treated, although he was held in appalling sanitary conditions.

TIME AND PLACE OF ARREST AND DETENTION

He was arrested in the first quarter of 1982 and held at the CNI centre in Valparaiso for 10 days. He was then transferred to the CNI centre in Santiago, where he was held for a week. Then he was moved to Val-

paraiso prison, where he remained until his unconditional release 21 days after arrest.

DURATION OF ALLEGED TORTURE

He was tortured on 10 days; on four of them the torture was exclusively psychological. He was held incommunicado for 16 days.

INTERROGATION AND TORTURE

His account of events was as follows:

In mid-March five men in plain-clothes who said they were members of SICAR, the *Carabineros'* intelligence agency, searched his home and removed several of his belongings. No arrest-warrant was shown. He was taken down to a car, hooded and threatened.

They drove him to an old house in Valparaiso, where he was made to sit on a chair to which his hands and feet were tied. He was asked about his personal relationships and kept tied to the chair all night.

He stayed tied to the chair throughout the following day, forced to listen to a cassette recording of a Mexican song played over and over again at full volume. The door was opened loudly a number of times during the day, but those who opened it said nothing to him.

That night he was allowed to go to bed but was tied to it by one hand. During the night he was woken up several times by somebody kicking him in the stomach.

Next day he was tied to the chair again and made to listen to music all day. In the evening, he was interrogated and kicked and beaten, mainly in the abdomen and on the back. He was undressed and electrically tortured for about an hour, primarily on the back and neck.

He sat on the chair throughout the next day, listening to the cassette player. In the evening he was interrogated for an hour and a half. During the interrogation he was punched on the body and neck, hit on the back of the head three or four times, slapped on the face and underwent telefono from five to 10 times. He was also frequently threatened with "disappearance" and execution.

The next day he was tied to the chair again and made to listen to a loud radio all day. A basic medical examination was carried out by a person who claimed to be a doctor.

He was interrogated for most of the following afternoon. Every time he refused to answer he was punched, mainly on the nose, which bled.

The next day he was interrogated, threatened and insulted, but the day after he was not interrogated—although he was made to spend the entire time sitting tied to a chair.

On the following day a "friendly" interrogator chatted to him all day trying to persuade him to tell the truth and so avoid further torture. Later someone else threatened him again with execution.

He was not interrogated the following day, but the day after his clothes were returned to him and he was made to sign various forms. Then some evidently important person came and shouted that they were incorrectly filled in. All his belongings were again removed and he was taken down to a car. He thought he was going to be killed and felt both frightened and resigned. Instead, however, he was taken to the CNI centre in Santiago where he was given overalls and zapatillas and was blindfolded. He was put in a small concrete cell measuring about 2m by 1.5m. That evening a person he took to be a doctor examined him with a stethoscope and measured his blood pressure, and he was interrogated yet again, this interrogation being far worse than any of the previous ones. He was made to lie on a bed and was severely beaten, including on the knee which had just been operated on. He was electrically tortured more severely than before with two electrodes, one attached to his chest, the other shifted about from his testicles to his right ankle to the lobe of his right ear. Later the picana torture was inflicted with a pencil-shaped object on his face and lips. A dry cloth was put over his mouth and nose a number of times, which made him feel as though he were being suffocated. Each time he nearly fainted. When he was finally taken back to his cell he heard the voice and screams of a friend (also interviewed by the medical delegates—Case No. 1).

He was left in his cell throughout the next two days. Someone who he thought may have been a doctor applied cream to his bruises.

The following day he was interrogated and beaten, in particular on the abdomen and back.

Next day the "doctor" came to his cell and tried to hypnotize him, but, by making a strenuous effort, he managed to resist this.

He was taken to the Fiscalia Militar (Military Prosecutor's Office) the following day and, still blindfold, made to sign some papers.

Next day he was given back his clothes and belongings and driven to the CNI centre in Valparaiso then on to Valparaiso prison, where he was no longer kept in isolation.

He was freed after 21 days but followed by agents for two days after release.

RÉSUMÉ OF INTERROGATION AND TORTURE

He was slapped, particularly in the face. He underwent teléfono a number of times. He was frequently punched, once on the neck, once on the nose (which gave him a nosebleed and many times in the abdomen and on the back, arms and legs. He was frequently kicked, in particular on the buttocks and the knee that had just been operated on.

He was electrically tortured twice: once in Valparaiso for an hour and once in Santiago. The shocks were administered on the lobe of his right ear, chest, testicles, right ankle, neck and back. *Picana* torture (at a lower voltage) was inflicted too, particularly on the lips, earlobes and cheeks.

He was gagged a number of times in such a way that he could not breathe and nearly fainted.

He was partially deprived of sleep the first two nights and made to spend an entire night naked, as well as being naked during several interrogation sessions.

He received many threats. He was threatened with execution and "disappearance", with being tortured in other ways, and with the imprisonment of his wife. He was tortured by noise for many days: Forced to hear the same tune on a cassette player again and again at maximum volume.

An attempt was made to hypnotize him, and the "friendly" interrogator tried to get him to give information.

He was kept in isolation and blindfolded for 16 days. For the first 10 days he was forced to sit up straight, tied to a chair. Except for the first night, when he was forced to remain sitting, he was allowed to sleep in bed. For his five days in Santiago he was kept in a concrete cell measuring about 1.5m by 2m.

MEDICAL EXAMINATION AND/OR ATTENTION DURING DETENTION

Once in Valparaiso and the first day in Santiago he was examined by someone claiming to be a doctor. During his final days at the CNI centre in Santiago he was given ointment to rub on his skin in order, he thought, to hasten the disappearance of his bruises.

EARLY SYMPTONS DESCRIBED

After being tortured he was tired and stiff, felt sore all over and could hardly move. Near both elbows were two parallel blue stripes which he said were the result of the tight binding of his arms with cord during torture. The cords were tied especially tightly during electric torture when his arms moved involuntarily. There were bruises on the right hypogastrium, as well as medially on the left leg just under the knee. His nose bled after being punched, his lip was swollen for a week and his ears itched and were scaly in the auditory canal. He suffered from precordial pain in the chest, without radiation, and had difficulty breathing for about half an hour several times a week. This happened particularly at night, and he himself believed it was due to anxiety since he had had similar anxiety attacks before being arrested. He had nightmares and his memory was somewhat impaired. Just after he was released he found himself forgetting small matters, such as where he had put things, appointments and telephone numbers. He was emotionally labile, irritable and aggressive.

PRESENT SYMPTOMS DESCRIBED

He still has slight discomfort in his left knee and pain in the medial part of his left calf, where he can feel a hard lump near the tibia. He suffers from "nervous" attacks of difficulty in breathing about once a week. His memory is slightly impaired.

CLINICAL EXAMINATION (ONE MONTH AFTER THE ALLEGED TORTURE)

He was well-balanced and relaxed, cooperated with the interviewer and was able to give a clear and detailed account of what had happened to him.

There was some soreness in the medial anterior cleft of his left knee, and a slight atrophy of the quadriceps muscle. On the medial side of the left tibia, between 16cm and 19cm below the knee, there was a 3cm by 2cm hard, indolent lump, unattached to the skin and tibia (it felt very much like an organized haematoma). The skin over the knot was unchanged. Medial to this area and between 12cm and 16cm distal to the knee joint a 5cm-long, 1cm-diameter, rod-shaped indolent swelling could be felt (probably an area of superficial phlebitis).

Near both elbows were two sets of two light brown pigmented parallel stripes 1cm wide and separated by 2cm, crossing each other approximately in the middle of the bend of the elbow.

CONCLUSION

The medical delegates found consistency between the torture alleged, the symptoms described and the clinical findings.

CASE NO. 10

Anonymous.

PERSONAL DETAILS

He is 29. He went through high school, was trained as a social worker and has been employed by a church organization since 1978. He is unmarried but has a steady woman friend.

STATE OF HEALTH BEFORE ARREST

He has situs inversus (internal organs in positions which are the reverse of normal; for example, with the heart on the right rather than left side).

TIME AND PLACE OF ARREST AND DETENTION

He was arrested in early 1982 and was taken to the CNI centre in Santiago where he was held for two days. After two days he was transferred to the Cárcel Pública where he was held for a day. Next day he was moved to the Penitenciaria, where he was held for 79 days before being released on bail.

DURATION OF ALLEGED TORTURE

He was tortured on two days, during which time he was held incommunicado.

INTERROGATION AND TORTURE

His account of events was as follows:

While driving early in 1982 he was followed by a car, then stopped. Four men in civilian clothes, armed with pistols, examined his documents, then forced him into their car. No arrest-warrant was shown. He was blindfolded with tape, handcuffed, required to give information about himself, insulted and threatened with death. (He later learned that his home was searched the same day by CNI agents.)

He was driven to the CNI centre in Santiago, where he was punched hard on the left cheek. He was forced to stand facing the wall for half an hour, during which time he was punched at random on the head and body. Afterwards he was examined by a person he took to be a doctor, photographed and given overalls and zapatillas.

That night, around midnight, he was interrogated. During the interrogation he was beaten and electrically tortured for about an hour. Later that night he was again interrogated. Two people he knew were brought into the room and all three were interrogated together for two hours. Towards morning he was once more interrogated, beaten and electrically tortured. This meant he did not sleep at all that night. He was interrogated again at 10.00 am and once more at 2.00 pm. A "friendly" interrogator talked to him for a long time, asking him why he was involved in such "subversive organizations". Towards evening he was given back his clothes and taken into a "TV studio" in the same building. This room had a large mirror on one wall, which he presumed was a two-way mirror. Here, he and his two acquaintances were interrogated, having been told they were being video-recorded. When they did not answer they could hear the machine being switched off. Later that night he was yet again taken to be interrogated, this time on his own. He was dressed in the overalls again and once more beaten, threatened and insulted.

Two days after arrest he was examined by a person he took to be a doctor. Then his clothes were returned to him and he was brought before a judge. He was made to sign a statement and was then sent to the Cárcel Pública, where he remained for just under three months.

He was released on bail in April 1982.

RÉSUMÉ OF INTERROGATION AND TORTURE

On the first two days, he was frequently slapped on the forehead, neck, chest and back, and was punched on the left cheek, chest and back. He was electrically tortured. He was made to hold a key attached to a wire in each hand. The wire was then charged with electricity, which gave him violent convulsions. Picana was then inflicted—a black, pencil-shaped object was applied to his throat, hands, thighs, lower legs and ankles. He was never sure where they were going to apply the current next. This form of torture lasted for about an hour.

He was held incommunicado for two days and partially deprived of sleep for two days, during which he slept for only three hours altogether. The first night he was interrogated almost continuously; the next, he did not return to his cell until quite late and afterwards was disturbed a number of times. All the while, he was nervous and agitated. He underwent frequent, prolonged interrogations—four three-hour sessions in the course of two days. He was threatened with parrilla. He heard other prisoners crying and screaming.

MEDICAL EXAMINATION AND/OR ATTENTION DURING DETENTION

On arrival at the CNI centre he was examined by a person he took to be a doctor. He was questioned about previous illnesses and operations. His blood pressure and pulse were taken and he was examined with a stethoscope. To discover whether it really was a doctor examining him he told him he had situs inversus and that this was very serious. The doctor assured him it was not and gave a correct account of the condition. He was again examined by a person he thought was a doctor after being tortured.

While in prison, he requested a forensic examination but this was never done.

EARLY SYMPTOMS DESCRIBED

He was generally extremely tired and weak and had difficulty walking and moving for the first few days. His left cheek was very sore—presumably through being punched—and for the first three days he had diarrhea and nausea. He found it hard to fall asleep while in prison and several times had nightmares. (Following release, he slept for 24 hours.) He did not notice any marks on his skin.

PRESENT SYMPTOMS DESCRIBED

He feels completely normal.

CLINICAL EXAMINATION (THREE MONTHS AFTER THE ALLEGED TORTURE)

He was well-balanced, behaved naturally and cooperated with the interviewer.

Examination by stethoscope revealed situs inversus. He had scattered acne.

CONCLUSION

The medical delegates found consistency between the torture alleged and early symptoms described.●

JO ANN KOVALCIK HONORED FOR EXTRAORDINARY SERVICE

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. RINALDO. Mr. Speaker, I wish to commend Mrs. Jo Ann Kovalcik of Scotch Plains, N.J., for her extraordinary service and leadership in assisting the handicapped through her volunteer work with the Occupational Center of Union County, N.J., and for her leadership with the New Jersey Kidney Foundation.

Mrs. Kovalcik is a woman of extraordinary talents and energy that compliment her deep sense of compassion for the lives of people born with physical and mental afflications.

Through her love and devotion to her sister, who is handicapped, Jo Ann Kovalcik has brought hope to the lives of many people. She symbolizes those thousands of community volunteers who have committed themselves to sponsoring and supporting programs that aid the handicapped. It is most visible in the achievements of the Occupational Center in Union County, with training centers and workshops for the handicapped in Roselle and Berkeley Heights.

Far more than the large amount of money she has raised for the Kidney Foundation of New Jersey and the occupational center, Jo Ann Kovalcik brings to these worthwhile programs a spirit and enthusiasm that arouses the best instincts and compassion in other people. She is unselfish and devoted to helping other people who need assistance.

In addition to her outstanding efforts in behalf of the occupational center and Kidney Foundation, Jo Ann Kovalcik also serves on the Union County Unit of the American Cancer Society and is a member of the Union County Children's Shelter Advisory Board and the New Jersey State Banking Advisory Board. A highly successful businesswoman and executive with Hahne's in New Jersey, Mrs. Kovalcik is the essence of the modern American woman capable of succeeding at any job and still finding time to contribute her talents and energy to the community. She is, indeed, an extraordinary American woman and one of New Jersey's finest citizens.●

H.R. 2025

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MINETA. Mr. Speaker, I am today introducing legislation to forstall the transfer of social security off the unified Federal budget. Such a transfer, to be effective in 1993, was a provision of the Social Security Amendments in 1983.

In 1967 the President's budget concepts commission recommended that all Federal programs be shown as part of the same budget, a "unified budget."

Starting in the early 1970's some programs (notably the Federal Financing Bank) were placed "off-budget" by statute. Off-budget spending is exactly the same as on-budget spending—it is simply not counted. But it is a part of the Federal debt since the Treasury finances all spending.

Moving social security and medicare off-budget is ill-advised for three reasons.

It is bad for the budget process since it results in a budget that is understat-

ed by over $300 billion. Members will not be in a position to consider Federal spending as a percent of the economy. Nor will they be able to directly compare similar programs—for example, medicare will be off-budget but medicaid on-budget. Nor will they get a valid comparison of different components of Federal spending—defense, means-tested programs, grants to States, and so forth, will all be overstated as percent of total spending. Nor will the revenue portion of the budget give an adequate portrayal of the total tax burden on taxpayers.

It may be bad for social security benefits. Currently it is widely believed that social security and medicare are financed by taxes on the potential beneficiaries. This is not true—there are a number of general fund subsidies (by 1988 they could total $20 to $30 billion.)

Those subsidies are not obvious now, since they are paid by one fund and received by another—a net zero. But, with social security off-budget, these subsidies will be very visible since they alone will remain as on-budget payments. Highlighting these subsidies could provide more ammunition for groups that want to cut benefits.

It is bad for the deficit, hence for other spending programs. With the reforms recently enacted, social security will be solvent—that is, in surplus—through the end of the century. This surplus would be shown off-budget, so the on-budget deficit would be overstated. Voting for unnecessarily overstated deficits seems unnecessary.

As the former chairman of the Budget Committee's task force on the budget process, I have introduced a comprehensive budget reform bill which, among other things, would bring all off-budget agencies on-budget—H.R. 2025. In the 96th Congress we included language in our budget resolution of fiscal year 1980 to affirm our commitment to "relate accurately the outlays of off-budget Federal entities to the budget." Again in 1982 and 1983 we carried forward this commitment with language in the budget resolution which expressed the sense of Congress that future budget resolutions should also portray off-budget spending.

I am pleased to have my colleague, LEON PANETTA, as an original cosponsor of this legislation.●

PALM BEACH COUNTY PSI VOLUNTEERS PRAISED

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. LEWIS. Mr. Speaker, today I would like to pay tribute to the following people for lending their strong support and talents to the Palm Beach County private sector initiative program: Judy Goodman, Robert Miller, Lee Horton, William Brooks, Col. Don R. Kohl, USAF (Retired), Bill Burson, Harry L. Smith, Pat Wilson, Lucy Runyon, Thomas I. Davis, Jr., Judy Finn, Kay Mansolill, Terry Lino, John Ollis, Robert Coker, Sandra Chamblee, Bernadette O'Grady, Thomas J. Heran, Donn Colee, Sr., John List, Natalie Wohlert, Beverly Green, Mike Hardwick, Robin Stein, Ruth Hardy, Pat McKenna, Art Giles, and David Bludworth.

More than 70 million Americans volunteered for community service in the past 3 years and more than half volunteered at least 5 hours a week to community service programs.

These volunteers, joining with private organizations, provide job training and placement, health care, transportation, education, housing, nutrition, senior and youth activities, legal and consumer advice, and other community activities. The manner in which this American partnership is being practiced in Palm Beach County and other American communities is creating worthwhile changes in the way social services are delivered and economic progress is stimulated in the United States.●

PROPOSED ELIGIBILITY GUIDELINES FOR LEGAL SERVICES CLIENTS WOULD DENY REPRESENTATION TO MILLIONS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. RODINO. Mr. Speaker, the Legal Services Corporation recently published proposed regulations concerning client eligibility which would have the effect of precluding representation for millions of poor people, particularly the elderly and the handicapped.

Taken by themselves, these proposals appear to be an ill-conceived effort to deal with the cuts in the Corporation's budget. But taken in the context of the Reagan administration's hostility to this program, the proposals appear to be another in a series of attempts by the administration to deny legal representation to low-income people.

Despite the overwhelming support for the Legal Services Corporation demonstrated by the Congress and the American people, the administration has tried every year to eliminate all funding for the Corporation. Having failed to do so, the administration is now trying to weaken the Corporation's effectiveness and its ability to serve the poor in legal disputes.

One of the most onerous proposals is a regulation which would deny legal assistance to individuals who have over $15,000 equity in a home. This would drastically affect the elderly, who may have paid for their homes years ago, and who may be in desperate need of legal representation. These are the very people the Corporation was established to serve.

An essential aspect of the legal services program is local control—each program is administered by a local board of directors which is most knowledgeable about the needs of the client community. These mandated eligibility guidelines would fly in the face of local decisionmaking.

Most important, however, is the fact that these regulations were developed by individuals who have neither the experience with, nor the demonstrated commitment to the delivery of legal services for the poor. The Corporation is being administered by an unconfirmed board of directors, presently numbering four individuals, who have recruited a staff of questionable dedication to the effectiveness of this program. These proposals reflect a lack of understanding about the legal needs of the poor, and I hope that the Corporation will reconsider implementing them.

Further, I hope President Reagan will end his hostility to this program which seeks to provide "equal justice under law." I urge him to demonstrate his willingness to let the Corporation survive by nominating a board of directors promptly—individuals who have both the commitment and the experience necessary to administer this program.●

SOVIET DOWNING OF KOREAN FLIGHT 007

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mrs. SCHNEIDER. Mr. Speaker, few incidents in this country's history have provoked the shock and outrage that greeted the Soviet Union's recent downing of Korean Air Lines flight 007. Unfortunately, the 269 passengers aboard were the innocent victims of the acute paranoia that seems to dominate Soviet foreign policy. Those Rhode Islanders who knew Lillian Fitzpatrick and Lucille Dawson—two Warwick residents on board the plane—understand first-hand the sense of loss and pain which this barbaric act brings to all U.S. citizens.

The Soviet's response to the shooting down of flight 007 has been perhaps more inflamatory than the act itself. First, the Russians denied that the plane had been shot down. Then, in the face of indisputable evidence that the barbrous act had occurred, the Soviets admitted their complicity

but concluded that it was the rational response to a provocation under international and Soviet law. One spokesman went so far as to suggest that we would do the same if a Soviet plane strayed over our airspace. In fact, in 1981, a Soviet Aeroflot plane departed from its normal flight route off the Atlantic Coast and flew over the naval shipyard in Groton, Conn. The U.S. response was to simply lead the plane back into international airspace. Comparisons aside, the lies and misinformation emanating from the Soviet Union since the tragedy clearly indicate that the country does not share the Western World's humanitarian appreciation for human life.

The President and Congress are now faced with the task of responding to Soviet brutality. The first step, I believe, should be passage of a resolution officially condemning the Soviet Union for their behavior, demanding that the country pay monetary retribution to the families of U.S. citizens on board the plane, and urging U.S. representatives to the United Nations to seek agreements making future attacks on commercial airliners illegal international acts subject to immediate and automatic sanctions. Once these steps have been approved, Congress and the President can then assess the long-term implications of this cowardly act on relationships between the two superpowers.●

SOVIET BARBARISM SHOWS FACE—AGAIN

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. SKELTON. Mr. Speaker, I commend to my colleagues an article which appeared in the Sedalia Democrat in the Fourth District of Missouri. This article on the Korean airline massacre accurately reflects the feelings of Americans across the country and makes some excellent points concerning the basic nature of Russian communism and the Soviet Union.

SOVIET BARBARISM SHOWS FACE—AGAIN

In attempting to apply the rules of civilized behavior to the Soviet downing of a South Korean jumbo jet carrying 269 people, we make a fundamental error. The fact is that Russian communism is by its very nature barbarian. This is hardly the first indication we've had of that fact, with Afghanistan being the latest, but by no means only, example.

Still, this was a new low even for the Soviets. No conceivable reason can justify shooting down a civilian jetliner packed with men, women and children. Among the victims were 50-some Americans, including a member of Congress.

Let us assume that the plane had deviated from its route and was skirting sensitive Soviet military installations. What possible threat did it pose? A Boeing 747 is not a bomber, nor does it have a reconnaissance capability. It is designed to carry innocent passengers from one place to another.

Yet a Soviet fighter pilot, acting on direct commands from the ground, fired a heat-seeking missile into the airliner, which crashed in the cold waters of the northern Pacific. No survivors have been found.

Considering the rigidity of the Soviet command structure, the "fire" order could not have been given without high-level consent from the Kremlin, knowledgeable observers agree. What this says about the Soviet leadership should be a sobering lesson for those in the West who still harbor illusions about its reasonableness and peace-loving intentions.

What can be done on our part? Everything possible to punish Moscow short of armed retaliation. Cancel the grain agreement (the terms of which are extremely undesirable from our standpoint anyway). Revoke Aeroflot's landing privileges in this country. Stop all cultural and scientific exchanges and review all trade pacts.

We must demand that Russia own up to what it did and make a full apology—including restitution to the American victims' survivors. We should encourage our allies and other responsible nations to take similar steps. In all ways possible we must let the Soviets know that such ruthless behavior exacts a price among civilized people.●

TRIBUTE TO BAY CITY CHEVROLET SMALL PARTS PLANT

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. TRAXLER. Mr. Speaker, I rise before this distinguished body today, to honor the 75th anniversary of the General Motors Corp. And in particular, the Bay City Chevrolet small parts plant which is located in the Eighth Congressional District of Michigan.

Over the years, General Motors has responded to the demands of American consumers with high quality products. There are current news reports of increasing automobile sales compared to past years, which is good news to a beleaguered industry. This proves that the domestic automobile industry is responding properly to consumer demand. Also, let us not lose sight of the fact that according to Government tests, American cars—especially General Motors models—are also the safest vehicles on the road today.

Bay City's Chevrolet small parts plant has been a member of the General Motors family since its purchase from the National Cycle Manufacturing Co., on April 10, 1916. Bay City Chevrolet has been one of the largest and oldest employers in the Bay County area, and is a respected, honored, and welcomed industry in the community.

Despite setbacks such as the Great Depression and World War I, Bay City Chevrolet has continued to grow and prosper and change with the times. Though the history of the Chevrolet Bay City plant is one of continued expansion over the years, the greatest growth has come in the last several decades. And this plant growth over the years has been accompanied by many important advancements in production methods.

For many years, Bay City Chevrolet has been playing an active role in various local community developments, activities and organizations. They have been a strong booster to the Bay Area Chamber of Commerce, the Forward Bay County Corp., and the Bay County United Way; for which they have time and again received the United Way Gold Award for Distinguished Service.

General Motors should be commended and thanked for the confidence which they have placed in the bay area community and its citizens. For the Bay City Chevrolet plant has worked to the mutual benefit of both General Motors and the area residents. The Bay City small parts plant has employed thousands of area workers, and has assisted in the bolstering of the areas' economy.

I am truly honored to represent such a large group of dedicated, hard working individuals. Please join with me in congratulating the Bay City Chevrolet small parts plant and General Motors Corp., along with all the people involved with these companies, both past and present, for a job well done.●

IN SUPPORT OF H.R. 3318

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. CONABLE. Mr. Speaker, an American student, upon returning to this country after spending a year in Japan, was quoted as saying,

The most wonderful part of Japan for me was the family I stayed with. My Japanese family shared their home, life, and culture unselfishly with me.

Every year thousands of young Americans return to the United States from exchange experiences such as this. An exchange is more than a sightseeing tour, for a student does not gain access to the intricacies of a culture through monuments and museums. Social complexities are discovered only if a student loses the comfort and security of an observer and finds himself completely immersed in another lifestyle. In the midst of this immersion a student contemplates his identity as an American and balances it with the influence of another culture.

A similar process of reflection occurs when a foreign student becomes a member of an American family. By explaining and sharing its customs and

habits with the student, the host family grasps a renewed sense of itself and its culture. Its members have the unusual opportunity to rediscover the meaning of the American environment in their lives. Both benefit in many ways.

This reciprocity creates an international web of human relations which is delicate and yet strong enough to withstand almost all political tension between nations. The active role exchange programs play as an elementary form of foreign relations is being eroded by rising costs. As a result, thousands of families and students who want to reach out in this way find it more difficult.

Currently, American families who host high school students can deduct $50 a month from their income tax for the expenses they incur while the students are attending high school and living in their American homes. Under current economic conditions this deduction, which was established in 1960, is nominal and should be raised to a more realistic figure.

For this reason, I have introduced H.R. 3318, a bill which would increase the current deduction to $100 per month, up to a maximum of $1,000 a year. At this level, more families might have the opportunity to open their homes to foreign exchange students. In addition, given the tremendous educational benefit provided by foreign exchange programs, as well as the expense incurred in adding another member to one's family, I think that this increase in the present deduction is entirely appropriate.

I hope that H.R. 3318 will receive favorable consideration at the earliest possible date.●

RECENT UTILITY COAL DEAL SHOWS COAL SLURRY PIPELINES CANNOT COMPETE

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. SHUSTER. Mr. Speaker, the House may soon consider H.R. 1010, the Coal Pipeline Act of 1983. This special interest bill is not a simple right-of-way bill, but rather is the possible catalyst for the elimination of all competition in the coal transportation arena.

An actual field test of a coal slurry pipeline, ETSI (Energy Transportation Systems, Inc.), and two railroads bidding for a large coal contract from the Arkansas Power & Light Co. raised serious questions on major arguments put forth by coal slurry proponents on why Congress should confer upon these private companies the privilege of Federal condemnation of private and public property. The arguments and the doubts raised about coal slurry pipelines are listed below:

Slurry argument No. 1. Coal slurry pipelines will provide cheaper coal transportation.

Response. Obviously in this instance, the coal slurry pipelines did not provide the cheaper transportation. The Arkansas Power & Light utility expressed doubt whether coal slurry pipelines will be in a position to compete for cheap coal transportation when it commented, "The projected costs of the slurry pipeline system have jumped three to four times from original estimations." The utility is nearly correct. In 1975, the ETSI pipeline estimated construction costs at $750 million. Today that figure is $3.8 billion or a 500-percent increase. From this development, it appears that time, coupled with high costs and other factors, have made coal slurry pipelines obsolete.

Slurry argument No. 2. Coal slurry pipelines will cause lower coal rates which will be reflected in savings for consumers.

Response. There is no evidence, whatsoever, that if only two railroads had been competing with each other that the coal rates in the contract would have been higher. In fact, there would have been real competition for this contract even if the slurry pipeline had not been a factor. Competition now exists in the coal hauling business, if it is not with other railroads, then it is with trucks or barges.

According to the Arkansas Power & Light press release, substantial savings to electric consumers served by Arkansas Power & Light apparently will be realized through the year 2016 at a level of $16.5 billion as a result of this railroad contract. These savings, of course, were realized under the present system without the necessity of an operating coal slurry pipeline. We are also pleased that this utility, unlike many others, will pass the savings on to consumers.

Slurry argument No. 3. Coal slurry pipelines need Federal eminent domain authority because railroads are blocking the way.

Response. This contract signing in itself strongly argues that the granting in H.R. 1010 of the special privilege of Federal condemnation of private property to for-profit coal slurry pipeline companies is not needed. The ETSI pipeline has acquired over 90 percent of its 1,400 miles of right-of-way without this special privilege at a cost of only six-tenths of 1 percent of the projected project cost. Such a cost is hardly prohibitive as evidenced by the fact that ETSI is competing, along with the railroads, for business.

The ETSI has accomplished a great deal within the presently competitive system, and therefore, they are a perfect example of why there is no pressing need for Congress to pass H.R. 1010.

Slurry argument No. 4. The coal slurry pipelines need take-or-pay contract arrangements in order to guarantee project financing and business for the pipelines.

Response. According to the Arkansas Power & Light Co., the coal slurry proposal was much more restrictive and the utility expressed a preference for the greater flexibility provided by the railroads' proposal. From the start, a coal slurry pipeline will be placed at a competitive disadvantage and if the slurry proponents insist on take-or-pay contracts, the dangers to the consumers of sky-high electric rates in forcing utilities to accept coal they may not need is obvious.

Slurry argument No. 5. There are presently nine coal slurry pipelines under serious design and development.

Response. The signing of this contract and the utility's reaction raises serious doubts whether these pipelines really exist or are figments of someone's imagination in order to attempt to put alleged pressure on the railroads. One has to wonder how many of these pipelines are real and what is the real motivation behind the utilities' support of H.R. 1010?

In conclusion, this contract signed by the Arkansas Power & Light Co. raises many serious questions whether H.R. 1010 is needed. I would bring to the attention of my colleagues the following article from the Washington Post of July 23, 1983, concerning the Arkansas Power & Light Co. contract.

[From the Washington Post, July 23, 1983]

TWO RAILROADS OUTBID PIPELINE CONSORTIUM FOR COAL SHIPMENT

(By Cliff Tan)

Two major railroads yesterday won a contract to deliver coal from Wyoming to Arkansas power plants, outbidding a coal slurry pipeline consortium, in an apparent setback for coal slurry promoters.

The Arkansas Power & Light Co. announced a 20-year contract with the Chicago North Western Transportation Co. and the Union Pacific System, which includes the Union Pacific and Missouri Pacific railroads, to move low-sulphur coal from the Powder River Basin in Wyoming to its White Bluff and Independence power plants.

Chicago North Western and Union Pacific had underbid the ETSI (Energy Transportation Systems Inc.) Pipeline Project for the transportation contract. The two railroads and ETSI, along with Burlington Northern Inc., submitted bids to Arkansas Power & Light April 15.

Coal slurry is coal crushed and mixed with water and then transported along a pipeline system. Proponents of slurry pipelines claim that these systems present a low-cost alternative to the railroad's virtual monopoly on transporting coal.

Railroads have opposed the pipelines, saying that they will suffer greatly and that the cost of shipping other commodities will go up if pipeline transport comes into being.

In the intense political debate over the two competing systems, Congress is considering legislation that would give pipeline operators eminent domain, the power to acquire rights of way despite railroad protestations. A spokesman for the Slurry Transport Association said legislation probably will be voted on in September.

Previously, pipelines have been blocked either by states worried about whether their water resources should be used to make slurry, or, pipeline supporters claim, by railroads which will not let pipelines acquire the right-of-way beneath the tracks.

A staff member of the House water and power subcommittee said even though ETSI had been underbid, that still does not mean that the slurry-pipeline measures will fail in Congress.

The issue for proponents of the measures, he said, is whether maximum competition will hold in the coal-transportation field. What is important is giving pipeline operators the chance to compete, he said, adding it is less important whether railroads underbid pipeline operators as long as competition exists.

"We personally don't know how they could do it and make money," said Stuart Serkin, of the Slurry Transport Association, about the railroads' bid. "It makes you think they're doing this to put ETSI out of business," he added.

A spokesman for Union Pacific, however, said his company will fully recover costs and make money from the bid it submitted to Arkansas Power & Light. He also denied a conscious attempt by Union Pacific to put ETSI out of business.

Jerry L. Maulden, president of Arkansas Power & Light, said his company has been a supporter of the slurry pipelines in the past and still believes they are a viable alternative.

Charles Steel, senior vice president of Arkansas Power & Light, said competition has increased for pipeline proponents since passage of the Staggers Act in 1980, the major rail deregulation legislation that permits many railroads to conclude specific-commodity contracts with utilities, at lower rates than before deregulation.

In addition, the projected costs of the slurry pipeline system have jumped three to four times from original estimations, he said.

The White Bluff and Independence power plants in Arkansas will require between 10 and 11 million tons of coal a year at full operation. At currently regulated coal transportation, that would represent a shipping bill of between $230 million and $250 million a year.●

TRIBUTE TO THE LATE DISTRICT JUSTICE JOHN BEDNARZ

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HARRISON. Mr. Speaker, on Monday, September 5, the city of Wilkes-Barre lost one its most beloved citizens and one of its most accomplished sons. District Justice John Bednarz died at the age of 67.

Magistrate Bednarz was born in Wilkes-Barre on April 28, 1916, the son of the late Wojiech and Rozalia Bednarz. He graduated from the James M. Coughlin High School and served in the United States Army for 4 years during World War II, seeing action in Africa, Sicily, and Italy.

Over the years, John Bednarz was active in community and veterans organizations almost without number. His service as grand commander of the Order of the Alhambra, Alhamar Caravan, comes to mind. So does his work with the Red Cross, the North End Slovak Citizens' Club, the North End Little League and so many, many other worthy causes.

But most of all, John will be remembered as the "judge" of the North End. He was an alderman in Wilkes-Barre's city 16th ward, 7th district for 25 years. Then, in 1969, when the newly ratified Pennsylvania Constitution created the position of district justice, John was elected to a 6-year term. His record in office was such that even though he was a lifelong member of the Republican party, John Bednarz received the nomination of both political parties on the two successive occasions when he ran for re-election.

Those of us who as lawyers, young and older, appeared before him, know why. He was always as firm and fair as he was courteous and compassionate. Everyone who appeared before District Justice John Bednarz received respect, fair treatment and, above all, equal justice.

I rise today, Mr. Speaker, to take note of his passing in the House and to extend my own deep sympathy to his wife, the former Helen Palute; his son, Attorney John A. Bednarz, Jr.; his grandson, John Russell Bednarz; and his brothers and sisters: Thomas J. Bednarz, Mrs. Sophie Karpinski, Mrs. Stella Shea, Mrs. Anne Urbanski, and Miss Hedwig J. Bednarz.●

HONORING EDWARD AND HELEN REYNOLDS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MURTHA. Mr. Speaker, as America has experienced difficult times in recent years, I think more and more focus has been placed on the American family and its key role in preserving the spirit and hope of our citizens.

It is with that background that I am particularly proud to insert these comments into the CONGRESSIONAL RECORD noting the 40th wedding anniversary of Edward A. and Helen L. Reynolds of Mineral Point.

They were married in New York City on September 12, 1943, when America was very different. In the 40 years of their married life together, they have experienced more changes in America and more dramatic events than during any other time of American history. Throughout that period, they contributed to their community, helped their friends, and raised a family. In fact, it was their daughter Diane who I came to know through working together with her. I am sure the Reynolds take great pride in Diane, as they should, and she is an excellent indication of the kind of people the Reynolds are and the deepfelt commitment they have to their community, family, and Nation.

It is my pleasure to join in noting the 40th wedding anniversary of Edward and Helen Reynolds, and wishing them many more happy, productive years ahead.●

LIMITING THE PRESIDENT'S SERVICE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, August 10, 1983, into the CONGRESSIONAL RECORD:

LIMITING THE PRESIDENT'S SERVICE

In November of 1982, a bipartisan group of prominent Americans announced the formation of a committee to promote an important amendment to the Constitution. The amendment would hold Presidents to a single six-year term in office.

The idea of limiting Presidents to a single term is not new. It is as old as the Republic itself. Although their reasons differed from those given today, the delegates to the Constitutional Convention in 1787 originally proposed a single seven-year term before settling on the renewable four-year term finally included in the Constitution. The idea of a single term has been raised many times since.

The main argument of the proponents is that a single six-year term would free Presidents from preoccupation with re-election. The basic view is that far from motivating positive behavior on the part of Presidents, elections hinder it. Presidents are forced to cater to electorally powerful special interests. Difficult but necessary decisions are put off in order to avoid offending potential supporters. Free from the burden of partisan politics, Presidents could focus on the nation's problems during the precious time that is now lost pursuing re-election. Proponents also say that a single six-year term would help strengthen a President's relations with other actors in the political system. For example, a President could send Congress proposals that would address problems directly because there would be less need to maneuver with factions in Congress for partisan advantage. The bureaucracy would be more professional because political appointees could stress management initiatives instead of re-election issues. The political parties would be able to concentrate on organizing themselves, not just on re-electing the incumbent.

As might be expected, opponents of the amendment dispute these claims. They say that by freeing Presidents from preoccupation with relection, a single six-year term would reduce presidential effectiveness. "Playing politics" is neither improper nor a waste of time. Rather, it is a key part of democracy. Paying attention to special interests and postponing tough decisions are often necessary parts of the give and take of the political process. Opponents also say that it is the possibility of re-election with strong support among the voters that gives Presidents their influence with other political actors. Congress would be less likely to go along with a President's programs if they were not tested in elections. The bureaucracy, in tandem with friends in Congress, would be less likely to bend to the will of a President who it knew would be in office for a maximum of six years, not eight. Political parties would be essentially leaderless, and without his party a President would have difficulty generating support for his programs.

Arguments for and against a single six-year term sound convincing because they appeal to contradictory yet fundamental beliefs that Americans have about government. The argument for the proposal reflects the view that politics is bad and that political considerations detract from sound decisions based on what is best for the people. The argument against the proposal reflects the view that politics is an integral part of the democratic process and that political considerations represent nothing more or less than the people's judgment of what is best for them. Proponents of the amendment ultimately base their argument on the public interest. Opponents cite the public interest as well. In fact, that is the crux of the problem. What is the "public interest" in this context?

While there is something to be said for the idea of freeing Presidents from politics so that they may solve problems and make decisions, I find the argument against a single six-year term more compelling. An election does not prevent a President from doing what he thinks is in the country's best interest. It merely insures that he will not ignore the public as he formulates his position. If his view differs from that which prevails in the public, it falls to the President to explain why he is right. A President should never be relieved of the responsibility to educate and mobilize the public in support of his position. At bottom, I side with the opponents of the amendment because I believe that elections make Presidents accountable to the people. I also think that six years is too long a time to retain a President who has lost public confidence, but too short a time for a President who has won it.

I find myself uneasy with the essentially anti-democratic argument of the proponents, which suggests that the President can make better judgments when he is isolated from the messy business of politics. A President above politics is both remote from the people and alien to our system of government. Presidential accountability should be built into the system. The people are not nuisances the President should avoid, but sources of strength and wisdom on which he should rely. Implicit in the proposal for a single six-year term is the notion that a political elite knows best, that the President and his advisers should be permitted to make decisions for the people without being reminded that they are servants of the people and are subject to the popular will. It seems to me that a single six-year term would create a six-year "lame duck" without political power, at least as political power ought to be understood in our nation. The prospect of his re-election and his standing with the people are what give the President his true political power.

Calls for a single presidential term will continue for as long as the Republic survives. The search for a mechanism to overcome the fallibilities of our present system of government will (and should) persist. Purging politics from the system is an objective that many Americans support. However, I think that it would be a mistake, and a serious one, to ratify the amendment now being proposed. A single six-year term would make Presidents less effective and less accountable, and it would be inconsistent with our way of governing ourselves, based as it is on the will of the people expressed through elections.●

THE NEED FOR THE VOICE OF AMERICA

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MICHEL. Mr. Speaker, I came across and article in the Christian Science Monitor that shed new light on the Korean airliner massacre. The article told of the reaction of the Russian man in the street to the tragedy. Most of those interviewed by the Monitor said the Soviet Union was "absolutely right" in shooting down the aircraft. "On issues like this we are very tough" said one Muscovite.

Another article, appearing in The Wilson Quarterly (Autumn, 1983), written by Walter Reich, contains a passage telling of the author's first contact with Soviet citizens who believe the United States is planning for war. He then writes:

When I first heard that, I thought it was a line inevitably fed to a foreigner. But I began to realize that I was hearing it even from those who were willing to express their antipathy to Soviet life and their sympathy with American ways. Could it be that they really believed their own media? It could be. If the same thing is said again and again, in every place one looks, without variation or demurral, how could it not sink in? * * * The Soviet media have really been successful in presenting the government's case on the question of war and peace. Not everyone believes everything, but many believe much of it. In the large cities, perhaps 50 percent believe 50 percent of it; elsewhere in the country, among groups with little sophistication, the figures may be higher, much higher.

These are sobering reminders that we are dealing with a closed society in which all but the most determined citizen is going to eventually begin to believe at least a portion of what he hears and sees in state-controlled media. Such a population is not only ignorant of the truth—it is easier to control, much more likely to approve of get-tough measures—no matter how brutal—and less likely to question the government, if only in the privacy of their own minds.

What does this attitude tell us? For one thing it reminds us that the Communist Party of the Soviet Union has total control over information media. The Russian people and others in the Soviet Union—are a captive audience and they get the kind of information—we could call it propaganda—that the Soviet rulers want them to get. After a barrage of that kind of thing, no wonder we get the kind of reaction that the Monitor reports.

The people behind the Iron Curtain need to know the truth. One way of doing that is through our international broadcasting stations. The Voice of America increased its broadcasting to Eastern Europe and the Soviet Union during the Korean airliner crisis. But our transmitters are so ancient and in such need of repair that we could continue this increased broadcasting only for a short while. And, even then, our signals are not strong enough to cut through sophisticated Soviet electronic jamming.

We need to build the best international broadcasting stations in the world if we expect to give the Russian people and the people of Eastern Europe a chance to hear another point of view. The Voice of America and Radio Free Europe/Radio Liberty are underfunded. We should immediately do all we can to give them the funds they need to do the job we expect them to do.

At this point I wish to insert in the RECORD, "Enter Our Space, You Get Shot, Say Most Russians on the Street," from the Christian Science Monitor, September 8, 1983.

ENTER OUR SPACE, YOU GET SHOT, SAY MOST RUSSIANS ON THE STREET

(By Ned Temko)

"If I may be frank, we were absolutely right to shoot down the Korean plane," said the stocky, middle-aged man near Moscow's central farm market.

And what of the 269 passengers aboard?

"Look. Tell your readers that they should be absolutely clear on one thing. On issues like this we are very tough. You enter our airspace like this, and you get shot down.

"And that's the way things should be . . . And if you want to test us, test us, and you will surely not be the winner."

Most Muscovites strolling under an Indian summer sun Wednesday seemed generally to agree. And where days earlier pedestrians were loath to discuss the air disaster, a crescendo of (anti-American) accounts in the Soviet news media seems to have loosened unofficial tongues as well.●

LIST OF PASSENGERS KILLED ON KOREAN AIR LINES FLIGHT 007

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. GEKAS. Mr. Speaker, the entire world was horrified to learn this month that the Soviet Union shot and destroyed a civilian Korean airliner with 269 men, women, and children aboard. The Soviet Government has yet to apologize for their inhumane action, and the international condemnation of the brutal shooting grows daily. I am certain that the Congress will be taking swift action this week to officially denounce the U.S.S.R., and as part of our consideration of this matter, I would like to insert a list of the passengers killed on Korean Air Lines flight 007, as printed in the New York Times of September 2. Also included is a list of those Americans who died in this tragedy.

LIST OF PASSENGERS KILLED ON KOREAN AIR LINES FLIGHT 007 AS PRINTED IN THE NEW YORK TIMES OF SEPTEMBER 2, 1983

Ariyadej, Diane, Mrs.; Ariyadej, Sammy (child); Avecilla, J., Miss; Baek, Yunj, Mr.; Bahk, Mric, Mr.; Bayona, A., Ms.; Bayona, L., Ms.; Be, Bun Soon, Mr.; Beirn, James, 50, Piscataway, N.J.; Bessell, Eleanor; Bevins, Richard, Mr., New Windsor, N.Y.; Bolante, E., Mr.; Bolante, N., Ms.; Brownspier, K., Ms.; Burgess, James, 57, Seneca, S.C.; Campbell, S., Miss; Carrasco, C., Mr.; Carrasco, M. E., Miss; Caser, C., Mr.; Chai, Soom Yung (child).

LARRY McDONALD A MARTYR IN THE CAUSE OF FREEDOM AND DEMOCRACY

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. STUMP. Mr. Speaker, the definition of murder is the wanton, malicious, and premeditated killing of another. That definition clearly applies to the Soviet missile action which killed 269 passengers of the Korean Airlines flight 007. That missile was specifically ordered by Soviet military authorities.

The tragic irony of that Soviet mass murder is that among those 269 innocent victims it struck down Congressman Larry McDonald, of Georgia, who had spent his career in public life trying to convince the free world that the Soviets were not ony capable of murder, but that in their passion to subjugate the peoples of the world they were willing to use any violent means. They have proven their capabilities in Afghanistan and Southeast Asia. Larry McDonald was not just a thorn in the side of the Soviets, he was the most dedicated Member of Congress, if not the United States in the fight against communism. He constantly was exposing their "peace" efforts as a sham, a confidence game in which the Soviets were lulling western democracies into disarmament and weaknesses, so the free world could be terrorized into submission to Soviet power.

Through the years in which this country was led by those who held the naive belief that unilateral disarmament would somehow change the

blood thirsty character of the Soviet Government, Larry McDonald preached that the real road to peace was through strength.

Through those years, his messages stressing courage as a virtue were often received by small audiences. His work defending freedom and democracy was ridiculed and reviled by those opponents who tried to undermine the purpose and will of this country by crying for appeasement with their slogan "better red than dead."

Congressman McDonald, with his outspoken views on Soviets and communism, helped reawaken the American public to the dangers that we face so that they would support leadership who believe in peace through strength.

It is ironic that just as the message about the Soviets, that he had labored so long and hard to carry, was being recognized, and we were finally moving to strengthen national defense, Larry McDonald was struck from the roll of patriots by the trigger finger of those who feared his rallying cry to the American people.

Throughout our history our country has been preserved by voices crying in the wilderness warning us of dangers. Larry McDonald has been one of those voices. He is truly a martyr in the cause of freedom and democracy.●

TRIBUTE TO THE LATE MAYOR CON SALWOSKI

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HARRISON. Mr. Speaker, on Monday, September 5, the city of Wilkes-Barre lost one of its foremost sons and its former mayor, when Con (Firpo) Salwoski died suddenly at the age of 78.

The son of the late Constanty and Barbara Salwoski, the mayor worked and lived in the city of Wilkes-Barre all of his life. For years, he headed the Wilkes-Barre Parks Department and served as superintendent of buildings and grounds. From 1970 to 1978, he was an elected member of the Wilkes-Barre City Council.

Under the form of government then in effect, the seven members of the city council elected one of their number as mayor. For two terms, from 1972 to 1976, the council bestowed this honor on Con Salwoski. It fell to him, therefore, to lead the city during those trying days when the Susquehanna River swept over its boundaries as a result of Hurricane Agnes and inundated almost the entire city in one of the greatest natural disasters in the history of the United States. It was under his leadership that the city began the long road back from the trying days after the river receded, through the recovery and into the beautiful "newest old city in America" which it has become.

In addition to his political and governmental service, Mayor Salwoski was active in a large number of community endeavors. Among them were both the American Legion and the Catholic War Veterans, the Polish American Citizens' Club of Dupont, the Wyoming Valley Fraternal Order of Police and, of course, St. Mary's Church of the Maternity, of which he was a parishioner. In addition, he operated the Heights Independent Democratic Club for 30 years.

I rise today, Mr. Speaker, to take note of his passing in this House and to extend my deep sympathy to his widow, the former Isabelle Adamski; his son, Raymond, his daughter, Mrs. Florence Martin; five grandchildren and one great-grandaughter; as well as his sisters, Mrs. Mary Quinn and Stella Sypiewski.●

THE 75TH ANNIVERSARY OF HOLY TRINITY BYZANTINE CHURCH

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MURTHA. Mr. Speaker, on Sunday, September 25, the parishioners and friends of Holy Trinity Byzantine Catholic Church will observe the 75th anniversary of the church's founding.

I believe the letter I received from Msgr. John Kostival and Nicholas Gelles, the committee chairman, said it very well when noting that "we will pay tribute to our church's founding fathers for their vision, zeal, and sacrifice and for their dedication to Catholic ideals and their strong love for our Byzantine Rite heritage."

I would like to add that it is extremely important that we take time to celebrate these church anniversaries. Across the entire United States, the role of leadership of the chruch in our history and progress is well documented. In addition, in our community of Johnstown over the 75 years of this church we have known our share of problems and disappointments, including two disastrous floods, record high unemployment levels, and major changes in life styles and manners. The role of churches in our community has been essential during these times to preserve the human spirit and rededicate the people to the struggles of the community.

It is in this spirit that the anniversary takes place. It is a recognition of history; moreover, it represents a rededication to the community, to religious principles, and to the spirit of the Johnstown community.●

USE CREDIT AS WEAPON

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. RUDD. Mr. Speaker, the United States and the free world need not look too far to find what could well be the perfect weapon with which to strike back at the Soviet Union for its deplorable deed of shooting down an unarmed South Korean commercial airliner.

We need only look at the credit that we so freely provide the Communist nations around the world.

Credit easily could become a strategic weapon as strong and true as any of the armament we now possess.

Certainly, Mr. Chairman, it is an idea worthy of a full examination by this body.

And to that end, I urge my colleagues to read the following Newseek article written by George Will, who not only tells it like it is, but perhaps how it should be.

NEEDED: A POLICY OF PUNISHMENT

(By George F. Will)

The shocking thing is how shocked people are. The day the Soviet regime murdered another 269 persons was the 24,041st day since the regime was founded. Since 1917 the regime has killed at least 20 million of its own citizens, an average of more than 800 a day for 66 years. Unless the Red Army massacred another Afghanistan village last Thursday, the regime had a below-average day of blood.

Why are people so startled when the Soviet regime acts in character? Nothing in nature—not even granite, which water wears away over time—is as durable as illusions grounded in a desire to avoid facing nasty facts. Oh, yes, with metronomic regularity the Soviet Union does shatter some Americans' illusions. But Americans are a manufacturing people, so they manufacture new illusions about Soviet willingness to move up from barbarism. In 1979, after 62 years of domestic carnage and international gangsterism, the Soviet regime invaded Afghanistan, and the president of the United States said gosh that sure opens my eyes.

Why did the Soviet regime, after 2½ hours of thinking about it, murder another 269 persons? Well, why not? The benefits are clear enough (the benefits of intimidation, especially of Japan), and the costs are almost certainly going to be negligible, and brief.

The Soviet deed has been the subject of a U.N. debate. For the Kremlin that was an ordeal akin to being bombarded with marshmallows. Thank God it is not December or some dunce would suggest dimming the national Christmas tree. The state of Ohio, which has a better foreign policy than the United States, has removed Russian vodka from state-run liquor stores. Perhaps the 269 murders will complicate the process of subordinating foreign policy to presidential politics. Perhaps it will now be harder for the president to sally off to an election-year summit and sign an arms-control agreement ruined by American eagerness. But summits and agreements have no noticeable influ-

ence on the behavior of the Soviet rainmakers—the "yellow rain" rainmakers.

IMPARTIALITY

The World Council of Churches has not yet had time to condemn Korean Air Lines for aggressive bumping into Soviet air-to-air missiles, but various other "peace" parties, with the impartiality for which they are famous, have announced: The Soviet deed proves the irrationality of "the superpowers" and demonstrates the paranoia to which U.S. policy has driven the Soviet Union. So everyone must disarm, starting now, starting here.

The cotton-candy language of journalism spreads a sticky goo of imprecision over events like the attack on the plane. It has repeatedly been referred to as a "tragedy." No, when children die of leukemia, that is a tragedy. When they are blown to bits by an act of state, that is an atrocity, and one worthy of Hitler's former allies. But too many persons by now have too large a stake in muzzy language. Remember the merry disdain that showered down upon President Reagan when, in his first press conference, he talked about how the Soviet Union lies? "There you go again," said his cultured despisers, when he recently referred to the "evil empire."

His words are fine, but he has not got a policy worthy of them. What is needed is a policy not merely of punishment, but of steady deterrents and leverage. A suitable policy, one that was desirable even before this atrocity, is at hand. But the hands of this administration are not apt to reach for it at this late date.

Felix Rohatyn, the investment banker and Democratic thinker, says: The Soviet Union has shot down an airplane. We should shoot down a Soviet-controlled country. Western governments should nationalize the loans Western banks have made to communist countries. The governments should buy up the debts at a substantial discount—at, say between 25 and 50 cents on the dollar (that is between 25 and 50 cents more than some of them are worth). Then it should declare Poland in default, drying up the flow of credit to that country and slowing the flow to all other Soviet satellites.

This would give the banks a little liquidity—more than they deserve, given their irresponsibility. It also would force them to quit cooking their books, pretending that virtually irrecoverable loans retain their full face value as assets. But the principal benefit would be for foreign policy.

Credit is a strategic weapon. Like other strategic weapons, it should not be in private hands. Credit for communists should no more be controlled by private banks than the MX should be controlled by Hertz. Loans—if any—for the East bloc should be government to government, so that Western policy will no longer be hostage to commercial calculations.

BELLY UP

Were credit nationalized, we could say to the Kremlin: You want credits for your basket-case economies? Fine—but it will be contingent on reductions in defense spending. You reject such linkage? Fine—you pay for Poland, and have fun when Romania goes belly up.

During martial law Poland received from the West a substantial subsidy: its debts were rescheduled. The Reagan administration is a shameful subsidizer: Poland has not paid debts owed to the U.S. government, yet the United States has not put Poland in default. Some bankers say that forcing default would be too kind to Poland, because it would wipe the slate clean. Poland's regime knows better; otherwise it would declare default on its own. Poland today is receiving, in effect, money at 6 percent from the West while Americans pay more than twice that for mortgages. If Democratic candidates cannot make an issue of that, they should be burned on a pyre of their bumper stickers.

The Soviet Union suffocates entire nations without even a suspension of subsidies from the West. What has it to fear from reaction to the annihilation of a mere planeload of people? A regime whose essential policy is intimidation has added another brutality to its repertoire. But the diplomatic minuet will continue, from Madrid to Geneva. The grain shipments will continue, and so will the subsidized sale of "nonstrategic" goods—as though such a distinction makes sense regarding a totalitarian nation with a command economy entirely subordinated to militarism. Faster than a heatseeking missile, there will be business as usual, especially for business.●

FREEZE MOVEMENT TAINTED

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. LAGOMARSINO. Mr. Speaker, several important occurrences of late have cast dark shadows on the real nature of the peace movements here and in Western Europe. Of course, the most significant of these was the downing of a civilian airliner by Soviet fighter jets. The importance of this and other events in proving the sincerity of the Soviet-sponsored peace offensive is, in my opinion, invaluable.

Included in this peace offensive is, of course, the freeze movement. To what extent the Soviets have infiltrated this movement has been the source of heated debate, charges and countercharges. What is interesting to me about the freeze movement is the amount of at least indirect support the KGB has received from some Members of the House of Representatives. It seems that even when the evidence appears overwhelming that some Members have participated in meetings with KGB leaders and organizers of the freeze movement, there is a concerted effort to hide the facts from the public and simply wish the whole matter away.

It is fine editorials such as the following, from the Oxnard Press-Courier in my district, which accurately portray these organized attempts to coverup such meetings and connections between U.S. Congressmen and the KGB leaders of the freeze movement as the latest scandal to hit Washington, "Freezegate."

[From the Press-Courier, Aug. 15, 1983]

FREEZE MOVEMENT TAINTED

You were waiting for it. Now it's here: Freezegate. "The bottom line is that the hearings provide no evidence that the Soviets direct, manage or manipulate the nuclear freeze movement." So said Rep. Edward Boland, D-Mass., chairman of a House committee on intelligence, last December, his committee having finished an investigation of Soviet ties to the movement.

Now, it turns out that the committee reached its conclusion in part because Boland kept key evidence of just such a link from its attention.

That's just one of the findings in a fascinating new book, "KGB Today: The Hidden Hand" by intelligence expert John Barron.

Barron's history of the movement suggests that the freeze idea floated for some time in the West, but never could take hold—until Feb. 23, 1981, Barron argues, when Soviet dictator Leonid Brezhnev made a pitch for it before the party congress.

One month later and—viola!—the first national strategy conference of the American Nuclear Freeze Campaign popped up at Georgetown. Coincidence? No, the KGB, Barron says. "From March 20 to 22, virtually the entire blueprint for the nuclear freeze campaign was drawn in clear and comprehensive detail," he writes. KGB man Yuri Kaprolov was assigned to spur the peace movement along, showing up at Georgetown and future freeze events.

One piece of evidence in Barron's case is a brochure published by the World Peace Council, one of the Kremlin's oldest front groups. Included in the brochure are lists, pictures and boasts of the council's contacts in the United States—including Congressmen John Conyers, Charles Rangel, Ted Weiss, Ronald Dellums and Don Edwards.

So why didn't the Boland committee, which used the brochure as an exhibit, take note of this evidence? Because Boland deleted 14 pages which contained most of the damaging revelations. Boland: "I felt it was not appropriate for the committee to document the public activities or associations of any member of Congress. I was not willing to see the committee involved in the practice of 'naming names.'"

Given that standard of evidence gathering, one wonders if the committee could prove that bananas have peels, much less that the Kremlin exerts influence over supposedly autonomous disarmers in the West. How does one prove a case like that without naming names?

What if they gave a freeze movement and nobody came? The answer, it seems, is that people like Kaprolov bring some, and people like Boland are always there to sweep up the tracks.●

THE PRODUCT LIABILITY ACT OF 1983

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. SHUMWAY. Mr. Speaker, Representative BARBARA MIKULSKI and I recently introduced legislation—H.R. 2729, the Product Liability Act of 1983—to reform and rationalize existing product liability tort law. Currently, each State has its own individual product liability code, codes which vary widely, thus leading to uncertainty for manufacturers and consumers alike. Our bill at once provides for

a uniform Federal code, to be administered through State courts, and establishes reasonable criteria that protect the interests of all parties who may be involved in product liability law suits.

Unfortunately, our efforts are being opposed by many trial lawyers and their professional association, the American Trial Lawyers Association. While this may not be surprising—it has been estimated, for instance, that for each $0.66 received by plaintiffs in product liability damage awards, attorneys receive $0.77—such self-interest should not be permitted to stand in the way of ligitimate reform.

In this respect, I would like to commend to the attention of our colleagues a short piece by Richard Greene, which recently appeared in Forbes. Greene discusses the liberalization in product liability law which has recently occurred, and concludes that the result has been "more wine on the table for lawyers and plain tap water for the rest of us."

The full text follows:

[From Forbes, Aug. 1, 1983]

THE LONG, GRABBY ARM OF THE LAW

(By Richard Greene)

Late last year a developer wanted to build homes on 160 acres of undeveloped property in Mayfield Heights, Ohio, a suburb of Cleveland. "No," said the city council. "I'll sue," said the developer. And he did. Not only the city, but each member of the city council, each member of the city planning commission, the city's law director, the city engineer, the city finance director and the mayor.

Says Jim Murphy, of Squire, Sanders & Dempsey, the firm representing all the officials, "When you sue somebody on a city council for $3 million and he's probably earning $500 a year for that job, it gets his attention."

The Mayfield case is only one of a seemingly endless stream of lawsuits in which a plaintiff sues not just the most obvious defendant, in this case the city, but scores of others. In this situation, says Murphy, it is likely that the developer simply wanted to throw a scare into the city officials. But whatever the reason for suing a large number of parties, one thing is clear: When you are sued, no matter how frivolous the suit, no matter how little liability you think you have in the matter, you have to defend yourself. And that costs money.

The epidemic of this so-called multidefendant litigation stems from a liberalization in the liability laws during the last decade or so. Lenient judges creating lenient precedents have allowed suits that would never have seen the light of a courtroom years ago. Explains Murphy: "The courts have nearly eliminated the so-called privity requirement. Under that doctrine, if I had a contract with you to perform a certain service and you did it defectively, the only one who could sue you was me."

But why bother suing parties who have every chance of escaping scot-free? After all, plaintiffs' attorneys are generally paid on a contingency basis—so they only make money when they win.

First and foremost in the minds of aggressive lawyers, however, is the notion of the "deep pocket." If you are unlucky enough to get into an automobile accident with an uninsured individual, you will have a hard time getting any compensation. So, you try to sue the automobile company. "What good is getting a determination that your client is injured and deserves compensation if there's no ability on the part of the defendant to compensate?" asks Richard Weingberger, senior litigation partner for Ballon, Stoll & Itzler, a large New York law firm.

Listen to John Townsend, a partner with Hughes Hubbard & Reed, one of the law firms that has helped defend Ford against allegations that its Pintos tend to catch fire in collisions. "In the Pinto cases, many of the accidents were just accidents involving drunk drivers," he explains. "But a lot of drunk drivers don't have more than $10,000 insurance. So, the plaintiff's lawyers goes after Ford."

Sometimes, of course, the defendant with the deepest pocket is truly responsible for the damages. But often enough, the deep pocket is brought in for a shot at big money. In fact, there are even legal consulting firms that advertise their skill at turning negligence lawsuits into product liability suits. And since some large companies are quick to settle (it can be much cheaper than paying attorneys contesting the case), this strategy frequently pays off.

What's more, if the lawyers can't push a deep pocket into making a settlement and the case does come before a jury, the plaintiff who has brought in one or more large defendants has a better chance of winning than a plaintiff who has sued a human being. "The jury finds it easier to find a large corporate defendant liable than an individual," says William Newlin, managing partner of Buchanan Ingersoll, a Pittsburgh law firm.

Think about it. Would your return $100 you found in the street if you knew who it belong to? What if you got the same $100 in change from a pay telephone? You would probably take the money faster from AT&T than from somebody who lost his wallet. Well, so would a jury.

Another reason for suing a number of parties is the statute of limitations. Time limits on bringing suits put pressure on plaintiffs' attorneys to make sure that they have gone after the right targets. "If you only have two years to file a lawsuit after the incident occurred, and you don't sue the right guy, then you're out of luck," says Murphy. "So, you sue everybody."

Unfortunately, while the practice of suing everyone in sight sometimes helps protect the plaintiff and almost always enriches his attorneys, it is done at the expense of society. Courts are crowded, and companies pass along their legal fees to customers. More wine on the table for lawyers and plain tap water for the rest of us.●

TIME CHANGES NOTHING

HON. ELDON RUDD

OF ARIZONIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. RUDD. Mr. Speaker, for the Soviet Union, time apparently changes nothing. Twenty-three years ago, the Soviets shot from the skies a high altitude RB-47 that was being flown by a six-man U.S. military crew.

John McKone, one of only two survivors, was captured by the Soviets and imprisoned by the KGB police. During one of his many interrogation sessions, he was told by one of the KGB leaders that the goal of the Soviets was to embrace Africa, South America, Central America, and Southeast Asia.

Today, the Soviets still are shooting airplanes out of the skies and today they still are pursuing the same goals.

I recommend to my colleages that they read the following article about the incident that appeared today in the Arizona Republic.

[From the Arizona Republic, Sept. 13, 1983]

'WE'RE DUMB,' SAYS PILOT SHOT DOWN BY RUSSIAN MIG JET

(By Pat Murphy, Editor)

John McKone has a distinction that he probably could just as well have foregone.

Retired two weeks ago from the U.S. Air Force as a colonel, McKone is one of the few Americans who has been shot out of the skies by a Russian Mig jet fighter plane who has lived to tell the story, unhappy as it is.

McKone and a fellow crewmen—Freeman Olmatead, who will retire next month from the Air Force as a colonel—were aboard a six-engine RB-47 recon jet when it was shot down on July 1, 1960, over the Barents Sea at least 50 miles off Northern Russia's territorial limits.

Four other crewmen perished and only one's body was found and returned to the United States.

Because of the high public interest in the downing of that Korean Air Lines Boeing 747 by the Russians, I tracked McKone to San Antonio, where he's preparing for a daughter's wedding, and chatted with him for nearly an hour about that episode 23 years ago and the possible parallels with the downing of the KAL jumbo jet.

The episode preoccupied two presidents [Eisenhower and Kennedy]. became the centerpiece of angry United Nations debate, resulted in direct negotiations between President Kennedy and Soviet leader Nikita Khrushchev, and finally a personal welcome home at the White House by Kennedy.

At 60, Col. McKone may have lost some of the anger about his own encounter with the Russians. But the downing of KAL flight 007 has only sharpened his acuity about Soviet style and strategy that he was to see up close as a prisoner of the Russian KGB secret police for 7 months.

McKone and other crewmen bailed out at 28,000 feet when Mig cannon fire knocked out engines and tore holes in the fuselage. They free-fell to 14,000 feet, where parachutes opened automatically.

Rescued from the frigid Artic water, McKone and fellow crewman Olmstead were hustled off to the KGB's, infamous Lubyanka prison in Moscow, where they would remain for 208 days, alternatingly interrogated by high-ranking KGB and Russian military officials, and locked in solitary confinement.

Interrogation lasted 4 to 5 hours at a stretch before they were allowed to sleep for 4 hours, and then subjected to another round of questions and demands that they sign "confessions."

Talking about this dark passage in his career resulted in McKone making these important points.

First, just as there seemed to be no purpose in shooting down McKone's RB-47 on that summer day 23 years ago, McKone saw utterly no reason for the Russians to have shot down the South Korean jetliner.

McKone, who spent a lot of his career flying high-altitude recon missions, never heard of any airline converting aircraft for spy missions—except, ironically, Russia's own Aeroflot airline.

And second, his principal interrogator was the head of the KGB, Alexander Shelepin, who in just a few years would be succeeded by another ice man named Yuri Andropov, who today is the leader of the Soviet Union.

Shelepin blurted out during one interrogation that McKone was naive—that the Soviet Union's plan was to ultimately embrace Africa, South America, Central America, Southeast Asia and to "Take everyone of those weak countries" before taking on Europe, Mexico and Canada.

With some disgust, and perhaps some resignation, John McKone looks back over the two decades since that conversation in a Soviet interrogation room in Moscow with the KGB's top cutthroat, and mutters the inevitable epitaph to the Free World's continuing failure in dealing with the Soviets.

"I'm amazed how dumb we are."●

LEO NAMEY—RECIPIENT OF GREATER WILKES-BARRE LABOR COUNCIL'S HUMANITARIAN OF THE YEAR AWARD

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HARRISON. Mr. Speaker, on Tuesday evening, September 6, the Greater Wilkes-Barre Labor Council presented its second annual Humanitarian of the Year Award to a most deserving recipient.

This honor was extended to Leo Namey, who for the past 32 years served his Teamsters Union and the entire Wyoming Valley community.

Mr. Namey graduated from the Elmer Meyers High School in 1934 and immediately took a job as a breaker boy in the mines. Two years later, he became a member of the Teamsters after going to work for Acme Markets. He subsequently became shop steward and was appointed to the union's executive board in 1947. In 1950, he became vice president and business manager of local 401 and continued in that capacity until his retirement last year.

Leo's long-time friend and colleague, Ernest Milewski of the United Textile Workers, spoke at the annual Labor Day dinner and pointed out that the Humanitarian of the Year Award, unlike an Oscar, which recognizes a single performance, is given in recognition of the "endeavors and achievements of a lifetime." So it is, Mr. Speaker, and in Leo Namey it has a fitting recipient.

I am happy, Mr. Speaker, to be able to share this occasion with my friends and colleagues in the House and to express to Leo Namey my congratulations and best wishes for many, many more years of success, happiness, and dedication to the labor movement and to his fellow man.●

HONORING J. FRANKLIN SMITH

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MURTHA. Mr. Speaker, it is my pleasure to join in honoring an outstanding citizen, and a good friend, Frank Smith.

I have known and worked with Frank for many years. In his position as president of the Pennsylvania Electric Co. we worked together on several legislative issues and community battles. Through our joint activities with the Boy Scouts of America, I saw firsthand the dedication and commitment Frank brought to these community challenges. And through his work with the Johnstown Area Regional Industries, we worked together in bringing jobs and industry into the community.

I have known few people with the personal dedication to excellence that Frank has. Maybe that dedication is well shown in his sports accomplishments at Penn State. Frank achieved nine varsity letters in three sports—an accomplishment which today is impossible. In fact, Frank probably would have had a professional baseball career if a knee injury had not affected him. Personally, from the standpoint of our community, I think we can be thankful for however that injury occurred.

But it is that same dedication Frank has brought to service. At Pennelec he was a leader in involving employees in the legislative process and working together with their government; he was an innovator in community development including original, successful campaigns in Johnstown, Lewistown, and Tyrone; once retired he volunteered his time to work with Labor and Industry For Energy, a group dedicated to America's energy future.

Having noted Frank's love of sports, maybe there is no clearer indication of his dedication than the fact that he never let a golf game interfere with his duty and commitment; although he loves the game, even in retirement it must come second to the job he has to do.

Soon, he will be national chairman of the American Heart Association, the highest lay volunteer job that a person can hold. The Heart Association could have no finer leader.

And it is a fitting group for Frank to serve with, for not only is the cause so important, but it symbolizes the heartfelt feelings of appreciation we have for Frank.

August 18 is J. Franklin Smith day in Johnstown. It is an honor most fitting and proper, and I certainly extend my best wishes to Frank on this most deserved of honors.●

BURTON S. BARR—1983 REPUBLICAN LEGISLATOR OF THE YEAR

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. STUMP. Mr. Speaker, the Honorable Burton S. Barr has been majority leader of the Arizona House of Representatives for 16 of his 19 years in that body. A man of boundless energy and good humor, Burt Barr has been a driving force in Arizona through the years the State has had to cope with incredible growth.

He is an acknowledged master of finding and persuasion on crucial votes. The result is a record that includes reorganization of Arizona government, the largest tax reduction in State history, enactment of a pioneering groundwater code, the Nation's only alternative to medicaid, and reform of education finance. In addition to these bills of statewide importance, in each session he has quietly and effectively moved legislation that touched the individual lives of tens of thousands of Arizonans.

In recognition of this outstanding public service the National Republican Legislators Association has chosen Burton Barr from a field of 3,000 as one of their 10 outstanding legislators of the year.

No one deserves this award more than Burton Barr. He is the kind of citizen legislator that makes democracy work.●

WHY PAC SUPPORTS SANCTIONS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. LAGOMARSINO. Mr. Speaker, the situation in Poland remains tragic. While the Pope's visit brought hope to millions of Poles, positive, substantive measures have yet to be taken by the military junta to alleviate even the most minor problems facing that country.

Since the Yalta agreement, wherein the United States turned our backs on and sealed the fate of Eastern Europe, the people of Poland have suffered at the hands of continuous repressive regimes. Throughout this ordeal, the United States has pledged its moral and spiritual solidarity with those in Poland and elsewhere in Eastern Europe truly seeking the freedom which so many of us here in the United States take for granted. The

Reagan administration is now faced with a crucial decision as to whether the United States should lift sanctions currently in effect against the Warsaw regime, thereby ending our stated dissatisfaction with the present regime and the appalling conditions it has forced upon all Poles.

The repression, subjugation and eradication of human rights and basic human freedoms put into effect by the imposition of marital law on December 13, 1981, has entered a new phase. The Communist regime under General Jaruzelski claims that no state of war against the Polish people or the outlawed trade union, Solidarity, now exists. The suspension of martial law, they argue, has created a favorable climate whereby the West may now lift sanctions, resume trade, and extend credit to Warsaw.

The facts, however, clearly do not support the regime's claims, as eloquently pointed out in a letter from the officers of the Polish-American Congress which follows. I wholeheartedly endorse the PAC's position on this matter and wish to bring the letter to the attention of my colleagues.

WHY PAC SUPPORTS SANCTIONS

The key to the suspension of sanctions and subsequent measures to assist in Poland's economic recovery is actually in the hands of the government of the Polish People's Republic, namely, Gen. Jaruzelski.

The martial law imposed on December 13, 1981 has proved a complete failure. It did not resolve the critical problems of economic and social-political crisis which the country faced at that time. One year later the sullen nation regards the authorities with barely disguised hostility and disdain, while the country's economy continues its downward slide.

Suspension of martial law in Poland on December 31, 1982 represents a deceitful maneuver to project an image of apparent moderation and relaxation. In fact, the martial law has been replaced with a totalitarian system even more threatening and repressive. New laws enacted by Poland's rubber-stamp parliament assure the retention by the regime of total control of every aspect of people's lives.

Faced with the failure of repression Gen. Jaruzelski's junta has mounted a vigorous propaganda campaign in a transparent effort to project an image of apparent moderation and relaxation. Its objectives are two-fold. Internally, the regime tried to persuade the nation, exhausted and disillusioned by the year-long struggle, to surrender its aspirations to freedom and dignity and resign itself to unquestioned submission to Communist rule. Externally, the objective is to influence a favorable response in the Western countries to its critical need of new credits and the suspension of economic sanctions imposed by the United States.

Poland's current realities of totalitarian repression clearly contradict this deceitful campaign. In fact:

Lech Walesa remains under a virtual house arrest, deprived of freedoms of speech and travel, unable to respond to the expectations of millions of Poles who regard him as a symbol of their hopes, aspirations and demands.

Hundreds of released internees and others have been drafted into the specially created army units, which are tantamount to forced labor camps.

Several leaders of "Solidarity" and the former Social Self-Defence Committee known under its Polish acronym of KOR have been arrested, charged with treason and are awaiting trials.

Some 2 to 3 thousand people who were sentenced to long-term prison terms for membership in "Solidarity" and infractions against the quasi-legal martial law regulations remain incarcerated.

Under the so-called "parasite" law anyone considered by the authorities to pose a threat to public order can be sentenced by an administrative decision to a term of forced labor.

Further, in a throw-back to the fuedal system of long ago, workers are in essence bound to their jobs, since they cannot leave them, or change them, without the permission of relevant authorities.

Finally, with the denial of the freedoms of expression and assembly remaining in full force, the nation is effectively muzzled and subjected to the monopoly of the Party propaganda apparatus and its lies and distortions.

Thus, the inescapable conclusion is that the military junta led by Gen. Jaruzelski, with full support and encouragement of the Soviet Union, is determined to force the recalcitrant nation into total submission.

Suspension of the United States sanctions imposed against the martial law regime in Poland in December, 1981, would be contrary to the basic long-range interests of both countries.

These interests require full restoration of the Polish people's human and national rights and freedoms which were brutally suppressed by Gen. Jaruzelski's military junta.

Lifting of the U.S. sanctions at this time would in effect legitimize the junta's totalitarian regime.

To the regime it would signal our acquiescence in the policy of repression and thus encourage its continuation and escalation.

To the Polish people it would signal abandonment of our support for their determined struggle for their basic rights and freedoms.

Faced with these realities, the Polish American Congress supports retention of sanctions at their current level until tangible reforms are implemented to restore Polish people's rights in actual fact.

Contrary to its current policy, the government of the Polish People's Republic must respond in a positive manner to the demands of reforms of the country's political and economic systems before sanctions can be removed and normal economic relations reestablished with the democratic countries of the West.

BACKMAN AND DeNUCCI'S SPECIAL COMMISSION ON SOCIAL SECURITY DISABILITY

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. FRANK. Mr. Speaker, Members of the House are unfortunately very familiar with the sad history of the disability program in the past several years. Since 1981, this administration has presided over a callous purge of the social security disability roles. Many people have been involved in the effort to overturn these practices, and I hope that within a few weeks the Congress will enact legislation which puts an end to these abuses of the disabled. One group which has worked hard to change this tragic situation is the Special Commission on Social Security Disability established by the Legislature of Massachusetts in December 1982. That commission, chaired by State Senator Jack Backman and State Representative A. Joseph DeNucci has done a superb job. Not only have they done a great deal to document the unjustified harm being done to many needy people, they have gone beyond simply listing abuses to make very thoughtful recommedations as to how the system should be improved. I believe it would be very helpful for those Members who are concerned with the need to make drastic changes in the Reagan administration's approach to social security disability to be familar with the outlines of this special commission report.

The material follows:

EXECUTIVE SUMMARY

The Special Commission on Social Security Disability was established in December 1982, in response to hundreds of complaints that disabled individuals were suddenly losing their benefits under the Social Security Disability Income (SSDI) program.

Many persons claimed that they had been unfairly and illegally cut from the entitlement rolls after years of receiving SSDI benefits and despite serious, continuing impairments. Their allegations were buttressed by the following statistics:

SSA nearly quadrupled the number of cases reviewed annually from 2,700 in 1980 to more than 10,000 in 1982.

Over 40 percent of the cases reviewed were terminated.

Judges were overturning 70 percent of the terminations appealed to them. • • •

THE INVESTIGATION

In October 1982, Sen. Jack H. Backman and Rep. A. Joseph DeNucci, co-chairs of the Committee on Human Services and Elderly Affairs, filed legislation calling for a special commission to investigate the complaints and allegations. The legislation was signed into law on December 20, 1982 • • • Eleven members were quickly appointed with Sen. Backman and Rep. DeNucci as chairpersons.

The Special Commission on Social Security Disability met on February 9, 1983 and conducted 10 more public hearings and executive sessions.

Throughout the investigation, a clear picture emerged of a state agency, MRC (Massachussetts Rehabilitation Commission) that implemented federal program guidelines without challenging their legality or their effect on the disabled. Furthermore, the SSDI program as administered by MRC and the Disability Determination Service, was experiencing serious administrative difficulties. Many were related to federal constraints, such as inadequate funding to hire sufficient staff, but there were problems that could have been dealt with by MRC, such as stricter supervision over medical consultants.

Testimony was presented by hundreds of witnesses, including many disabled persons, well-organized by the Ad Hoc Committee on Social Security Disability and Stop Abuse of the Disabled (SAD). Their testimony centered on improper procedures and practices. For example, one woman testified that her benefits were terminated despite 12 recent operations on her stomach, hand, neck and back. Another young man born with cerebral palsy testified that he was examined by a MRC-contracted physician who totally ignored this medical history. Another person who had an artificial leg and an abscessed lung lost his benefits while he was in the hospital. Most persons charged that the DDS was making only cursory attempts to determine if their disabilities still existed.

FEDERAL CHANGES ANOTHER ISSUE

Other testimony blamed the Social Security Administration and the Reagan Administration for improperly carrying out a Congressional mandate to increase disability reviews.

The Congress was responding to General Accounting Office studies in 1976 and 1979 that as many as 20 percent of the SSDI recipients were ineligible but undetected due to too infrequent reviewing. In 1980, Congress ordered SSA to review all persons with non-permanent disabilities at least once every three years. Increased reviews were to start in January 1982.

The new administration which took office in January 1981, however, chose to begin increased reviews nine months earlier, in March 1981. As a result, state agencies were ill-prepared for the flood of cases that came down upon them, as was recently admitted by Secretary of Health and Human Services Margaret Heckler at a press conference on June 7, 1983. It was this increased pressure to review cases quickly, charge many critics, that resulted in sloppy processing and an inability to obtain the medical evidence needed to corroborate the existence of a disability. Changes in eligibility requirements, as written by the Social Security Administration, resulted in cases being reviewed under harsher guidelines than were in place at the time of the original disability determination.

This was especially true in Massachusetts where a study performed by Greater Boston Legal Services even before the new reviews took place showed a substantial number of examples of failure to investigate claims thoroughly, or monitor medical exams, and a staff that was understaffed and overworked.

VIOLATION OF FEDERAL LAWS

Even more compelling than the picture of an agency unable to cope with an increased caseload, however, was testimony that the Social Security Administration, and subsequently the Mass. Rehabilitation Commission, were not following the rule of law as pronounced by the U.S. courts in the First Circuit.

In Massachusetts, for example, a major decision was handed down by the First Circuit Court of Appeals in the 1975 case of *Miranda* v. *the Secretary of HEW* (514 F.2d 996, C.C.A.1) which cited medical improvement as one of the few criteria for denying continued SSDI eligibility (Appendix B). Instead of following *Miranda*, however, the SSA was ordering states to conduct an essentially new disability determination for each recipient.

Since the Administrative Law Judges have been overturning 70% of MRC denials, it can be assumed that they concluded that Social Security guidelines as interpreted by Mass. Rehab. illegally deprived recipients of their benefits.

KEY FINDINGS

Based on these facts and allegations, the Special Commission identified five specific areas of investigation: procedures, medical practices, caseworker issues, federal versus state responsibilities and impact on individuals. Public testimony was heard in each of the five areas. Claims were further investigated by the Special Commission staff. The following are the Special Commission on Social Security Disability's findings:

FEDERAL VERSUS STATE ISSUES

The Massachusetts Rehabilitation Commission continued to follow Social Security Administration regulations even after being informed about the considerable likelihood that they differed from federal law.

As early as 1975, various court rulings ordered different, and often more humane, interpretations of social security law than were being practiced by the Social Security Administration. The SSA has often adopted a position of non-acquiesence instead of implementing them into its guidelines. This meant that SSA stated in formal rulings that a decision in one court district was not to be implemented nationwide. MRC took no action to contest this posture.

In a recent California court case, the court ruled against SSA's policy of non-acquiesence.

The federal agency and, subsequently the States, have taken an overly narrow and punitive attitude towards disability.

The Special Commission finds that it is unreasonable and simplistic to assume that, because a disability has lessened in severity, the person will be able to return to, or even find, suitable employment. In other instances, the agency has wrongfully assumed an impairment is less debilitating than it is.

Many of the problems being experienced in Massachusetts must be resolved on the federal level.

Serious reform is needed at the Federal level both by the Congress and by SSA. Necessary changes have been identified and include: requiring face-to-face interviews with an examiner; requiring medical improvement for CDI cases; discontinuance of SSA's policy of "non-acquiesence" with court rulings; requiring all rules of and changes to the program to be subject to the public review and comment process; continuation of benefits through ALJ appeal; more realistic standards and methods for assessing vocational capability; a moratorium on all mental impairments cases pending development of new more realistic assessments; sufficient staffing and reasonable case processing workloads.

MEDICAL ISSUES

The judgments of claimants' personal physicians are either ignored or insufficiently solicited.

This is evidenced by use of contracted doctors in more than 40% of all CDI cases. Expecting a doctor to ascertain a claimant's full disability in 45 minutes or less, as opposed to the personal physician's long-term knowledge of the claimant, is unreasonable.

Consulting physicians are insufficiently monitored and are performing only cursory examinations.

Consulting physicians have no incentive to perform a comprehensive, detailed examination; they are paid on a per case basis. These doctors often do not receive case histories of claimants before the examination. At least three doctors last year received close to $100,000 in fees for exams; one of them was cited often during testimony as performing very superficial examinations. Mass. Rehab's monitoring of consumer dissatisfaction basically consists of sending post-exam questionnaires to 10% of the claimants or by responding to complaints.

Staff physicians, who have been responsible for final sign-off on all disability determinations, are processing too many cases to make fair decisions.

Last year, the DDS processed 57,000 cases. Yet only the equivalent of 20 full-time staff physicians must study the lengthy case records, order consultative examinations, and answer technical questions from case examiners with limited medical background. This means, on average, assuming no work breaks of any sort during a working day, that staff physicians and psychiatrists spend less than three-quarters of an hour total on each case that they process.

The Social Security Administration regulations take an exceptionally rigid and unrealistic approach to psychiatric standards.

As was learned from the *Minnesota* case, state disability determination services were instructed to require that psychiatrically disabled individuals meet one of the permanent listings of impairments to qualify for benefits. Other disabilities, however, that fail to meet the listings are further checked for residual functioning capacity, i.e. ability to perform work. Younger psychiatrically-impaired individuals particularly suffer from this procedure.

PROCEDURES ISSUES

The SSDI review system is geared towards proving a claimant is not disabled, instead of proving he or she is.

Considering that all recipients have previously gone through a lengthy and comprehensive disability determination to be initially accepted for SSDI, examiners and physicians should begin with a stronger presumption of disability. Instead, the Special Commission has heard evidence that caseworkers do too little to accumulate the information needed to prove disabilities exist. This can be a result of short processing times, lack of training, case overloads, or lack of sensitivity to the disabled person's problems.

Staff physicians and claims examiners unfairly make decisions without ever seeing the claimant.

Currently, the only person the claimant sees during the entire review process is an official in the Social Security district office. The person has no involvement in the actual disability determination. As a result of legislation enacted this year that also continued as SSDI claimant's benefits through appeal, claimants will be eligible to

meet with a federal SSA staffperson, but only after a decision to cease their benefits has been made, and still not with the decisionmaker. There will be only four such SSA workers for the entire Commonwealth of Massachusetts.

The complexity of the process has traditionally been poorly explained to claimants.

This problem has lessened somewhat because of the publicity afforded to the issue, but Mass. Rehab. must do more to improve its information dissemination and to involve the advocacy network in providing information to claimants.

The Disability Determination Service did not provide sufficient interplay with the vocational rehabilitation component provided through the Mass. Rehabilitation Commission.

The Special Commission learned that, upon occasion, a recipient was no longer considered too disabled for work by the DDS, but upon applying for vocational rehabilitation at another unit of MRC, was considered too disabled to be a suitable work prospect. Similarly, the Special Commission did not find sufficient communication between the two units when referring a ceased claimant. A more elaborate referral program has since been established.

Processing times for staff to complete each step of the disability determination process are based on quantity, not quality.

Workers are expected to process a claim in a limited amount of time, but gathering necessary information may require a lengthy effort. For example, when a claimant's personal physician is unable to examine the client or file a report in the brief time available, the client may be sent to a consulting doctor. The result is greater expense to the state and the possibility of a less thorough examination.

In the past, the DDS has relied too heavily on federal program structures and procedures.

The DDS must take a closer view of its own procedures and how they might be improved to better serve the disabled in the Commonwealth.

IMPACT ON INDIVIDUALS AND OTHER AGENCIES

Despite their eventual return to benefits following appeals to Administrative Law Judges, people's lives are unfairly and unnecessarily disrupted by this process.

Claimants whose benefits have been ceased must go through a lengthy appeal process, as long as 12 months or more during which they lose medical benefits. They also must pay for a lawyer and legal expenses. A temporary federal policy allows claimants to continue receiving benefits through appeal to an ALJ, but that opportunity is scheduled to end in October 1983. Even more serious is the emotional cost of this lengthy process, especially for persons who must daily deal with the difficulties of a disability.

The SSDI system for cessation does not take into account the difficulty of returning to the work force after several years, nor such other factors as high unemployment and job discrimination.

Considering the nation's high unemployment rate and subtle biases against hiring the disabled, other factors must be considered.

Due to SSDI terminations, state agencies such as the Departments of Public Welfare and Mental Health, and the vocational rehabilitation component of the Mass. Rehabilitation Commission, are experiencing increased costs, workloads and applications for services.

Recipients who are thrown off the federal SSDI rolls often apply for state-funded programs. At present, however, the agencies and the Executive Office of Human Services are not gathering sufficient data to determine the exact magnitude of the problem.

CASEWORKER ISSUES

Heavy caseloads and short processing times are resulting in insufficiently developed cases.

Restrictive and narrow disability guidelines require extensive case development to prove the existence of a disability. The necessary time for development is not available.

Caseworkers are undertrained and not always sufficiently experienced to handle the complexity of CDI (Continuing Disability Investigations) cases.

New claims examiners begin working with initial claims cases, and then can graduate to performing CDIs. Although the number of case examiners was recently increased by 60 (to a total of 135) to handle this increased case review, these new workers were adequately prepared only for initial cases. Many inexperienced examiners were prematurely graduated into CDI reviews.

Caseworkers need increased sensitivity training in dealing with claimants.

Many persons testified that they were rudely treated and received inappropriate phone calls from case examiners and other staff at the DDS. Workers in contact with the disabled public should be fully aware of the need for additional sensitivity.

RECOMMENDATIONS

The Special Commission on Social Security Disability worked closely with the Massachusetts Executive Office of Human Services to design procedures for determining continuing eligibility for SSDI which would conform to federal laws. In April 1983, the Massachusetts Rehabilitation Commission implemented a series of precise criteria that must be met before recommending cessation of a client's benefits. According to these criteria, a person cannot lose benefits unless he or she has returned to work; improved enough to return to work; received training or medical treatment that makes it possible to return to work; or was incorrectly judged disabled and has the necessary vocational skills to return to work. (See Appendix H.)

The Special Commission also urged the Commonwealth to become a plaintiff in a class action suit brought by Greater Boston Legal Services. The lawsuit would more sharply delineate the standards by which an SSDI recipient's benefits could be ceased. The Department of Health and Human Services has asked the state to drop its participation in the suit in exchange for a pilot project in Massachusetts incorporating many of the Special Commission's other recommendations. These negotiations are not yet final, but the lawsuit would be continued by the Greater Boston Legal Services in any event.

Finally, in its deliberations, the Special Commission on Social Security Disability identified more than 50 procedural problems that can be corrected by the state. Most of these recommendations have been accepted formally by the Massachusetts Rehabilitation Commission and are being implemented (Appendix C). They include, for example:

A review of all forms and other written material sent to claimants;

An independent physician selection board;

Maximum caseload sizes; and

Re-establishment of a specialized CDI unit. . . .●

GOLDEN WEDDING ANNIVERSARY OF JOHN AND JOSEPHINE THOMAS

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HARRISON. Mr. Speaker, on Saturday evening, September 3, two wonderful people celebrated a very happy event.

John and Josephine Thomas marked their golden wedding anniverary at a party with their many friends. Among them was Danny Thomas, nationally known entertainer and founder of the St. Jude Children's Research Hospital. John J. Thomas serves on the board of that hospital with his friend, Danny Thomas, and it was a fitting and a happy occasion that brought them together in the ballroom of the Woodlands, an inn, to commemorate 50 joyous years and to look forward to many, many more years of family life and community service.

The world would be a better place, Mr. Speaker, if there were more people like Danny Thomas and more people like John and Josephine Thomas. It is my privilege to salute them on this occasion and to share their happiness with my friends and colleagues in the House.●

SPENDING CUTS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, September 14, 1983 into the CONGRESSIONAL RECORD:

SPENDING CUTS

Every member of Congress is keenly aware of the desire of his constituents to cut unnecessary federal spending. Cutting spending is a constant theme in Hoosiers' letters and remarks to me. In 1980, President Reagan was elected in large part because he persuaded voters that he would impose rigorous discipline on the federal budget. The problem for the President and members of Congress has always been the hard time the voters have identifying what items in the budget to cut. According to the polls, most voters favor cuts in spending for foreign aid and welfare, but in 1982 these programs together up only 2 percent of the budget. In almost every other area, including defense, social security, education, and health care, most voters favor increases in spending.

During the last three years, the President and Congress have wrestled with the issues of what and how much to cut. The President's proposals have been adopted with only minor amendments. The results of the work of the President and Congress are now clear, and a comprehensive assessment of them is possible. The Congressional Budget

Office's new report on the spending cuts matches spending for 1982 through 1985 as it would have been under the 1981 laws against what it is scheduled to be under the 1983 laws. Analytically speaking, this approach is the best one to take because it gives the sharpest picture of what will take place. At botton, it shows that spending for human services for 1982 through 1985 will be $110.1 billion less than it would have been otherwise. This represents a cut of 7 percent overall in the human services budget. When considered together with the massive military buildup recommended and partly achieved by the President, these figures imply that there has been a strong shift in federal budget priorities.

The $110.1-billion cut will hit virtually every part of the human services budget. Retirement and disability programs (social security, civil service retirement, veterans' pensions and compensation, and supplemental security income) will lose $25.8 billion. A total of $27.1 billion will be trimmed from other income security programs (unemployment insurance, welfare, food stamps, child and maternal nutrition, housing aid, and home heating assistance). Health care programs (medicare, medicaid, and other health care services) will be reduced by $18.5 billion. A total of $25 billion will be cut from employment and training programs (general employment and training, job corps, public service employment, and work incentives). Social service programs (social services block grant, community services block grant, and veterans' readjustment benefits) will lose $4.6 billion. A sum of $9.1 billion will be removed from education programs (compensatory and vocational education, head start, guaranteed student loans, and other student aid).

It is evident from these figures that some human services programs will be hit much harder than others. In terms of percentage, the hardest hit will be public service employment (down 99 percent), community services block grant (down 39 percent), general employment and training (down 35 percent), work incentives (down 33 percent), and child nutrition (down 28 percent). It should be noted that during a time of recession, stagnation, and economic change, employment and training programs as a group will suffer most under the budget cutter's knife.

That the cuts will have a direct and adverse impact on people cannot be denied. Some 325,000 families will lose welfare benefits, and the same number of families will have their benefits reduced. About 1,000,000 people will become ineligible for food stamps. Some 600,000 people will receive guaranteed loans. Some 3,000,000 children will end their participation in the school lunch program. About 700,000 fewer students will receive guaranteed loans. Some 600,000 people will see their public service jobs taken away. Such figures take on an even greater significance when one realizes that the high unemployed of recent years normally would increase the number of people dependent on these programs.

It is clear from the report that the poor will bear the brunt of the cuts, the largest of which will be made in "means-tested" programs (those open only to people who have low incomes). About 40 percent of the savings will come out of benefits paid to households with annual incomes of $10,000 or less. Also, the average cut in benefits per household will be greatest for those whose annual income was $10,000 or less. This approach is in line with the President's philosophy of welfare, which holds that because welfare encourages dependence, the cuts must fall on poor people who are working or are able to work.

My guess is that this report will become one of the key documents of the political debate in 1984. Not much is likely to happen in Congress in the coming months to alter the terms of the debate. The report goes quite directly to one of the major issues: Has the President's approach to spending control been fair to all, or has it focused only on the programs which benefit the politically weak while leaving essentially intact the programs which benefit the politically powerful?

While every reasonable effort to cut excess federal spending must be supported, the experience of the last three years only shows how hard it will be to get additional cuts of sufficient size to reduce the $200-billion deficit. As we survey the major categories of domestic spending, we see that there is not much room to move. Domestic budgets either have been cut deeply already (employment and training), cannot be cut except at the margins (social security), or cannot be cut at all (interest on the debt). Many domestic budgets are too small on balance to make much difference. In 1982, for example, budgets for science, general government, energy, community development, justice, revenue sharing, and commerce ranged from $3.9 billion to $7.2 billion. Not one exceeded 1 percent of the total budget. Modest savings may be made in transportation, natural resources, and agriculture programs, whose larger budgets ranged from $12.9 billion to $20.6 billion in 1982, but savings of the magnitude necessary to reduce a deficit of $200 billion will not be found.●

STATEMENT TO THE NEW ENGLAND MEETING OF PARENTS WITHOUT PARTNERS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MARKEY. Mr. Speaker, under leave to extend my remarks in the RECORD I include the following:

STATEMENT TO THE NEW ENGLAND MEETING OF PARENTS WITHOUT PARTNERS

The English essayist Sir Francis Bacon wrote: "The joys of parents are secret, and so are their griefs and fears." I am sure you understand the truthfulness of this statement better than I do, for it is a statement worth considering. All of you face the great challenge of parenthood alone, and must face the joys and griefs and fears alone. But just because you are a single parent does not mean that you must be without support from society. I know that many of you are concerned that the federal government does not give you, as single parents, adequate support. I agree with your assessment, and would like to address some of the measures I support which would help parents like you face the great challenge, joys and griefs of parenthood.

If one steps back and examines the whole picture of single parents today, economic hardship dominates the picture. In 1979, 47 percent of single parents received some form of direct welfare payments from the Aid to Families with Dependent Children program. Nearly half of female single parents are living at or below the poverty level. To add one more depressing statistic: the median income for single female parents fell in 1982 from 1981, down to $8,950. That median income level does not compare favorably with the poverty level of $8,220 for a family of 3 or a poverty level of $9,900 for a family of four. Clearly, being a single parent today means doing battle with your checkbook and worrying about where money will come for unforeseen medical expenses, or for a nice vacation for your children and you.

What can the federal government do about this situation? Aside from a full and robust economic recovery, which I fervently hope we will see despite the policies of Ronald Reagan, there are several actions the government could take to make the life of a single parent a little easier. I should add here that even if there is a recovery, I am concerned that the President will declare his economic policies a victory when unemployment gets "down" to 8 percent and many people, especially, history will tell us, women and poor people, will still be out of work. Given this state of affairs, we should not sit and wait for a recovery in the economy which may not help all single parents, but instead we should support programs which make sense to all Americans concerned about fairness and the citizens of tomorrow.

One of these programs should be tough enforcement of child support. Statistics on child support compliance shock anyone who has respect for the law. In 1981, $3.8 billion of child support was not paid. That figure represents about 40 percent of the child support payments due. For once I agree with the President: there are a lot of deadbeats out there and it is time we make them pay up. The problem with Ronald Reagan is that his idea to get better enforcement is to give less money to the state offices which enforce child support payments. There are several proposals in Congress which would force states to get tough against those who flaunt the law and refuse to pay child support. Let me assure you that I support these measures and hope they become law before any more parents go without money they and their children need.

Another issue which should be of interest to all parents is child care facilities. We need to realize that our society today is much different than it was when you and I were growing up. To reflect the change in lifestyles, we need to recognize that new and different social support systems are needed. For instance, more child care facilities after school are needed. In addition, we need to expand the tax credit to insure parents are not bankrupted by providing adequate child care for their children. Furthermore, there is a need for extensive pre-school child care facilities and this need must be met. On the whole there is a need for the federal government to encourage and promote quality child care at all levels.

Let me also commend your group for providing a support network for single parents. I know how helpful it is to talk about one's problems; I have ample opportunity on the floor of the House of Representatives to do just that. I encourage you to communicate your needs and beliefs to your Congressman. You should know that there are so many issues facing Congressman that we need letters and phone calls to focus our attention on important concerns like the ones I have addressed here.

You all have, in my mind, one of the toughest and most important jobs on earth—raising children. For what tomorrow

looks like will be greatly affected by the job you do as parents. You should not be left alone in this effort, and you should not be blocked by a passive federal government. The issues I raised today—child support enforcement and child daycare facilities—are but two examples of areas which demand more federal involvement. I support your effort to focus attention on your concerns and hope the government takes action which enables parents like you face the joys, fears and griefs of parenthood knowing that you have a helping hand.●

JEROME M. ROSOW PROVIDES EXCELLENT OVERVIEW OF PAY AND COMPENSATION FOR FEDERAL EMPLOYEES

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Ms. OAKAR. Mr. Speaker, the September 2, 1983, edition of the Washington Post carried an op-ed article written by Jerome M. Rosow, chairman of the Advisory Committee on Federal Pay. The article is entitled, "Stop Exaggerating Federal Pay," and it provides an excellent overview of the whole area of pay and compensation for Federal employees.

As chair of the subcommittee with jurisdiction over these issues, I want to call Mr. Rosow's column to the attention of my colleagues. At a time when we will be considering serious questions involving Federal pay and benefits, I commend this as very worthwhile reading. The article follows:

[From the Washington Post, Sept. 2, 1983]

STOP EXAGGERATING FEDERAL PAY

(By Jerome M. Rosow)

A broadside attack on what is essentially deferred compensation cannot be considered either equitable or fair at a time when federal pay lags the private sector by about 20 percent.

Relentless attacks on federal compensation have served to lower both the morale and productivity of federal employees.

Any objective review of the past decade reveals that the pay system has been repressed, while pension costs have greatly increased. It is clear that we must restore balance among both current and deferred compensation and security in the compensation system. But it is neither fair nor practical to suggest, as some have, that at a time when federal white-collar pay averages about 22 percent below prevailing private levels, balance should be restored by major cuts in the pension plan.

Since 1962, the federal pay system has been based on the principle of comparability with prevailing private-sector salary levels. It was reinforced with the passage of the Federal Pay Comparability Act of 1970.

When President Ford established the Rockefeller Panel on Federal Compensation in 1975 to critique the entire pay-setting method, it concluded that "the principle of comparability with the private sector has proved to be a sound and effective basis for setting Federal pay rates." The comptroller general's office and the Congressional Budget Office have also conducted reviews, with similar conclusions.

The Advisory Committee on Federal Pay has itself repeatedly evaluated the system. We compared the federal paysetting method to other mechanisms, and it is clear that the current approach saves money. If, for example, the consumer price index had been the basis for adjusting pay, pay packages for federal white-collar workers would have been $9.5 billion higher in fiscal 1983. And if increases had tracked the increases the Postal Service won through collective bargaining, $22 billion would have been added to the payroll. Nevertheless, critics continue to exaggerate the pay itself by using inappropriate comparisons.

Inevitably, these criticisms have been reinforced by ballooning federal deficits, which are really separate and apart from the question of federal pay. Budgetary considerations persuaded Presidents Nixons, Ford, Carter and Reagan to adopt alternative pay plans, which reduced the pay adjustment in seven of the past 13 years. Now, under budgetary duress, President Reagan has recommended a 3.5 percent increase in federal pay to be effective in January 1984. Based on an annualized calculation, this is 2.6 percent pay adjustment, or about 10 percent of the increase required under this year's comparability figures.

While the salaries of white collar workers have lagged over the last six years, pension costs have forged ahead. Three interrelated factors were responsible for this imbalance (1) the pay catch-up that took place in the late 1960s raised salaries, which then became the basis for pensions in the 1970s; (2) the pension formula was changed to base benefits on the three highest salary years instead of the five highest salary years; and (3) a cost-of-living escalator was adopted to keep pension benefits in line with the rate of inflation. These three factors were compounded by double-digit inflation in the 1970s.

Federal pensions have been a mainstay of the total compensation package, serving to attract and retain valuable people through the promise of earlier retirement and benefits that were protected against inflation. The pension promise was well worth sacrifice. It was worth a 7 percent employee contribution when most private plans were—and still are—noncontributory (except for Social Security); it was worth pay disappointments; it was even worth enduring the public's scathing comments on the bureaucracy. If in certain years the pay was lower than pay in the private sector, the pension compensated.

Pension policy has also provided a safety valve. The early retirement provisions of the pension plan have opened an exit for long-service (30 years), relatively young (age 55) career people, thus encouraging a system of turnover and promotion from within. This voluntary turnover compensates for the other rigidities inherent in Civil Service employment and prevents the petrification of the system. New pension proposals could undermine the flexibility of the system by extending required working life 10 years to age 65.

Pensions need reform and reshaping in a meaningful, reasonable way. Integration with the Social Security system, a review of retirement age and a modification of the cost-of-living escalator all are worthy of consideration. But any changes should be accomplished gradually, without shaking the confidence of federal workers and their families. A broadside attack on what is essentially deferred compensation cannot be considered either equitable or fair at a time when federal pay lags the private sector by about 20 percent and the entire pay system is undergoing a crisis of confidence.

A word about productivity. Although the general impression of taxpayers and political leaders is that the performance of federal employees is poor, the productivity of these workers increased an average of 1.5 percent per year between 1967 and 1981—almost double the national (nonfarm) average gain of eight-tenths of a percent per year. With federal civilian employment (including Postal Service) flat at 2.7 million since 1970, and a federal budget that has jumped almost four-fold during the same period, payroll expenditures have declined from 5.1 percent of the GNP to 3.2 percent. The record is remarkable and does not reflect any proportionate growth in personnel costs that could be traced to widespread inflation of pay levels.

On all three counts—pay, pension and performance—federal employees deserve the consideration of the American people. Although it is desirable to continue to improve the federal compensation system, we must beware of "reforms" that would have the effect of undermining this system and destroying its viability. In the final analysis, the federal government requires career employees of uncommon ability to serve the national interest—and it depends upon fair, equitable and attractive compensation programs to attract and retain people of this caliber in public service.●

BAN COP KILLER BULLETS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. PORTER. Mr. Speaker, I would like to call my colleagues attention to a recent column in the Chicago Sun-Times by Mike Royko titled "Gun Lobby Hazardous to Policeman's Lives."

In this excellent column Royko expresses his support for efforts to ban teflon-coated, cop killer bullets. Although nearly half the Nation's police now wear bulletproof vests, they are still vulnerable to these penetrating bullets.

I urge my colleagues to read this column, and to work for the passage of H.R. 953 which will ban cop killer bullets.

GUN LOBBY HAZARDOUS TO POLICEMEN'S LIVES

(By Mike Royko)

It appears that the National Rifle Association is in favor of policemen being shot.

The NRA will be furious at the thought that they want policemen shot—or at least are indifferent to the possible carnage—but I can't see how any other conclusion can be drawn from their position on the superhard bullet.

This bullet, as you may have read, is the one that's so hard it easily pierces the Kevlar vests that many policeman are now wearing.

These vests have been credited with saving the lives of at least 400 cops who

were hit with ordinary bullets. Had these cops been hit with the Teflon-coated, superhard slug, there would have been 400 funerals.

For a long time, some congressmen who don't fear the mighty pro-gun lobby have been trying to get these bullets banned.

But the National Rifle Association is against this bill and has been putting its potent pressure on less courageous congressmen.

The NRA likes to portray itself as a sensible organization. It spreads ads for itself all over magazines—especially those directed at teenagers. It talks about how it is in favor of responsible gun ownership and responsible behavior.

At the same time, it fights with teeth bared against a law that would ban a bullet that has no other purpose than to blow away a human being.

These bullets aren't used in hunting, target-shooting or any other sporting activity—unless you consider zapping a cop to be jolly good sport.

Why, you ask, would an allegedly responsible, sensible organization take such a daffy position?

The answer is simple enough: The NRA's responsible posture is a phony. The NRA is against any kind of laws that provide any kind of restrictions on the ownership, sale and manufacturing of guns and ammunition.

If the NRA had its way, you would be able to buy guns and ammo in your corner liquor store. And you wouldn't have to register them or even leave your name with the clerk.

It's against any and all gun laws and it does all it can to intimidate congressmen, state legislators, local councilmen and any other politicians who don't share its views.

So it shouldn't be a surprise to anyone that the NRA is fighting against banning the superhard bullet.

It's no surprise to Rep. Mario Biaggi (D-N.Y.), an ex-cop who sponsored the bill in the House.

"There's no real, rational reason why the NRA is opposing this bill," Biaggi told us. "They're just paranoiac. They go crazy if they think someone is trying to encroach on their preserve of munitions or guns.

"They've tried real hard to defuse the issue with false statements. For example, they say the bill will affect hunters and sportsmen. That's nonsense. We're talking about handguns with barrels no longer than five inches. It should be clear we're trying to protect the law enforcement people—many of whom believe they'll be protected by wearing bulletproof vests.

"Then they say the bullets are only sold to police. That's clearly untrue. Time and time again it's been proven than just about anyone can go into a gun shop and buy these bullets right off the counter.

"They also say that the thieves and felons are using these bullets because we've publicized them.

"Now, that argument would be all right if you were talking to a naive high school kid. But I was on the police force for 23 years and I can tell you this: the felons know what's out there before the members of the police department do.

"All of the NRA arguments are just silly.

"The irony of this whole thing is that, while we wait for this legislation, the criminals are getting smarter. They're wearing bulletproof vests. Police use their traditional bullets and the felons are protected with these vests. But cops aren't protected against the felons using the killer bullets."

This is the fourth time that Biaggi has introduced a bill to ban the vest-piercers. Each time, the NRA had its loyal, gun-loving members put heat on their congressmen. And each time the bill died in committee.

But this time Biaggi thinks he can get the bill passed, once some studies are made that define what an armor-piercing bullet is.

You see, the NRA says that there is absolutely no way such a definition can be made. It argues that if you ban this bullet, all other bullets might be banned.

That's about as bright as saying that if you ban opium, which is a mood-altering, habit-forming substance, you will inevitably wind up also banning bottles of Lafitte Rothschild, 1959, because it, too, can be a mood-altering, habit-forming substance.

So I'm sure the agencies making these tests and drawing up guidelines will be able to come up with a satisfactory definition that can be written into the law:

No handgun ammunition can be sold if it can pierce anything as hard and thick as a police vest—or the thick skull of a National Rifle Association official.●

ALABAMA LABOR LEADER TO RETIRE

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. ERDREICH. Mr. Speaker, the passing of Labor Day brought with it the announcement that a dedicated and respected supporter and fighter for the rights of working men and women in Alabama will retire from office.

Barney Weeks has served for 26 years as president of the Alabama Labor Council. Weeks' ascent to the position of Alabama's top organized labor official began in 1936 with his employment as a printer with the Montgomery Advertiser. Shortly after that, he became president of his printers' local union. He was first elected president of the Alabama Labor Council in 1957, and has been a strong voice on behalf of Alabama's working men and women ever since.

The high esteem in which Barney Weeks is held by all who know him is testament to his integrity and his dedication to the people he has so ably served.

Barney Weeks has been a guiding force in securing fair wages and raising the standard of living of the working men and women of Alabama. His wisdom and leadership will be sorely missed.

The texts of editorials which appeared in both The Birmingham News and Birmingham Post-Herald, highlighting and praising the accomplishments of Barney Weeks, follow:

[From the Birmingham News, Aug. 21, 1983]

WEEKS TO RETIRE

Barney Weeks has served the AFL–CIO's Labor Council as its president for so long, he has become almost a fixture. Needless to say, he will be greatly missed by the union community as well as by office holders who have relied on his knowledge and sentiments regarding labor legislation.

Few men in recent times have worked as faithfully and as unflaggingly for union goals as has Weeks. His service as labor council president alone spans 26 years.

While he never left one in doubt as to who he represented, he has also been very much the gentleman in his dealings with those from other sectors. He has always had time to discuss issues with journalists, both at the capital and here in Birmingham. And while The News frequently disagreed with him on issues, it has always respected his integrity, forthrightness and dedication to his mission.

Still a vigorous and dedicated advocate of union causes at age 70, Weeks undoubtedly has earned retirement and the free time to spend with his wife and family and to pursue interests for which he had no time in the past. One can only wish him well, as he winds up his official business and in the more tranquil days ahead.

[From the Birmingham Post-Herald, Aug. 19, 1983]

BARNEY WEEKS STEPS DOWN

In his low-key way, Barney Weeks, president of the Alabama Labor Council, has been a political power in this state for 25 years.

He hasn't always won in his struggles to get what he considered necessary for the well-being of the union members he represents, although he has had his share of victories.

But he has earned the personal respect of most who have had dealings with him, whether they agree or disagree with his stands. He is a tough, honest advocate for organized labor. But one who knows that there are times when political compromises must be made.

Week's tenure as the state's top organized labor official—which will end with his retirement in October—has not been an easy one.

During the 1960s, he had to walk a tightrope between the union movement's support of civil rights and the large number of union members here in Alabama who dissented from that position. But he persevered, kept the organization together and eventually won acceptance by most members for the views he espoused.

Weeks decided not to seek re-election as council president so he can spend more time with his wife, who is in poor health. But even without the personal reasons, Barney Weeks has earned the right to enjoy retirement. He has labored long and hard for the people he represents.

We wish him only the best as he enters retirement.●

WILKES-BARRE WINS BATTLE OF CITIES

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HARRISON. Mr. Speaker, one of the highlights of the Jerry Lewis Telethon, as carried in northeastern Pennsylvania by WNEP TV, channel

16, was the "Showdown at Sundown," a series of sporting events designed as a competition between the officials and employees of the cities of Wilkes-Barre and Scranton.

I am happy but, of course, not surprised to report that the Wilkes-Barre "Killer Bees" were victorious.

The "Battle of the Cities" went on, quite literally, until sunup. Events were conducted in both Wilkes-Barre and Scranton, with a climatic "showdown," a tug-of-war which brought the two cities together on a neutral battlefield—the grounds of channel 16. There, in less than 2 minutes flat, the Killer Bees won the final and decisive event.

Apart from the fun and the sportsmanship, of course, these events contributed significantly to the success of the telethon in northeastern Pennsylvania. More than $30 million was raised for "Jerry's kids" and the exhausting all night effort of the men and women of both the Wilkes-Barre and Scranton teams served as an inspiration to those who stayed up and worked on the telethon as well as to those who called in and contributed to it.

And so it is my pleasure and my privilege today, Mr. Speaker, to congratulate the Wilkes-Barre Killer Bees—their captain, Wilkes-Barre Mayor Thomas V. McLaughlin, their coach, Wilkes-Barre City Clerk William G. Brace, and all of the team who gave so much of themselves to make this event a success: Bob Waskiewicz, Joe Miscavage, Ed Leslie, Marc Murphy, and his fiancee Joan Duffy, Dick Muessig, Bill, and Laura Brace, Rich, and Eileen Sorokas, Jerry Hdozdovic, Jim Munley, Barry DeRemer, Len Romanecz, Joe Douglas, Mary Kay Murphy, Thomas Morrissey, and the team mascot, "Mitzi" Sorokas.●

KOREAN AIR LINES MASSACRE

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. McEWEN. Mr. Speaker, I rise today to join with my congressional colleagues in voicing outrage and horror at the incomprehensible Soviet attack against Korean Air Lines flight 007 on September 1, 1983. This senseless act cannot begin to be explained on the grounds of national security considerations including the rights of territorial sovereignty. This blatant act of aggression, the second such firing upon a Korean 747 by the Soviet Air Force, again demonstrates the recklessness which with the Soviet Union uses its military might, its disregard for human life, and its utter contempt for the world family of nations.

To date, worldwide expressions of alarm and condemnation have been to no avail in touching the conscience of the Soviet Union's leadership. Our words, too, have fallen upon deaf ears in Moscow. This being the case, actions are now in order if we are to impress upon the Soviets the importance for all nations to behave in a civilized fashion on behalf of the mutual advancement of humanity.

I am today introducing a resolution expressing the sense of the House of Representatives that the President urge all governments to immediately prohibit Soviet air traffic from using the airports in their respective countries, and that this ban remain in effect until an official explanation and apology regarding the shooting down of commercial Korean Air Lines flight 007 is received. Temporary bans of specified duration, as we have witnessed to date, are valuable, but token. I urge my colleagues to pursue additional avenues to discourage yet another repetition of this outrageous Soviet action. The resolution is as follows:

H. RES. 308

Resolved, That it is the sense of the House of Representatives that the President should urge the governments of all countries to immediately prohibit Soviet air traffic from using the airports in their countries, with that prohibition to remain in effect until the Soviet Government provides an official explanation and apology regarding the downing of Korean Air Lines flight 007 in the vicinity of Sakhalin Island on September 1, 1983.●

SHOW OF FORCE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. LAGOMARSINO. Mr. Speaker, the President has been repeatedly criticized for sending U.S. troops and ships on maneuvers in the waters of Central America. Such action at this time, actually at any time according to his opponents' argument, is unproductive and likely to cause dissension among the countries of Central America and the Caribbean, perhaps even lead to war.

Now, the maneuvers are proceeding and there is no war. There have been, however, interestingly enough, new signs that the President's decision was the right one. The source of much of the region's instability, Cuba, has decided perhaps it is time to talk with the United States to see if some sort of negotiations can be undertaken. While the critics of the President will probably hail Cuba's Fidel Castro for his timely and altruistic call for an end to the violence in the region, which he has so cleverly wrought, they will deny that it was the strong show of force, resolve, which led Castro to make his concessionary remarks.

It is for this reason I bring the following editorial from the Oxnard Press-Courier, a local newspaper from my district in California, to the attention of my colleagues.

The article follows:

[From the Oxford Press-Courier, Aug. 14, 1983]

SHOW OF FORCE

The U.S. show of force off both coasts of Central America may have grabbed the attention of Cuba's Fidel Castro. We don't know why, but it looks that way.

Shortly after the Reagan administration announced deployment of naval forces off both coasts, Castro remarked in a television interview that he is willing to make some concessions in Central America.

Whatever the cause—and there is no way of reading Castro's mind—his sudden turn can be a good sign. The U.S. government should call his bluff, if it is one, and negotiate an agreement, if he really wants one.

There are reports that both Nicaragua and Cuba are pressuring the Salvadoran guerrillas to negotiate a settlement with the U.S.-supported conservative government in El Salvador.

Before U.S. forces arrived, some in Cuba and Nicaragua saw no obstacle to imposing communism on Central America.

It looks like President Reagan's gunboat diplomacy is getting their attention—and setting the scene for negotiation.●

KOREAN AIR LINES MASSACRE

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. WOLF. Mr. Speaker, I join with my colleagues today in our collective expressions of outrage and disgust at the Soviet Union's barbaric act of shooting down an unarmed Korean Air Lines jetliner with 269 innocent people aboard.

That one of our colleagues, Rep. Larry McDonald, was a passenger on that ill-fated flight brings this abhorrence closer to home for us here in this body. To his family and to all the families and loved ones of the 269 people on KAL flight 007, I extend my deepest sympathy.

By speaking out here today, I believe we as the elected representatives of the people of the United States of America can start a unification process among ourselves and our allies which will express clearly and without doubt to the Soviet Union that such total disregard for human life will not be tolerated by civilized and peace-loving people throughout the world.

I believe our collective outrage, properly channeled, can have a positive impact on the future and underscore to the world that murders in midair will not be condoned and that the perpetrator of this act—the Soviet Union—must be held accountable for this brutal deed.

Mr. Speaker, at this point in the RECORD I would like to share with my colleagues a column on the Soviet action by George Will which appeared in the September 12, 1983, edition of Newsweek.

[From Newsweek, Sept. 12, 1983]

NEEDED: A POLICY OF PUNISHMENT

(By George F. Will)

The shocking thing is how shocked people are. The day the Soviet regime murdered another 269 persons was the 24,041st day since the regime was founded. Since 1917 the regime has killed at least 20 million of its own citizens, an average of more than 800 a day for 66 years. Unless the Red Army massacred another Afghanistan village last Thursday, the regime had a below-average day of blood.

Why are people so startled when the Soviet regime acts in character? Nothing in nature—not even granite, which water wears away over time—is as durable as illusions grounded in a desire to avoid facing nasty facts. Oh, yes, with metronomic regularity the Soviet Union does shatter some Americans' illusions. But Americans are a manufacturing people, so they manufacture new illusions about Soviet willingness to move up from barbarism. In 1979, after 62 years of domestic carnage and international gangsterism, the Soviet regime invaded Afghanistan, and the president of the United States said gosh that sure opens my eyes.

Why did the Soviet regime, after 2½ hours of thinking about it, murder another 269 persons? Well, why not? The benefits are clear enough (the benefits of intimidation, especially of Japan), and the costs are almost certainly going to be negligible, and brief.

The Soviet deed has been the subject of a U.N. debate. For the Kremlin that was an ordeal akin to being bombarded with marshmallows. Thank God it is not December or some dunce would suggest dimming the national Christmas tree. The state of Ohio, which has a better foreign policy than the United States, has removed Russian vodka from state-run liquor stores. Perhaps the 269 murders will complicate the process of subordinating foreign policy to presidential politics. Perhaps it will now be harder for the president to sally off to an election-year summit and sign an arms-control agreement ruined by American eagerness. But summits and agreements have no noticeable influence on the behavior of the Soviet rainmakers—the "yellow rain" rainmakers.

IMPARTIALITY

The World Council of Churches has not yet had time to condemn Korean Air Lines for aggressively bumping into Soviet air-to-air missiles, but various other "peace" parties, with the impartiality for which they are famous, have announced: The Soviet deed proves the irrationality of "the superpowers" and demonstrates the paranoia to which U.S. policy has driven the Soviet Union. So everyone must disarm, starting now, starting here.

The cotton-candy language of journalism spreads a sticky goo of imprecision over events like the attack on the plane. It has repeatedly been referred to as a "tragedy." No, when children die of leukemia, that is a tragedy. When they are blown to bits by an act of state, that is an atrocity, and one worthy of Hitler's former allies. But too many persons by now have too large a stake in muzzy language. Remember the merry disdain that showered down upon President Reagan when, in his first press conference, he talked about how the Soviet Union lies? "There you go again," said his cultured despisers, when he recently referred to the "evil empire."

His words are fine, but he has not got a policy worthy of them. What is needed is a policy not merely of punishment, but of steady deterrents and leverage. A suitable policy, one that was desirable even before this atrocity, is at hand. But the hands of this administration are not apt to reach for it at this late date.

Felix Rohatyn, the investment banker and Democratic thinker, says: The Soviet Union has shot down an airplane. We should shoot down a Soviet-controlled country. Western governments should nationalize the loans Western banks have made to communist countries. The government should buy up the debts at a substantial discount—at, say, between 25 and 50 cents on the dollar (that is between 25 and 50 cents more than some of them are worth). Then it should declare Poland in default, drying up the flow of credit to that country and slowing the flow to all other Soviet satellites.

This would give the banks a little liquidity—more than they deserve, given their irresponsibility. It also would force them to quit cooking their books, pretending that virtually irrecoverable loans retain their full face value assets. But the principal benefit would be for foreign policy.

Credit is a strategic weapon. Like other strategic weapons, it should not be private hands. Credit for communists should no more be controlled by private banks than the MX should be controlled by Hertz. Loans—if any—for the East bloc should be government to government, so that Western policy will no longer be hostage to commercial calculations.

BELLY UP

Were credit nationalized, we could say to the Kremlin: You want credits for your basket-case economies? Fine—but it will be contingent on reductions in defense spending. You reject such linkage? Fine—you pay for Poland, and have fun when Romania goes belly up.

During martial law Poland received from the West a substantial subsidy: its debts were rescheduled. The Reagan administration is a shameful subsidizer: Poland has not paid debts owed to the U.S. government, yet the United States has not put Poland in default. Some bankers say that forcing default would be too kind to Poland, because it would wipe the slate clean. Poland's regime knows better; otherwise it would declare default on its own. Poland today is receiving, in effect, money at 6 percent from the West while Americans pay more than twice that for mortgages. If Democratic candidates cannot make an issue of that, they should be burned on a pyre of their bumper stickers.

The Soviet Union suffocates entire nations without even a suspension of subsidies from the West. What has it to fear from reaction to the annihilation of a mere planeload of people? A regime whose essential policy is intimidation has added another brutality to its repertoire. But the diplomatic minuet will continue, from Madrid to Geneva. The grain shipments will continue, and so will the subsidized sale of "nonstrategic" goods—as though such a distinction makes sense regarding a totalitarian nation with a command economy entirely subordinated to militarism. Faster than a heatseeking missile, there will be business as usual, especially for business.●

OUR MARINES IN LEBANON

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. LONG of Maryland. Mr. Speaker, U.S. involvement in Lebanon has become more complex and more dangerous for our Marines who serve in the multinational peacekeeping force. As we in Congress discuss U.S. policy in Lebanon and the extent of our military involvement there, many difficult issues must be addressed.

As chairman of the House Appropriations Subcommittee on Foreign Operations, I recently led a congressional delegation to the Middle East. In Beirut, we were eyewitnesses to the extremely vulnerable situation of not only our Marines and other peacekeeping troops there, but of the thousands of civilians trapped in that wartorn city.

My distinguished colleague from Florida, Congressman BILL LEHMAN, who was with me in Beirut and serves on the Foreign Operations Subcommittee, wrote a riveting and thoughtful article recently published in the Sunday edition of the Miami Herald. I wish I had written it myself.

[From the Miami Herald, Sept. 4, 1983]

OUR MARINES IN LEBANON

(By Representative William Lehman)

Only days ago I was on the Beirut patio of the U.S. ambassador to Lebanon's residence. Our noontime briefing on the situation in Lebanon was regularly punctuated by bursts of 155mm artillery shells lobbed beween the Druze Moslems in the Shouf mountains outside the city and the Christian Maronites within.

There was a surreal quality to the scene: a buffet lunch alongside the not-too-distant explosions somewhere beneath the clear Beirut sky. That no one seemed to feel any immediate sense of danger indicates the illusion that people in Beirut must have learned to live by.

This false sense of security was illustrated by glimpses of Beirut life: People lined the beaches and lounged around pool cabanas. Heavy traffic in the streets told me that this commercial resort city is still functioning in the midst of a war zone, where, less than a week after I left, two American Marines were killed. Nearly half the city is bombed out, but fresh wash hangs in the breeze across roofs of gutted buildings as if trying to defy the facts. The American Embassy stood like a giant chopped off at the knees.

The root of the new fighting stems from Lebanese President Amin Gemayel's inability so far even to seek a political settlement among the independent opposition factions. Ambassador Rober Dillion thinks Gemayel overrelies on the Americans to solve all his country's problems. Gemayel's greatest fear, Dillon said, is that he will end up controlling only 20 per cent of Lebanon, with a Greater Syria to the north and east and an Israeli "north bank" in the southern third of the country. Though the Israelis and Syrians are certainly not talking, Dillon spoke

of their shared interest in a tacit partition. But the main problem at present is to contain the internal divisions that worsened last week and that threaten any chance of Lebanese sovereignty.

The most powerful armed force is still the Phalangist militias, a coalition of right-wing Christian groups, predominantly Maronite and dominated by the Phalange Party, which has been controlled by the Gemayel family. Despite some temporary success in its efforts to assert authority, the military arm of the government, the Lebanese Armed Forces, is as yet unable to achieve the level of control that Israel had or that is now necessary to gain and maintain control over Beirut and the rest of the country. Any positive effect from training by U.S. Green Berets is not in sight, and it may be months or more likely years, including a likelihood of additional U.S. casualities, before results are evident. In any case, it was clear that the military arm of the Lebanese government was not up to the task last week. With the imminent Israeli withdrawal and uncertain government authority, last week's four-day battle may be a preview of what is yet to come.

If my meeting with President Gemayel just over a week ago was any indication, he may still be waiting for someone to hand him Lebanon's sovereignty on a silver platter. I have no doubt he would be willing to negotiate with Druze leader Walid Jumblatt in good faith if the United States threatened to withdraw from the multinational peacekeeping force. The U.S. presence is his only real lifeline as leader of what is still not a nation-state. Perhaps last week's return to civil war will force him to make a genuine effort at national reconciliation.

Gemayel's isolated mountaintop retreat is as removed from the anarchy of the city as the inexperienced leader seems to be from the reality of his country's struggle for life. I did not see a man who has the courage to exercise power or even to realize what strong actions must be taken. Cautious not to criticize Syria's deliberate attemps to destabilize his government, he was more comfortable in his eager denunciation of Israel's intentions in fortifying what he termed the "north bank" south of the Awali River. The Lebanese president stressed how dangerous Israel's failure to fully withdraw from all of Lebanon would be for the future of his country. Gemayel believes, too, that Lebanon is the only true democracy in the Middle East.

One thing that seems certain is the danger Gemayel poses to himself and his government if he does not begin a good-faith dialogue and achieve an agreement between the Druze and Christians and other opposition elements vying for greater power. Civil war is the inevitable alternative.

The Reagan Administration is so far unwilling to admit just how complex U.S. involvement in Lebanon has become. The Marines were initially sent to Lebanon with a clear mission: first to oversee the PLO withdrawal from Beirut, and later to deter violence when premature withdrawal of the peacekeeping force proved an open invitation for Christian militias to take revenge against the Palestinian community.

Deterrence has not worked. A 1,200-man U.S. Marine peacekeeping force and the U.S.S. Eisenhower anchored five miles offshore did not deter the recent fighting. There has been no reemergence of Lebanese sovereignty as Israel began its pullout but, instead, a widening arena for civil war. The *raison d'etre* for the multinational peacekeeping presence in Beirut has been removed. The peacekeeping forces, such as that of the United Nations Interim Force in Lebanon (UNIFIL), has been to implement agreements between sovereign states or to partition parties as in Cyprus—not to remain in the midst of a cauldron of hostilities.

The most plausible choices at present would be either to expand the multinational force or to withdraw. An expanded U.S., United Kingdom, Italian and French contingent may again prove to be ineffective should the internal divisions within Lebanon remain unbridged. If the force remains modest in size and in its current locations, more casualties should be expected.

It is also reasonable to speculate that an expanded U.S. force of possibly 20,000 troops could provoke even more violence by Syrian-backed factions. Any expansion of our Marine force should not take place as a substitute for President Gemayel's inability to exert his authority.

President Reagan has complied with certain terms of the War Powers Resolution. But a congressional debate can be expected in the coming weeks over the President's refusal to address the provisions of the resolution concerning the outbreak of hostilities. The debate could lead to congressional limitation of U.S. military involvement in Lebanon due to the risks faced by the present force or an expanded multinational peacekeeping force. A unilateral U.S. withdrawal would be unwise, though I think the time has come to set a timetable for withdrawal if the civil war in Lebanon continues.

The consequences of doing so must be weighed against such issues as the survivability of the Gemayel government, increased Syrian and PLO involvement (though Israel's forces will remain only 25 kilometers from Damascus after its redeployment), Soviet intentions and U.S. international commitments. Notwithstanding these concerns, the alternative I would lean toward is withdrawal should civil war persist. An outside force cannot bring peace to Lebanon.

In an effort to reduce casualties and to live up to its promised intention to withdraw from Lebanon, Israel Defense Forces (IDF) have begun to move their prefabs and other support facilities. Israel's withdrawal will prove that everyone already knows: The Lebanese government cannot reassert steady control at this time. The Druze, the Syrian-backed Shiites and the Syrian government have been working to exploit that weakness.

The United States and Israel have a mutual interest in a sovereign Lebanon. If Israel, with its intense interest in the area, has seen fit to pull back its troops from Beirut to a more defensible position, then what business does the United States have there? If it is a no-win situation for the Israelis, then it is a no-win situation for us. With troops much more numerous than the multinational force, Israel has still sustained high casualties. It is ominous for a peacekeeping force with fewer troops and less commitment.

I can understand why Prime Minister Menachem Begin may have chosen to bow out at this time. In a meeting in Jerusalem barely two weeks ago, he appeared frail but still capable, and not noticeably depressed. He considers Lebanon to be Israel's main problem. First perceived as having liberated Lebanon from the PLO, Israel no longer has the public will to stay there. The truth is that Israel is pulling out faster than the Israel-Lebanon withdrawal agreement called for.

The IDF succeeded in removing the long-range weapons that had threatened Israel's northern population. But after putting a stop to that threat, Israel has in a way become another hostage of Lebanon. It does not want to stay in but does not have security guarantees in place that would allow a full withdrawal. Begin insists he does not want to partition the country, only to implement the withdrawal agreement achieved with the help of the United States. But that agreement cannot be implemented without Syrian cooperation. Israel's leaders no longer believe that it will be implemented.

Begin wanted us to know that Israel has paid a price in Lebanon, incurring casualties in order to contain the fighting between the Christians and Druze. In what might be regarded as his last message as prime minister to members of Congress, he stated that Israel is a faithful ally of the United States and he regards the United States as a faithful ally of Israel. That means reciprocity is essential between our two countries. That is why the intelligence gathered from Israel's capture of Soviet weaponry used in Lebanon has been shared with the United States.

In Damascus, Syrian Foreign Minister Abdul Halim Khaddam repeated what he has undoubtedly told other American officials. Khaddam says there is no Israel-Lebabon withdrawal agreement, just one between Israel and the Phalangist Party, unrepresentative of Lebanon's unique communities. He reiterated his government's position that if Israel withdraws unconditionally from all of Lebanon within eight weeks, Syria will withdraw its forces immediately. Syria, acting as if it holds all the cards, may underestimate Israel's seeming lack of resolve to see the Lebanon debacle through.

Missions that seem impossible today may be achieved and replaced tomorrow by new impossible missions. The Middle East has proved time and again that predictions can be empty, expectations can be dashed and impossible dreams can be fulfilled. The only thing that seems certain, however, is that the situation as it stands today will not remain so for long.●

TRYING TO KEEP THE POOR POWERLESS

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mrs. LLOYD. Mr. Speaker, "justice for all" is one of the fundamental principles upon which our great Nation was founded, but now it appears that justice may only be for those who can afford it. Over the past several years, the Reagan administration has made every effort to gut the Legal Services Corporation with budget cuts and eligibility restrictions, and on September 28 yet another restriction is scheduled to take effect. It prohibits any person who has more than $15,000 equity in their home from obtaining legal assistance. We all know the prices of new homes, and how the prices of older homes have

skyrocketed, and this regulation will bar many homeowners who cannot afford legal advice, like senior citizens and the unemployed, from obtaining legal assistance. It is clear that this regulation is designed to prohibit all but those who live in object poverty from obtaining legal assistance, and it is just one more step in the administration's efforts to eliminate the LSC altogether. This unfair effort is not going unnoticed, and I believe the following editorial from the Chattanooga Times eloquently describes the feeling of million of Americans on this important matter.

One of the ideals in which Americans take justifiable pride is our attempt to ensure justice for all in the nation's legal system. The system isn't perfect, of course, but it has worked reasonably well. In recent years there have been efforts to provide increased access to the courts, especially for the poor. The Legal Services Corporation, for example, is a federal agency that helps provide lawyers to those who cannot afford to hire their own.

But the LSC is unpopular with the Reagan administration, which has failed in three attempts to abolish or at least emasculate, the agency. It has survived despite a 25 percent budget reduction, and the appointment of overseers who share Mr. Reagan's distrust for its role. But now a new threat is looming, one that, if successful, would disqualify millions of poor and elderly persons for any sort of legal assistance by the LSC.

The proposed regulations would, among other things, disqualify for legal assistance any person who has at least $15,000 equity in a residence. Many elderly persons have homes, bought years ago, that are worth that much, but today they are having to make do on limited incomes. Would the administration force them to sell their homes to hire a lawyer? The regulations would also deny legal assistance to anyone whose welfare payments, disability, or any type of government aid raised their income above a minimum figure.

The administration has tried to rationalize the new rules by arguing that the LSC's limited budget must be divided among those with the greatest need. But the argument fails to persuade, simply because the proposed regulations would transform the ideal of justice for all, making it justice for some.

Obviously those living in the most abject poverty would remain eligible for legal assistance. But consider the elderly and those with slightly higher incomes, all of whom are trying to make ends meet with limited means. These are the ones who will be denied justice because they won't be able to afford it.

The Reagan administration is obviously uncomfortable with the idea of the poor presuming to exercise their rights through the courts, hence its efforts to gut the Legal Services Corporation with budget cuts and restrictive eligibility criteria.

Barring an outpouring of protests, the new rules will take effect on Sept. 28. The American Bar Association has often reiterated its view that equal justice should be available to all, regardless of their economic circumstances. Its members, along with other Americans, should encourage Congress to prevent the administration from promulgating rules which in effect would put a price tag on the principle of equal justice.●

SOVIET'S INCOMPREHENSIBLE ACT

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MINISH. Mr. Speaker, it goes without saying that all of us in Congress, and indeed throughout the country, are shocked, angry, and deeply saddened by the tragic downing of Korean Air Lines flight 007. I for one, believe that in the wake of this incident, the United States should press for appropriate economic sanctions and strong international condemnation of the Soviet's incomprehensible act.

At this time, I would like to insert a fine editorial from the Newark Star-Ledger which I feel clearly paints a true picture of the Soviet regime and many of their policies.

The article follows:

[From the Newark (N.J.) Star-Ledger, Sept. 3, 1983]

BARBAROUS ACT

A string of angry words flashes across one's mind, the cerebral and emotional reaction to the shooting down of an unarmed South Korean civilian airliner by Soviet military aircraft: Barbarous, wanton, atrocity, horrifying, despicable, inhumane. These are graphically descriptive of a tragic affair in which 269 innocent, apolitical persons, including 51 Americans, were killed.

But the sense of moral outrage is somewhat leavened by trying, futilely, to fathom the dark motivation for such a devastating disregard for human life. In this context, the words that come to a rational mind are: Incomprehensible and implausible.

This, it must be made chillingly clear, was not a quick-trigger, spontaneous incident. Although the Kremlin belatedly explained that its involvement in the downing of the commercial airliner was "an accident," it has been established that Soviet jets had maintained a close visual surveillance of the plane for two and half hours after it penetrated Russian airspace. There was more than enough time for the local Soviet air command to confer with higher authorities before firing the fateful missile. In that chain-of-command framework, one can only conclude that a deliberate decision was made by the Soviet hierarchy to open fire.

It is difficult to perceive, again from a rational perspective, what the Kremlin conceivably thought it would gain from a horrendous act of violence that was certain to evoke a universal condemnation. Particularly at a time when Soviet authorities are trying to put their best nuclear face forward in the strategic arms talks with the United States, its nuclear superpower counterpart.

And at a time, too, when the Soviets are trying to forestall the deployment of middle-range missiles in Western Europe. How does one deal in a civilized manner with the insidious pathology of a brutal Soviet leadership, and the warped character that was responsible for the horrifying mass killing of innocent civilians? There are really few choices for the United States and the international community. But it should be fully clear, nevertheless, that Russia must live with the consequence of its wanton act.

There should be no lingering doubts that the Soviet Union, not the United States, is the greater threat to world peace. That should be the compelling message taken from pitiful, shattered remnants of the Korean plane in frigid seas north of Japan.

Strong, condemnatory representations must be made by Secretary of State George Shultz when he meets with Soviet Foreign Minister Andrei Gromyko in Madrid next week for the scheduled signing of the final document at the Review Conference on Security and Cooperation in Europe. And there should be, too, some serious rethinking by President Reagan on a summit meeting next year that the Kremlin has been pushing in recent weeks.

Another option available to the United States would be to press its allies to bar the Soviet airline from their airspaces, in retaliation for the lamentable incident. While the loss of human life is mortally irrevocable, Moscow must be held fiscally accountable for the grief-stricken kin of the victims, the bitter, ironical bottom line for the atrocity it committed.

LIES WILL FAIL

It looks very much as if this is one act of violence that the Soviets will not be able to talk their way out of. When Secretary of State George Shultz made his dramatic accusation of barbarism, he made it clear that he had the facts to back them up—and had them on tape in the form of actual recordings of the Soviet command to shoot down the defenseless plane.

American intelligence had done its job. It now seems, as the Security Council of the United Nations launches an investigation into this matter that has shocked the entire world, that the U.S. will win its case overwhelmingly in the only court this act of murder will ever be tried in—the court of world opinion.

The Soviets may bluster. Indeed, they have already begun a campaign of deceit designed at convincing the world that the loss of a plane was an "accident." But it looks as if this time we have the goods on them.

The sad fact is that the UN has the power to condemn, and little else. Even an action of this limited nature can be vetoed by the Soviets in the Security Council. But the impact of their unspeakable act goes far beyond mere word.

What response the United States will be able to take is still being determined and will no doubt be selected with great care. While numerous options have been suggested, there is no single response that can clearly be labeled the obviously right one.

Perhaps the most lasting result of this tragedy will be to end once and for all the Soviet claim to be a peace-loving nation. Those with short memories may have forgotten the crushing of the rebellions in Hungary and Czechoslovakia, the erection of the Berlin Wall, the sham trials, the purges and the executions. This will help remind them.●

BISHOP SMALLWOOD WILLIAMS HONORED AS CITIZEN OF THE WORLD

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. FAUNTROY. Mr. Speaker, on Saturday, September 10, 1983, the Shaw Community Center Food Committee held its third annual prayer breakfast. The honored guest at the breakfast was Bishop Smallwood E. Williams, founder and pastor of the Bible Way Church Worldwide.

Bishop Williams has provided long and dedicated service to the Washington metropolitan community. He has served as general secretary of the Church of Our Lord Jesus Christ of the Apostolic Faith; founded a school and mission in Liberia; served as president of the Washington, D.C., branch of the Southern Christian Leadership Conference; and served as a member of the President's Committee on Religious Resources in Mental Retardation.

In the area of community service, Bishop Williams was one of the principal leaders who fought for home rule for the District of Columbia. In 1964, he served as a member of the Washington Home Rule Committee Board of Directors. In 1967, he was cochairman of the Citizen's Committee To Support the President's Reorganization Plan for the District of Columbia Government.

Bishop Williams is the developer and president of the Golden Rule Apartments, Inc., a building containing 184 units. The Golden Rule Center contains 40 townhouses with up to 3 bedrooms, and includes a supermarket. These accommodations serve low- and medium-income people.

Bishop Williams' counsel is often sought by city elected and administrative officials, as well as prominent persons in business.

Bishop Williams has traveled extensively around the world. He has visited Israel as a state guest. He has frequently visited Europe, Africa, the Far East, and the Caribbean.

Bishop Smallwood E. Williams has received more trophies, plaques, keys to cities, awards, and days proclaimed in his honor than can possibly be acknowledged. Mr. Speaker, Bishop Williams is truly a citizen of the world.●

PAUL DORAN REVIEWS DEVELOPMENT OF PROPOSED ETSI PIPELINE

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. DASCHLE. Mr. Speaker, I request a letter which I have received from Mr. Paul Doran, President, ETSI Pipeline Project, be printed in the RECORD in its entirety as it relates to H.R. 3849, the Coal Pipeline Act of 1983, which may be considered soon by the House. Earlier this year, the Agriculture Subcommittee on Conservation, Credit, and Rural Development, conducted a hearing on H.R. 1749. Among the witnesses appearing before the subcommittee were four South Dakotans who testified on matters relating to the proposed ETSI pipeline. The letter which I have received from Mr. Doran reviews these same matters. Although I am not personally familiar with the negotiations and other related activities which have occurred in South Dakota in conjunction with the development of the proposed ETSI pipeline, the letter which I received from Mr. Doran should be made available to the other Members of the House so they may form their own opinions and judgments on these matters.

ETSI PIPELINE PROJECT,
A JOINT VENTURE,
Houston, Tex., July 20, 1983.

Hon. THOMAS DASCHLE,
House of Representatives, Washington, D.C.

DEAR MR. DASCHLE: On June 15, 1983, the House Agriculture Subcommittee on Conservation, Credit and Rural Development held a hearing on H.R. 1749. The purpose of this proposed legislation is to require that the Secretary of Agriculture—in consultation with the Secretary of Interior—study the effects of interbasin transfers on agriculture and to prohibit any state from selling or otherwise transferring interstate waters for use outside its borders unless all states in a given drainage basin consent to such sales or transfers. As you know, H.R. 1749 was introduced by Rep. Bedell of Iowa who chaired the hearing at which I testified on behalf of the Slurry Transport Association and the ETSI Pipeline Project in opposition to the proposed legislation. Following my testimony, the Subcommittee heard from four ranchers who are residents of South Dakota. They were: Mr. Pat Trask, Mr. Steve Johnson, Mr. Henry Bruch and Mr. Art Crowley. It is evident from reviewing their testimony that this group of witnesses did not come before the Subcommittee to offer constructive information on the substance of H.R. 1749. Rather, they used the hearing as a forum to attack the ETSI Project. In so doing, these individual's presented erroneous information for the record regarding ETSI's efforts to acquire a right-of-way for its water pipeline across the Western South Dakota. These distorted claims and charges require a response.

By way of background, I would begin by pointing out that when the right-of-way acquisition program for the West River Aquaduct (WRA) commenced in South Dakota in January, 1982, all field personnel were explicitly instructed that ETSI did not contemplate using the eminent domain process in acquiring right-of-way. Further, our people were told that in no way was condemnation to be used as a threat and all acquisitions were to be achieved through "good faith" negotiations. We were successful in acquiring rights-of-way across 142 of the 151 private ownerships in South Dakota, or approximately 95%. The Trask ranch is one of the nine properties not yet acquired as is the C&NW Railroad at St. Onge. For the record, the other parties that appeared before this committee do not have an interest in any properties we propose to cross.

In retrospect, I think we perhaps deluded ourselves in January 1982, to think we could acquire all of the right-of-way without resorting to eminent domain. Insofar as the WRA will provide substantial benefits to South Dakota and particularly to Western South Dakota, we took the position that all of the right-of-way could be acquired through arms length negotiations. We made changes and concessions in the acquisition program underscoring our efforts to deal in good faith despite what you were told by the Western South Dakota ranchers at your hearing on June 15. The condemnation files on the unacquired properties will support our position. After all, 95 percent of the properties have been acquired in South Dakota, so we must have done something right. I also ask that you consider the fact that only one of the landowners to be crossed by ETSI has appeared before you, that being Mr. Pat Trask.

Regarding Mr. Trask's testimony as to the negotiations with the family, ETSI has always negotiated in "good faith". In fact, there have been upward of a dozen conversations with Mr. Trask or a Trask family member (Attachment A). Initially, Mr. Mark Trask proposed a relocation of approximately 40 miles of pipeline to the north of our proposed alignment, which would now require that ETSI forfeit about 33 easements and be forced to acquire 30-40 new easements with different landowners. In addition, this route change could affect the hydraulics of the line, thereby necessitating a change in design and pump station locations which have already been acquired.

Mr. Mark Trask, prior to his death, did consider a route change to the south of our proposed alignment that was not nearly as drastic as his original proposal. However, following his death, the Trask family rejected all routes South of the original 40 mile relocation request. Whatever progress had been made in previous negotiations was negated, and the entire negotiation process was back to square one.

In Mr. Pat Trask's testimony, he states that there are no roads providing access to the property, when in fact there is a county road, deeded to Meade County, which provides access to the right-of-way. Access across the balance of the Trask property will be restricted to the right-of-way itself. Mr. Trask also states that the landowner will ultimately be responsible for recouping any reclamation losses. Contrary to this, ETSI's intent and the intent of the right-of-way document is to make sure that the landowner is "left whole". In other words, our projects should not cause any economic loss to the landowner. To that end, ETSI has requested that the Trask's have language drafted by their attorney for our review and approval that would insure satisfactory reclamation.

It is not surprising that Mr. Trask appeared before the subcommittee to present his position, and did so in order to garner as much publicity as possible. The day before his appearance, several members of the ETSI staff met with the Trask family at their attorney's Rapid City office in an effort to resolve the question of the pipeline location. At the conclusion of this meeting, both Pat Trask and his mother were insistent that all should meet at the ranch to view some of the proposed route. The ETSI people agreed to meet with the Trasks and their legal counsel on the property, not knowing what had been planned. After arriving at a site accessible only by pickup trucks, there suddenly appeared a television crew from Rapid City, some 40 miles away. Mr. Trask now had his forum for negotiations which, on advice of our counsel, were immediately concluded by ETSI. The Trask legal counsel, totally unaware of his client's plans and resulting actions, apologized profusely. It appers to us that the Trasks do not want to enter into good faith negotiations to resolve the issues; however, ETSI stands ready to resume negotiations whenever the negotiations can be conducted in a businesslike manner.

Pat Trask is right on several points. ETSI, due to an internal reorganization and out of respect for the family, did not pursue negotiations during the duration of his father's illness. Also, Mr. Trask erroneously attributes our support of H.B. 1353 in the 1983 South Dakota legislature as an attempt to acquire eminent domain. That bill simply would have provided "quick take" to the eminent domain law as it applies to ETSI. On April 11, 1983, ETSI filed a condemnation proceeding to cross the Trask property (Attachment B).

Regarding Mr. Johnson's comments, I would submit the following points for the record. First, concerning the Madison Formation, ETSI can only use this formation as a source of water if Missouri River water is not legally or physically available to ETSI. In that respect, Mr. Crowley, Mr. Bruch and Mr. Johnson have been very active in making sure that Missouri River water is not physically or legally available. They have either collectively or individually: (1) appealed the water permit issued by the State of South Dakota Water Management Board, (2) filed a Declaratory Judgment suit attempting to get the ETSI/South Dakota water sale contract declared void, (3) they each sat on the Board of Directors for the "Save Our Soils" (SOS) group representing landowners interests during the ETSI/SOS negotiations, and (4) they requested and received from the Lawrence County Commissioners a resolution that would have denied ETSI the right to cross Lawrence County lands unless all affected private landowners had entered into an agreement through arms length negotiations. This resolution has since been rescinded by the commissioners due to the efforts of concerned citizens of Lawrence County in support of the project.

Second, regarding the contracts submitted for the record by Mr. Johnson, the first contract, dated February 3, 1982, and signed by Mr. Derosier, calling for a consideration of $325.00/acre is no longer a needed easement due to a minor pipeline realignment and will be released of record. However, Mr. Derosier, et al, have since signed two additional easements (Attachment C), one for full consideration and the other for $600/acre. We believe this very clearly evidences Mr. Derosier's complete satisfaction with both the terms of the documents and the consideration to be paid. The second document, (Attachment D), submitted by Mr. Johnson, dated March 12, 1982 and signed by Mr. Stabio, is for lands that front both the East and West of U.S. Highway 85 and is located approximately one mile North of the I-90 Spearfish/Belle Fourche Interchange. These lands have a positive development potential. Mr. Stabio preferred to convey a 50' permanent easement, with a 50' temporary construction space, due the fact that the impact on the lands would be minimized when and if he developed the same. In essence, the granting of a 50' permanent and 50' temporary easement provided ETSI with the needed 100' easement to accommodate construction and emergency situations, thereby effectively reducing the price per acre within the 100' to $2500/acre which we consider to be reasonable and acceptable due to the development potential.

Mr. Johnson attempted to suggest that there was something sinister concerning the payment of rental for Bureau of Land Management land as opposed to a single payment to private landowners. This simply is caused by the inability by law for the BLM to convey easements or interest, whereas private landowners are not so restricted. A lump sum settlement versus periodic rentals are equated when the amounts are determined. A private owner can put his payment in the bank and draw it out as an annuity if he wishes, which equates to the BLM periodic payment scheme.

Another item raised was the assignment of the BLM right-of-way grant. Normally, before an interest in this land can be assigned, the right to originally convey that interest must exist. Since the BLM cannot convey an interest in the land, ETSI does not receive an interest in the land and therefore cannot assign something they have not acquired. Generally speaking, the permit to cross BLM lands can be transferred as a routine matter. As for the BLM having no liability, I would submit that this is a rather broad brush statement and rather misleading. Our legal counsel advises that there are many instances in which the BLM could be held liable for tortious acts committed by them or their agents.

Mr. Johnson also states that the BLM is reimbursed for all costs incurred by them in preparation of the right-of-way permit. ETSI offered to reimburse the SOS landowners individually for reasonable attorney fees upon the execution of an agreement satisfactory to both parties, as has been our policy with other landowners. Perhaps Mr. Johnson's testimony should be viewed as being supportive of federal eminent domain legislation for coal slurry pipelines in that he expressed a concern about discrepancies occurring. Without the right of eminent domain these discrepancies can and do occur; however, eminent domain would allow the entity acquiring right-of-way the opportunity to maintain a consistent pricing structure.

Mr. Bruch's testimony is basically without substance and is primarily used as a means of attacking the ETSI Pipeline Project. However, he does make one comment to which we will respond.

He states that, ". . . it is far easier to gain wealth by manipulating government to obtain special privileges . . ." Perhaps Mr. Bruch was attempting to acquire that very position with his appearance before the subcommittee. It would certainly enhance a landowner's negotiating posture if eminent domain was not available, and in fact, is just the opposite of the true intent of eminent domain which is that the welfare of the general public carries a greater weight than that of any one individual.

As further evidence of our willingness to negotiate in "good faith", we, ETSI, in our efforts to acquire the needed right-of-way in South Dakota, have worked with a number of landowner groups and have satisfactorily addressed their concerns except for one group—that being the "Save Our Soils" group. Initially, the SOS organization was formed to protect the landowners rights and was recognized as such. However, shortly after formation, the actual control and direction was usurped by persons with the sole intent of defeating the ETSI project, not the protection of the landowner membership. This direction was now in the hands of Messrs. Johnson, Bruch and Crowley. It was at this time that the group replaced their attorney who was diligently trying to resolve the issues. The group then retained a "cause" lawyer who, over the period of several months, was instrumental in blocking every attempt by ETSI to conclude negotiated agreements. To show how ridiculous the situation was, the group asked that ETSI pay this attorney for her services as an adversary. No one agreed that ETSI would pay her fees, to do so would be questionable ethically and would be downright foolish from a business standpoint. However, in keeping with our policy that no landowner should suffer an economic loss due to our request for an easement, we did agree to reimburse the individual landowners for reasonable attorney fees incurred upon the execution of a right-of-way agreement. It was after this offer that we were informed by the new attorney that we should pursue eminent domain proceedings.

Perhaps the appearance of these South Dakota landowners is in itself a testimony for the need of federal eminent domain authority for coal pipelines. It is, in our opinion, representative of the fact that a very vocal and persistent minority can and will, if given the opportunity, delay or prevent coal pipelines and other energy related projects—projects that are vital to the Nation's efforts to develop its resources and thus decrease our dependency on foreign energy sources.

I hope this letter will be helpful to you in understanding the charges made against ETSI at the subcommittee hearing. Should you have additional questions, please do not hesitate to call.

Sincerely,

PAUL G. DORAN,
President.●

TRIBUTE TO AN EAGLE SCOUT

HON. JOHN R. McKERNAN, JR.

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. McKERNAN. Mr. Speaker, I rise and ask my colleagues to join me in praising the achievements of one of my constituents, David Caron, 16, of Portland, Maine. David will become an Eagle Scout on September 27.

I do not need to remind my colleagues of the tremendous effort and test of character involved in attaining the rank of Eagle Scout. So many fig-

ures of national renown have this prestigious award among their laurels that we may well conclude that the young men who earn this title today have unusual promise for tomorrow.

It is a privilege to be able to represent David Caron, who is the first Scout in troop 5 of St. Patrick's Church in Portland to attain the level of Eagle Scout. David is a junior at Deering School, where he is both a good student and athlete. In his spare time, David has a part-time job and attends a data processing course at a local vocational school. He is interested in a career in computer science.

David single-handedly undertook a fund drive for the cancer fund as part of his Eagle Scout requirements. He set up a "tag day" at several local stores, and, working with other Scouts and their parents, was able to provide a significant contribution to the fight against cancer. The bearer of 21 separate merit badges, and an attentive student of the Boy Scout creed, David Caron is truly worthy of the Scout's highest award.

I join David's parents, teachers, friends, and Scouts everywhere, in congratulating him on his achievement, and in wishing him many future successes.●

PAYROLL DEDUCTION FACILITATION ACT

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Ms. OAKAR. Mr. Speaker, I am introducing legislation today which will benefit Federal employees, save the taxpayers money, and allow the Government to utilize modern banking practices.

This bill, the "Payroll Deduction Facilitation Act," accomplishes two basic purposes. It provides for no-cost payroll deductions for Federal employees, and it amends the Right to Financial Privacy Act of 1978 (12 U.S.C. 3413) to assist the Government in making recurring payments through the use of direct-deposit electronic fund transfers (EFT's).

Over the years, payroll deductions have proven to be an effective and efficient means of encouraging savings for all Americans. We know that savings are a sure method by which every citizen can contribute to improvement in our economy, help stall inflation, and play a positive role in bringing down interest rates. Congress, therefore, should do all it possibly can to encourage thrift and savings, and this is one of the purposes of the bill I am offering today.

Under the current law, service charges for processing payroll deduction checks are imposed only on savings allotments made under 31 U.S.C. 3332. This statute requires that Federal agencies be reimbursed for the additional administrative costs incurred in processing savings allotments for Federal civilian employees by their recipient financial institutions. The Federal Government will absorb the administrative cost of sending one check to an employee's designated financial organization. However, the appropriate Federal agency must be reimbursed by the designated financial organization for any administrative costs incurred in processing additional savings allotment checks, which are statutorily limited to two. Current law also provides that only active and retired military personnel and Department of Defense civilians working overseas are authorized to make more than one allotment to financial institutions at no cost to them or to their recipient institutions.

The bill I am introducing would delete the requirement that administrative costs be reimbursed by the financial organization. It would require the Federal Government to absorb all administrative costs incurred in the savings allotment program. In my opinion, the benefits to our economy provided by this legislation far outweigh any additional minimal costs to the Government. Moreover, as with military and overseas DOD personnel, it is already common practice in the private sector to provide such services for employees at no cost to the employees or to their financial institutions.

By way of background, payroll allotments for civilian employees of the Federal Government were established in 1961 (5 U.S.C. 5525). These cost-free allotments were limited to labor dues, charitable contributions, and taxes. The program was expanded in 1965 to permit Federal employees to send allotments to financial institutions, but there was no requirement that the Government impose fees for these services. It was not until 1968 that charges for sending allotments to financial institutions were set by the Department of the Treasury. Under 31 U.S.C. 3332(c), as amended by Public Law 90-365, the Treasury Department was given the authority to establish fees for the two additional allotments sent to financial institutions. An allotment for an employee's regular paycheck has been and continues to be sent at no cost to the employee or the financial institution, since it is considered to be an entitlement to the employee. Incidentally, charges were imposed on the two extra allotments because it was feared that additional allotments might constitute an excessive expense for the Government. However, during the 96th Congress, the Office of Personnel Management concluded otherwise and proposed a rule which would substantially liberalize the use of payroll allotment programs.

During the last Congress, the Department of the Treasury published a Notice of Proposed Rulemaking to increase the service charge for payroll allotments of Federal civilian employees. In response, I introduced H.R. 4703 (97th Congress) to negate the Treasury Department's proposed regulation and to require the Government to provide payroll deductions free-of-charge to all its employees. My Subcommittee on Compensation and Employee Benefits held a hearing on February 4, 1982, and the bill passed the House on April 27, 1982. Following this House action and while the bill was still pending in the Senate, the Department of the Treasury, on June 7, 1982, postponed indefinitely the scheduled fee increase.

Since the beginning of this Congress, my subcommittee staff has been working with staff from the Banking Committee and the Department of the Treasury. The bill I am introducing today is the result of that effort, and I am pleased to report that this bill has the support of the Department of the Treasury, the major credit union associations, and other financial organizations interested in thrift and savings for all Americans.

While this bill benefits the Federal employee, it also provides significant benefits for the American taxpayer and the Government as well. It is a major step forward in assisting the Treasury Department reach its goal over the next decade of having virtually all Federal recurring payments made by direct-deposit electronic fund transfer (EFT). More importantly, by converting the estimated 75 million Federal civilian savings allotments per year to direct-deposit EFT, the Department of the Treasury projects an annual $4.4 million savings to the Government.

The Payroll Deduction Facilitation Act provides a important benefit to the Federal employee, and it saves the Government money. I ask my colleagues to support it.●

BOYS' CLUBS HONOR BOB HOPE

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MOORHEAD. Mr. Speaker, on September 28, 1983, at the Century Plaza Hotel, the Boys' Clubs of Long Beach, Pasadena, Rio Hondo, and Santa Monica will present their Greater Los Angeles Citizen of the Year Award to Bob Hope.

What can be said about Bob Hope that has not been said many times before. He is, undoubtedly, the most honored man living in our Nation

today. He is esteemed by millions for his humor, commonsense, and credibility. He is praised often and appropriately for his countless gifts of time and love and joy to countless persons. He is admired universally for his aplomb, his skill, his energy, and his success.

On thousands of occasions, his facile wit and nimble jests have made us laugh at ourselves and our "dire straits." Repeatedly, his humor and his presence have eased our pain and lessened our anxiety. Time after time, in virtually every part of the world, he has been the consummate giver of fun and smiles. For all these virtues, we greatly admire and respect Bob Hope.

But I suspect that beyond and above these wonderful traits, we Americans like Bob Hope most because we simply see him as a very good man.

Who can imagine, for example, Bob Hope screaming about some small slight. Who can imagine him as the outraged demagog or who can imagine him flaying America because it failed to reach perfection and who can imagine a sullen, humorless, divisive Bob Hope.

I certainly cannot. I see a man whose livelihood has been to create warmth and brotherhood, to generate unity and strength. His way has been to lift spirits, to put mirth in the soul and sparkle in the eye. Bob Hope is the kind of man who would put a yellow ribbon down the middle of a muddy road.

I would like to thank Bob Hope and the boys' clubs for their unceasing gifts. They both deal in yellow ribbons. Both are devoted to improving the lives of people, young and old. There is no higher calling.

Mr. Speaker, I would like to take this moment to bring to the attention of my colleagues in the House of Representatives the presentation to Bob Hope of the Greater Los Angeles Citizen of the Year Award by the Boys' Clubs of Long Beach, Pasadena, Rio Hondo, and Santa Monica.●

LIEUTENANT GIBBONS TOP ARMY ROTC GRADUATE

HON. BILL NICHOLS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● **Mr. NICHOLS. Mr. Speaker, today it was my privilege to participate in a distinguished presentation in Secretary John Marsh's office in the Pentagon, honoring the top Army ROTC graduate in the United States, Lt. Edward G. Gibbons, Jr. Lieutenant Gibbons is a 1982 graduate of Auburn University in my congressional district, which by every standard of measure, is one of America's finest academic institutions.**

Lieutenant Gibbons' academic, military, and leadership achievements at Auburn were singularly outstanding. A history and political science major, he was graduated with high honor, having been selected to the dean's list for academic excellence his last eight quarters. He was elected to numerous honor societies including Phi Kappa Phi, the foremost national scholastic honor society at Auburn and Mortar Board, the national senior scholarship, leadership, and service society. He also received a fully funded Army fellowship for graduate study.

In military leadership and training, Lieutenant Gibbons' achievements are unprecedented at Auburn University and the State of Alabama. Among his many firsts, he was the top ROTC graduate of all cadets from throughout the United States at the 1981 U.S. Army Ranger School; was the honor graduate of the U.S. Army Air Assault School; received the George C. Marshall award as the top cadet at Auburn University; and received the 1982 Governor's Award as the foremost cadet in the State of Alabama.

Lieutenant Gibbons held the position of cadet battalion commander, the highest ROTC leadership position at the university. His leadership and esteem among his classmates of all services also gained him the presidency of all three military honor societies at Auburn.

Lieutenant Gibbons, who attended Auburn on a 4-year Army ROTC scholarship, is a 1978 graduate of Signey Lanier High School in Montgomery, Ala. He is the son of Mr. Edward G. Gibbons of Montgomery and Birmingham, and Mrs. Beverly B. Gibbons of Boston, Mass.

Lieutenant Gibbons recently completed the infantry officer basic course at Fort Benning, Ga., where he was selected to the commandant's list for outstanding achievement. He is currently assigned as a mortar platoon leader in Company C, 2d Battalion, 325th Infantry (Airborne), 82d Airborne Division, Fort Bragg, N.C.●

THE CONTINUING REALITY OF UNEMPLOYMENT

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MOODY. Mr. Speaker, today the Subcommittee on Public Assistance and Unemployment Compensation held hearings on what is presently our country's most serious problem—unemployment. The Northeast-Midwest Coalition's Unemployment Task Force tesitified to the special crisis in our section of the country and urged the adoption of an extension of the Federal Supplemental Compensation program. I would like to reiterate that plea.

It is frightening to realize that there are over 10.5 million people out of work, a large percentage of whom are no longer eligible to receive unemployment benefits. Yet, according to a study published last week by the Brookings Institution, despite record unemployment, proportionately fewer Americans received unemployment in the thick of the recession than in any recession since World War II. Even more appalling is the finding that in contrast to calendar year 1975 when more than 78 percent of the unemployed were covered by regular, extended, or supplemental unemployment insurance, in calendar year 1982 only 45 percent were covered. Furthermore Federal, State, and local governments paid out fewer dollar benefits for unemployment in 1982 when 10 million people were jobless than in 1976, when 7.6 million workers were out of work.

Certainly, these are sobering figures. Yet I, as did most of my colleagues, found these facts to be dramatically illustrated during the recent district work period. Cold statistics mean little to a family with an employed bread earner for years. But now have that bread earner been laid off, with little hope of being rehired.

Yet hope, faith and pride persist in the face of this economic nightmare. I would like to share with you excerpts from a letter I recently received from one of my constituents which reveals the heartache that accompanies these statistics:

DEAR CONGRESSMAN: The problem I'm writing about concerns millions of people, it sure has with our family. I'm certified disabled, now my heart has gone bad—no surgery because of the other ailments. Medicine is very expensive, I feel like not taking it, although I'm not afraid of death our four children, their spouses and six grandchildren would miss my "cooking" and "love."

My husband was laid off in October, 1982, after 42 years there, except for WW II, from Milwaukee Gear. One of our son-in-laws, same time, same place. His wife worked for Mobil Oil, they left Milwaukee. Another family lost their business, but didn't go bankrupt—two children. Another son (single), age 39, has had 3½ years of surgeries, they cut his disability off, but later reinstated it. Our homes are open to him, but he perfers his cheap apartment on Milwaukee Street. By God, we help each other.

Now they're cutting off compensation. The men are not lazy, nor our girls, they do any work they can find. I help, as far as my condition permits. Where is the surplus food? We got cheese. The phone increase?

Please restore my confidence in America, Jim. We have a son in Washington who has sent us money and gifts. At first we were ashamed to accept, but his wife said, Mom, we share!

Respectfully,

VIVIAN.

Mr. Speaker, if we do not get unemployment under control soon, it will

destroy for many the individual dignity which comprises the fabric of our country. In the meantime, we must concentrate on the long-term unemployed who most need help.●

TRIBUTE TO SCTAC ON 10TH ANNIVERSARY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. ANDERSON. Mr. Speaker, this year marks the 10-year anniversary of the Southern California Transportation Action Committee (SCTAC). So many of us who are interested in southern California are familiar with their work and their efforts as an educational organization dedicated to improving mobility in our area. Having had the opportunity to speak to the SCTAC, I am impressed by their current activities and ongoing goals which are designed to build public awareness of and support for the important transportation needs of this region.

The SCTAC recognizes that there can be no single solution to solving our complex transportation problems, and so they have spoken and acted on behalf of a comprehensive approach designed to address the matter on many fronts. As such, the SCTAC has a wide variety of transportation interests some of which include accelerated completion of priority highway projects, building public support for "bus-on-freeway" transit, supporting adequate transportation funding, strengthening the county transportation commission's role in transportation decisionmaking, improving regional airports' operations, and enhancing our harbor access.

A central strength of SCTAC is that they have been able to utilize the abilities and channel the energies of outstanding individuals throughout the region. Founded in 1973, the SCTAC is a nonprofit, educational organization whose broad-based alliances include members and associates of air, water, rail and highway operators and users, builders, developers, suppliers, and transport users. They also work closely with the chambers of commerce, organized labor groups, project advocates, environmental and civic groups, local government agencies, and many private individuals.

It is through such coalition building that the SCTAC has played an important role in assisting with the passage of important transportation legislation at both the Federal and State levels. Few groups are able to interact with such diverse elements as has the SCTAC. This, I think, is testimony not just to the goals and objectives of the organization, but to the manner in which they work toward those goals.

So, I know I join with many others when I offer my congratulations to the Southern California Transportation Action Committee on the occasion of their 10th anniversary, commend them for the work they have done to date, wish them the best for the future, and tender a standing offer to assist them in their efforts to improve the transportation network in southern California and, indirectly, throughout the Nation.●

MOSCOW FEARS OUR VOICE

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. KEMP. Mr. Speaker, America's international broadcasts are essential for getting unbiased information on world affairs, like the Korean Airline massacre, to people living in the Soviet Union and other tyrannies. As President Reagan said in his national radio address on Saturday:

Accurate news like this is about as welcome as the plague among the Soviet elite. Censorship is as natural and necessary to the survival of their dictatorship as free speech is to our democracy.

I commend to my colleagues this excellent editorial from the New York Post on our Voice of America and Radio Liberty broadcasts. With recent events pointing out once again the important nature of these national security programs, I urge my colleagues to support the long overdue funding increases for these broadcasts.

The editorial follows:

MOSCOW FEARS OUR VOICE—LET'S MAKE IT STRONGER

Secretary of State George Shultz says the Soviet Union's paranoid form of government is a system which fears foreign radio broadcasts even more than it fears missiles.

There is no need to tell that to the Voice of America.

If ever there were proof that President Reagan should ask Congress to give the VOA the tools with which to do its job it was provided by the Korean airliner tragedy.

The Soviets intensified their jamming to block every attempt by the VOA to broadcast Washington's meticulously detailed version of the shooting down of the airliner—including the shocking tapes of the Soviet pilots actually firing their missiles.

By straining every available resource the VOA managed to pierce the Soviet jamming. It brought in equipment that was in need of maintenance. It boosted the power of foreign transmitters beyond their normal levels. It will be able to keep up its present stepped-up rate of 17 hours of broadcasts a day to the Soviet Union, however, for only another week.

The VOA was helped in getting its broadcasts through by prevailing conditions. Jamming is difficult during twilight periods in the summer months of northern Europe.

There are places in Moscow and other East European cities where people go specifically during those periods to hear the few VOA and other Western broadcasts which get through.

We pointed out here last week that the Soviet action in shooting down the Korean airliner had already proved to be a huge defeat for Moscow's prolonged campaign to present the Soviet government as "peace-loving" and the United States as a "threat to peace."

The defeat would have been more substantial and more lasting if the VOA were not handicapped by inadequate funds and obsolete equipment.

The Soviets spend more money jamming the VOA and other Western broadcasts than the VOA's budget to broadcast to the entire world.

The Soviets have 37 high-powered 500-kilowatt shortwave transmitters. The VOA has six make-shift affairs, clobbered together from 250-kilowatt transmitters.

Further, many of the VOA transmitters in Washington, and its relay transmitters around the world, are more than 15 years old.

Anyone who travels abroad and listens to a shortwave radio knows the result of this cheeseparing in Washington. The airwaves are flooded with Soviet and Eastern European propaganda broadcasts.

Indeed, the Soviets are on the air around the world in 82 languages for 2157 hours a week.

By contrast, the VOA broadcasts in only 42 languages for a total of only 956 hours.

As a result, many countries which should be receiving an American version of what is going on get only an hour or so of information daily.

The VOA broadcasts for only an hour a day to Laos, for 1½ hours to Bulgaria and Cambodia, for 1 hour 50 minutes to Yugoslavia and the Baltic states—Estonia, Latvia and Lithunia—seized by the Soviet Union after World War II. It broadcasts for only 1½ hours in Pashtu and a further 1½ hours in Dari to Afghanistan—compared with round-the-clock propaganda by the occupying Soviet forces.

The worst result of Washington's penny-pinching is in the paucity of VOA broadcasts to Central and South America. It broadcasts for only 5½ hours a day in Spanish to that area. The Soviets broadcast in nine languages for 19 hours and Cuba broadcasts in six languages right round the clock.

There is an urgent need for the Reagan Administration to change this dismal performance. The VOA has the leadership and the staff to deliver. All it needs are the tools.●

GERMAN-AMERICAN TRICENTENNIAL YEAR 1983

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. GILMAN. Mr. Speaker, to paraphrase an old mathematical axiom, the whole can be no greater than the sum of its parts. When we reflect on the great achievements that we as a Nation have attained, in every frontier imaginable, we can attribute that success to the greatness of all the people who comprise our Nation. The Ameri-

can people are a synthesis of scores of cultures, many of whose traditions and beliefs we have embraced as a Nation. I am pleased to be able to note today that President Reagan is honoring one of these groups and has designated 1983 as the Tricentennial Anniversary Year of German-American Settlement in America.

On October 6, 1683, 13 Mennonite families (33 people in all from the city of Krefeld) arrived in Philadelphia and founded the community of Germantown, paving the way for the 7 million Germans who were to follow them to the United States during the next 300 years. In those ensuing years, the contributions of German-Americans have been countless. Among the list of distinguished German-Americans are Albert Einstein, John Steinbeck, H. L. Mencken, Kurt Vonnegut, Billy Wilder, Marlene Deitrich, Kurt Weill, Levi Strauss and the Heinz, Busch, Weyerhaueser and Boeing families, to name just a few. The U.S. Census Bureau has estimated that more than 28 percent of all Americans claim German ancestry . . . approximately 52 million U.S. citizens.

The Tricentennial of German-American settlement is being marked by a series of events throughout the United States and West Germany in 1983, including musical and dramatic performances, lectures, exhibitions, seminars, scholarly conferences and official ceremonies. The culmination of this celebration will be the visit to Philadelphia in October of President Karl Carstens of West Germany and the dedication that same month of the Friendship Garden on the mall between the White House and the Jefferson Memorial.

Mr. Speaker, I would like to take this opportunity to recognize the membership of the German-American Club of North New Jersey and New York. On September 28, 1983, they will hold their Heritage Celebration at the Elk's Lodge in Greenwood Lake, N.Y. which is located in my congressional district. Mr. Hermann Schnipkoweit, Social Minister of Lower Saxony, and Mr. Heinrich Bierman, County Executive of Hildesheim will be their honored guests. In the spirit of the Tricentennial of German Immigration to these shores, I know that my colleagues would want to join me in thanking this outstanding group of people for their countless contributions to our Nation and to wish them continued happiness and success.●

A TRIBUTE TO JACK GARRETT REAL

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MOORHEAD. Mr. Speaker, on September 28, 1983 at the Beverly Hilton Hotel, the prestigious Americanism Award of the Great Western Council, Inc., Boy Scouts of America will be presented to Mr. Jack Garrett Real.

In its 10-year history, the Americanism Award has gone to only three other men—Gen. James Doolittle, Bob Hope, and former President Gerald Ford.

The only thing that Jack Real does not share with this esteemed trio is worldwide fame. In all other meaningful respects, he is their equal.

His life in the business and civic community has been marked by a firm and unswerving commitment to excellence, integrity, and commonsense. He has been and is a leader in every meaning of the word.

Jack Real's professional business career began as a mechanical engineer at Lockheed-California Co. in 1939. For the next 32 years, he put his unique stamp of quality on that famed aircraft company.

Upon leaving Lockheed, he went to Hughes Tool Co. and again made his presence felt. Today, he is the president of Hughes Helicopters.

On the civic side he has given great amounts of time and effort to his first love, the Boy Scouts of America. For the past 25 years, he has been a member of the executive council, offering leadership, wise counsel, and prestige.

Mr. Speaker, I would like to call to the attention of my fellow Members in the House of Representatives this presentation of a very special award to a very special man from a very special organization. I am pleased to take part in this fine tribute.●

IKE ON "MAN AGAINST WAR"

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. NEAL. Mr. Speaker, in the aftermath of the Soviet Union's murderous attack on Korean Air Lines Flight 007, which was amoushed by Soviet fighters and shot from the skies over Sakhalin Island in the predawn hours of September 1, there have been growing misgivings about future United States-Soviet relations, including our ongoing negotiations to limit the nuclear arsenals of our two countries. Some critics of the United States response to this latest Soviet act of barbarism have insisted that the negotiations should be halted. It is my hope that cooler heads will prevail.

I am of the opinion that the response of the United States has been, in the main, both measured and appropriate. I share to the fullest extent the indignation and outrage expressed by our President and our Department of State. I share in the desire to bring the Soviet Union to full account, both in explaining truthfully what actually happened; in compensating the survivors of the 269 victims; and in obtaining a guaranty that such mindless savagery will not occur again. To obtain those ends, I believe the United States should be a leader of the free world in an international effort to protect the lives and the liberty of those who travel the airways, including those who stray over unfriendly territory.

I do not believe this purpose would be served, however, by allowing our grievances to push us to the brink of war, as some vocal critics of the United States handling of the KAL-007 affair seem willing to do. We need to remember that wars have been ignited by incidents of similar gravity. The assassination of the Austrian Archduke Ferdinand—the loss of one life, albeit an heir to the Austrian throne—is listed as the immediate cause of World War I, in which over 10 million soldiers died. There was at that time an European arms race, extremely tense international relations, and manifest distrust among the competing powers. Nonetheless, had Ferdinand's assassination not occurred, or had reaction to it been more subdued, who knows what course history might have taken? The point is that impassioned revenge usually extracts a price, or entails risk. Today, the risks are awesome, not only to ourselves, but to all mankind.

In a recent issue of the Washington Post, syndicated columnist David S. Broder reported an important letter written in 1956 by President Dwight D. Eisenhower to Richard L. Simon, president of the publishing firm of Simon & Schuster. Mr. Simon had written President Eisenhower calling attention to a column by Joseph and Stewart Alsop on the Soviet military threat, urging the President to give high priority to a crash program for long-range airpower and missiles—in other words, a head start on a stepped-up arms race.

This was at a time, Mr. Speaker, when the nuclear capability of the United States was vastly superior to that of the Soviet Union. Yet President Eisenhower, in a strong statement that rings even more true today than it did then, foresaw clearly that the day would come when the choices would be narrowed to two—a peaceful containment of nuclear arms, or all-out nuclear war.

I would like at this time, Mr. Speaker, to insert the text of the Eisenhower letter into the RECORD, and commend it to the attention of my colleagues:

EISENHOWER LETTER

Dear Dick: Thank you for your letter, which brings up subjects too vast to be discussed adequately in a letter. Suffice it to say here that I doubt that any columnist—and here I depend upon hearsay as I have no time to read them—is concerning himself with what is the true security problem of the day. That problem is not merely man against man or nation against nation. It is man against war.

I have spent my life in the study of military strength as a deterrent to war, and in the character of military armaments necessary to win a war. The study of the first of these questions is still profitable, but we are rapidly getting to the point that no war can be won. War implies a contest; when you get to the point that contest is no longer involved and the outlook comes close to destruction of the enemy and suicide for ourselves—an outlook that neither side can ignore—then arguments as to the exact amount of available strength as compared to somebody else's are no longer the vital issues.

When we get to the point, as we one day will, that both sides know that in any outbreak of general hostilities, regardless of the element of surprise, destruction will be both reciprocal and complete, possibly we will have sense enough to meet at the conference table with the understanding that the era of armaments has ended and the human race must conform its actions to this truth or die.

The fullness of this potentiality has not yet been attained and I do not, by any means, decry the need for strength. That strength must be spiritual, economic and military. All three are important and they are not mutually exclusive. They are all part of and the product of the American genius, the American will.

But already we have come to the point where safety cannot be assumed by arms alone. But I repeat that their usefuness becomes concentrated more and more in their characteristics as deterrents than in instruments with which to obtain victory over opponents as in 1945. In this regard, today we are further separated from the end of World War II than the beginning of the century was separated from the beginning of the sixteenth century.

Naturally, I am not taking the time here to discuss the usefulness of available military strength in putting out 'pairie fires'—spots where American interests are seriously jeopardized by unjustified outbreaks of minor wars. I have contented myself with a few observations on the implications of a major arms race.

Finally, I do not believe that I shall ever have to defend myself against the charge that I am indifferent to the fate of my countrymen, and I assure you that there are experts, technicians, philosophers and advisers here, who give far more intelligent attention to these matters than do the Alsops.

With warm regard,

Sincerely,

DWIGHT D. EISENHOWER.●

HONORING A GREAT AMERICAN—BRIG. GEN. ROBERT CARDENAS, U.S. AIR FORCE

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MARTINEZ. Mr. Speaker, I am proud to have the opportunity to call to Congress attention the outstanding achievements of Brig. Gen. Robert L. Cardenas. This man not only deserves our praise for the 35 years of service to his country, and his role as a pioneer in aircraft development, but also the respect of the entire Hispanic community in the United States. His dedication serves as an example and an inspiration to all of us who share this proud heritage.

General Cardenas attended schools in San Diego and later graduated from the University of New Mexico in 1955 with a bachelor of science degree in mechanical engineering. His military career began in 1939 when he became a member of the California National Guard. He entered aviation cadet training in September 1940, and received his pilot wings and commission as a second lieutenant in July 1941.

During World War II General Cardenas served as a B-24 air craft pilot in the European theater and was awarded the Air Medal and two Oak Leaf Clusters for bombing missions before being shot down over Germany in March 1944.

General Cardenas aided in pioneering jet air craft development, test flying the P-59 and XB-45, the Air Force's first jet fighter and bomber. In 1969, General Cardenas became vice commander of the 16th Air Force with headquarters at Torrejon Air Force Base, Spain. He was awarded the Spanish Grand Cross of the Order of Aeronautical Merit by the Spanish Government.

It is with great pleasure that I sight these many achievements. General Cardenas exemplifies the fine dedication of a soldier in service to this country, and the powerful motivation and contribution of the Hispanic community to American society.●

THE DESTRUCTION OF FLIGHT 007

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Ms. FIEDLER. Mr. Speaker, the destruction of Korean Air Lines flight 007 has added yet another chapter of horror to the history of this dark and terrible century. The Soviet Union has added to its long lamentable list of crimes: The famines in the Ukraine, the great purge, the Baltic deportations, the repression of Soviet Jewry, the invasion of Afghanistan, to name just a few. We are dealing with a regime to whom the bizarre and hateful slogans of Communist ideology are real, but men and women mere shadows, a regime that holds its borders "sacred," but human life worthless. The Soviet Union may talk of peace; but the death of flight 007 shows they act with missiles.

It is time for the decent people to look to their defenses. If there could be any doubt that terror was as important and fundamental to the Soviet state as democracy and freedom is to ours, it is now dispelled. Lenin himself wrote "We have never rejected terror on principle, nor can we do so." What we saw in the night sky over the Sea of Japan was not an aberration, nor a mistake. It was rather a crystal-clear glimpse of the basic and fundamental nature of the Soviet Union.

In the short term, the United States, and the governments of much of the world, have reacted with sanctions. This is both applaudable and necessary, but it is not enough. If flight 007 fades from the headlines without making us view the Soviet Union the way it really is, then we will have broken faith with those who died.

The United States is a democracy, a form of government that requires responsibility and participation from its citizens. The spirit of democracy is opposed by that of totalitarianism—that the state is all, the individual, the family, nothing. That is why I strongly support the actions of individual Americans against the Soviet Union. It is not an American tradition to rely on the government for all things. That includes expressing their outrage, whether it be by small things, such as refusing to stock Soviet-made vodka, or large ones, such as the actions of the Los Angeles longshoremen who willingly refused the wages they could have earned unloading the Soviet freighter *Novokuibyshevsk*. In creating their own sanctions against the Soviets, by putting their principles before monetary gain, these longshoremen have carried on a proud American tradition. They have earned our support and our gratitude.

This freedom and resolve is the opposite of the spirit that destroyed flight 007. Its continued existence is one of the few hopes all those who value human life and the human spirit have in the face of the crimes that the Soviet Union perpetrated since it first emerged. These crimes were intended to intimidate, to kill not only people who wished to live in freedom, but to kill the hope for freedom in those who still lived. The Soviets have failed in this as much as they have failed in agriculture, in industry, in everything else with the exception of war, repres-

sion, and viciousness. The spirit of freedom still lives with the people of Afghanistan, with Soviet Jewry, with the Ukrainians, Balts, Christians, Hungarians, and with those, worldwide, who share this spirit. As long as people are willing to stand up for this spirit—as happened in Los Angeles and throughout America in the wake of this latest crime—then we may yet remain the last, best, hope of the Earth.●

AGENT ORANGE CARAVAN

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Ms. KAPTUR. Mr. Speaker, during the August recess, I had the opportunity to participate in one of the most moving and uplifting experiences in my public life. Last week, the Vietnam Veterans of Toledo welcomed to Toledo, the Agent Orange Caravan which is on its way to the Nation's Capital. During this welcoming ceremony, I became more convinced than ever, that the tragedy of agent orange must be forthrightly addressed by the Congress.

The individual most responsible for organizing this event was a gentleman for whom I have a great deal of respect, Mike Flowers, the president of the Vietnam Veterans of Toledo. Mike is an inspiring leader of this organization. Since serving his country in Vietnam, Mike has been an articulate spokesman for the cause of the Toledo area's Vietnam veterans. As a member of the Veteran's Committee, it is a privilege to work with an individual like Mike Flowers in our effort to serve our country's Vietnam veterans.●

DISASTER RELIEF

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. BOSCO. Mr. Speaker, today, along with my colleagues, Congressmen WEAVER and SWIFT, I am introducing a concurrent resolution which seeks to address the severe economic hardship facing west coast commercial salmon fishermen. Ocean conditions associated with the natural phenomenon commonly known as El Nino have threatened the continued viability of hundreds of small commercial salmon operators in California, Washingtion, and Oregon. The 1983 salmon industry is suffering through the worst season since before World War II. With this concurrent resolution it is my hope that Congress will quickly act to help secure Small Business Administration economic injury disaster loans for commercial salmon fishermen.

In California, as in Washington and Oregon, El Nino has had a negative impact upon several different fisheries including squid, shrimp, crab, and ground fish. However, the salmon fishery has been particularly hard hit; El Nino's high water temperatures and absence of normal upwellings has vastly reduced the amount of plankton and other nutrients upon which smaller fish and shellfish normally feed. The National Marine Fisheries Service has stated the failure of California's chinook salmon fishery is directly attributable to El Nino conditions.

In terms of total weight, California salmon landings are at their lowest level since 1939. The average weight of chinook salmon, the State's most valuable salmon species, is the lowest ever recorded. The size, quality, and number of salmon found has been exceedingly low. In fact, the California Department of Fish and Game reports that combined chinook and coho landings are less than one-third that landed a year ago. In many respects, coho, pink, and sockeye landings in Oregon and Washington have been hit even harder.

Obviously, this disastrous season resulting from El Nino has adversely affected California's $1 billion fishing industry, and the economies of many coastal communities which depend on it. Most important, however, has been the plight of individual fishermen and their families. In my particular district along California's north coast, bankruptcies and defaults on mortgaged fishing vessels are occurring at an alarming rate. Production credit associations and other private financial institutions are understandably hesitant to extend further financing or soften current credit terms for fishermen, marked as poor credit risks due largely to current El Nino conditions. Having dedicated their lives to commercial fishing, many families find themselves close to the point of financial insolvency. Without further help, hundreds of victims of this natural disaster will not be able to revive their commercial operations next season—threatening the future health of this vital industry.

Astonishingly, these fishermen have found themselves virtually without recourse to Federal or State disaster relief assistance programs. However, under the economic injury disaster loan program, SBA is authorized to make loans available to small business concerns which have suffered substantial economic injury due to a physical disaster. Small business victims of such natural disasters as hurricanes, floods, earthquakes, and droughts throughout the Nation have justifiably received millions of dollars in Federal assistance. Despite conclusive evidence to the contrary, SBA has expressed its reluctance to recognize El Nino as a natural disaster, as well as to recognize the causal effect between El Nino and the decimated salmon fishery; they have threatened to disapprove any request for loan assistance for salmon fishermen. This despite the fact that hundreds of fishermen can easily demonstrate an impaired financial condition attributable to El Nino.

Currently, numerous counties in Washington, Oregon, and California are petitioning their respective Governors to certify to the Small Business Administration that conditions called for under the economic injury disaster loan program have been met, and that financial assistance is needed. To be eligible, counties and the Governor must provide evidence to SBA that a physical disaster has occurred, that at least five small business concerns in affected counties have suffered substantial economic injury, and that businesses are in need of financial assistance not otherwise available on reasonable terms. In my district, all four coastal counties have recently completed their petition process. The California Governor is expected to act soon.

Mr. Speaker, as evidenced by recent county actions, I believe these conditions of eligibility required under the law are easily met in affected areas along the west coast. Cities, counties, fishermen organizations, and members of the congressional delegations in affected States have undertaken a coordinated, bipartisan effort to insure fishermen their rightful access to this program. This concurrent resolution is designed to support these efforts by putting Congress on record as requesting that SBA take necessary action to make loan assistance available to commercial salmon fishermen. Ultimately, it is my hope that county, State, and congressional sentiment will provide the necessary inducement for SBA to properly exercise its authority in meeting the needs of these disaster victims. Thus, I urge the Congress to pass this measure without delay.●

SAFETY OF CIVIL AVIATION IN JEOPARDY

HON. RON PACKARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. PACKARD. Mr. Speaker, I deplore the act of barbarism the Soviet Union committed when they shot down Korean Air Lines Flight 007 on September 1. This destructive action resulted in the murder of 269 innocent passengers from the United States and 13 other nations. The United States and the entire international community cannot tolerate such acts of violence. The callous and uncivilized gunning down of this civilian aircraft must never be forgotten.

The safety of civil aviation has been placed in jeopardy by yet another example of air aggression by the Soviets. Sanctions aimed at the Soviets are vital if we are going to deter that country from future repetition of such inhumane behavior. We must bolster the strong words of disgust, revulsion, scorn and fury with equally severe measures. Banning Aeroflot—the national air carrier—from landing in this country, suspending certain cultural, scientific, and diplomatic exchanges and working with other nations to limit Soviet civil flight in the West are all legitimate responses to this tragedy.

This attack was aimed at all societies that value individual rights and moral behavior. The Soviets' action reflects the total disregard they have for human life. Their flagrant neglect for human existence has been further compounded by their steady refusal to tell the truth. I call upon the Congress to cooperate with President Reagan in developing a measured and proper reaction to this international tragedy.●

FEDERAL CIVIL SERVICE IN TURMOIL

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mrs. SCHROEDER. Mr. Speaker, when President Reagan first took office, he pledged to make significant changes in the civil service to produce a more efficient Federal Government. I have recently released a report of the General Accounting Office (GAO) that confirms that his changes have been significant—unfortunately they have demoralized employees and reduced productivity.

The GAO report ("Retrenchment and Redirection at the Office of Personnel Management" GAO/GGD-83-95) deals with the impact of Reagan administration policies on the Office of Personnel Management (OPM). OPM is the central personnel office of Government and, as such, is responsible for setting and implementing policy in employee selection, compensation, retirement, and work force management. The GAO report documents the devastating effect of the numerous reorganizations and reductions in force implemented at OPM by Director Donald J. Devine. These actions have resulted in the demotion or separation of nearly 650 employees and a loss of pay for 3,000 more. While these actions were taken in accordance with law, they were enormously disruptive both to the workers involved and to the programs they administered.

Dr. Devine has always maintained that he wants to return OPM to the basics of bedrock personnel management. What this has meant, in practice, is that other Federal agencies have gotten less help from OPM and are subject to less oversight. This reduced oversight has resulted in an upsurge in merit system abuses during this administration.

The August 29, 1983 U.S. News & World Report contains a very good article discussing the serious problems in the Federal civil service. It shows that despite the system's need for thoughtful, deliberate reform, the policies of the Reagan administration have only served to generate unbelievable turmoil, devisiveness, and frustration.

The article follows:

[From the U.S. News & World Report, Aug. 29, 1983]

IT'S NOT VERY CIVIL IN THE CIVIL SERVICE—REAGAN APPOINTEES ARE TRYING TO TAME THE BUREAUCRATS, BUT FEDERAL WORKERS ARE FIGHTING BACK

(By Joseph Shapiro)

In its 100th-anniversary year, the federal civil service is in turmoil.

Not in recent years have the short-term political managers and long-term career bureaucrats been so openly suspicious of one another. In some agencies, it's a state of war.

To President Reagan, it's a matter of taming what he regards as an unaccountable and out-of-control bureaucracy. But others complain of the "politicization" of the civil service and contend that political appointees sometimes come to an agency hostile toward its mission and suspicious of its employes.

The infighting affects—adversely, in most cases—everything Washington does, from providing service to the individual citizen to the spending of billions of tax dollars. Says Robert Hartman, who recently completed a study of the civil service for the Brookings Institution: "Everybody is operating from weakness. Morale is zero. The work force is deteriorating. No matter how conservative you are, you want somebody with experience negotiating billion-dollar defense contracts."

Core of doubt. All new administrations—Republican or Democratic—come to Washington with doubts about how much they can trust the federal workers, now numbering 2.2 million.

"Conservative administrations often feel they have to buck the tide against an entrenched set of liberals in the civil service," says Charles Goodsell, a professor of public administration at Virginia Polytechnic Institute and State University. The result, he says, often is to doom an administration to repeat past mistakes because political appointees ignore the experience of career bureaucrats. One recent example:

At the Justice Department, 204 employes in the civil-rights division protested the administration's plan to grant tax exemptions to private schools that discriminate racially. Despite the argument that the new policy was unconstitutional, the political appointees pushed ahead. The Supreme Court in late May ruled that the employes were right.

For frustrated federal workers, even those who joined the service in a past Republican administration, it is an unhappy and insecure period. G. Jerry Shaw of the Senior Executives Association, a group that represents senior career employes, says out-of-favor career workers are being fired, transferred or given nothing to do; out-of-favor agencies are underfunded and understaffed.

The result is that political managers are becoming more deeply entrenched. According to a recent congressional report, the number of political appointees has jumped 110 percent since 1977, the year Jimmy Carter took office.

Specific cases show what's happening:

At the Department of Energy, Maxine Savitz lost her job as the government's top civil servant for energy conservation. She said she was punished for doing too good a job with a program the Reagan administration wants phased out without getting congressional approval. A civil-service review office agreed, but the department has refused to take her back.

At the Department of Housing and Urban Development, 77 workers are asking the courts to overturn their firings and demotions. A lawyer for the workers contends there was a "sinister motive" behind the moves: To gain political control over the agency and shut down fair-housing programs. Also at HUD, two fired employes were ordered reinstated after a review board found they had been improperly dismissed because of their union backgrounds.

A recent congressional probe criticized ACTION, the independent agency that handles domestic antipoverty programs, for hiring large numbers of noncareer workers, contrary to directives of congressional committees. It was such activity that prompted formation of the civil service in the first place.

Before 1883, many jobs were awarded by elected officials to friends, who often kicked back part of their pay. That year, reacting to the 1881 assassination of President James Garfield by a disappointed job seeker, Congress passed the Pendleton Act, which outlawed the spoils system and replaced it with a career civil service in which applicants competed on merit tests.

Since then, rules to provide job security have been so strengthened that even some supporters of the civil service concede that firing of incompetent workers has become complicated and time consuming. Numberous government managers say that trying to fire an unsatisfactory worker by the rules isn't worth the frustration.

Ideas for reform: Many civil-service supporters see a need for change. The Brookings Institution study calls for broad reform of pay and retirement systems. Top administrators pay would be raised to try to keep them in federal service, but compensation at lower levels would be reduced to bring workers' benefits more in line with those in the private sector.

Donald Devine, Reagan's director of the Office of Personnel Management, is pushing sweeping reforms that he says will make government more efficient. They include a proposal to link pay and job security to performance evaluations.

Stiff opposition: Currently, such evaluations are used for 7,000 top-level officials. An agency administrator, on 15 days' notice, can transfer a senior executive down the hall or across the country. Shaw, of the Senior Executives Association, says this power, part of a 1978 package to improve the civil service, is being misused to punish efficient but out-of-favor employes.

Devine insists that the current system, whereby 1.4 million civil servants get virtually automatic raises based on their tenure, often rewards incompetence and helps give

bureaucrats a poor public image. His pay-for-performance plan has met strong opposition in Congress. Critics point to cases where they say evaluations were used punitively.

One example: Dr. Peter Infante, the Occupational Safety and Health Administration's chief cancer expert, challenged an international agency's finding that there was insufficient evidence to call formaldehyde a carcinogen. That provoked a representative of the formaldehyde industry to send Infante's boss a letter asking, "How do you control members of the bureaucracy who seem to be operating freely within and without government?" Infante got an answer: He was given an unsatisfactory job-performance rating and ordered fired. Only after a congressional panel intervened was his job saved.

Other ways out: When job evaluations do not work to push out or punish disliked workers, transfers sometimes are used. One recent case was that of Marvin Lesht, HUD's regional personnel director in Chicago. He was ordered transferred after he had cooperated with a federal review panel investigating unfair employment practices at his agency. Under pressure from a federal review board, HUD in mid-August rescinded the transfer.

Often, employes are required to make difficult, if not impossible, choices—in effect, forcing them to quit. During a General Services Administration shakeup, for instance, a husband and wife were transferred to different cities.

Bosses also use political muscle to shift people into jobs with little to do. At the Office of Personnel Management, a research psychologist was paid his $42,653 salary despite being demoted to coloring computer printouts, a job he said was rated to pay only $10,645.

Another gambit, employes say, is to cut funds for agency staff and programs. Large-scale firings—called reductions in force—are used to dismantle programs that Congress wants continued, says Representative Patricia Schroeder (D-Colo.), whose House subcommittee has investigated several such firings.

Defensive punch: Bureaucrats are not powerless in the struggle with management, as the conflict at the Environmental Protection Agency demonstrates. When former Administrator Anne Burford took EPA in a new direction, she quickly learned about civil servants' tenacity. Career employes leaked damaging stories of mismanagement, political favors and employe hit lists to congressional committees and the media. In the end, the leaks helped lead to the departures of Burford and a dozen political appointees.

Still, critics say, career employes whose jobs are about to be abolished face a tough road. Lawyer George Chuzi, who represents employes, says the procedure set up in 1978 to protect bureaucrats—the Merit Systems Protection Board and its Office of Special Counsel—lacks the funding, staff and resolve to be effective.

The harshest charge against the Reagan administration's personnel actions is that they subvert the whole merit civil service. Representative Schroeder says the message from the administration is that "the merit system is being rolled back after 100 years, and here we go."

In the end, Shaw says, the current battle comes down to this: "Are you going to have a career civil service to provide the continuity and stability from administration to administration, or are you going to politicize the management of federal government?"

Reagan supporters argue that the question really is: "Are the elected officials or the bureaucrats going to run the country?"●

LEGISLATION TO DELAY RECOMPUTATION OF FEDERAL EMPLOYEES' PAY

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. FAZIO. Mr. Speaker, I wish to express my strong support for legislation introduced today affecting our Federal work force. This bill would delay the recomputation of Federal white-collar salaries from October 1 until the date when Federal workers receive a pay raise, which is expected to be next January. The changeover from computing pay on the basis of a workyear of 2,080 hours to one of 2,087 hours will cost the average civil servant about $3.20 every 2 weeks.

I have worked closely with the author of this legislation, Post Office and Civil Service Committee Chairman Bill Ford, and wholeheartedly agree that the impact of this salary cutting formula should be delayed. This bill has already received the endorsement of the Office of Personnel Management, and represents a bipartisan effort among Members of Congress on behalf of our Federal work force. The bill will be brought to the floor under suspension of the rules, and I urge my colleagues to give it their swift and favorable consideration.●

BISHOP FRANK MADISON REID, JR., INSTALLED AS PRESIDENT OF AME CHURCH'S COUNCIL OF BISHOPS

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. DERRICK. Mr. Speaker, I would like to take this moment to bring to the attention of my colleagues an outstanding individual, Bishop Frank Madison Reid, Jr. Bishop Reid was recently installed as president of the African Methodist Episcopal Church's Council of Bishops when some 5,000 delegates met in my home State, South Carolina, this summer.

Bishop Reid, in addition to this outstanding and dedicated service as the presiding bishop of the Seventh Episcopal District for the past 7 years, has involved himself in both community and civic affairs outside the responsibilities of the church. He is an extraordinary individual who has done much to improve education and assist the poor. He was born in Danville, Ky., and reared primarily in St. Louis, Mo. Working with my colleague,the gentleman from the First District in Missouri, Mr. William Clay, Bishop Reid fought for equal opportunity in the war against discrimination and poverty in this country.

This great leader attended the public schools in St. Louis, and recieved his B.A. degree in psychology from Wilberforce University, the Nation's oldest historical black college. His masters in divinity was received from Garrett Evangelical Theological Seminary, Evanston, Ill. He has also studied at the University of Chicago and has received honorary degrees from Morris Brown College and Allen University.

Having pastored in South Carolina, Ohio, Illinois, Missouri, Maryland, and the District of Columbia, Mr. Reid has a long and distinguished history of church service. He has been active in the African Methodist Episcopal Church since the age of 17. He has served in many administrative capacities in the AME organization and it was while here in the Nation's capital that he was elected bishop. He has received numerous awards and citations throughout his career, including the Kidder Award for Excellence in Preaching and the Order of African Redemption—awarded by the President of the Republic of Liberia in recognition of meritorious service.

Over the years Bishop Reid has been extremely effective in communicating with the young people, and his conference revivals have resulted in hundreds coming to Christ. His ministry will continue to serve as an inspiration to the AME Church family. I know that he will do a fine job in his new role as president of the Bishops' Council of the African Methodist Episcopal Church which represents some 1.3 million members worldwide.●

MINES—A REAL SOVIET THREAT

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. ROTH. Mr. Speaker, the U.S. Navy today has an active force of 21 minesweepers. The Soviets have a force of 388 minesweepers.

Our minesweepers are over 30 years old and are of World War II vintage. The Soviets have an expanding navy with state-of-the-art technology.

The United States has numerous ports and sealanes. The Soviets have only a few to protect.

As one reads the above statements, one would be convinced that the names are reversed. After all, it is the United States which depends on its ports and on open sealanes for its very survival. Yet it is the United States

which runs a far second in the quality and numbers of its minesweepers.

The Soviets have the capability to lay mines in our ports and sealanes. Their mine and mine-laying technology is among the best in the world. Thus, we must be prepared to meet the threat.

At the present time, the first of a series of sophisticated, technologically up-to-date minesweepers is under construction in my congressional district. The second will soon be underway.

These ships are well-designed and are being built by able, competent shipbuilders. They are ready and willing to build three more minesweepers—as authorized in the fiscal year 1984 defense authorization.

Now it is imperative that the funds be appropriated to enable construction of these ships. Therefore, I urge the Appropriations Committee members, particularly those on the Defense Subcommittee, to support construction funds for these three ships.●

DOCUMENTATION CENTER AND SHRINE

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mrs. JOHNSON. Mr. Speaker, a constituent from my district, Rabbi Henry Okolica, of New Britain, was recently in the Federal Republic of Germany to visit his home town of Aschaffenburg. Rabbi Okolica's travels were not motivated, however, simply by nostalgia. He was returning to his birthplace to see the progress the city government has made in building a documentation center and shrine to commemorate the historic events of the years between 1933 and 1945 during which the entire Jewish community of Aschaffenburg was dispersed or wiped out by the Nazis. Seven hundred years of uninterrupted Jewish community life came abruptly to an end with the advent of Hitler's rise in Germany in 1933. In only 10 years, the entire Jewish community of Aschaffenburg was wiped out; 135 Jewish citizens were known to be deported to Poland's concentration camps, 37 to Theresienstadt, and seven committed suicide before the deportations began, including Otto Wolfsthal, one of the great Jewish philanthropists, and his wife Maria.

Now the city, under the guidance of its Oberburgermeister Dr. Will Reiland, is building a memorial to remind a new generation that dictatorships bring ruin to nations. On the ground where the synagogue once stood shall stand a shrine with tablets that bear the names of those deported or killed during the dispersion. The former Jewish Community House shall now house a library, museum, and chapel, building a foundation for future generations to learn from the tragedies of the past. The dedication will be in the summer of 1986, and the city of Aschaffenburg will invite the survivors of Hitler's inferno to be present at the ceremonies.

It is most appropriate that the events that took place during World War II against the Jewish communities be publicly acknowledged and recorded in this age so prone to revisionary history. I as a citizen of a nation dedicated to truth, justice, and the realization of man's spirit of freedom and mutual respect, commend Dr. Reiland and the citizens of Aschaffenburg for their determination to preserve the past; its perversions as well as its glories. Such actions thereby honor those who suffered so unjustly, as well as protect against such inhumanity in the future, for as George Santayana once said, "Those who do not remember the past are condemned to repeat it.●

TRIBUTE TO VICE ADM. LANDO W. ZECH, JR.

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. HILLIS. Mr. Speaker, I would like to tribute today to Vice Adm. Lando W. Zech, Jr., an outstanding officer who has served the Nation and the Navy with distinction for nearly four decades. As the ranking minority member on the House Armed Services Subcommittee on Military Personnel and Compensation, I have had the opportunity to work closely with Admiral Zech and would also like to offer my thanks to him for his superb representation of the Navy's manpower and personnel interests for the last 3 years.

Admiral Zech will be relieved on September 28, having served as Chief of Naval Personnel since August 1980. During World War II he participated in combat operations in the Caroline Islands, Iwo Jima, and Okinawa. He went on to command three submarines—including U.S.S. *Nautilus*, the first nuclear-powered ship—and a guided-missile cruiser. His last 10 years of service have been as a flag officer.

There is an interview with Admiral Zech in the September 12 issue of Navy Times, which demonstrates quite clearly that the Admiral's primary concern during his tenure as Chief of Naval Personnel has been the young sailor at sea. I quote the Admiral:

I have tried to be a good guardian. What I have tried to focus on every day was that young sailor out at sea * * * We are the ones who are supposed to be worried about them.

But, at the risk of embarrassing the Admiral, I will tell a brief story which shows that his demonstrated leadership abilities were evident many years ago. As a junior officer in the early 1950's he served for 2 years on the staff at the Naval Academy as a company officer in charge of a company of midshipmen. One day the senior administrators, who were responsible for rating the junior staff members, decided to see if there was any correlation between their appraisals of the company officers and the number of midshipmen from each company who elected to receive commissions in the Air Force—rather than in the Navy or Marine Corps—upon graduation, a selection which is permitted by law. The senior members of the academy staff were not surprised with what they found: Lieutenant Zech not only was rated No. 1 among the company of officers, but his company had the fewest members requesting commissions in the Air Force. More of his midshipmen decided to "stay Navy" than in any other company.

Admiral Zech has "stayed Navy" for more than 39 years. The Navy owes him a large debt for his exemplary service, and we in the Congress owe him our gratitude for having helped make it possible for us to discharge our responsibilities regarding the maintenance of the Armed Forces and the protection of our country. Admiral, we thank you.●

SCOOP JACKSON—LARGER THAN LIFE

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. BONKER. Mr. Speaker, to those of us who knew him, Scoop Jackson was an extraordinary, larger than life person. His longtime Senate colleague, Warren Magnuson, noted in a recent eulogy that Scoop Jackson seemed "indestructible." Together, these two Washington Senators gave our State the kind of representation that was the envy of every Congressman. The "gold dust" twins were powerful. Their vast influence lay as much in their exceptional personal qualities and abilities as it did in their nearly half-century tenure in Congress and the important committees they chaired. For Washington State, the U.S. Senate will not be the same without them. We have just witnessed the passing of an era.

Senator Jackson was a legend in his own time. His counsel was earnestly sought by Presidents of both parties and leaders around the world. In Beijing the day of his death, the official China Times announced "China loses a dear friend." Wreaths from Israel

and other world capitals filled the church sanctuary in Everett the day of his funeral. Leaders of the free world mourned his passing while their counterparts in the Kremlin felt relieved to be rid of their biggest nemesis.

Scoop Jackson will be remembered for his expertise in Soviet affairs and strategic policy, but he was also a giant in the most important national and regional issues of our day. He was in the forefront of the environmental movement, and authored major legislation of the 1960's and early 1970's to protect the Nation's air, water, and natural resources. It was his committee—and his leadership—that dealt effectively with the energy problems that plagued our country in the mid-1970's. He was a proven authority on many subjects.

Scoop Jackson was most impressive in how he delivered for the Northwest. Whether it was for dams or dredging, fish hatcheries, the aerospace industry, post office, help for a pensioner, or an immigration case, we could depend on him.

I recall a few months back our frustration with getting the administration to release funds to continue vital dredging around Mount St. Helens. The White House side balked until Jackson posed the question: "How can I justify not being able to secure funds to protect my constitutents from flooding while leading the President's efforts to obtain funding for the MX?" The message got across. The Senator was not being threatening or arrogant. He effectively stated his dilemma.

Scoop Jackson personified Americanism.

He was as much at home in the U.S. Capitol as in his hometown of Everett. He was as comfortable talking to corporate leaders as he was in union halls with rank-and-file workers. I have seen him at it a hundred times and he said pretty much the same thing to both sides. Nobody ever accused Jackson of hypocrisy. On one occasion, I was amused watching him read the Wall Street Journal as we were driving to a union meeting.

Relate to world leaders he did, but Scoop really enjoyed talking to senior citizens, kids, the local civic leaders, and others in the community. I marveled at his vivid description of La Center and Naselle, only two of the hundreds of small towns Scoop knew like his own neighborhood. He could cite names and places in remote areas of the State that would surprise even his close supporters. It seemed at times everyone in the State either knew Scoop, was a classmate, got a letter from him, or had heard the Senator speak. He touched all of our lives.

Scoop Jackson was a Democrat, and a tough partisan at that. But he crossed philosophical lines like few have in our history. At the funeral were the likes of Senator STROM THURMOND and BARRY GOLDWATER, elder conservatives, and Senator PAUL TSONGAS, the young liberal from Massachusetts. He was called my hero by the conservative columnist George Will; yet his labor voting record, consistently 100 percent, was totally at odds with what Mr. Will believes is best for America.

This seemingly contradictory side of Senator Jackson was possible because of the universal respect everyone had for the man. His integrity earned him his independence.

Above all, his personal qualities impressed those who knew him.

In 45 years of public service, Scoop Jackson had an unblemished record in integrity. There were no grey areas—not in campaign donations or use of campaign funds, questionable votes or office accounts, not at all in his personal life. These days most Senators are supplementing their income with honoraria. He averaged $40,000 a year in speaking fees, but every penny went to a foundation he set up to help needy students. Scoop was simply incorruptible.

His self-discipline left people around him in despair. Scoop did not indulge in smoking or drinking, not even coffee. He exercised regularly, went to bed early, read constantly, watched carefully what he ate, treated everyone equally, worked hard. Few could match his stamina, even those 20 or 30 years his junior. But he did not impose those standards on others.

Another attribute was the Senator's constancy on issues. He did not change his views, and only reluctantly altered his position on an issue when compromise was necessary. You always knew where Scoop Jackson stood and there were never surprises. To Scoop, the Senate was a no-nonsense place where a person's integrity counted.

He genuinely cared about people. At times his staff despaired when their Senator became absorbed in a constituent problem, giving it as much time and effort as he would a major speech or hearing, but that was simply his nature. Scoop Jackson was a father figure for his staff and supporters, forever inquiring about their family and health. His humanness was not only personal, but corporate as evidenced by his early and strong support for programs to help the needy. But he also did not excuse or approve of recipients who were not deserving or did not try to help themselves.

On a more personal note, I had my differences with Scoop. We were at odds on issues, notably defense spending. How insignificant these things seemed last Wednesday. The man's greatness was obvious by those who were at the funeral and the eulogies spoken.

I reflected on my 20-year association with Senator Jackson and felt something of a political renewal. One could not help but learn a great deal being around Scoop. I do not think I fully valued the measure of the man when he was with us.

Now that he is gone I know how much Scoop Jackson meant to me, to our State, and Nation. He will be missed, probably more than we realize. All Washingtonians can be proud that he served us for so long and so well.●

SENATE—*Wednesday, September 14, 1983*

(Legislative day of Monday, September 12, 1983)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the Honorable TED STEVENS, Senator from the State of Alaska.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Eternal God, source of all that is, "from whom, through whom and to whom are all things," we so easily ignore sources. We enjoy the fruit while we forget the root. We take human rights seriously because our forebears believed that they were inalienable, having been endowed by God who created all men equal. Forgetting this, Lord, our sense of human and moral values erode because we deny the One from whom they came.

Help us, patient God, to understand that we confront world leaders for whom human value is meaningless, human rights nonexistent. These are not people who believe very much as we do and are simply misbehaving; these are people whose beliefs are antithetical to ours and who act totally consistent with their beliefs. Deliver us, Lord, from indifference to the roots of our behavior as well as the roots of the behavior of those who oppose us. Free us, Lord, from the naiveté that assumes these leaders think as we think and need only to be persuaded. May we be "wise as serpents and harmless as doves." (Matt. 10:16) In the name of the Prince of Peace. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The bill clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., September 14, 1983.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable TED STEVENS, a Senator from the State of Alaska, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. STEVENS thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE SENATE SCHEDULE

Mr. BAKER. Mr. President, let me repeat the schedule of the Senate for today for the benefit of Members who may be listening in their offices.

After the recognition of the two leaders under the standing order, there will be a period for the transaction of routine morning business until 10 a.m. At 10 o'clock and until 12 noon, the Senate will have a period for eulogies and tributes to our late colleague, Senator HENRY M. JACKSON.

Mr. President, at 12 noon there will be another period for the transaction of routine morning business with an extended time in which Senators may speak, that is to say, 15 minutes each, and it is anticipated that most of that time, if not all of it, will be devoted to statements on the situation in Lebanon and the War Powers Act.

Under the order previously entered, Mr. President, the Senate will turn to the consideration of the resolution on the Korean Air Lines massacre at 2 p.m. It is hoped, Mr. President, that a unanimous-consent agreement can be entered into that will provide for an orderly allocation of time and consideration of that resolution and amendments, if amendments are offered. No such agreement has been entered into at this time.

The unfinished business, Mr. President, is the Interior appropriations bill, and it is anticipated that we will return to the consideration of that measure in due course.

Mr. President, I have no further need for my time under the standing order. I offer it to the minority leader, if he has a need for it.

Mr. BYRD. Mr. President, I thank the majority leader. I would like to have his remaining time.

Mr. BAKER. Mr. President, I yield my remaining time to the control of the minority leader.

Mr. BYRD. I thank the majority leader.

Mr. President, I join with the majority leader in hoping that we can arrive at an arrangement which will preclude the offering of amendments to this resolution. I think it is important that the resolution be passed quickly. The President asked for such a resolution. There are always other vehicles to which Senators may attach whatever amendments they might wish to propose to this resolution. I hope we will not utilize this resolution as a vehicle for amendments because one amendment brings on another, and another, and another.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the minority leader is recognized.

WELCOME BACK, DR. HALVERSON

Mr. BYRD. Mr. President, I know I speak for the Senate in expressing our happiness and pleasure that the Chaplain of the Senate, Dr. Halverson, has recuperated from a recent heart attack and is back in the Senate pulpit, reassuring us and giving us inspiration and strength through his prayers.

(The PRESIDENT pro tempore assumed the chair.)

KOREAN AIR LINES ATTACK

Mr. BYRD. Mr. President, ever so often, the Soviet Union provides the world with a reminder of the treachery and lawlessness of which it is capable. Ever so often, the Soviet leadership jolts the moral sense of all mankind by proving anew that it has no use for basic human rights, international law, or common decency. And to make sure the lesson is not lost on us, it makes its point, as it has most recently, at the cost of lives of innocent men, women, and children.

The senseless and brutal destruction of the Korean airliner with the resulting loss of 269 people from 13 countries, 63 of them Americans, is our most recent reminder.

When I learned of this terrible tragedy, I called for an immediate reevaluation of our economic relationship with the Soviets. Military action is out of the question. A suspension of diplo-

matic relations can only lead to more tension. We must keep our communication lines open and we should renew our efforts to arrive at a meaningful, verifiable—and I strongly emphasize the word verifiable—mutual arms control agreement. Any interruption of the strategic arms limitation talks would not advance U.S. interests. I am not concerned about the Soviet interests. I am concerned about the U.S. interests. I do not believe there should be a suspension of those talks. Thus we are left with a range of economic responses and political responses through which we can express our contempt for this brutal act. I do not expect everybody to agree with me. My wife even does not always agree with me.

I think that we should begin by reconsidering the administration's recent decision to lift export controls on the sale of pipelaying equipment. Energy exports are by far the largest source of foreign currency earnings for the Soviet regime. The sale of equipment which strengthens the Soviet energy industry cannot be in the interests of the United States.

Likewise, I urged, and I found myself in a minority, I think, that the newly negotiated grain agreement be reviewed in light of recent events. But being in the minority does not necessarily mean that one is wrong. One can be right and still be in the minority. We should not ask the American farmer to bear the full burden of our response. I am willing to consider a total embargo on the export of American goods to the Soviet Union for a fixed period, with extended controls on key high technology equipment that the Soviets badly need.

Some have said these sanctions are ineffective. I do not see how they can say that. I do not understand how they can say these things are ineffective.

I supported the grain embargo that was initiated by President Carter.

I opposed the lifting of that embargo. Many said it was ineffective. It cost the Soviets over $1 billion and it hurt them. The late President Brezhnev stated to the world that the agricultural policies of the Soviet Union were not working, that they were behind in their agriculture and their pursuit of power, I say, only fueled the military.

But who should say that that grain embargo was not effective? Of course, we can say it did not pull anybody out of Afghanistan, but it was effective because it was hurting the Soviets.

Some say we shot ourselves in the foot. I do not think so. It would have been more effective had other countries joined with us in the embargo. If the embargo had remained on, it would have continued to be effective.

I do not like to feed the mouth that bites me. I do not think the American people want to feed the mouth that bites us. How can we insist, with our European allies, that they sacrifice, if we indicate that we are not ready to sacrifice something at the alter of the almighty dollar?

The sanctions were ineffective if by that is meant that they did not cause the Russians to pull out of Afghanistan. Such sanctions would be ineffective if we have in mind bringing back the lives of those 269 persons who were lost on the Korean airliner. So I agree, if that is the meaning of effectiveness. But no one can deny that these measures would be felt and understood by the Soviet leadership.

Such an effort should be joined in by other countries. Canada sells grain to the Soviet Union. It may be a Canadian plane which next goes off course and into the Soviet airspace. Australia supplies the Soviets with grain. It may be an Australian plane. Certain Western European countries supply the Soviets with grain. It may be a West European country next time.

The tragic murder of those 269 people is the clearest example I can imagine of a Soviet affront not just to the United States, which lost 63 persons, but to the entire world community. It demands an international response. And there has been an international response of expressed outrage.

But the Soviets do not pay any attention to public opinion. They did not blink an eye at public opinion when they built the Berlin Wall. They did not blink an eye at public opinion when they went into Afghanistan, overran that country ruthlessly, and shot down young people who had the courage to stand up in the face of Soviet rifles.

I support the President in every action that he has taken with respect to that Korean incident. I have urged that there be consideration of additional sanctions and I believe and hope that the administration is working in that direction.

The International Civil Aviation Organization is meeting in an extraordinary session tomorrow, September 15, to discuss the tragedy. I am sending a member of the Democratic Policy Committee to attend those meetings. I urge our delegation to that meeting to work with other nations to call the Soviets to account. The ICAO members should insist that under ICAO auspices, the crash site be made available to an international inspection team and that a full investigation be undertaken.

Mr. President, how much more cruel and inhumane and callous can a nation be than the Soviet Union, which has, up to this point, prevented, precluded other nations from going into those waters in an attempt to find the bodies of those who died? It seems to me that would be the least, the least, that such a society and such a government would be expected to do. I am sure the Soviets want the bodies of Soviet soldiers to be brought home from Afghanistan, the bodies of those who died.

I simply cannot understand the reasoning and the thinking of a government which will not allow other governments, especially those who have lost, who have suffered the loss of citizens, or at least an international group, to go into those waters and help search for the remains of those who died. I hope that the ICAO members will insist that that crash site be made available to an international inspection team.

Further, our delegation and those of other nations have considered opposing Soviet reelections to the ICAO Council, the organization of the executive body, for this term. This loss of influence would be an unmistakable signal from the world community.

I was encouraged by the President's remarks to the Nation on this subject. I called him immediately after his televised speech to say that I complimented him on the speech. I thought it was tough in tone. I thought that it was restrained as to the actions that would be taken. I complimented the President on that restraint. I think we must act carefully and after due deliberation; but rhetoric is not enough.

The President began by calling for a full and complete accounting of the incident and an apology from the Soviet Union. I do not expect the Soviets ever to comply with that request, but they should.

Beyond that, he urged full compensation for the families of the passengers—a reasonable, a very reasonable position to take.

Finally, he called on the Soviets to work with other nations to develop procedures that will avoid the unwarranted attacks on civilian aircraft that seem to be a part of Soviet military policy.

These are all laudable steps, and he has the support of this Senator, the full support of this Senator, in these efforts. The resolution which Senator BAKER and I have introduced is in keeping with that promise. The President has suspended talks on a minor transportation agreement. I approve of that.

But what other actions have we taken? The Soviets have proved that they have no respect for international law, except when it is in their favor. The United Nations can pass resolutions all year long and the Congress can do the same. But the Soviet Government has made a national policy out of disregarding public opinion. What does it care for the criticism we will heap on them?

I am not suggesting that these acts are futile. Our public statements and those of other concerned nations are a

minimum; but rhetoric, including my own, will not have much if any impact upon the Soviet Union. We cannot delude ourselves that such indignation will deeply move the Soviet regime.

Soviet actions time and again, as I have said, have taught us that they have a remarkable capacity for treachery. That is why any arms agreement should be verifiable, verifiable through means that do exist. By our inaction we have taught the Soviets that treachery can go unpunished. When lifting the grain embargo, we did not ask for any quid pro quo. Some may say, "Well, would you feel the same, Senator, about coal?" The answer is yes.

If we content ourselves with mere words and moral outrage, the world community runs the risk of reeinforcing that lesson. I urge the President and the leaders of all concerned countries to consider a measured response utilizing the full range of political and economic options available to them. I am not in favor of severing our diplomatic relations with the Soviet Union. I think we have to keep the pipeline of communication open. If we want the Soviets to understand us, however, we must speak with actions and not just words.

Mr. President, I ask unanimous consent that my letter to the President be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., September 9, 1983.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: This letter follows-up our telephone conversation of Monday, September 4, concerning the Soviet attack on the Korean airliner. I know you share the outrage and horror felt by all Americans. As I indicated to you, you will have my full support for the initiatives you announced in your address to the nation.

However, I am convinced that this murderous act requires an international response that goes beyond harsh statements and diplomatic censure. Once again, I encourage you to work with the leaders of the many other nations who have expressed outrage, to assure that decisive actions will support our words. I have asked that you consider the full range of economic and political responses at your disposal, and that the United States, in concert with other nations, act to send an unmistakable message to the Soviet leadership. As we discussed, I support a suspension of grain sales to the Soviet Union, and I urge that you seek the support of other producers (Australia, Canada, Western Europe) in that effort. Such an embargo should remain in effect unless and until the Soviet government meets certain minimal conditions to come to terms with its responsibility. For example, the Soviet government should be required to acknowledge that it was responsible (which it has belatedly done), to make an apology, to pay reparations to the families of those killed, and to take steps to assure that lethal force will not be used against other unarmed civilian aircraft. You have indicated that you will explore this course of action with the appropriate officials within your Administration.

As you know, the Soviet Union is dependent upon the United States and other countries for a long list of high-technology goods and machinery. I urge you to review export control practices with respect to sales of these critical items to the Soviets. In particular, I encourage you to reintroduce the export licensing controls on sales of pipelaying equipment which were lifted on August 20, as a result of your directive to the Department of Commerce. Licensing requirements with respect to computers, machine tools, chemical production and other vital technologies should be reviewed and, where appropriate, strengthened. These steps will help to assure that our actions match our strong words.

Finally, I encourage your support for measures to assure better communications and cooperation with the Soviets and other nations, such as Japan, to alert aircraft which may be in danger of straying into Soviet airspace. An appropriate system could be developed through the International Civil Aviation Organization (ICAO), and I recommend that the United States representative to the ICAO Council raise this issue at the upcoming meeting in Montreal.

I appreciate the opportunity to share my views on this important issue. I look forward to continuing consultations concerning the United States' response to this lawless act.

Sincerely,

ROBERT C. BYRD.

Mr. BYRD. Also, Mr. President, I ask unanimous consent that an article which appeared in the New York Times on Tuesday, September 13, by Carol Rae Hansen, entitled "The Risky Grain Deal," be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 13, 1983]

THE RISKY GRAIN DEAL

(By Carol Rae Hansen)

WASHINGTON.—Along with the tragic personal suffering and national affront, the downing of the Korean Air Lines 747 may offer one advantage—a chance to reconsider the consequences of the new United States-Soviet grain sales agreement.

The pact is dangerous for three reasons. It limits future United States foreign policy flexibility and contradicts President Reagan's commitment one year ago not to resume sales as long as repression continues in Poland. It makes it look as if the United States is going hat in hand to Moscow, and it grants the Soviet Union major domestic and foreign policy advantages.

This accord is the latest development in a divisive 11-year debate on the efficacy of grain sales as a means for moderating Soviet conduct. The pact is a clear victory for Agriculture Secretary John R. Block—he also engineered the lifting of the grain embargo invoked by President Jimmy Carter after the Soviet intervenion of Afghanistan—over the position voiced by Secretary of Defense Caspar W. Weinberger and former Secretary of State Alexander M. Haig Jr., who stressed the strategic, rather than commercial or political, significance of grain sales.

These flip-flops between and within Administrations undermine the use of grain sales as a foreign policy tool, anger American farmers and create supply and planning problems for European and third world allies.

How ironic that the Reagan Administration, which prides itself on a hard line toward Moscow, should bind us to Article II of the 1975 agreement, signed by President Gerald R. Ford. This provision, which extends for five years, prohibits the United States Government from exercising "any discretionary authority available to it under United States law to control exports of commodities purchased for supply to the U.S.S.R." Thus, it shackles this Administration and whoever is elected in 1984. Moreover, Congress had no say in the matter, since this is an executive agreement, not a treaty.

The Reagan Administration has every right to choose against using curtailed grain sales as a means of restraining Soviet adventurism. The President already stated last March that grain sales would not be used as a foreign policy instrument. In fact, an Agriculture Department official explains it would take "almost a state of war for the United States to curtail supplies." But why did the President tie the country's hands in a bilateral agreement? How can the United States predict that it will not need this tool in the event of another Afghanistan or Poland?
